### PART I.

#### ADMINISTRATION OF EDUCATION (SCOTLAND) ACT, 1872.

Order in Council continuing the Board of Education for Scotland for a further period of two years from the 6th August 1875 -	1
List of Parishes and Burghs in each County of Scotland having separate School Boards, with the Population as at the Census of 1871 (up to 31st March 1876) -	2
Letter to Clerks of School Boards conveying General Order for the Triennial Election of School Boards -	32
General Order regulating the Triennial Election of School Boards -	32
Circular to Returning Officer referring to certain paragraphs in the General Order of 31st January 1876 -	39
Circular to Clerks of School Boards as to appointment of Chairman and Officers -	39
Circular to Clerks of School Boards with reference to Election Expenses -	40
List of Schools recognized under Section 75 of Education Act, 1872 -	42

#### MINUTES, INSTRUCTIONS, &c.

Code (1876) -	43
Minute (23rd June 1875) fixing the Standard of Proficiency to be required under the 12th Section of the Factory Act, 1874 -	76
Circular to Inspectors as to the issue of Certificates under the foregoing Minute -	77
Minute (26th June 1875) fixing the Conditions under which Pensions may be granted to certain Teachers -	80
Minute (16th July 1875) modifying certain Conditions of the Minute of 26th June 1875, under which Pensions may be granted -	83
Circular to Managers of Schools as to Stone Throwing at Telegraph Wires -	83
Circular to Training Colleges for Females with reference to the Examination in Languages and Science at Christmas 1876 -	84
Inspectors' Districts and Head Quarters -	86
Syllabus of Subjects of Examination for Certificates at Christmas 1876 -	89
List of Papers relating to Elementary Education, presented to Parliament by the Committee of Council on Education, 1875-76 -	90

---

# THE REPORT

OF THE

COMMITTEE OF THE PRIVY COUNCIL ON EDUCATION  
IN SCOTLAND TO THE QUEEN'S MOST EXCELLENT  
MAJESTY IN COUNCIL,

For the Year 1875.

---

MAY IT PLEASE YOUR MAJESTY,

We, the Lords of the Committee of Your Majesty's Privy Council on Education in Scotland, humbly submit to Your Majesty this the Third Annual Report of our proceedings under the Education (Scotland) Act, 1872.

The object of that Act was to amend and extend the provisions of the law of Scotland on the subject of education in such manner that the means of procuring efficient education for their children may be furnished and made available to the whole people of Scotland."

This object can be attained only by securing (1) the provision of a number of suitable schools sufficient to meet the requirements of the population; (2) the regular attendance at these schools of the children for whose benefit they are provided; and (3) the efficient instruction of the scholars by (4) a body of competent teachers.

The following statistics taken from the reports of the inspectors will show what progress has been made of late years in meeting the requirements of the country under each of these four heads:—

## *Elementary Schools.*

In the year ending 31st August 1875 the inspectors visited 2,720 day schools to which annual grants were made, containing 2,946 departments under separate teachers, and furnishing accommodation, at 8 square feet of superficial area per child, for 391,538 scholars. There were on the registers the names of 402,633 children, of whom—

95,442 were under 7 years of age;  
280,622 were between 7 and 13; and  
26,569 were above 13.

Of these scholars, 344,131 were present on the day of the inspector's visit to their respective schools, while 303,536 were, on an average, in daily attendance throughout the year; 273,848 having made the requisite number of attendances were qualified to be examined, 48,404 (under 7) collectively, and 225,444

(above 7) individually, in reading, writing, and arithmetic; 178,662 were actually presented for individual examination, and 131,230 passed the prescribed test without failure in any one of the three subjects.

The inspectors also visited 170 schools which do not fulfil the conditions on which annual grants are made. In these schools 13,537 scholars were present on the day of inspection.

The night schools examined during the year were 196 in number; 10,628 scholars above twelve years of age were, on an average, in attendance each night; 9,510 scholars were qualified for examination by having made the required number of attendances during the night school session. Of these, 6,954 were actually examined, and out of every 100 scholars so examined, 95.33 passed in reading, 83.23 in writing, and 77.47 in arithmetic.

### *Training Colleges.*

The inspectors found 3,811 certificated teachers at work in the aided schools which they visited, while the seven training colleges, from which the supply of such teachers is mainly recruited, were attended in 1875 by 950 students. These students (with very few exceptions), and 162 acting teachers, were examined for certificates in December 1875; and in the following week 769 candidates for admission to the 519 vacancies declared in the training colleges were examined; of these, 614 were successful, and 534 are now in their first year of residence, along with 489 students of the second year.

The following table compiled from the reports of the inspectors on the schools visited in the course of the last four years shows the rate of progress during that period.

Years ending 31st August				
	1872.	1873.	1874.	1875.
ESTIMATED POPULATION - - -	3,399,226	3,430,923	3,462,916	3,495,214
NUMBER OF SCHOOLS (Institutions) inspected - - -	2,030	2,108	2,609	2,900

Average attendance - - -	2,143	1,221	10,840	8,810

We proceed to make some remarks in connexion with this table upon each of the four points previously referred to.

### I.—*School Supply.*

The report of the Registrar-General on the census of 1871 showed, as we explained in our report for 1873, that about 477,360 out of 561,600 children from 5 to 13 years of age, ought to be daily under instruction in our schools.

What do we learn from our returns as to the amount of accommodation already provided, or likely to be supplied, for these children, in schools aided with public grants?

i. From 1839 to 31st December 1875, grants to the amount of 139,122*l.* have been paid in aid of

building 478 new schools for - - - 78,165 scholars, and  
enlarging or improving 197 schools for 14,710 „

or for 92,875 scholars in all.

The great majority of these schools have been for some time in receipt of annual grants, and the premises have consequently been maintained in a comparative state of efficiency.

ii. The schools under inspection in 1872 provided accommodation for some 281,688 scholars. But many of these schools have, since the passing of the Act of 1872, been either discontinued by the former managers or transferred to the school boards of the districts in which they are situated.

The following table shows the classification of schools to which annual grants were made in 1875 as compared with that of 1872:—

	1872.	1875.
Public schools - - -	—	1,935
Church of Scotland - - -	1,311*	476
Free church - - -	523	151
Episcopal - - -	46	66
Roman Catholic - - -	22	92
* Including parish (now public) schools.	1,902	2,720

The accommodation in aided schools in 1875 (392,357) shows an increase of 33·42 per cent. in the last two years.

iii. In a large number of cases the school boards, under the 67th section of the Act of 1872, have sought grants from the Department in aid of the erection of new schools, or the repair and enlargement of existing schools. Up to the 31st of December 1873, when the time for applying for building grants expired, we had received 1,685 applications for aid to supply schoolroom for about 250,000 children, with 1,083 residences for teachers. Under the Code (Article 16), we must be satisfied before making a building grant that the school for which aid is sought is required in the locality, and it rests with the Board of Education in Edinburgh to determine, after considering the report of each school board, whether additional accommodation is required to complete the school supply of the district.

Education Act,  
sec. 26-35.

We, therefore, referred all the applications for building grants to the Edinburgh Board, and have the advantage of their advice in determining in each case whether any grant is required by the circumstances of the district. We have received reports from the board on the greater number of these applications, and have dealt with them. By the 1st of April 1876, 1,383 had been approved, 49 refused, and 58 withdrawn by the school boards, leaving 195 still undecided. In 949 cases grants have been announced to the amount of 335,856*l.* 1*s.* 6*d.*, and 288 grants to the amount of 79,190*l.* 1*s.* 3*d.* have been paid. All these schools, being public schools, will be placed under the charge of certificated teachers, and will be entitled, on the fulfilment of the usual conditions, to participate in the benefits of the parliamentary grant.

## II.—*School Attendance.*

The enforcement of school attendance is left in the hands of the school boards. Where the existing school supply allows them to do so, the boards are putting in force their compulsory powers vigorously, and the following table shows that their efforts have been attended with marked success :—

Years ending 31st August.	Average attendance in aided schools.	Increase on pre- vious year.	Rate of increase.
1871	203,054	—	—
1872	213,549	10,495	5·1 per cent.
1873	220,508	7,059	3·3 per cent.
1874	263,748	43,240	19·6 per cent.
1875	303,536	39,788	15· per cent.

For the *financial year* ending the 31st of March 1875, we paid grants on an average attendance of 287,249, and for 1876,

of 324,520 scholars. This shows an increase of 37,271, or 13 per cent., in the year.

The efforts of the school boards continue to be wisely and liberally furthered by the aid given (under section 69 of the Act of 1872) to poor parents, to enable them to pay for the education of their children at the schools which they prefer. The parochial boards paid, as schools fees, in the past year the sum of 5,654*l.* 17*s.* 11*d.* on behalf of 11,834 children; of whom 8,659, attended public schools; 1,872, schools connected with the Church of Scotland; 418, Free Church schools; 118, Episcopal schools; and 767, Roman Catholic schools.

### III.—*Standard of Instruction.*

The registers of schools inspected in 1875 contained, as already mentioned, the names of 402,633 scholars, of whom

95,442 were under 7 years of age;  
280,622 were between 7 and 13; and  
26,569 were above 13.

Out of 225,444 children qualified by age and attendance, 178,662 were presented to the Inspectors for individual examination, of whom 82,618 were under, and 96,044 were above 10 years of age.

We record with satisfaction an increase of 58,005 scholars on the registers, of 39,788 in average attendance, and of 24,016 individually examined; but we regret to have to advert to (1) the large number 46,782 of scholars who, though qualified by attendance for individual examination, are not presented to the inspectors; and (2) the small number (32,876) of scholars above 10 presented in the upper standards out of the total number on the register (148,761) qualified by age for examination in these standards, of whom as many as 56,820 were over 12 and 11,379 above 14 years of age.

The following table shows for each standard—

- (a.) The age at which the standard ought to be passed.
- (b.) The number of scholars of that age on the registers of aided schools.
- (c.) The number of scholars examined in the standard.
- (d.) The number above 10 years of age examined.

Standard	(a.)	(b.)	(c.)	(d.)
I. - - -	7	51,564	64,000	12,177
II. - - -	8	53,706	48,176	23,871
III. - - -	9	53,160	32,948	27,120
IV. - - -	10	50,517	19,724	19,103
V. - - -	11	41,424	9,564	9,525
VI. - - -	12	30,251	4,250	4,248

It thus appears that whereas, out of 178,662 scholars examined, as many as 96,044, being over 10 years of age, *ought* to have been presented in Standards (IV.–VI.), only 32,876 *were* so

presented, while 63,168 were presented in standards suited for children of seven, eight, and nine years of age.

It must, however, be borne in mind that the large number of older scholars who are presented in low standards is partly accounted for by the new compulsory powers which, especially in town districts, have driven many children, hitherto uncared for, into aided schools.

Our statistics for the past year further show the following results. For the purpose of comparison, the corresponding results in England are given in brackets.

Out of every 100 scholars in average attendance—

- i. 54 (55) were boys ;  
46 (45) were girls ;
- ii. 25 (36) were infants, *i.e.*, below 7 years of age ;  
39 (35) were between 7 and 10 ;  
36 (29) were above 10 ;
- iii. 16 (26) infants (below 7) had attended 250 times and upwards ; of whom  
13 (24) were presented to H.M. Inspectors ;
- iv. 74 (62) scholars, above 7, had made the requisite number of attendances ; and  
59 (53) were presented to H.M. Inspectors ; of whom  
31 (26) were above 10 years of age ; while of these only 11 (10) were presented in Standards IV.—VI.

Each scholar presented to H.M. Inspectors made, on an average, 2·66 (2·4) passes in the standard examination.

These results are not satisfactory, except in so far as they show that progress has been made in respect of the numbers in attendance, and, to a limited extent, in the presentation of the scholars.

We note that of 12,958 scholars presented, under Article 21 of the Code, in subjects beyond the standard examination, 435 were examined, and 327 passed, in three such subjects ; 6,334 were examined, and 3,863 passed, in two such subjects, and 5,863 passed in one subject. This is a considerable increase upon the numbers quoted in our last report.

The grants under this Article amounted to nearly 3,000*l.* ; and a Table (No. 13) in the Appendix shows that the subjects of examination generally selected are, English literature (7,274 scholars), physical geography (5,131), Latin (2,703), physiology (2,179), mathematics (1,177), and French (898).

No general improvement, however, is likely to be made in the standard of instruction until more attention is paid than at present to the early and regular attendance at school of children below seven, and, with this view, to the organization of special infant departments under the charge of independent female teachers. The methods of instruction for children over and under seven years of age ought to vary, and cannot be efficiently carried out in the same room, so that every school, except the very smallest, requires a separate department for its infants.

Looking to the large number of female students now in training who will be duly qualified to take charge of infant departments, we shall, ere long, have to consider whether it will not be necessary to modify the conditions on which grants for infants may be awarded unless, in cases where they reach a certain number, special provision is made for their instruction by suitable teachers.

#### IV.—*Teaching Power.*

The 2,720 elementary schools in Scotland, inspected in 1875, provided accommodation, in 2,946 departments, for 391,538 scholars. The average daily attendance in these schools amounted to 303,563, so that each department, while providing accommodation for 133 scholars, had an average attendance of only 103. Assuming that, under the operation of the Education Act, the average attendance rises to 120, and that some 480,000 children ought to be in daily attendance at aided schools, it would follow that about 4,000 separate departments under certificated teachers will be required, as the general school supply of the country.

What progress has been made of late years towards providing a sufficient supply of competent teachers for this number of schools? And from what sources is this supply to be still further recruited?

There were on the 31st of December 1869, 2,859 pupil-teachers and 2,406 certificated teachers at work in schools under inspection. These numbers by the 31st December 1875 had risen to 4,217 pupil-teachers and 3,854 certificated teachers, while the pupil-teachers in the first of the five years of their service have increased from 639 in 1869 to 940 in 1875.

An addition of 550 was made to the number of certificated teachers, as the result of the last Christmas examination, when 167 male and 244 female students of the second year, and 66 male and 73 female acting teachers, obtained places on the class list of candidates for certificates. 27 students of the first year also left the training colleges after one year's residence to take charge of elementary schools.

Certificates have been granted, without examination, to 454 male and 92 female teachers, on whose schools the Inspectors have reported favourably: while provisional certificates (which hold good till the teacher completes his or her 25th year) have been granted to 9 male and 20 female ex-pupil-teachers, qualifying them to take charge of small schools, with less than 60 children in average attendance throughout the year. The pupil-teachers who yearly complete their engagement satisfactorily, and cannot be admitted to training colleges, furnish a valuable supply of teachers for these small schools.

The accommodation provided by the training colleges under inspection in Scotland is sufficient for 1,042 students, and 1,023 are now under instruction. These colleges can, therefore, at

Scotch Code,  
Articles 59 and  
66.  
Article 60.

Training Col-  
leges.

present furnish a yearly supply of 500 teachers who have been trained for two years. This supply would be of itself sufficient to fill up the waste (calculated at 6 per cent.) in a staff of 8,300 teachers. Looking at the number of qualified candidates for certificates who are likely to enter the profession through the universities\* and other channels, recognised by the Code, we see no reason to doubt that the supply of teachers will, before long, be found sufficient fully to meet the requirements of the country. But the supply of certificated teachers is, at present, much below the demand. Many schools have been erected, at great cost, since the Act of 1872 was passed; and the promoters naturally look for public assistance to enable them to carry on the schools which they have been forced to provide. This assistance can be given only if the teachers are certificated. A sufficient supply of teachers so qualified is not forthcoming, and we have, therefore, slightly modified the Article (59) in the Code, introduced by our predecessors, by which the Scotch Education Department are empowered to grant certificates without examination to persons who, having been for some years in charge of elementary schools, are reported by the inspectors to be *efficient teachers*, and give practical proof of their aptitude for their calling by the production in their schools of a reasonable amount of those "results" which form the basis of the administration of the parliamentary grant. We trust that this article, under the careful watching of the inspectors, will give a step in their profession to many deserving teachers qualified to take charge of the numerous small schools throughout the country, where local funds, even when largely taxed, do not suffice for the payment of the salaries at present paid to the highly trained students who leave our colleges every year.

The extent to which the training colleges have contributed to the existing supply of efficient teachers in Scotland is shown by the fact that of 2,524 masters employed in schools reported on in 1874-5, 1,286, or 50·9 per cent., had been trained for two years; 336, or 13·3 per cent., for one year, and 136 or 5·4 for less than one year; while 766, or 30·4 per cent., were untrained. In like manner, of 1,287 schoolmistresses, 896, or 69·6 per cent., had been trained for two years; 139, or 10·8 per cent., for one year; 22 or 1·7 per cent. for less than one year; and 230, or 17·9 per cent., were untrained.

The system, introduced by the Code of 1873 (Article 102 b), of combining attendance at university classes with the efficient course of practical professional training provided by the colleges under our inspection, is being tried with some success. In 1875 32 students took advantage of this arrangement, some of whom passed with great credit the examination for certificates held last Christmas, taking in every college the highest place in the

---

\* At Christmas 1873, 16 graduates were examined for certificates under Articles 47 (c) and 48 of the Code; 22 were examined at Christmas 1874, and 19 at Christmas 1875. All were successful at Christmas last.

lists of successful candidates. For the current year 17 students, all in Free Church Training Colleges, are being trained under this provision of the Code.

The following tables show the number of candidates for admission to training colleges, and of students undergoing a course of professional instruction for the present and last two years :—

TABLE No. 1.

DENOMINATION.	Number of Students.								
	1874.			1875.			1876.

TABLE No. 2.

SHOWING the SOURCES from which the CANDIDATES for TRAINING, in each of the above three Years, were mainly drawn, at the previous CHRISTMAS EXAMINATIONS.

	1873.		1874.		1875.	
	Males.	Females.	Males.	Females.	Males.	Females.
Pupil-teachers of all years, at Christmas -	1,935	1,656	1,828	2,005	1,867	2,350
Pupil-teachers in their fifth year - -	257	296	272	272	259	334
Pupil-teachers examined for admission into Training Colleges - - - -	171	232	196	256	207	269
Non-pupil-teachers examined - - -	66	134	63	221	56	237
Candidates who passed the examination successfully - - - -	197	332	174	412	197	417

With the view of encouraging the study of scientific subjects Science. in training colleges, the syllabus provides that success in the examinations in science, held in May of each year by the Science and Art Department, should be taken into account in determining the students' places in the class list of candidates for certificates as teachers of public schools. This recognition of branches of study, which are every day becoming of more importance, has been attended by satisfactory results.

The total number of *male* students examined at Christmas 1875, was 345, who together worked 633 papers at the May

examinations. The success of the students at these examinations will be seen from the following table:—

Subject.	Number of Male Students examined.	Number passed.	
		Elementary Stage.	Advanced Stage.
Magnetism and electricity - - -	259	139	109
Animal physiology - - -	128	52	55
Acoustics, light and heat - - -	92	64	25
Physical geography - - -	89	1	68*
Geology - - -	65	50	—

Four out of the seven Scotch training colleges for female students sent candidates to the science examinations.

The total number of *female* students examined at Christmas 1875 was 585; the number of science papers worked in May was 484.

The results of the examination were as follows:—

Subject.	Number of Female Students examined.	Number passed.	
		Elementary Stage.	Advanced Stage.
Physical geography - - -	175	40	57
Magnetism and electricity - - -	144	126	18
Elementary Botany - - -	108	105	—
Geology - - -	57	27	—

We desire to invite special attention to a circular, printed in the Appendix to this Report, with respect to a change made in the syllabus for 1876, by which the female students in our colleges will henceforth be confined to *one* of the two optional subjects of language and science; and will not be allowed, in the examination for certificates, to receive credit for both. The propriety of this change, which has been confirmed by the highest medical authority, has, we are glad to find, been generally acknowledged by the college authorities.

A few, viz., 21 male and 25 female, candidates for admission to training, examined at Christmas 1875, also received credit for success in previous science examinations. The number who were examined in languages was much larger, viz., 188 males (of whom 75 took two languages), and 304 females. The papers worked were as follows:—

\* In addition to these, one passed in honours.

—	Latin.	Greek.	French.	German.	Total.
Males -	160	4	94	5	263
Females -	9	—	290	5	304

The number of students examined in drawing in 1875 was 943, of whom 482 passed the examination successfully. In the same year, 346 pupil-teachers passed, and 99 obtained prizes.

We publish in the Appendix:—

1. An Order of Your Majesty in Council, dated the 5th day of August 1875, by which the term of Office of the Board of Education for Scotland has, pursuant to the 3rd section of the Education (Scotland) Act, 1872, been extended for two years.

2. The Order which, under the powers vested in us by the 13th section, and schedule B., of the same Act, we issued for the regulation of the first general triennial elections of school boards, which have been held this year.

3. A Circular with respect to the expenses of these elections, which was called for by the terms in which, in his second annual report (1875), the accountant to the Board of Education for Scotland spoke of the character of certain charges which had been incurred, in 1873, on the occasion of the first election of school boards throughout the country.

4. A list of schools erected or established since the passing of the Act of 1872, not being public schools, which, in the course of the year, we have recognised as entitled to receive annual grants. Education Act, sec. 75.

### *Pensions.*

We have received 12 applications for pensions under the Minutes of 26th June 1875 and 16th July 1875, now incorporated (Article 118) into the Code. Of these cases, 10 were dealt with at Michaelmas last, and the remainder at Lady-day 1876. We have granted two pensions of 25*l.*, and six of 20*l.* We have awarded one gratuity of 20*l.*, and in the remaining three cases we regret that we were unable to consider that the applicants came within the terms of the Minute under which pensions may be granted.

(Signed) RICHMOND & GORDON.  
SANDON.

Scotch Education Department,  
the 1st day of June 1876.

## PART I. OF APPENDIX.

---

---

ORDER IN COUNCIL CONTINUING THE BOARD OF EDUCATION  
FOR SCOTLAND.

*At the Court at Osborne House, Isle of Wight, the 5th day of August  
1875.*

PRESENT,

The QUEEN's most Excellent Majesty in Council.

Whereas by an Act passed in the session of Parliament held in the 35th and 36th years of Her Majesty's reign (chapter 62), intituled "An Act to amend and extend the provisions of the law of Scotland on the subject of education," it was, amongst other things, enacted that the Board of Education established by the said Act should endure for the term of three years from and after the passing of the said Act, with power to Her Majesty, by Order in Council made before the expiration of that term, to extend the same for a further period of not more than two years :

And whereas the period for which the said Board of Education was established will expire on the 6th day of August 1875, and it is deemed expedient that that period should be extended for a further term of two years : Now, therefore, in exercise of the powers conferred upon Her Majesty by the said Act, and by and with the advice of Her Privy Council, Her Majesty is pleased to order, and it is hereby ordered, that the term for which the said Board of Education for Scotland was established by the said Act shall be and the same is hereby extended for a further period of two years from the 6th of August 1875.

C. L. PEEL.

---

(Corrected to 13 July 1876.)

LIST of PARISHES and BURGHS in each COUNTY of SCOTLAND having separate SCHOOL BOARDS, with the population as at the Census of 1871; the names and addresses of the Clerks of the Boards; the number of Members assigned to each School Board by the Board of Education (section 12-1 of the Act), and the date of the first election of each School Board.

1. The names of *burghs*, excepting those dealt with (under section 11 of the Act) as parts of the parishes in which they are situated, and of the *towns* in Schedule A. of the Education Act, are printed in small capitals.
2. The names of *parishes*, including burghs dealt with (under section 11 of the Act) as parts of the parishes in which they are situated, are printed in ordinary type.

LETTER TO CLERKS OF SCHOOL BOARDS CONVEYING GENERAL  
ORDER FOR THE TRIENNIAL ELECTION OF SCHOOL BOARDS.

Scotch Education Department, Whitehall, S.W.,  
SIR, 187 . .

I AM directed to request that your board will take the necessary steps for the ensuing triennial election in accordance with the enclosed General Order on the subject.

I have, &c.  
F. R. SANDFORD,  
Secretary.

---

GENERAL ORDER REGULATING THE TRIENNIAL ELECTION OF SCHOOL  
BOARDS.

*At the Council Chamber, Whitehall, the 31st day of January 1876.*

BY THE LORDS OF THE COMMITTEE OF THE PRIVY COUNCIL ON EDU-  
CATION IN SCOTLAND.

The Lords of the Committee of Privy Council on Education in Scotland, by virtue and in pursuance of the powers in them vested under the Education (Scotland) Act, 1872, and of every other power enabling them in this behalf, do order, and it is hereby ordered as follows :—

With respect to the triennial election of a school board :

1. Every existing school board shall remain in office until a new election shall take place.

2. The number of members of the new school board shall be the number determined in the case of the first election by the board of education ; unless such number may have been changed by any order of the Scotch Education Department, which has been communicated to the school board *one month* before the triennial election.

3. The election shall be held upon some convenient day to be fixed by the school board, provided that such day of election shall be not more than *ten* clear days before, or *twenty* clear days after, the same day of the year as that which was fixed for the first election of the school board.

4. The returning officer shall be the chairman of the school board, or failing him, some person appointed by the school board.

No candidate for election may act as returning officer.

5. The electors shall consist of all persons being of lawful age, and not subject to any legal incapacity, whose names are entered on the latest valuation roll applicable to the parish or burgh for which the board is to be elected, made up and completed not less than one month prior to the election, as owners or occupiers of lands or heritages of the annual value of not less than four pounds, situated within such parish or burgh.

6. *Fifteen* clear days at least before the day fixed for the election the returning officer shall prepare, sign, and publish such notice of the election as is herein-after prescribed.

7. The notice shall specify the number of members to be elected, with the day fixed for the election ; and shall also specify a place for the reception of the nomination papers herein-after mentioned.

The notice shall be in the form annexed to this order, *or to the like effect.*

8. After publication of the notice, but not less than *eleven* clear days before the day fixed for the election, any two electors may nominate as a candidate any person of full age, by sending to, or delivering at, the appointed place a nomination paper, subscribed by such two electors as aforesaid, and stating the Christian name and surname, with the place of abode and designation, of each subscriber, and of the candidate nominated; and the returning officer shall send forthwith notice of such nomination to each candidate.

No teacher of a public or state-aided school is eligible as member of a school board.

9. No nomination paper shall be received after 4 o'clock in the afternoon of the last day upon which such paper may be received, and no person shall be a candidate unless he has been nominated within the time and in the manner aforesaid.

The returning officer shall decide whether any nomination is valid, and his decision shall be final.

10. *Eight* clear days at least before the day fixed for the election, the names, places of abode, and designations of the several candidates nominated as aforesaid shall be published by the returning officer.

11. After delivery of a nomination paper, but not less than *six* clear days before the day fixed for the election, any candidate may be withdrawn by the delivery at the place appointed of a notice of such withdrawal, addressed to the returning officer, and signed by the candidate.

Such notice shall be delivered not later than 4 o'clock in the afternoon of the last day on which it may be received.

12. If the number of candidates, nominated and not withdrawn as aforesaid, shall equal but not exceed the number of members to be elected, such candidates shall be deemed to be elected on the day fixed for the election, and the returning officer shall on that day publish a list of the names, with the places of abode and designations, of the persons so elected, and such publication shall be conclusive evidence of the election.

13. If the number of candidates nominated and not withdrawn as aforesaid shall be less than the number to be elected, but sufficient to constitute a quorum of the school board, the returning officer shall, on the day fixed for the election, declare such candidates to be duly elected, and shall publish a list of the names, with the places of abode and designations, of the persons so elected; and they shall at their first meeting nominate and appoint as many persons to be members of the school board as shall be necessary to make up the full number of members, and shall give notice of such appointment to the Scotch Education Department, and to the Board of Education.

If the number of candidates so nominated and not withdrawn shall *not* be sufficient to constitute a quorum, the returning officer shall report to the Scotch Education Department that no election has taken place.

Three members constitute a quorum of a school board.

14. If after the time herein-before limited for the withdrawal of any candidate more persons remain as candidates than there are members to be elected, the returning officer shall *forthwith* publish the names, places of abode, and designations of the several candidates, and give notice that a poll will be taken on the day fixed for the election, between the hours specified in such notice.

15. The school board shall determine the number and situation of the polling stations, and for the purposes of this election may cause their district to be divided into polling divisions. The returning officer shall cause the boundaries of such divisions, and the number and situation of

the polling stations, to be published not less than *three* clear days before the day fixed for the election.

No public house shall be used for a polling station, or for the purposes of an election.

16. If the district of a school board is divided into polling divisions, each voter shall give his vote in the polling division in which the property in respect of which he is entitled to vote is situate, and if it is situate in more than one such division, he shall vote in any one of the divisions in which it is situate.

17. The returning officer, or some person or persons appointed by him for this purpose, shall preside at each polling station, provided that only one person shall preside at the same time.

18. The poll shall be open—

(a.) *In a burgh*, during the hours prescribed for municipal elections.

(b.) *In a parish*, during not less than *six* nor more than *eight* hours, from such hour not later than 12 o'clock noon to such hour not later than 6 p.m., as the school board may fix.

19. Subject to the provisions of this order, the poll shall be taken—

(a.) *In a burgh*, in like manner as a poll at a contested municipal election is directed by the Ballot Act, 1872, to be taken; and subject to this order the provisions of that Act shall apply to the election of a school board, with the substitution of the term "school board election" for the term "municipal election."

(b.) *In a parish*, in the manner prescribed in the schedule (A.) annexed to this order.

20. In case of an equality of votes, the returning officer shall determine the person to be elected.

21. The returning officer shall publish notice of the result of the poll and of the names, with the places of abode and designations, of the persons elected.

22. The returning officer shall in every case transmit to the Scotch Education Department and to the Board of Education a copy of the list which he publishes, showing the result of the election.

23. The returning officer shall deliver the ballot papers in a sealed cover to the clerk of the school board, to be kept among the records of the board, subject to the direction of the Scotch Education Department.

24. Notice of the election of a person to be a member of a school board shall be sent to that person by the returning officer, together with a notice to attend the first meeting of the school board, at a place and time to be prescribed before the election by the school board; and that time shall be not later than fourteen days after the date of the election.

25. The expenses incident to the election (but not including the expenses of any candidate) shall be paid by the school board out of the school fund. Provided that if any question shall arise as to such expenses such question shall be referred to the Scotch Education Department, whose decision thereon shall be final and conclusive.

26. Notices and other matters required by these regulations to be published, shall be published—

(a.) *In a burgh*, by advertisement in the local newspapers, or in such other manner as public notices are usually published.

(b.) *In a parish*, by being affixed to the doors of the parish church, and of all other places of worship, and of all public or state-aided schools within the parish.

27. When the Board of Education shall have decided that any burgh or town for which a school board has been elected, shall cease to have

a separate school board, and shall be included in the area of the parish in which it is situated, then the returning officer (failing the chairman of the school board for the parish) shall be appointed, and the time and place for the election of the general school board shall be fixed, at a joint meeting of the parish and burgh school boards.

F. R. SANDFORD,  
Secretary.

#### FORM OF NOTICE.

##### *Triennial Election of a School Board.*

School Board of

Notice is hereby given that—

1. The triennial election of a school board for this (*burgh, parish, or district*) will take place on the                      day of                      187 .

2. The number of persons to be elected as members of the school board is .

3. Every person of lawful age, and not subject to any legal incapacity, whose name is entered on the valuation roll, dated the                      day of                      187 , as owner or occupier of lands or heritages of the annual value of not less than 4*l.* is entitled to vote in the election.

4. Any two electors may nominate any person of full age as a candidate, by sending to or delivering at (*some place to be specified*) a nomination paper.

The nomination paper must be dated and subscribed by the two electors, and must contain the Christian names, surnames, places of abode, and designations of the subscribers, and of the candidate nominated.

No nomination paper will be received after 4 o'clock in the afternoon of the                      day of                      .

5. Public notice will be given of the list of candidates on or before the                      day of                      .

6. Any candidate may be withdrawn by the delivery at (*some place to be specified*), not later than 4 o'clock in the afternoon of the                      day of                      , of a notice of withdrawal signed by the candidate and addressed to the returning officer.

7. The voting will take place in each polling division, and notice of the number and situation of the polling stations will be published on or before the                      day of                      .

Each voter must vote in the division in which the property in respect of which he is rated is situate, and if it is situate in more than one division, in any one of the divisions in which it is situate.

8. The poll will be open from                      a.m. till                      p.m.

9. The voting shall be by ballot.

10. Each voter has                      votes, all or some of which he may distribute among the candidates as he sees fit.

Dated this                      day of                      187 .

Returning officer.

(*State office or address.*)

## SCHEDULE A.

*Rules and Directions for taking Votes in Parishes.*

1. *Preparations for Poll.*—The returning officer shall provide a ballot box so constructed that a ballot paper can be introduced therein, but cannot be withdrawn without the box being unlocked; a sufficient number of printed ballot papers, containing in the form annexed the names of the candidates; materials for the marking of the votes on the ballot papers, sealing wax, and a copy of the valuation roll of the parish or school district: and shall cause one compartment or more to be fitted up in the polling place, in which the voter shall be screened from observation while marking his ballot paper. Provided that in any parish situated in the counties of Argyll, Inverness, Ross and Cromarty, and Orkney and Shetland, the returning officer may use written ballot papers, in the form herein-after described.

The returning officer should make a uniform private mark on all the ballot papers issued, or adopt some other means to guard against the use of fraudulent papers.

2. *Persons entitled to attend at the Polling Place.*—The only persons entitled to be present within the polling place are the returning officer and his clerks, and the candidates, or the persons whom they shall authorize in writing under their hand to represent them.

3. *Declaration of Secrecy.*—Before the opening of the poll, the returning officer and every person authorized to be present within the polling place, or at the counting of the votes, must have made before a Justice of the Peace the following declaration of secrecy:—

I solemnly promise and declare that I will not communicate, except for some purpose authorized by law, any information as to the persons who have voted or not voted, or as to the candidates for whom any vote has been given, at the election for a school board in this parish [or school district].

The returning officer shall not permit any person who has not made the above declaration of secrecy to attend within the polling place.

4. *Commencement of Poll.*—Before the commencement of the poll, the returning officer shall show the ballot box, empty, to such persons as may be present, and then lock it up and seal it. He shall then place it near him, and keep it within his view.

5. *Mode of Voting.*—When any person comes up to vote, the returning officer shall ascertain that the person is entitled to vote; and if so, the returning officer shall deliver to the voter a ballot paper, call out his name and description as stated in the valuation roll, place against the name of the voter a mark, which will denote that the voter has received a ballot paper, but not denote the particular ballot paper which he has received.

The voter, having received his ballot paper, shall proceed at once to the compartment, and shall there either in figures or by crosses, but not in written words, secretly insert opposite the names of the candidates for whom he votes the number of votes he gives to each. He shall then fold up his ballot paper so as to conceal the figures or crosses which he has inserted, put the ballot paper, so folded, at once into the ballot box, and immediately leave the polling place.

6. *Order within the Polling Place.*—The returning officer shall make arrangements for preserving order within the polling place; and shall regulate the admission of electors, so that those voting shall not

be liable to be overlooked or otherwise put to inconvenience; and shall see that each voter retires immediately after giving his vote.

7. *Validity of Votes.*—Any ballot paper on which more votes are given than the voter is entitled to give, or on which anything is written or marked by which the voter can be identified, shall be invalid and not counted.

8. *Proceedings at close of Poll.*—Immediately after the time fixed for the close of the poll, the returning officer, in presence of the candidates or the persons authorized to represent them, shall break the seal, open the box, examine the ballot papers, and record the number of votes for each candidate. He shall then make up the whole of the ballot papers into a packet, and shall write on the outside of the packet a description of its contents, the date of the election, and the name of the school board, and shall seal up and deliver the same to the clerk of the school board, to be kept among the records of the board, subject to the direction of the Scotch Education Department.

9. *Proceedings where there is more than one Polling Place:—*

(a.) If there be more than one polling place appointed for a parish or school district, the returning officer shall appoint for each polling place a presiding officer, who shall conduct the taking of the votes in all respects in conformity with the foregoing rules.

(b.) The returning officer shall deliver to the presiding officer, along with the other necessary materials for voting, a certified list, taken from the valuation roll, of the persons entitled to vote at each polling place.

(c.) At the close of the poll, in the presence of the candidates or the persons authorized to represent them, the presiding officer shall seal with his own seal, and the seals of such candidates as desire to affix their seals, the ballot box in use at his polling place unopened but with the key attached and shall deliver the box as soon as practicable to the returning officer.

(d.) The returning officer shall make arrangements for counting the votes in the several ballot boxes in the presence of the candidates, or the persons authorized to represent them, as soon as practicable after the close of the poll, and shall give to the candidates notice of the time and place at which he will begin to count the same.

(e.) Before beginning to count the votes, the returning officer shall, in the presence of the candidates or the persons authorized to represent them, open the ballot boxes, and then mix together the whole of the ballot papers contained in the ballot boxes.

---

CIRCULAR TO RETURNING OFFICER REFERRING TO CERTAIN  
PARAGRAPHS IN THE GENERAL ORDER OF 31 JANUARY  
1876.

Scotch Education Department, Whitehall, S.W.,  
1876.

School board of  
County of

SIR,

I HAVE the honour to acknowledge the receipt of the return of members of the new school board for the above-named district.

I am to request your attention to paragraph 12 (or 13) of the general order of 31st January 1876, which fixes the day on which the members of the new school board enter upon office, and to paragraph 24 of the same order, which states the duties which have now to be performed by yourself as returning officer.

I am to request that a copy of the return may be forwarded to the clerk of the school board.

I am further to request that you will be good enough immediately to inform their Lordships, if you have not already done so, what was *the day fixed for the election* in the above-named district.

I have, &c.

F. R. SANDFORD,  
Secretary.

CIRCULAR TO CLERKS OF SCHOOL BOARDS AS TO APPOINT-  
MENT OF CHAIRMAN AND OFFICERS.

Scotch Education Department, Whitehall, S.W.,  
1876.

School board  
County of

SIR,

MY Lords have received the return of members of the new school board for the above-named district, whose term of office is to be considered as beginning on the day fixed for the election (see paragraph 12 of the general order of 31st January 1876).

I am to request you to bring under the notice of the new school board, at their first meeting summoned pursuant to paragraph 24 of the said general order, the following matters which will require their early attention.

1. "Every school board shall at their first meeting after their election appoint one of their number to be chairman during the school board's tenure of office; and should the chairman be absent from any meeting of the school board, the members present shall appoint one of themselves to be chairman of the meeting \* \* \* ; and at every meeting the chairman shall have a deliberative, and also in cases of equality, a casting vote; and three members of school board shall be a quorum." Education (Scotland) Act, 1872, sec. 21.

I am to request you to intimate to this Department the name of the person so appointed to be chairman.

2. With regard to the clerk and other officers of the school board, I am to state that my Lords are advised that these officers

are to be considered as in the service of the board in its corporate capacity, so that unless the new school board should come to a resolution determining their tenure of office, such tenure of office does not expire with the existence of the previous board.

Should any change take place in the office of clerk, I am to request that the name and designation of the person appointed to the office may be notified to this Department without delay.

I have, &c.

F. R. SANDFORD,  
Secretary.

# CIRCULAR TO CLERKS OF SCHOOL BOARDS WITH REFERENCE TO ELECTION EXPENSES.

SIR,

Scotch Education Department, 3rd March 1876.

IN connexion with the forthcoming elections of school boards, certain duties fall to be discharged by the returning officer, under their Lordships' General Order of 31st January, 1876.

My Lords have already had addressed to them several inquiries relating to legal points arising in connexion with these duties.

Where such questions appeared to their Lordships to belong to the legal interpretation of the Act, they have refrained from expressing an opinion thereon, and have referred the correspondents to legal advice.

But the question may further arise how far expenses incurred in procuring such advice can be reckoned to be "expense incident to the election" under paragraph 25 of the general order. As this question may ultimately be referred for their Lordships' final decision, it may be well to state beforehand the view which will guide their action in the matter.

In order to prevent an undue and necessary burden being laid on the ratepayers, their Lordships must hold the returning officer personally responsible for all such expenses; and it will therefore be advisable, in case he should find himself in doubt as to any legal question, that he should obtain the sanction of the existing school board, preliminary to incurring expense in procuring a legal opinion thereon. Should such sanction not have been previously obtained, their Lordships will disallow the expenditure, unless it is proved to their satisfaction that the doubt felt by the returning officer was reasonable, and that no course was open to him other than to take legal advice thereon.

It will be advisable also that the returning officer, so far as possible, should, for the purposes of the election, avail himself of the premises (other than school premises) at the disposal of the school board, and of the services of the school board officials.

Their Lordships trust that every effort will be used to keep down the expenses of elections; and they will disallow, in case the question should come to their decision, any expense incurred through a failure on the part of the returning officer to avail himself of the machinery at the disposal of the board.

It will be expedient that the attention of the returning officers be directed to the following specific points, which will be kept in view by their Lordships in deciding any disputes as to expenses which may be referred to them.

1. It is not necessary that the notices required by the general order regulating the election should, *in the case of a parish*, be published in any newspaper, and any expense incurred in doing so in such a case will be disallowed.

2. In making out a bill of charges the returning officer must set forth, *first*, the sum total charged for personal trouble which may be regarded as his fee, and *secondly*, the various items charged in respect of sums actually disbursed, or to be disbursed by him.

*As to the first.*—If the election is uncontested the fee or sum charged for personal trouble must not exceed 3*l.* 3*s.* 0*d.*

*It will be observed that in this communication, the charge fixed is a maximum. It must therefore depend upon circumstances whether this maximum should be charged in each case.*

If the election be contested, and there is only one polling station the fee must not exceed 6*l.* 6*s.* 0*d.*, and my Lords consider that if there is more than one polling station the maximum sum to be charged should not exceed 3*l.* 3*s.* 0*d.* for each polling station *after the first*.

*As to the second.*—The number of polling stations should not, except in very large districts, exceed one for every 1,000 persons entitled to vote as shown by the valuation roll.

There must be only one presiding officer at a fee not exceeding 2*l.* 2*s.* 0*d.* for each polling station, and not more than two clerks at a fee not exceeding 1*l.* for the first, and 15*s.* for the other. One of the clerks may also be appointed as a deputy to act for the presiding officer in case of emergency. No money for refreshments may be paid to the returning or presiding officer or to any of the persons employed.

The counting of the votes need not take place the same evening if it cannot be completed before 9 o'clock.

If the counting cannot be completed the same evening a sum not exceeding 1*l.* may be allowed to any presiding officer employed on the following day, and 15*s.* to each of the clerks.

If the valuation roll requires to be *copied and arranged alphabetically* the returning officer will be allowed to charge at the rate of one half-penny for each name.

—Unless the leave of the Scotch Education Department has been *specially obtained*, no expenses for making an alphabetical list of the valuation roll will be allowed in any case in which there has been no poll. It is considered that the six clear days allowed by the order for election give sufficient time to enable the returning officer to prepare such list.

With respect to ballot boxes and other fittings, my Lords think that in burghs those provided for municipal elections should be used for the school board elections, free of charge.

As to parishes, if ballot boxes and fittings have been provided for a school board election in a parish, an arrangement should if possible be made by which the same ballot boxes and fittings should be used in a school board election in any neighbouring parish.

The ballot boxes and other fittings of course belong to the school board of the parish which paid for them, but each parish which uses them would no doubt be willing to pay a certain sum for the privilege.

I have, &c.

F. R. SANDFORD,  
Secretary.

LIST OF SCHOOLS RECOGNIZED UNDER SECTION 75 OF EDUCATION ACT, 1872, SINCE PUBLICATION OF LAST REPORT AND UP TO 31ST DECEMBER 1875.

## 1.

County.	Name of School.
Banff -	Charlestown of Aberlour Girls Mixed Episcopal.
Dumfries -	Eaglesfield General Assembly (Enlargement).
Forfar -	Dundee, Malcolm's Works.
Lanark -	Glasgow, St. Aloysius, Milton Street R. C.
Renfrew -	Glasgow, Park Grove, Sussex St.

In these cases the schools have been recognized by the School Board of the district, as part of the available school supply.

## 2.

Kirkcudbright -	Kirkcudbright R. C.
Lanark -	Carluke R. C.
Renfrew -	Glasgow, Kinning Park, Our Lady and St. Margaret's R. C.

In these cases grants have been promised on the ground that (1.) There is in the vicinity of the school a population of the denomination which it is intended to serve sufficient to maintain a separate school; while (2.) No special provision is made by the school board of the district for the religious instruction of the children whose parents are members of that denomination.

## 3.

Inverness -	Whitebridge R. C.
-------------	-------------------

Recognized because there had been a school belonging to the Roman Catholic denomination in the district (though not in the same premises) before the passing of the Act.

## MINUTES AND INSTRUCTIONS.

CODE (1876) OF THE SCOTCH EDUCATION  
DEPARTMENT.

## PRELIMINARY CHAPTER.

1. A sum of money is annually granted by Parliament "For public Education in Scotland."
2. This grant is administered by the Scotch Education Department,\* herein-after called the Department.
3. The object of the grant is to aid local exertion, under certain conditions, to maintain—
  - (a.) Schools for children (Article 6); and
  - (b.) Training colleges for teachers (Article 83).
4. Aid to maintain schools is given by annual grants conditional upon the attendance and proficiency of the scholars, the qualifications of the teachers, and the state of the schools.
5. These grants are made,—
  - a. "To any school board for and in respect of the public schools under their management."
  - b. "To the managers of any school which is, in the opinion of the Department, efficiently contributing to the secular education of the parish or burgh in which it is situated." (Education Act (Scotland), 1872, sec. 67 (2).)
6. In every school, or department of a school, in respect of which grants are made, the following regulations must be strictly observed:—
  - a. "The school shall be open to children of all denominations, and any child may be withdrawn by his parents from any instruction in religious subjects and from any religious observance in any such school; and no child shall in any such school be placed at any disadvantage with respect to the secular instruction given therein by reason of the denomination to which such child or his parents belong, or by reason of his being withdrawn from any instruction in religious subjects."
  - b. "The time or times during which any religious observance is practised or instruction in religious subjects is given at any meeting of the school for elementary instruction shall be either at the beginning or at the end, or at the beginning and at the end of such meeting, and shall be specified in a table approved of by the Scotch Education Department." (Education Act, sec. 68.) This time table is to be submitted to the inspector for approval, on behalf of the Department, at the time of his annual visit (Article 11).
  - c. The education given must consist chiefly of elementary instruction (Article 28).
  - d. The ordinary payments in respect of the instruction, from each child, must not exceed ninepence a week.

---

\* "The term 'Scotch Education Department' shall mean The Lords of any Committee of the Privy Council appointed by Her Majesty on Education in Scotland" (Education, Scotland, Act, 1872, s. 1).

7. No grant is made for or in respect of—

*a.* Instruction in religious subjects (Education Act, sec. 67 (*a.*)).

*b.* A school established after the passing of the Education (Scotland) Act (6 August 1872), unless the Department shall after due inquiry be satisfied that no sufficient provision exists for the children for whom the school is intended, regard being had to the religious belief of their parents, or that it is otherwise specially required in the locality where it is situated (*ibid*, sec. 67 (*b.*)).

*c.* Higher class public schools (*ibid*, sec. 62–64).

8. Officers are employed to verify the fulfilment of the conditions on which grants are made, to collect information, and to report the results to the Department.

9. These officers are inspectors appointed by Her Majesty, on the recommendation of the Department, and persons employed by the Department, as occasion requires, in the capacity of acting inspectors, inspector's assistants, or auditors of accounts.

10. No grant is paid except on a report from an inspector, showing that the conditions of the grant have been fulfilled. The inspector may delegate to an assistant the duty of examining into the attendance and proficiency of the scholars.

11. The Department, at the time of agreeing to place a school on the list of those to which grants may be made, informs the managers in what month to look for the inspector's annual visit. This month remains the same from year to year, unless the Department informs the managers of a change. Notice of the day of the inspector's annual visit is given beforehand to the managers.

12. An inspector may visit any public school, or other school subject to inspection, at any other time without notice.

13. Grants are issued to each school only once per annum. The year for this purpose is reckoned as ending with the last day (inclusive) of the month preceding that fixed for the inspector's annual visit.

14. No school is placed on the list for inspection (Article 11) till an application has been addressed to the Secretary, Scotch Education Department, Whitehall, London, S.W.

Full instructions are thereupon issued according to the particulars of the case.

15. *a.* The managers of a school must appoint a correspondent with the Department, and must give notice of any change of correspondent.

*b.* Teachers cannot act as managers of, or correspondents for, the schools in which they are employed, nor can they be recognised by the Department as clerks, or treasurers, of school boards, unless very special grounds can be shown for their holding such appointments.

*c.* The term managers includes,—

(1.) The School Board of any burgh or parish.

(2.) The managers of a public school appointed by a School Board under section 22 of the Education Act.

(3.) The managers of any school to which grants are made pursuant to Article 5 *b.*

## BUILDING GRANTS.

16. It is provided by section 67 of the "Education (Scotland) Act, 1872," that—

"No parliamentary grant shall be made in aid of building, enlarging, improving, or fitting up any school, except in pursuance of a written application from a School Board, containing the information required by the Scotch Education Department for enabling them to decide thereon, and sent to the said Department on or before the 31st day of December 1873, but without prejudice to applications made prior to the passing of this Act (6th August 1872), being dealt with according to the existing laws; and with respect to any *parish* situated in the counties of Inverness, Argyll, Ross, and Orkney and Shetland, where a school rate of not less than ninepence in the pound on the rateable value of such parish has been levied, such grant as aforesaid may be made of an amount not exceeding 300*l.* for each school and 100*l.* for each teacher's residence, without regard to the amount contributed by the school board out of the school fund or otherwise, or by local subscription, towards the building, enlarging, improving, or fitting up such school or residence."

(1.) Subject to these conditions, aid will be granted to school boards to build public schools (Article 6) if the Department is satisfied—

*a.* That such a school is required in the locality.

*b.* That the buildings, at the time of application, have not been begun nor contracted for, and that no trust deed has been executed.

(2.) The grants made by the Department for building, enlarging, improving, or fitting up schools, shall not exceed *any one* of the following limits, viz. :—

*1st Limit.*—The total amount contributed in the form of—

*a.* Payments by the school board ;

*b.* Local subscriptions, or collections ;

*c.* Materials, at the price allowed for them by the contractor, or at which sold off ;

*d.* Sites given without valuable consideration (the value to be certified by two professional surveyors) ;

*e.* Cartage (the value to be certified by the surveyor of roads for the district).

*2nd Limit.*—2*s.* 6*d.* per square foot of internal area in new school-rooms and class-rooms.

*3rd Limit.*—65*l.* for each teacher's house.

(3.) If the School Board of any *parish* in the counties of Inverness, Argyll, Ross, and Orkney and Shetland, where a school rate of not less than ninepence in the pound on the rateable value of such parish has been levied, propose to erect a new school which shall cost more than 300*l.*, or a teacher's residence which shall cost more than 100*l.*, then, and in each such case, in addition to the sums specified in the first paragraph of this Article, a grant may be made of an amount not exceeding one half of the cost of such buildings in excess of these sums.

(4.) The site, plans, estimates, specifications, title, and trust deed must, in every case, be previously approved by the Department.

(5.) Grants are not made for rooms under places of worship ; nor for improving or fitting up schools which have already received the maximum grant allowable under the Articles of the Code in force at the time when such previous grant was made.

(6.) The extension of the area of existing school-rooms to receive more scholars, and the erection, or improvement of teachers' houses are treated *pro tanto* as new cases under Article 16 (2.).

(7.) No application can be entertained if the approved estimate falls below 20*l.* in small rural schools, or 50*l.* in other schools.

*The Site.*

(8.) The site must be—

*a. In extent,*

Not less than 1,200 square yards.

*b. In situation,*

1. Healthy, and not noisy.

2. Within convenient distance from the homes of the scholars.

*c. In tenure,*

Fee simple (Acts 4 & 5 Vict. c. 38., and 12 & 13 Vict. c. 49.).

(1.) Without incumbrance, or rights reserved over the surface.

(2.) Any power granted or reserved to lease or sell the site, or to terminate the lease and resume possession, shall be so conceived and expressed that it shall not be lawful to exercise the same without the written consent of the Secretary of State for the Home Department, and the possession of the site shall not be resumed without first repaying any grant which may have been paid in respect of the premises.

(3.) Leaseholds are not admissible, if fee simple can be granted. The term must not be less than 99 years, and there must be no onerous covenants, nor more than nominal rent.

*The Trust Deed.*

(9.) The trust deed must declare the premises to be granted to a school board in trust for a public school.

(10.) When the trust deed has been executed according to a draft approved and sealed by the Department, and (when necessary) enrolled or registered, a copy of it, including all signatures, attestations, and endorsements, must be made on plain unstamped parchment, and lodged in the Office of the Department.

*The Plans.*

(11.) The plans (with specification and estimate), when approved and sealed, are returned to the school board, but must be lodged in the Office of the Department before a grant is paid.

*Payment of Grants for Building, Enlarging, Improving, or Fitting up Public Schools.*

(12.) The amount of the grant is not announced until after the draft trust deed and plans have been sealed.

(13.) The grant must be accepted or declined within 14 days.

(14.) The grant is paid on presentation of a certificate (with balance sheet annexed), by the school board, setting forth that the building and conveyance are completed, and that the money in hand will, when added to the grant, meet all claims, and close the account.

(15.) Grants under 50*l.* are treated as lapsed, if unpaid at the end of nine months, and grants above 50*l.* at the end of eighteen months, from the date of announcing them. If the grant exceeds 100*l.*, the date of claiming payment may be deferred, if satisfactory reasons are previously shown to the Department for delay in presenting the certificate (section 14).

CHAPTER II.  
ANNUAL GRANTS.

PART I.  
SCHOOLS FOR CHILDREN.  
SECTION I.

*Preliminary Conditions.*

17. Before any grant is made to a school (Article 4) the Department must be satisfied that—

- (a.) The school is conducted in accordance with the terms of Article 6; and no child is refused admission on other than reasonable grounds.
- (b.) The school is not carried on with a view to private emolument (Article 5 b).
- (c.) The premises are healthy, well lighted, cleaned, warmed, drained, and ventilated, properly furnished, supplied with suitable offices, and contain in the principal school-room and class-rooms at least 80 cubical feet of internal space, and 8 square feet of area, for each child in average attendance.
- (d.) The principal teacher is certificated (Article 43), and is not allowed to undertake duties, not connected with the school, which occupy any part whatever of the school hours, or of the time appointed for the special instruction of pupil-teachers (Schedule II. 4).

*Exception :—*

- (A.) The teachers of evening schools need not be certificated if they are,—
  - (1.) Pupil-teachers who satisfy the conditions of Article 60; or,
  - (2.) Upwards of 18 years of age (Article 42), approved by the inspector, and employed in an evening school connected with a day school, in receipt of annual grants.
- (e.) Notice is immediately given to the Department of any changes in the school staff (Article 39) which occur in the course of the year. The *first* grant to a school is computed from the date at which (1) the appointment of a certificated teacher is notified to, and approved by, the Department; or (2) the acting teacher passes the examination for a certificate (Article 44).
- (f.) The girls are taught plain needlework\* and cutting out as part of the ordinary course of instruction.
- (g.) All returns called for by the Department are duly made; the admission and daily attendance of the scholars carefully registered by, or under the supervision of, the teacher (Article 67); accounts of income and expenditure accurately kept by the managers, and duly audited; and all statistical returns and certificates of character (Articles 67, 77, and 80) may be accepted as trustworthy.
- (h.) Three persons have designated one of their number to sign the receipt for the grant.

*Exception :—*

The treasurer of a school board signs the receipt for grants to schools under the management of the board.

18. The grant may be withheld, if, on the inspector's report, there appears to be any serious *primâ facie* objection. A second inspection, by another inspector is made in every such instance, and if the grant be finally withheld, a special minute of the case is made and recorded.

---

\* This includes darning, mending, marking, and knitting; but no fancy work of any kind may be done in school hours.

*Grants to Day Schools.*

19. The managers of a school which has met not less than 400\* times, in the morning and afternoon, in the course of a year, as defined by Article 13, may claim at the end of such year—

A. The following sums per scholar, according to the average number in attendance throughout the year (Article 26).

(1.) 4s.

(2.) 1s. if singing forms a part of the ordinary course of instruction.

(3.) 1s. 6d., if the inspector reports that the organisation and discipline are *excellent*; or, 1s. if he reports that they are *good*.

The inspector will bear in mind, in reporting on the organisation and discipline, the results of any visits without notice (Article 12) made in the course of the school year; and will not interfere with any method of organisation adopted in a Training College under inspection if it is satisfactorily carried out in the school. To meet the requirements respecting discipline, the managers and teachers will be inspected to satisfy the inspector that all reasonable care is taken, in the ordinary management of the school, to bring up the children in habits of punctuality, of good manners and language, of cleanliness and neatness, and also to impress upon the children the importance of cheerful obedience to duty, of consideration and respect for others, and of honour and truthfulness in word and act.

B. For every scholar, present on the day of examination (Article 11), who has attended (Article 23 not less than 250\* morning or afternoon meetings of the school:—

1. If above four, and under seven, years of age at the end of the year (Article 13),—

(a.) 8s. if the infants are taught as *a class* of a school suitably to their age, and so as not to interfere with the instruction of the older children; or

(b.) 10s. if the infants are taught as a separate department by a certificated teacher of their own, in a room properly constructed and furnished for their instruction.

2. If more than seven years of age, subject to examination, Articles 28, 29—

(a.) 3s. for each pass in reading, writing, or arithmetic; or

(b.) 4s. for each such pass in an infant school† or department (Article 19 B. 1. b.).

3. After 31 March 1878 no grant will be paid for any scholar who passes in only *one* of these three subjects (Article 29b.).

4. The results of the examination of each scholar will be communicated to the managers.

---

\* *Exceptions:—*

i. If a school is employed for the purpose of taking the poll at a *Parliamentary election*, under section 6 of the Ballot Act, 1872, the number of meetings during which the managers are deprived of the use of the school, *solely* in consequence of its being so employed, may, *if necessary*, be counted in making up,—

1. The 400 meetings of the school; or,

2. The 250 attendances of any scholar who was under instruction in the school the week before it was occupied for election purposes.

ii. If a school claiming annual grants for the first time has not been open for the whole year (Article 13); or, if a school has been closed during the year, under medical authority, on account of a local epidemic, a proportionate reduction is made for the number of meetings (400) and attendances (250) required by this Article.

† See Supplementary Rules 8 and 9 (Fifth Schedule).

5. No scholar who has made the prescribed number of attendances may (without a reasonable excuse for absence on the day of the inspector's visit) be withheld from examination.

C. The following sums per scholar according to the average number of children, above 7 years of age, in attendance throughout the year (Article 26),—

1. 2*s.* if the scholars present on the day of examination, *in the classes* from which children are examined in Standards II. and III. show an intelligent and grammatical knowledge of the passages read.
2. 2*s.* if *the classes* from which children are examined in Standards IV.—VI., or in specific subjects (Article 21*b*), pass creditably in history and geography. *This grant will not be paid unless 10\* per cent. of the scholars examined under Article 19 B. 2 are presented in Standard IV. and upwards.*
3. The extent of the examination is indicated by the passages printed in italics in Article 28. In districts where Gaelic is spoken the intelligence of the children examined under this paragraph, in Standards II. and III. may be tested by requiring them to explain in Gaelic the meaning of the passage read.
4. No scholar who has made the prescribed number of attendances, or has, at the date of inspection, been for three months on the register, may (without reasonable excuse for absence on the day of the inspector's yearly visit) be withheld from examination under this paragraph (C.) ; and one half of the children so examined must pass creditably.
5. The mode of examination (whether oral or on paper)<sup>†</sup> is left to the discretion of the inspector.

D. The sum of 10*l.* (or 15*l.*), subject to a favourable report from the inspector, if the population within two miles, by road, of the school is less than 300 (or 200) souls, and there is no other public or State-aided school, with sufficient accommodation for such population, within three miles of the school.

(a.) This article implies the provision of a school-room which can be approved by the inspector, and the grant offered by it will not be made if the average attendances is less than 15. The most suitable teacher for such a school is one qualified under Article 60.

(b.) In thinly peopled districts where the number of scholars that can be brought together at one centre is less than 15, children living more than four miles from any aided school, or separated from it by the sea, may be instructed at their own homes, or elsewhere, by a teacher qualified under Article 60, and working under the supervision of the certificated teacher of a school to which grants are made. If these scholars, having been so instructed on 60 days in the year, are presented to the inspector on the day of his annual visit to the central school, the managers of such school may claim a double grant on their account under Article 19, B. 2.

\* This proportion will be raised in 1878 (1 April) to 15, in 1879 to 20, in 1880 to 25, and in 1881 to 30, per cent.

† Examination on paper will, as a rule, be confined to scholars in Standard VI.

- (c.) When the number of scholars so instructed by one such teacher, and presented to the inspector, reaches 15, the managers may claim a grant of 10*l.* in addition to the amount earned by examination.
- E. The sum of 40*s.* (or 60*s.*) in respect of each pupil-teacher required by Article 32 (c.), who satisfies fairly (or well) the conditions of Article 70 (e.).
20. 150 attendances (Article 23) qualify for examination—
- (a.) Scholars under any half-time Act.
  - (b.) Scholars above 10 certified by the managers to be beneficially employed at work when not at school.
  - (c.) Scholars residing two miles or upwards from the school.
21. If the time table of the school, in use throughout the year, has provided for one or more specific subjects of secular instruction according to the table in Schedule IV.—
- a. A grant of 4*s.* per subject may be made for every day scholar, presented in Standards IV.–VI. (Article 28) who passes a satisfactory examination in not more than *two* of such subjects.
  - b. Any scholar who has previously passed in Standard VI. may be presented for examination in any *three* of such specific subjects.
  - c. No payment will be made under this Article if less than 75 per cent. of the passes attainable in the Standard Examination by the scholars presented for examination (Article 28) has been obtained.
  - d. No grant may be claimed under this Article on account of any scholar who has been examined, in the same subject, within the preceding year, by the Department of Science and Art.\*
  - e. *After the 31st of March 1877*, every girl presented under this Article must take domestic economy (Schedule IV., column 14) as a subject of examination.

*Grants to Evening Schools (Articles 106–112).*

22. The managers of a school which has met not less than 45 times in the evening, in the course of a year, as defined by Article 107, may claim (Articles 108 and 109),—

- (a.) The sum of 4*s.* per scholar, according to the average number in attendance throughout the year (Article 26).
- (b.) For every scholar who has, in the year, been under instruction in secular subjects for not less than 40 hours during evening meetings of the school, 7*s.* 6*d.*, subject to examination (Article 28), viz., 2*s.* 6*d.* for passing in reading, 2*s.* 6*d.* for passing in writing, and 2*s.* 6*d.* for passing in arithmetic.

*Calculation of Attendance.*

23. Attendance at a morning or afternoon meeting may not be reckoned for any scholar who has been under instruction in secular subjects less than two hours,† if above, or one hour and a half‡ if under, seven years of age; nor attendance at an evening meeting for any scholar who has been under similar instruction less than one hour.

---

\* See *Science Directory* (September 1875), *Section LI.* “No pupil in an elementary school, receiving aid from the Education Department, Whitehall, may be presented for examination by the Science and Art Department in any subject of science who has not passed Standard VI. of the Scotch Code: nor who has been examined within the preceding six months in the same subject by Her Majesty’s Inspectors.”

† This may include an interval of 15 minutes for recreation during a meeting of 3 hours, or of 5 to 10 minutes in a shorter meeting.

‡ Not including any time allowed for recreation.

24. Attendance of boys at military drill, under a competent instructor, or of girls at lessons in practical cookery, approved by the inspector, for not more than two hours a week, and 40 hours in the year, may, in a day school, be counted as school attendance.

25. Attendances may not be reckoned for any scholar in a day school under 3 or above 18, or, in an evening school, under 12 or above 21, years of age.

26. The average number in attendance for any period is found by adding together the attendances of all the scholars for the same period, and dividing the sum by the number of times the school has met within the same period; the quotient is the average number in attendance.

27. In calculating the average number in attendance, the attendances of half-time scholars reckon for no more than those of other scholars.

### *Standards of Examination.*

28.	Standard I.	Standard II.	Standard III.	Standard IV.	Standard V.	Standard VI.
Reading.*	Easy book not confined to words of one syllable.	Reading, with comprehension, easy narrative. <i>The scholar to point out the nouns in the passage read.</i>	Improved reading of plain narrative. <i>The scholar to show comprehension of the meaning of the sentences read, and to point out the nouns, adjectives, and verbs.</i>	Reading intelligently a passage from some history book in use in the school, with parts of speech and explanation of sentences.	Reading with expression a short passage of prose or of poetry with explanation, grammar, and elementary analysis of simple sentences.	Reading, with improved expression, explanation, and grammatical analysis, of passages selected by the Inspector.
Writing.	A line from the same book, copied in large or half-text, on slates or in copybooks, at option of managers.	(a) A short sentence from the same book, dictated slowly word by word. (b) Writing large or half-text; copybooks to be submitted.	(a) Five lines from the same book, dictated slowly by a few words at a time. (b) Fair small-hand, with capital letters, and figures, to be shown in copybooks.	(a) Eight lines dictated slowly from the same book. (b) Improved small-hand, to be shown in copybooks.	Writing from memory the substance of a short story or narrative read out twice by the Inspector; spelling, grammar, and handwriting to be considered.	A short letter on a subject to be prescribed by the Inspector. The form of composition, spelling, grammar and handwriting to be considered.
Arithmetic.	Notation and numeration up to 1,000. Simple addition and subtraction of numbers of not more than three figures. In addition, not more than five lines to be given.	Notation and numeration up to 10,000. The Multiplication Table to 5 times 12. Simple addition and subtraction of numbers of not more than ten figures. In addition, not more than eight lines to be given.	Notation and numeration up to 1,000,000. Four simple rules. Money and timetables.	Compound rules (money and common weights and measures).† Aliquot parts of a pound sterling.	Practice, bills of parcels, and simple proportion.	Proportion, vulgar, and decimal fractions.
History and Geography.				<i>Outlines of the History of Scotland, from Robert the Bruce to the Union of the Crowns. General outline of the Geography of Scotland.</i>	<i>Outlines of the History of Great Britain from the Union of the Crowns to the death of George III. Geography of Scotland, with special knowledge of the county in which the school is situated, and map drawing of it.</i>	<i>More detailed knowledge of the history in Standard V., with special knowledge of any historical events connected with the district in which the school is situated. Geography of Great Britain. Continental divisions of the world, and outline of map.</i>

N.B.—As to the words printed in italics, see Article 19. C. 3.

\* Reading will be tested in the ordinary class books, if approved by the Inspector; but these books must be of reasonable length and difficulty, and unmarked. If they are not so, books brought by the Inspector will be used. Every class ought to have two or three sets of reading books. The class examination (Article 19. C. 1, 2) will be conducted so as to show the intelligence and not the mere memory of the scholars.

† The 'weights and measures' taught in schools should be only such as are really useful; such as Avoirdupois Weight, Long Measure, Liquid Measure, Time Table, Square and Cubical Measures, and any measure which is connected with the industrial occupations of the district.

29. Scholars may not be presented a second time for examination—  
 (a.) under a lower Standard ; or,  
 (b.) under the same Standard, unless they fail to pass in more than one subject in that Standard (Article 19 B. 3).

30. } *Suspended Articles.*  
 31. }

*Reduction of Grant.*

32. The amount which may be claimed by the managers under Articles 19 and 22 is reduced,—

(a.) By its excess above,—

- |  |                                      |
|--|--------------------------------------|
| 1. The income of the school from fees, rates, and subscriptions ; and— | } in the year defined by Article 13. |
| 2. One-half* the expenditure on the annual maintenance† of the school. |                                      |

*Exception.*

In any *parish* (not burgh) in the counties of Inverness, Argyll, Ross, and Orkney and Shetland, “where a School rate “ of not less than 3*d.* in the pound, on the rateable value of “ the parish has been levied,” (Education Act, sec. 67.) this Article will not be enforced.

- (b.) By not less than one-tenth nor more than one-half in the whole upon the inspector's report, for faults of instruction, discipline, or registration, on the part of the teacher, or (after six months' notice) for failure on the part of the managers to remedy any defect in the premises which seriously interferes with the efficiency of the school, or to provide proper furniture, books, maps, and other apparatus of elementary instruction. If the inspector at a visit without notice (Article 12), not less than six months after intimation has been given of the requirements of the Department, reports that they have not been carried into effect, a deduction may be made from the next grant to the school.

(c.)—

1. If a staff of pupil-teachers (Article 70) is not provided, at the rate of one for every 40 (or fraction of 40) scholars in average attendance, after the first 60,—

A deduction, at the rate of 1*l.* for the year will be made on account of each of the first 20 scholars out of every 40 for whom a pupil-teacher is required but not provided.†

2. A certificated (Article 43) assistant teacher, or an assistant fulfilling the conditions of Article 79, is equivalent to two pupil-teachers.  
 3. In mixed and girls' schools a woman (not less than 18 years of age) if employed throughout the day in the general instruction of the scholars, and in teaching sewing, is, if

\* This reduction is not made in the case of the *first* grant paid to a school.

† This may include part of the salary of an organizing teacher, or of a teacher of drill, cooking, or any other special subject (Article 21), employed by the managers of several schools ; but not expenditure on such items as school treats, clothing, money prizes, or any outlay on the premises beyond the cost of ordinary repairs.

‡ According to this rule,—

- (1.) No pupil-teacher is required for the first 60 scholars.
- (2.) One pupil-teacher is required for any number of scholars between 6, and 100, inclusive.
- (3.) Two pupil-teachers are required for 101 to 140 scholars, and so on.

approved by the inspector, accepted as equivalent to a pupil-teacher.

- d. By one twelfth for each month of interval between the employment of two certificated teachers (Article 17 d.). This reduction is not made if the interval does not exceed *three* months, during which the school has been in charge of an uncertificated teacher.

33. If the excess of scholars has arisen from increased attendance since the last settlement of the school staff (Article 39), the amount claimed by the managers is not reduced under Article 32 (c).

### *School Diary or Log-Book.*

34. In every school receiving annual grants, the managers must provide out of the school funds, besides the Code for the year, and registers of attendance (Article 17h),—

(a.) A diary or log-book.

(b.) A portfolio to contain official letters, which should be numbered in the order of their receipt.

35. The diary or log-book must be stoutly bound and contain not less than 300 ruled pages.

36. The principal teacher must make at least once a week in the log-book an entry which will specify ordinary progress, visits of managers, and other facts concerning the school or its teachers, such as the dates of withdrawals, commencements of duty, cautions, illness, &c., which may require to be referred to at a future time, or may otherwise deserve to be recorded.

37. No reflections or opinions of a general character are to be entered in the log-book.

38. No entry once made in the log-book may be removed or altered otherwise than by a subsequent entry.

39. The summary of the inspector's report, after his annual visit, or any visit made without notice, and any remarks made upon it by the Department, when communicated to the managers, must be immediately copied *verbatim* into the log-book, with the names and standing (*certificated teacher of the —class, or pupil-teacher of the —year, or assistant teacher*) of all teachers to be continued on, or added to, or withdrawn from the school staff according to the decision of the Department upon the inspector's report. The correspondent of the managers must sign this entry, which settles the school staff for the year.

40. The inspector will call for the log-book and portfolio at every visit and will report whether they appear to have been properly kept. He will specially refer to the entry made pursuant to Article 39, and he will require to see entries accounting for any subsequent change in the school staff. He will also note in the log-book every visit paid without notice (Article 12), making an entry of such particulars as require the attention of the managers.

## SECTION II.

### TEACHERS REFERRED TO IN THE PRECEDING SECTION.

41. The recognised classes of teachers are,—(a.) Certificated teachers. (b.) Pupil-teachers. (c.) Assistant teachers.

42. Lay persons alone can be recognised as teachers; but this condition will not apply to any person to whom a certificate is granted under Article 66.

*Certificated Teachers.*

43. Teachers in order to obtain certificates, must be examined (Article 44), and must undergo probation by actual service in school (Article 51).

*Examination for Certificates.*

44. Examinations are held in December of each year at the several training colleges under inspection (Article 100), and at such other centres as may be necessary.

45. A syllabus of the subjects of examination for male and female candidates respectively may be had on application to the Department (Article 14).

46. The names of candidates who desire to be examined must be notified to the Department (Article 14) before the first day of October preceding the examination.

47. The examination for certificates is open to,—

(a.) Students who have resided for at least one year in training colleges under inspection ; or,

(b.) Candidates who are upwards of 21 years of age, and have either—

1. completed an engagement as pupil-teacher satisfactorily ;
2. obtained a favourable report from an inspector ; or,
3. served as assistants, for at least six months, in schools under certificated teachers.

(c.) Graduates in Arts or Science of any University of the United Kingdom, who have satisfied an inspector of their practical skill as teachers.

Candidates under sections (a.) and (b.), who at the time of the examination are not teachers of schools to which annual grants are or may be made, must be recommended by the authorities of their college, or by the managers of the school in which they last served.

48. Teachers, or graduates, attending the examination may at their option take the papers of the first or second year's students (Article 102) ; but graduates are not required to be examined in any of the subjects (Article 45) in which they were examined on obtaining a degree.

49. A list is published showing the successful candidates, arranged in four divisions in the first year, and three divisions in the second year.

50. The relative proficiency of the candidates according to examination, and the nature of the professional training (Article 47) which they have received, are recorded upon their certificates.

*Probation.*

51. Candidates for certificates, after successfully passing their examination, must, as teachers continuously engaged in the same schools, obtain two favourable reports from an inspector, with an interval of one year (Article 13) between them ; and, if the first of these reports be not preceded by service of three months (at the least) since the examination, a third report, at an interval of one year after the second report, is required. If the second (or third) report is favourable a certificate is issued.

52. Teachers under probation satisfy the conditions which require that schools be kept by certificated teachers.

*Certificates.*

53. Certificates are of four classes. No certificate is originally issued above the second class. The fourth (lowest) class includes special certificates for teachers of infants, and of small schools.

*Certificates of the First and Second Class.*

54 (a.). Candidates who are placed by examination in the first division of the second year (Article 49), receive certificates of the second class, which can be raised to the first class by good service only.

(b.) Certificates remain in force for 10 years from the date of their issue, after which interval they are open to revision according to the intermediate reports.

*Certificates of the Third Class.*

55. Candidates who are placed by examination in the second or third division of the second year, or in one of the first three divisions of the first year (Article 49), receive certificates of the third class, which can be raised (Article 54 (b.)) by good service only.

*Certificates of the Fourth Class.*

56. Candidates who are placed by examination in the fourth division (Article 49) receive certificates of the fourth class.

57. Certificates of the fourth class do not entitle the teachers to have the charge of pupil-teachers.

58. Certificates of the fourth class can be raised only by examination.

59. During the period ending 31st December 1879, certificates of the fourth class may be granted, without examination, upon the report of an inspector, to acting teachers who satisfy the following conditions :—

1. They must, at the date of the inspector's report,—

- (a.) be above 25 years of age ;
- (b.) have been teachers for at least five years ; and
- (c.) present certificates of good character from the managers of their schools.

2. The inspector must report,—

- (a.) That they are efficient teachers ;
- (b.) That not less than 20 children, who had been under instruction in their schools during the preceding six months, were individually examined (Article 28) ; and
- (c.) That at least 15 of the “ passes ” of these scholars in reading, writing, or arithmetic, were made in the second or some higher standard.

59 (a.). If the inspector reports that the results of the examination under Articles 19 and 21 show that a teacher is thoroughly efficient, the certificate granted under this Article may be of the *third* class ; but it will be withdrawn or reduced (Article 69) if the teacher fails to instruct his, or her, pupil-teachers properly.

59 (b.). In schools attended by infants only (under 7 years of age), the conditions of Article 59, 2, (b. and c.) are not required to be fulfilled.

59 (c.). In schools having a total population of less than 100 souls within three miles of them, for which no other school is available, the conditions of Article 59, 2, (b. and c.) are not required to be fulfilled. In such cases certificates will be granted to women only, and will not qualify the holders (Article 17 d.) of them for the charge of schools of any other class.

60. Pupil-teachers who have completed their engagement with credit, and who have passed satisfactorily either the examination for the close of their fifth year (Schedule I.) or (Article 94) that referred to in Article 91 may, upon special recommendation by the inspector, be provisionally certificated in the fourth class for immediate service in charge of schools which have an annual average attendance of not more than 60 scholars.

61. After their 25th year of age (completed) their provisional certificates must have been exchanged for permanent certificates (Article 43) or are *ipso facto* cancelled.

61 (a). The provisional certificate is confined to an entry of the pupil-teacher's name in a register kept by the Department, and does not involve the issue of any certificate to the pupil-teacher.

62. The managers of several schools may combine to employ an Organizing teacher to superintend the Certificated teachers of these schools (*see footnote to Article 32 a. 2*).

#### *Future Rating of Existing Certificates.*

63 (a.). Existing certificates of the first or second class are rated as of the first or second class.

(b.) Existing certificates of the third class, and infant school certificates of the first class, are rated as of the third class.

(c.) Existing infant school certificates of the second class are rated as of the fourth class.

64. Certificates of the second or third class will be open to revision at the end of 10 years from the date of their issue, or of their last revision.

65. The class of any certificate not yet issued will be fixed by Articles 54, 55, and 56.

#### *Certificates for acting Teachers of Public Schools. (Education Act, 1872, Sec. 56.)*

66. A certificate will be granted on the following conditions, to every person not already certificated, who at the date (6th August 1872) of the passing of the Scotch Education Act, was—

The *principal* teacher of a public school, as defined by that Act; or Teacher in a burgh school and a member of the council of a Scotch University (Education Act, s. 56.) :—

- (1.) Such persons being graduates, or members of council, of a Scotch University, will, if they are above 30 years of age, and have been employed as teachers for 10 years, receive certificates of the *first* class.
- (2.) If, being graduates, or members of council, they are under 30 years of age, or have served as teachers for less than 10 years, they will receive certificates of the *second* class, which will be subject to Article 54 (b.).
- (3.) In all other cases the certificates will be of the *third* class (Article 55) for *male*, and of the *fourth* class (Article 56) for *female* teachers, and will be subject to Articles 57 and 58.
- (4.) The certificates will be issued on a favourable report from an inspector, on any public school, to which grants are or may be made, under the charge of such teacher.

#### *Reports of Managers and Inspector.*

67. The managers must annually state whether the teacher's character conduct, and attention to duty have been satisfactory.

68. The inspector reports of each school visited by him whether it is efficient in organisation, discipline, and instruction.

69. Certificates may, at any time, be recalled, suspended, or reduced if the certificate and report under Articles 67 and 68 are not satisfactory.

### *Pupil-teachers.*

70. Pupil-teachers are boys or girls employed to serve in a school on the following conditions, namely:—

(a.) *That the school* is reported by the inspector to be—

1. Under a duly certificated teacher (Articles 43 and 57).
2. Held in suitable premises (Article 17. c.).
3. Well furnished and well supplied with books and apparatus.
4. Properly organised and skilfully instructed.
5. Under good discipline.
6. Likely to be maintained during the period of engagement.

(b.) *That the pupil-teachers* be not less than 13 years (completed) of age at the date of their engagement.

(c.) Be of the same sex as the certificated teacher under whom they serve; but in a mixed school female pupil-teachers may serve under a master, and may receive instruction from him out of school hours, on condition that some respectable woman, approved by the managers, be invariably present during the whole time that such instruction is being given.

(d.) Be presented to the inspector for examination at the time and place fixed by his notice (Article 11).

(e.) Pass the examinations and produce the certificates specified in Schedule I.

(f.) *That the managers* enter into an agreement in the terms of the memorandum in the Second Schedule to this Code. A copy of this memorandum is sent to the managers for every candidate approved by the Department, and unless duly completed does not satisfy Article 32 (c).

(g.) That not more than *four* pupil-teachers are engaged in the school for every certificated teacher serving in it.

71. The Department is not a party to the engagement and confines itself to ascertaining, on the admission of the pupil-teacher and at the end of each year of the service—

(a.) Whether the prescribed examination is passed before the inspector.

(b.) Whether the prescribed certificates are produced from the managers and teachers.

72. Whatever other questions arise upon the engagement may be referred to the Department (provided that all the parties agree in writing to be bound by the decision of the Department as final), but, otherwise, must be settled as in any other hiring or contract.

73. Vacancies in the office of pupil-teacher which occur in the course of any year (Article 13) must not be filled up until after the next examination by the inspector.

74. The candidate or candidates for such vacancies must be engaged in the meantime by the week only as monitors, and the memorandum of agreement (Article 70 f) will not be issued by the Department to the managers until the inspector's report has been examined.

75. Temporary monitors engaged by the week, pursuant to Article 74, for the supply of vacant pupil-teacherships during a current year (Article 13), satisfy Article 32 (c), provided—

(a.) That a sufficient number of candidates to complete the requisite proportion of teachers to scholars pass the next examination for admission (Article 77) to permanent engagements ; and

(b.) That the vacancies are reported to the Department as soon as they occur, and have been occasioned by causes which are accepted by the Department as satisfactory.

76. Except in the cases provided for by Article 75, each vacancy in a pupil-teachership during a current year (Article 13) works a forfeiture under Article 32 (c).

77. The qualifications and certificates required of candidates for admission, and of pupil-teachers in each year of their service, are regulated by the First Schedule annexed to this Code.

*Pupil-teachers who have successfully completed their Engagement.*

78. At the close of their engagement pupil-teachers are perfectly free in the choice of employment. If they wish to continue in the work of education, they may become assistants in schools (Article 79), or may be examined for admission into a training college (Article 91), or may be provisionally certificated for immediate service in charge of small schools (Article 60).

*Assistant Teachers.*

79. Pupil-teachers who have completed their engagement with credit, (having passed satisfactorily either of the examinations referred to in Article 60) and candidates, not having been pupil-teachers (Article 93 c), who have passed with success (Article 94) the examination referred to in Article 91, may serve as assistants in schools in place of pupil-teachers, without being required to be annually examined.

80. Such assistants cease to fulfil the conditions of Article 32 (c), if at any time the inspector reports them to be inefficient teachers, or if they fail to produce from the managers, and from the principal teacher, of their school, the same certificates of conduct, attention to duty, and obedience, as are required from pupil-teachers.

81. A vacancy caused by the withdrawal of an assistant in the course of any school year (Article 13) may be supplied by the appointment of temporary monitors, pursuant to Articles 74, 75, or of another assistant, qualified according to Article 79.

82. Assistants make their own terms with the managers, both as to hours and wages.

82 (a). Assistants are counted as part of the school staff (Article 39) from the date at which their appointments are notified to, and approved by, the Department.

## PART II.

### TRAINING COLLEGES.

#### SECTION I.

83. A training college includes—

(a.) A college for instructing candidates for the office of teacher ;

(b.) A practising school, in which such students may learn the exercise of their profession ; and

(c.) In some cases, a hall in which the students are boarded and lodged.

84. No grant is made to a training college unless the Department is satisfied with the premises, management, and staff.

## SECTION II.

## GRANTS TO TRAINING COLLEGES.

85. Annual grants are made to practising schools (Article 83 *b.*) on the same conditions as to other schools.

86. Grants are placed to the credit of each college of 100*l.* for every master, and of 70*l.* for every mistress who, having been trained in such college during two years—

(*a.*) completes the prescribed period of probation (Article 51), and becomes qualified to receive a certificate as a teacher in a school to which annual grants may be made, or in a training college;

(*b.*) is reported by the proper department in each case to have completed a like period of good service as an elementary teacher in the Army or Royal Navy, or (within Great Britain) in Poor Law Schools, Certified Industrial Schools, or Certified Reformatories.

87. Teachers who have been trained for one year only may obtain certificates after probation (Article 51), or may be reported by the proper department, upon the same terms as others; and grants, of half the amounts specified in Article 86, may be placed to the credit of the colleges in which they were trained, provided—

(*a.*) they completed their training before 1st January 1864; or

(*b.*) are teachers of infants, having—

1, received a complete and special course of training for that service in their colleges, which must have been previously recognised by the Department as providing such a course; and

2, undergone their probation in infant schools.

88. The annual grant to each college is paid out of the sums placed to its credit (Articles 86, 87).

89. The grant must not exceed—

(*a.*) 75 per cent. of the actual expenditure of the college for the year, certified in such manner as the Department may require.

(*b.*) 50*l.* for each male, and 35*l.* for each female, Queen's scholar (Article 96), attending for continuous training throughout the year for which it is being paid.

90. The annual grant to each college is paid as follows:—

(*a.*) An instalment of 12*l.* (males), or 8*l.* (females) is paid on 1st March, 1st June, and 1st September, in respect of every Queen's scholar (Article 96) attending for continuous training throughout the year.

(*b.*) Part of the instalment of the 1st of September may be suspended, if payment of the full amount then due would cause the limit under Article 89 (*a.*) to be exceeded.

(*c.*) The balance is adjusted as soon as the college accounts for the year have been closed, audited, and approved by the Department.

## SECTION III.

## ADMISSION INTO TRAINING COLLEGES.

91. An examination of candidates for admission is annually held at each college in summer, commencing at 10 a.m. on the first Tuesday after the 2nd of July (*4th July 1876*).

92. The examination extends to the subjects required in the course of a pupil-teacher's engagement (Schedule I.).

93. The candidates are selected, and admitted to the examination, by the authorities of each college on their own responsibility, subject to no

other conditions, on the part of the Department, than that the candidates—

(a.) intend *bonâ fide* to adopt and follow the profession of teacher in schools fulfilling the conditions of Article 86 (a) or (b).

(b.) having been pupil-teachers, have successfully completed their engagement.

(c.) not having been pupil-teachers, will be more than 18 years of age on the first of January next following the date of the examination. This article will apply to pupil-teachers whose engagement may have been determined under section 5 of the memorandum of agreement (Article 70 f.), without discredit to themselves, and for reasons approved by the Department.

94. The successful candidates are arranged in two classes in order of merit.

95. The authorities of each college may propose to the Department for admission any candidate declared to be admissible pursuant to Article 94.

96. Such candidates when admitted are termed *Queen's scholars*.

97. Before candidates are admitted—

(a.) The medical officer of the college must certify the state of their health to be satisfactory, and that they are free from serious bodily defect, or deformity; and,

(b.) They must sign a declaration signifying their intention conformably to Article 93 (a).

98. The authorities of each college settle their own terms of admission.

99. Upon proof by the authorities of any college that candidates have not fulfilled the conditions signed by them on admission into the college, the Department will refuse to grant teacher's certificates (Article 53) to such candidates, or to admit them to probation for certificates (Article 51).

## SECTION IV.

### EXAMINATION OF STUDENTS IN TRAINING COLLEGES.

100. An examination of the students is held in December at the several colleges. This examination will commence in 1876, on Tuesday the 12th of December, at 10 a.m.

101. No student may be presented for examination except such as, at the date of their admission, satisfied Article 93, and have been under instruction throughout the whole year. No such student may be left out.

102 (a.). The students have a different examination according as they are males or females, or are at the end of a first or second year of training.

(b.) *Queen's scholars* (Article 96) may, with the consent of the authorities of their training college, attend during the *winter session* of each year of their instruction in such college, one or two (but not more) of the classes in a Scotch University, prescribed for graduation in Arts or Science. If they attend two such classes during the session they may during the same time, reckon two hours of attendance per diem at the training college as equivalent to regular attendance.

(c.) The examination for certificates, in the subjects taught in these classes, will be conducted by a board of examiners composed of professors in the Scotch Universities and Her Majesty's Inspectors of schools.

103. The first year's syllabus for females includes special subjects for the teachers of infants. Candidates who pass in these subjects, and

complete their probation (Article 51) in schools for infants, receive special mention thereof (*stamp*) on their certificates.

104. Students who pass successfully through two years of training receive special mention thereof (*stamp*) on their certificates.

105. Students of the first year who fall into the fourth division (Article 49) are required to take up the first year's subjects again at the end of their second year.

### PART III.

#### SPECIAL PROVISIONS.

##### EVENING SCHOLARS.

106. The managers of any school to which annual inspection has already been promised (Article 11) may apply in writing, before the 1st of January, to the *Inspector of the district* for an examination of their evening scholars (Article 22). This application must be renewed annually.

107. Only one examination is held per annum of evening scholars in the same school, and it may be held on any day, between the 1st of February and 30th of April, that may be arranged with the Inspector, provided that the school has met the required number of times (Article 22) since the date of the last examination.

108. *If the evening school is connected with a day school, in receipt of annual grants, and the accounts of the two schools are kept as one account* the grant for the examination of the evening scholars is paid as part of the next annual grant to the whole school (Article 13).

109. *If the evening school is not connected with a day school, in receipt of annual grants, or being so connected has a distinct and separate account*, the grant is paid as soon as possible after the 30th of April; at which date, in such cases, the evening school year is considered to end.

110. The Inspector may make arrangements for the examination, at some convenient centre, of the evening scholars of several schools.

111. A separate examination will not be held for any school, unless 20 scholars are to be presented to the Inspector. If less than 20 scholars are to be presented, they can be examined only at a collective examination (Article 110), or at the same time with the day scholars. The number to be presented must be stated in the managers' annual application (Article 106) to the Inspector.

112. The Inspector may either hold the examination himself, or entrust it to an assistant approved by the Department.

#### *Certificates under Labour Acts.*

113. The inspector after his yearly visit (Article 11) to a school will grant such certificates as may be required for scholars who have reached the standard (Article 28) prescribed by, or pursuant to the provisions of, any Act for regulating the education of children employed in labour.

114. The inspector may depute his assistant, or the certificated teacher of the school, to sign these certificates.

115. Certificates will be issued for those scholars only who pass in all the three subjects (Article 28) in the prescribed standard, or in a higher standard.

116. For the purpose of granting these certificates, the inspector, or his assistant will examine—

- (1.) Scholars in the school, whether they have made 250 attendances (Article 19 B.), or not;
- (2.) Other children, not being scholars in the school, allowed by the managers to attend on the day of inspection.

117. If there is no school under inspection at which the children of any parish, or group of parishes, for whom certificates are required, can conveniently attend for examination, application for a special examination may be made by any person interested in procuring such certificates, subject to the following regulations :—

(a.) The application shall be sent to *the inspector for the district* not less than 14 days before the date at which it is desired that the examination should be held.

(b.) The applicant must specify the number of children (not less than 15) to be presented for examination, and must undertake,—

That all children within the parish, or group of parishes, for whom certificates are needed, will be summoned to and allowed to attend the examination; and—

That a convenient room will be provided for the examination at such day and hour as shall be fixed by the inspector.

(c.) The applicant must satisfy the inspector that he is a proper person to conduct the preliminary proceedings, and, if necessary, to receive for distribution the certificates which may be granted after the examination.

### CHAPTER III.

#### PENSIONS.

118. A limited number of pensions will be granted to teachers who were employed in that capacity when the minutes \* relating to pensions were cancelled :—

(1.) The proposed pensioner must—

(a.) Be a certificated teacher in a public, or state-aided school, or training college, at the time when the pension is applied for.

(b.) Have become incapable, from age or infirmity, of continuing to teach a school efficiently.

(c.) Have been employed continuously since the 9th of May 1862, as principal or assistant teacher in elementary schools, or in training colleges.

(d.) Be recommended by Her Majesty's Inspector, and the managers of the schools served in.

(e.) Be 60 years of age (if a man), or 55 (if a woman), unless the pension is applied for on the ground of failure of health.

(2.) Pensions will be granted to those teachers only who have been, during the seven years preceding the application on their behalf, employed in schools or colleges under inspection, and are in need and deserving of such assistance.

(3.) Applications for a pension will be received only from the managers of the school in which the teacher is serving at the date of retirement.

(4.) These applications will be collected for decision, on their comparative merits, twice a year, about Lady Day and Michaelmas.

\* Minutes of 25th August and 21st December 1846, and 6th August 1851.

(5.) Teachers who entered on the charge of a school before 1851, will be regarded, *cæteris paribus*, as having the first claim.

(6.) The maximum number and value of pensions receivable at one time, in England and Scotland together, will be as follows :—

				£
270	{	20 pensions of 30 <i>l.</i> each	- - -	600
		100 pensions of 25 <i>l.</i> each	- - -	2,500
		150 pensions of 20 <i>l.</i> each	- - -	3,000
				<hr/>
				6,100
Donations or special gratuities (each year)				- 400
				<hr/>
				£6,500
				<hr/>

(7.) The pension will be paid yearly, on certificates proving identity, good behaviour, and continued need.

---

#### CHAPTER IV.

#### REVISION OF CODE.

119. The Department, as occasion requires, may cancel or modify articles of the Code, or may establish new articles, but may not take any action thereon until the same shall have been submitted to Parliament, and shall have lain on the Table of both Houses for at least one calendar month.

120. The Code shall be printed each year, in such a form as to show separately all articles cancelled or modified, and all new articles, since the last edition, and shall be laid on the Table of both Houses within one calendar month from the meeting of Parliament.

121. The schedules and notes annexed to the Code shall have the same effect as the Articles of the Code, and shall be subject to the provisions of Articles 118 and 119.

(Signed) RICHMOND AND GORDON,  
Lord President of the Council.

SANDON,  
Vice-President of the Committee of Council  
on Education.

F. R. SANDFORD,  
*Secretary.*  
Scotch Education Department,  
7th March 1876.

---

## FIRST SCHEDULE

## QUALIFICATIONS AND CERTIFICATES OF PUPIL-TEACHERS

—	1. Health.* N.B.—Copies of all these Certificates should be entered in the Log Book.	2. Character and Conduct.	3. Reading and Repetition.	4. English Grammar and Composition.
For Admission -	A medical certificate that candidate is not subject to any infirmity likely to interfere with profession of teacher.	A certificate from managers that the moral character of the candidates and of their homes justifies an expectation that the instruction and training of the school will be seconded by their own efforts and the example of their parents.	To read with fluency, ease, and expression.	To point out the parts of speech in a simple sentence; and to write from dictation in a neat hand, with correct spelling and punctuation, a passage of simple prose. <i>[In the following years, copy writing, one line of large hand and one of small hand will be required.]</i>
End of 1st Year -	Certificate from managers that pupil-teacher has not suffered any failure of health likely to incapacitate for profession of teacher.	1. Certificate of good conduct from the managers. 2. Certificate of punctuality, diligence, obedience, and attention to their duties, from the master or mistress.	To read as above - - -	The noun, verb, and adjective, with their relations in a simple sentence; and to write from memory the substance of a passage of simple prose, read to them with ordinary quickness, or a short letter or theme.
End of 2d Year -	Same as at end of first year.	Same as above - - -	To read as above; and to repeat 50 consecutive lines of poetry with just expression and knowledge of the meaning.	The pronoun, adverb, and preposition, with their relations in a sentence; and to write from memory the substance of a passage of simple prose, read to them with ordinary quickness, or a short letter.
End of 3d Year -	Same as at end of first year, together with one from a medical practitioner.	Same as above - - -	To read as above; and to repeat 40 consecutive lines of prose.	The conjunction, with the analysis of sentences; and to write full notes of a lesson on a subject selected by the inspector.
End of 4th Year	Same as at end of first year.	Same as above - - -	To read as above; and to repeat 100 lines of poetry.	Recapitulation of the preceding exercises; the meaning in English of the Latin prepositions; and to write a letter, or to write from memory the substance of a longer passage than at the end of second year.
End of 5th Year	Same as at end of first year. * Scrofula, fits, asthma, deafness, great imperfections of the sight or voice, the loss of an eye from constitutional disease, or the loss of an arm or leg, or the permanent disability of either arm or leg, curvature of the spine, hereditary tendency to insanity, or any constitutional infirmity of a disabling nature, is a positive disqualification in candidates for the office of pupil-teacher.	Same as above - - -	To read as above; and to repeat 80 lines of prose.  N.B.—The passages for repetition in prose and poetry must be of a secular character, and taken from some standard English writer, approved by Her Majesty's Inspector. The meaning and allusions of well known will atone for deficiency of memory.	Recapitulation of the preceding exercises; to know something of the sources and growth of the English language; and to write an original composition on some simple subject selected by Her Majesty's Inspector.

Female pupil-teachers, before admission, must produce a certificate from the schoolmistress and managers that they possess reasonable competency as sempstresses; and, at the annual examinations, must bring certified specimens of plain needlework to the inspector, together with a statement from the schoolmistress specifying whether they have been receiving practical instruction in any other kind of domestic industry. The inspector, at the time of examination, or afterwards, will obtain the opinion of some competent person upon the merit of the needlework. A paper of questions on domestic economy is given to the female candidates for admission to Training Colleges at the Christmas examination (Article 91).

## FIRST SCHEDULE.

## AT ADMISSION AND DURING THEIR ENGAGEMENT.

5. Arithmetic. and Mathematics.		6. Geography.	7. History.	8. Teaching.	9. Additional Subject.	10. Drawing.* Optional.	11. Music.† Optional.
To write from dictation, and work correctly, sums in the first four rules of arithmetic, simple and compound, including weights and measures.		Geographical definitions; the distribution of land and water; and the outlines of Scotland.	- - -	To teach a class to the satisfaction of Her Majesty's Inspector.	<i>Voluntary.</i> 1. A paper will be set at the examination for admission to training colleges (Articles 91, 92) in— 1. Latin. 2. Greek. 3. French. 4. German. 2. This paper will contain grammatical questions and easy passages for translation from and into English. 3. Marks will also be given to any candidate at that examination who, at one of the examinations held in May of each year by the Department of Science and Art,* has taken a first class in the elementary stage, or passed in the advanced stage of— 5. Mechanics. 6. Chemistry. 7. Animal Physiology. 8. Acoustics, Light, and Heat. 9. Magnetism and Electricity. 10. Physical Geography. 11. Botany. 4. Male candidates may obtain marks at the admission examination (Article 91) for any two, and females for any one, of these 11 subjects.	1. Pupil - teachers who during their engagement successfully work exercises in freehand, geometry, perspective, model, and blackboard drawing are credited with marks in any future examination under Articles 44, 91, or 100. 2. The exercises may be worked in any order, except that pupil-teachers cannot be examined in blackboard drawing till they have passed in all the other subjects. 3. Examinations are held— (1) In March at the elementary schools in which drawing is taught. (2) In May at the Schools of Art (and Art Night Classes) connected with the Department of Science and Art. 4. Pupil - teachers should attend the examination at their own school, if one is held there; if not, they should be examined at the Art School or Class where they have been taught drawing. They cannot be examined both in March and May, nor on the occasion of H.M. Inspector's visit to their school. 5. Pupil - teachers may also, with the consent of the authorities of a Training College, be examined in blackboard drawing ( <i>only</i> ) at the examination held, towards the close of the year, at each of these Colleges.	—
Male Pupil-teachers.	Female Pupil-teachers.	The British Isles. [Maps to be drawn in this and the following years.]	History of Scotland, from Robert the Bruce, to the Union of the Kingdoms.	The same, and to show increased skill in instruction and discipline.	<i>Compulsory.</i> 5. All male pupil-teachers admitted after 1 September 1873, must choose one of the four languages specified above, and will be examined at the end of their 3rd, 4th, and 5th years, according to the course laid down in Schedule IV. for the 1st, 2nd, and 3rd years of study in that language.	The natural scale, and the intervals found in it. Shapes and relative values of notes and rests. Places of notes on the treble stave.	The relation of treble stave to bass. Places of notes on both. Simple - common, and simple-triple time.
Practice and proportion (simple and compound).	Practice and bills of parcels.	Europe	Outlines of British History, from the Union to the death of George III.	The same			
Vulgar and decimal fractions.	Proportion (simple and compound).	The Colonies.	- - -	The same			
Interest and Per centages; and Euclid, Book I.	Vulgar fractions.	Asia and Africa.	- - -	The same			
Euclid, Book II., Algebra to Simple Equations (inclusive).	Decimal fractions.	America and the Oceans.	- - -	To satisfy Her Majesty's Inspector of power to conduct a division of the school, or manage grouped classes in the class-room and specially to give a collective lesson.		4. Pupil - teachers should attend the examination at their own school, if one is held there; if not, they should be examined at the Art School or Class where they have been taught drawing. They cannot be examined both in March and May, nor on the occasion of H.M. Inspector's visit to their school. 5. Pupil - teachers may also, with the consent of the authorities of a Training College, be examined in blackboard drawing ( <i>only</i> ) at the examination held, towards the close of the year, at each of these Colleges.	The minor scale in its diatonic forms.
Euclid, Book III., and Algebra, to Quadratic Equations (inclusive).	Interest, and recapitulation of the preceding rules.					The minor scale in its chromatic forms, and the chromatic intervals found in it.	

\* For detailed information respecting the means of instruction, and the places and times of examination, apply by letter to "The Secretary, Department of Science and Art, South Kensington, London, W."

† At the examination for admission to Training Colleges (Article 91) additional marks will be given to candidates who pass the following examination in practical skill.

1. Sounding single notes, or passages of two or more notes, in a given scale, from dictation; or, naming such notes sounded by the examiner.

2. Sol-fa-ing, or reading without musical intonation, a unison passage of one or more measures, in time; or, giving the time, names of such measure, or measures, recited by the examiner.

N.B.—Pupil-teachers may be examined at the end of any year in subjects prescribed for preceding years in columns 4, 5, 6, 7 and 11 of this Schedule.

## SECOND SCHEDULE.

## FORM OF MEMORANDUM OF AGREEMENT (Article 70 f.).

(N.B.—For use in Public Schools under the Management of a School Board. A similar Form is supplied by the Department for use in other Schools.)

<sup>1</sup> Insert name of the School Board. MEMORANDUM OF AGREEMENT between the School Board

<sup>2</sup> Insert names, description, and address in full, of father or other person who is to be the surety of the pupil-teacher. of <sup>1</sup> \_\_\_\_\_ and <sup>2</sup> \_\_\_\_\_ herein-after called the surety, the <sup>3</sup> \_\_\_\_\_ of <sup>4</sup> \_\_\_\_\_ herein-after called the pupil-teacher and the said pupil-teacher.

<sup>3</sup> Insert father, or other relation or friend of the pupil-teacher, as the case may be. The said board, for themselves, and their successors, agree with the said surety, h <sup>5</sup> \_\_\_\_\_ heirs and executors, and the said pupil-teacher, as follows:—

<sup>4</sup> Insert name in full of the pupil-teacher. 1. The said board agree to engage the said pupil-teacher to serve under a certificated teacher during the usual school hours

<sup>5</sup> Insert his or her. in keeping the <sup>6</sup> \_\_\_\_\_ public school of the said board, or any other public school of the said board to which the said pupil-teacher may be transferred with the previous sanction of

<sup>6</sup> Insert name of the school. the Scotch Education Department, and teaching the scholars thereat, but so that the said pupil-teacher shall not be obliged

<sup>7</sup> The month as defined by Article 11 of the Code. to serve therein more than six hours upon any one day, nor

<sup>8</sup> Insert name of preceding month. more than 30 hours in any one week, Sunday being expressly excluded from this engagement.

<sup>9</sup> The term must be for five full years; or any less number of years, not under two, provided (a) that the candidate has passed for admission the examination fixed for a later year in proportion to the reduced term of service; and provided also (b) that the end of the reduced term of service fall beyond the candidate's 18th year (completed). 2. This engagement shall begin on the first day of <sup>7</sup> \_\_\_\_\_ 18 \_\_\_\_\_, and shall end on the last day of <sup>8</sup> \_\_\_\_\_ 18 \_\_\_\_\_, but if the said pupil-teacher shall, with the consent of the other parties hereto, attend the examination for admission into Training Colleges (or a Scotch University) in July (or October) next preceding the last-mentioned date, this engagement may end on the 31st day of the month of December next following such examination (or of October).

3. The said board will pay to the said pupil-teacher as wages <sup>10</sup> \_\_\_\_\_ per <sup>11</sup> \_\_\_\_\_ in the first year, and

<sup>10</sup> The sum to be inserted must be fixed at the discretion of the parties, having in view the local rate of wages, and the advantages of the school as a place wherein to learn the business of a teacher. this sum shall be increased by <sup>10</sup> \_\_\_\_\_ per <sup>11</sup> \_\_\_\_\_ in each subsequent year of the engagement, but such increase may be stopped at the discretion of the board for the unexpired remainder of any year after receipt of notice from the Scotch Education Department that the said pupil-teacher has failed to pass the examination or to fulfil the other conditions of a pupil-teacher, according to the standard of the preceding year as prescribed in the Articles of the Code of the said Department

<sup>11</sup> Insert week, or as the parties may agree. applicable to the case.

4. The said board will cause the pupil-teacher, while the school is not being held, to receive, without charge, from a certificated teacher of the said school, special instruction during five hours per week, of which hours not more than two shall be part of the same day. Such special instruction shall be in the subjects in which the said pupil-teacher is next to be examined pursuant to the said Articles.

5. The said pupil-teacher shall be liable to dismissal without notice for idleness, disobedience, or immoral conduct, of a gross kind, respectively; and this engagement shall be terminable on the part of the said board or of the said surety and pupil-teacher by a written notice of six months, or, in lieu of such notice, by the payment on the part of the said board or of the said surety and pupil-teacher of 3*l*. in the first year, 4*l*. in the second, and an additional pound in each succeeding year of the engagement, but never exceeding 6*l*. in the whole; such payment to be recoverable as liquidated damages by the board or the said surety, as the case may be, over and above the settlement of all other accounts between the parties.

6. The said pupil-teacher enters into this engagement freely and voluntarily on h <sup>5</sup> \_\_\_\_\_ own part, and with the privity and consent of the said surety.

7. The said surety agrees with the said board and their successors, to clothe, feed, lodge, and watch over the said pupil-teacher during the continuance of this engagement in a proper manner.

<sup>12</sup> Here insert a testing clause according to the form of the law of Scotland.

In witness whereof <sup>12</sup>

N.B.—1. This agreement must be executed *as follows, viz. :—*

- (1.) By three members of the School Board, being the statutory quorum thereof.
- (2.) By the surety.
- (3.) By the pupil-teacher.

2. If it be executed with blanks still remaining in it, except in the testing clause, they cannot legally be filled up afterwards, unless as part of a new agreement requiring a new stamp. An incomplete agreement does not satisfy Article 32 (c.) in the Code.

3. The agreement, when executed, and after the testing clause has been completed, should be deposited with the school papers (Article 34 b.). The surety should have either an executed duplicate (which requires a second stamp) or a certified copy. The agreement exists only between the parties who execute it.

### THIRD SCHEDULE.

#### I.—FORM OF NEW AGREEMENT ON CHANGE OF MANAGERS.

(N.B.—*For use in Schools not under the Management of a School Board.*)

<sup>1</sup> The surety in the existing Memorandum.

<sup>2</sup> The Managers in the original Memorandum, and the Executors of any of them who are deceased.

<sup>3</sup> The name, description, and address of the new Manager or Managers.

<sup>4</sup> The name, description, and address of the present Managers, excluding such as will be no longer Managers, and including the new Manager or Managers.

<sup>5</sup> The new Manager or Managers.

<sup>6</sup> Deceased or outgoing Manager or Managers.

<sup>7</sup> Here insert a testing clause according to the form of the law of Scotland.

MEMORANDUM OF AGREEMENT between <sup>1</sup> \_\_\_\_\_  
within and herein-after described as *the Surety*; <sup>2</sup> \_\_\_\_\_  
the persons within described as *the Managers*; <sup>3</sup> \_\_\_\_\_  
and <sup>4</sup> \_\_\_\_\_  
herein-after described as "*the Managers.*"

1. The said Surety and the said <sup>2</sup> \_\_\_\_\_ hereby mutually rescind the within written Agreement, and agree that the same shall be henceforth determined, and of no further force as regards the future.

2. The said Surety and the said "*Managers*" hereby mutually agree to adopt and enter into an agreement in the same words, and to the same effect as the within written agreement for the unexpired term thereof; and that the like obligation and responsibility shall exist and be of force between them in like manner, and to all intents and purposes as if the name of the said <sup>5</sup> \_\_\_\_\_ had been inserted therein and signed thereto, instead of the name of the said <sup>6</sup> \_\_\_\_\_

In witness whereof <sup>7</sup> \_\_\_\_\_

N.B.—This memorandum must be executed *by all the parties named in it, viz. :—*

Managers.  
Surety.  
Pupil-teacher.

If it be executed with blanks still remaining in it, they cannot legally be filled up afterwards, except as part of a new agreement requiring a new stamp. An incomplete memorandum does not satisfy Article 32 (c.).

#### II.—FORM FOR CANCELLING ENGAGEMENTS OF PUPIL-TEACHERS.

(*To be endorsed on the original Memorandum.*)

The within written Memorandum of Agreement is hereby cancelled by the under-signed parties.

In witness whereof\*

\* Here insert a testing clause according to the form of the law of Scotland.

N.B.—The cancellation must be executed by the same parties by whom the memorandum of agreement was executed, except that it is not necessary, in the case of Public Schools, that the same three members of the School Board should sign it.

## FOURTH

## TABLE of SPECIFIC SUBJECTS of

	1. Mathematics.	2. English Literature and Language.	3. Latin.	4. Greek.	5. French.	6. German.	7. Mechanics.
1st year.	Algebra, notation, addition, subtraction, Euclid, book I., prop. 1 to 15, inclusive.	Two hundred lines of poetry, got by heart, with knowledge of meaning and allusions. Writing a paraphrase of an easy prose passage.	Grammar, to the end of regular verbs.	Grammar, to the end of regular verbs.	Grammar, to end of regular verbs. Ten pages of a French vocabulary.	Grammar, to end of regular verbs. Ten pages of a German vocabulary.	General ideas respecting the different states of matter, solid, liquid, and gaseous, with illustrations of compressibility, elasticity, and resistance. Measures of space, time, and velocity.
2d year.	Algebra, to simple equations ( <i>inclusive</i> ). Euclid, book I.	Three hundred lines of poetry, not before brought up, repeated; with knowledge of meaning and allusions, and of the derivations of words. Writing a paraphrase of a passage of poetry.	Irregular verbs and first rules of syntax. Knowledge of Delectus or other first Latin reading-book. Translation of simple sentences of English (three or four words) into Latin.	Irregular verbs and knowledge of some easy Greek reading-book. Translation of simple sentences (three or four words) into Greek.	Grammar, and translation into English of easy narrative sentences. Ten pages of a French conversation - book approved by inspector.	Grammar, and translation into English of easy narrative sentences. Ten pages of a German conversation - book approved by inspector.	General notions of force, and of the conservation of energy. The parallelogram of forces. General notions of gravitation.
3d year.	Algebra, to quadratic equations ( <i>inclusive</i> ). Euclid, books I., II., and III. Elements of mensuration.	Three hundred lines of poetry, not before brought up, repeated; with knowledge of meaning and allusions, and some general knowledge of the history, construction, and etymology of the English language. Writing a letter or statement, the heads of the topics to be given by the inspector. N.B.— <i>Poems of some length should preferably be selected. No passages may be brought up which have been previously learnt for the standard examination.</i>	The Latin Grammar. Cæsar de Bello Gallico, book I. Somewhat longer sentences to be translated from English into Latin.	The Greek Grammar. Xenophon's Anabasis, book I. Somewhat longer sentences to be translated from English into Greek.	Grammar, and knowledge of some easy French book approved by inspector. Translation of conversational sentences into French. Tolerable correctness of pronunciation.	Grammar, and knowledge of some easy German book approved by inspector. Translation of conversational sentences into German. Tolerable correctness of pronunciation.	General notions of the mechanical powers.

It is intended that the instruction of the scholars in the Science subjects in this Table shall be given mainly by their own neighbourhood. If these subjects are taught to children by definition and verbal description, instead of by direct observation, it cannot, therefore, be too strongly impressed on teachers, that nothing like learning by rote will be accepted as far as possible, in their own language, the ideas they have formed of what they have seen.

## SCHEDULE.

## SECULAR INSTRUCTION. (See ART. 21.)

8. Chemistry.	9. Animal Physiology.	Physics.		12. Physical Geography.	13. Botany.	14. Domestic Economy (for Girls).
		10. Light and Heat.	11. Magnetism and Electricity.			
Elementary and compound matter. Illustrations of combination and decomposition in such bodies as hydrochloric acid, water, oxide of mercury, and rust of iron.	The build of the human body, names and positions of the internal organs.	General notions respecting the formation of shadows, and the reflection of light. The formation of images by a looking glass. The three modes in which heat may be conveyed from one place to another. Effects of heat; expansion, melting, boiling, and evaporation.	Attraction, repulsion, and polarity, as illustrated by the magnet. Terrestrial magnetism, and the mariner's compass.	The nature of a river or stream, whence it is supplied, and what becomes of it. Evaporation and condensation. Rain, snow, and hail, dew and mist. The atmosphere and its composition. Winds. An explanation of the terms river-basin, and watershed. The boundaries of the great river-basins of Scotland.	Characters of the root, stem, leaves, and parts of the flower, illustrated by specimens of common flowering plants.	Food and its preparation. Clothing and materials.
Preparation and properties of the common gases, such as oxygen, hydrogen, nitrogen, and chlorine. The chemical character and constituents of pure air, and pure water, and the nature of the impurities sometimes found in both. The air-food of plants.	Circulation and respiration, and the broad structure of the organs concerned.	Refraction of light, appearance of objects under water. Separation of white light into its components by a prism. Explanation of the thermometer. The disappearance of heat in the melting of solids, and the boiling of liquids.	Attraction of light bodies by rubbed sealing wax and glass. Experimental proof that there are two forms of electricity. Attraction and repulsion. Gold leaf electroscope.	The ocean, its extent and divisions, depth, saltness, and currents. Action of waves. Sea beaches. The phenomena of the tides.	Structure of wood, bark, and pith. Cells and vessels. Food of plants, and manner in which a plant grows. Functions of the root, leaves, and different parts of the flower.	The dwelling; warming, cleaning, and ventilation. Washing materials and their use.
The properties of carbon as found both in inorganic and organic bodies, with elementary knowledge of the constituents of food. Differences between metallic and non-metallic bodies. Combination by weight and volume. The use of symbols and chemical formulæ.	The organs and function of alimentation. The properties of muscle and nerve.	Rudimentary explanation of the camera obscura, burning glass, magnifying glass, microscope, and telescope. Illustration of the difference of the specific heat of bodies. The causes of cloud, rain, and dew.	Construction of electrophorus, electrical machine, and Leyden jar. Construction of a common battery. Explanation of a thunderstorm. Action of a current on the magnet.	Form and size of the earth, and its motions. Day and night. The seasons of the year; how they depend upon the relative positions of the earth and sun. Moon's dimensions and distance, explanation of her phases. General arrangement of the planetary system.	The comparison of a fern and a moss with a flowering plant. The formation of different kinds of fruits. The structure of a bean and of a grain of wheat or barley. The phenomena of germination.	Rules for health; the management of a sick room. Cottage income, expenditure and savings.

experiment and illustration, and in the case of Physical Geography by observation of the phenomena presented in or by making them exercise their own powers of observation, they will be worthless as means of education. as sufficient for a grant, and that the Examinations by the Inspectors will be directed to elicit from the Scholars

## FIFTH SCHEDULE.

## SUPPLEMENTARY RULES.

RULE 1.—In column II. of the Examination Schedule the names of the qualified scholars must be entered class by class, *beginning with the lowest scholar in the lowest class.*

RULE 2.—The entries in column VI. must show where one *class* ends and another begins. The number denoting each *class* is to be written only *once*; dots (".") are to be put for each repetition of it, until the next higher class begins. There must be no intermixture of classes.

RULE 3.—The entries in column VIIb. will show where one *standard* ends and another begins. The number denoting each *standard* is to be written only *once*; dots (".") are to be put for each repetition of it until the next higher standard begins. There must be no intermixture of standards.\*

RULE 4.—The end of each standard in column VIIb. *need not* (although, of course, it *may*) coincide with the end of each class in column VI.\* Compare the entries opposite to No. 6 who ends a *class*, but not a *standard*; No. 8 who ends a *standard* but not a *class*; No. 16 who ends *both* a *class* and a *standard* (this is preferable).

RULE 5.—All the scholars must be presented in the classes to which the school registers prove them to belong, unless they fall as "*Exceptions*" under Rule 6.

RULE 6.—The children who, for whatever reason, are presented under a lower standard than that which an examination of the school according to the above rules assigns to their class, must be entered *last* in the Schedule under the title of "*Exceptions*," otherwise they will violate Rule 2 or 3. No child is to be placed among the "*Exceptions*" unless there is some special *excuse* for doing so, such as previous illness, &c. *Primâ facie, every child who is not fit to be examined in its own class has been wrongly placed there for instruction.*

RULE 7.—The Inspector is directed to refuse to examine children in Schools wherein Rule 2 or 3 is violated. He will in such cases proceed to inspect the School, and will report to the Department why he has left column VIII. (*his Report on each candidate*) in the Examination Schedule blank.

RULE 8.—No grant will be paid to a Day School in which children are retained after the age of 8, unless one *class*—*i.e.* all who are to be examined as members of one class, according to Rule 5—be presented *at least as high* as Standard II.

RULE 9.—A deduction of at least one-tenth will be made from the grant to a Day School in which children are retained after the age of 10, unless one *class*—*i.e.* all who are to be examined as members of one class, according to Rule 5—be presented *above* Standard II.

\* In the following transcript of part of the Examination Schedule, Columns II., VI., and VIIb., are filled up, *by way of example*, according to Rules 2 and 3. Of course, the other Columns must not, in practice, be left blank; and the actual numbers, presented in each class, will generally be much larger.

I.	II.	III.	IV.	V.	VI.	VIIa.	VIIb.
Number.	NAME.	Age (on last Birth- day).	Date of Admission to this School. Year. Month.	Number of Attend- ances† in the Year.	In what class of School; <i>first</i> means <i>highest</i> .	Under what Standard LAST examined, enter I., II., III., &c. as case may require.	Under what Standard NOW to be examined, enter I., II., III., &c. as case may require.
1	John Duncan ....				4th.		I.
2	Thomas Peters...				"		"
3	Henry Brown....				"		"
4	Wm. Robinson...				"		"

17	Charles Knox....						

† See Rule 11.

**RULE 10.**—For the rule how to find the average number of scholars in attendance at a school for any period, see Article 26 of the Code.

**RULE 11.**—The Class Registers at each meeting of a school must be marked and finally closed before the minimum time constituting an attendance (Article 23) begins.

If any child, entered in the Register as attending, is withdrawn from school before the time constituting an attendance is complete, its mark for presence should be at once cancelled.

The inspector will inquire whether these rules have been observed (Article 17h.).

**RULE 12.**—No child's name should be kept on the Admission Register after a fortnight's continuous absence without inquiry from the parents *whether the child has been withdrawn*. The names of children withdrawn (*whether they are so, the answer of their parents will decide*) should be cancelled at once in the Registers, and not included in the returns of age and stay at school; but the attendances (if any) opposite to such names in the Class Registers, must be counted under Rule 10, *supra*, and the whole number of such names must be counted for the return "left in past year."

## APPENDIX.

Showing separately (for 1876) all ARTICLES modified, and all  
New ARTICLES.

### Articles in the Code of 1875 which are modified in the Code of 1876.

7. *b.* A school established after the passing of the Education (Scotland) Act (6 August 1872), not being a public school, unless the Department shall after due inquiry be satisfied

\* \* \* \* \*

17. (*f.*) The girls are taught plain needlework and cutting out as part of the ordinary course of instruction.

19. A. The footnote has been incorporated into the Article.

19. B. 1. (*a.*) 8s. if the infants are instructed by the principal teacher suitably to their age, and in a manner not to interfere with the instruction of the older children.

### New, or modified, Articles in the Code of 1876.

7. *b.* A school established after the passing of the Education (Scotland) Act (6 August 1872), unless the Department shall after due inquiry be satisfied

\* \* \* \* \*

17. (*f.*) The girls are taught plain needlework \* and cutting out as part of the ordinary course of instruction.

19. A. The inspector will bear in mind, in reporting on the organization and discipline, the results of any visits without notice (Article 12) made in the course of the school year; and will not interfere with any method of organization adopted in a Training College under inspection if it is satisfactorily carried out in the school. To meet the requirements respecting discipline, the managers and teachers will be expected to satisfy the inspector that all reasonable care is taken, in the ordinary management of the school, to bring up the children in habits of punctuality, of good manners and language, of cleanliness and neatness, and also to impress upon the children the importance of cheerful obedience to duty, of consideration and respect for others, and of honour and truthfulness in word and act.

19. B. 1. (*a.*) 8s. if the infants are taught as a class of a school, suitably to their age, and so as not to interfere with the instruction of the older children.

\* This includes darning, mending, marking, and knitting; but no fancy work of any kind may be done in school hours.

Articles in the Code of 1875 which are modified in the Code of 1876.

19. B. 2. If more than seven years of age, subject to examination,—  
 3s. for passing in reading; } Articles 28, 29.  
 3s. for passing in writing; }  
 3s. for passing in arithmetic; }

19. C. 2. 2s. if the classes from which children are examined \* \* \* This grant will not be paid unless 20† per cent. of the scholars examined under Article 19 B. 2 are presented in Standard IV. and upwards.

19. D. The sum of 10℥. (or 15℥.), subject to a favourable report from the inspector, \* \* \* and there is no other public elementary school, with sufficient accommodation for such population, within three miles of the school.

19. E. The sum of 40s. (or 60s.) in respect of each pupil-teacher who satisfies fairly (or well) the requirements of Article 70 (e.), and Schedule I. (column 8).

20. 150 attendances (Article 23) qualify for examination—  
 (b.) Boys above 10 in a rural district.

21. Footnote:—  
 \* See *Science Directory* (September 1874), Section LI. "No pupil in an elementary school, receiving aid from the Education Department, Whitehall, may be presented for examination (except in elementary drawing) by the Science and Art Department, who has not passed Standard V. of the Scotch Code; nor who has been examined within the preceding six months in the same subject by Her Majesty's Inspectors." *Standard VI. will be substituted for Standard V. after the 31st of December 1875.*

25. Attendances may not be reckoned for any scholar above 18, or in a day school under 3, or in an evening school, under 12 years of age.

28.	Standard II.	Standard IV.
Arithmetic.	* * * Simple addition and subtraction of numbers of ten figures. * * *	Compound rules (money and common weights and measures.) * * *

30. After the 31st of December 1876 no day scholar above 9 years of age, and no evening scholar above 13, will be examined in Standard I.

† In 1877 this proportion will be raised to 25, and in 1878 to 30 per cent.

New, or modified, Articles in the Code of 1876.

19. B. 2. If more than seven years of age, subject to examination (Articles 28, 29).—  
 (a.) 3s. for each pass in reading, writing, or arithmetic; or  
 (b.) 4s. for each such pass in an infant school\* or department. (Article 19 B. 1. b.).

19. C. 2s. if the classes from which children are examined \* \* \* This grant will not be paid unless 10† per cent. of the scholars examined under Article 19 B. 2 (a) are presented in Standard IV. and upwards.

19. D. The sum of 10℥. (or 15℥.), subject to a favourable report from the inspector, \* \* \* and there is no other public or State-aided school, with sufficient accommodation for such population, within three miles of the school.

19. E. The sum of 40s. (or 60s.) in respect of each pupil-teacher required by Article 32 (c.), who satisfies fairly (or well) the conditions of Article 70 (e.).

20. 150 attendances (Article 23) qualify for examination—  
 (b.) Scholars above 10 certified by the managers to be beneficially employed at work when not at school.

21. Footnote:—  
 \* See *Science Directory* (September 1875), Section LI. "No pupil in an elementary school, receiving aid from the Education Department, Whitehall, may be presented for examination by the Science and Art Department, in any subject of science, who has not passed Standard VI. of the Scotch Code; nor who has been examined within the preceding six months in the same subject by Her Majesty's Inspectors."

21. e. After the 31st of March 1877, every girl presented under this Article must take domestic economy (Schedule IV., Column 14) as a subject of examination.

25. Attendances may not be reckoned for any scholar in a day school under 3 or above 18, or in an evening school, under 12 or above 21 years of age.

28.	Standard II.	Standard IV.
Arithmetic.	* * * Simple addition and subtraction of numbers of not more than ten figures. * * *	Compound rules (money) and reduction (common weights and measures). * * *

30. Suspended Article.

\* See Supplementary Rules 8 and 9 (Fifth Schedule).

† This proportion will be raised in 1878 (1st April) to 15, in 1879 to 20, in 1880 to 25, and in 1881 to 30 per cent.

Articles in the Code of 1875 which are modified in the Code of 1876.

31. *After the 31st of December 1877* no day scholar above 9 years of age, and no evening scholar above 14, will be examined in Standard II.

32. The amount which may be claimed by the managers under Articles 19 and 22 is reduced,—

(a.) By its excess above,—

2. One half the expenditure on the annual maintenance of the school.

(c.) 3. In mixed and girls schools a woman (not less than 18 years of age) who is employed during the whole day

\* \* \* \* \*

(c.) 4. The forfeiture may be reduced one half if a pupil-teacher fails in examination, but produces the prescribed certificates (Article 77). This reduction of the forfeiture is made only once for the same pupil-teacher, and not in successive years for the same school.

59. During the period ending 31st December 1876, certificates of the fourth class may be granted, without examination, upon the report of an inspector, to acting teachers who satisfy the following conditions:—

1. They must, at the date of the inspector's report,—

(a.) be above 35 years of age (*males*), or 30 (*females*);

(b.) have been teachers for at least 10 years.

69. Certificates may, at any time, be recalled, suspended, or reduced under Articles 67 and 68.

70. (*f.*) That the managers enter into an agreement in the terms of the memorandum in the Second Schedule to this Code, a copy of which memorandum is sent to the managers for every candidate approved by the Department.

91. An examination of candidates for admission is annually held at each college in Decem-

† Expenditure on such items as school treats, clothing, money prizes, or any outlay on the premises beyond the cost of ordinary repairs, will not be taken into account.

New, or modified, Articles in the Code of 1876.

51. *Suspended Article.*

32. The amount which may be claimed by the managers under Articles 19 and 22 is reduced,—

(a.) By its excess above,—

2. One half\* the expenditure on the annual maintenance of the school.

(c.) 3. In mixed, girls, and *infant* schools a woman (not less than 18 years of age) who is employed during the whole day

\* \* \* \* \*

(c.) 4. Cancelled.

(d.) *By one-twelfth for each month of interval between the employment of two certificated teachers (Article 47 d.). This reduction is not made if the interval does not exceed three months during which the school has been in charge of an uncertificated teacher.*

59. During the period ending 31st December 1879, certificates of the fourth class may be granted, without examination, upon the report of an inspector, to acting teachers who satisfy the following conditions:—

1. They must, at the date of the inspector's report,—

(a.) be above 25 years of age;

(b.) have been teachers for at least five years.

62. *The managers of several schools may combine to employ an organizing teacher to superintend the certificated teachers of these schools. (See footnote to Article 32. a. 2.)*

69. Certificates may, at any time, be recalled, suspended, or reduced *if the certificate and report under Articles 67 and 68 are not satisfactory.*

70. (*f.*) That the managers enter into an agreement in the terms of the memorandum in the Second Schedule to this Code. A copy of this memorandum is sent to the managers for every candidate approved by the Department, and *unless duly completed does not satisfy Article 32 (c).*

91. An examination of candidates for admission is annually held at each college *in sum-*

\* This reduction is not made in the case of the first grant paid to a school.

† This may include part of the salary of an organizing teacher, or of a teacher of drill, cooking, or any other special subject (Article 31), employed by the managers of several schools; but not expenditure on such items as school treats, clothing, money prizes, or any outlay on the premises beyond the cost of ordinary repairs.

Articles in the Code of 1875 which are  
modified in the Code of 1876.

ber, during the week following the examination for certificates (Article 100). In 1876, and thenceforward, this examination will be held in summer, commencing on the first Tuesday after the 2nd of July.

FIRST SCHEDULE.

Section 3.—Reading and Repetition.

N.B.—The passages for repetition in prose and poetry must be \* \* \* approved by Her Majesty's Inspector.

Section 10.—Drawing.

3. Pupil-teachers who have been taught drawing in their own schools should be examined there in *March*. They cannot be examined in drawing on the occasion of Her Majesty's Inspector's visit.

New, or modified, Articles in the  
Code of 1876.

mer, commencing at 10 a.m. on the first Tuesday after the 2nd of July (4th July 1876).

118. A limited number of pensions will be granted to teachers who were employed in that capacity when the minutes\* relating to pensions were cancelled.

(1.) The proposed pensioner must—

(a.) Be a certificated teacher in a public elementary school, or training college, at the time when the pension is applied for.

(b.) Have become incapable, from age or infirmity, of continuing to teach a school efficiently.

(c.) Have been employed since the 9th of May 1862, as principal or assistant teacher in elementary schools, or training colleges.

(d.) Be recommended by Her Majesty's Inspector, and the managers of the schools served in.

(e.) Be 60 years of age (if a man), or 55 (if a woman), unless the pension is applied for on the ground of failure of health.

(2.) Pensions will be granted to those teachers only who have been, during the seven years preceding the application on their behalf, employed in schools or colleges, under inspection, and are in need, and deserving, of such assistance.

(3.) Applications for a pension will be received only from the managers of the school in which the teacher is serving at the date of retirement.

(4.) These applications will be collected for decision, on their comparative merits, twice a year, about Lady Day and Michaelmas.

(5.) Teachers who entered on the charge of a school before 1851, will be regarded, *ceteris paribus*, as having the first claim.

(6.) The maximum number and value of pensions receivable at one time, in England and Scotland together, will be as follows:—

	£
20 pensions of 30 <i>l.</i> each -	600
100 pensions of 25 <i>l.</i> each -	2,500
150 pensions of 20 <i>l.</i> each -	3,000
	6,100
Donations or special gratuities (each year) -	400
	6,500

(7.) The pension will be paid yearly, on certificates proving identity, good behaviour and continued need.

FIRST SCHEDULE.

Section 3.—Reading and Repetition.

N.B.—The passages for repetition in prose and poetry must be \* \* \* approved by Her Majesty's Inspector. The meaning and allusions if well known will atone for deficiencies of memory.

Section 10.—Drawing.

3. Examinations are held—

(1.) In *March* at the elementary schools in which drawing is taught.

(2.) In *May* at the Schools of Art (and Art Night Classes) connected with the Department of Science and Art.

\* Minutes of 25th August and 21st December 1846 and 6th August 1851.

Articles in the Code of 1875 which are  
modified in the Code of 1876.

4. Pupil-teachers may study and be examined (about *May* in each year) at any of the Schools of Art, or Art Night Classes, connected with the Department of Science and Art.

5. Pupil-teachers, although not studying at a School of Art, or Art Night Class, may, with the consent of the Committee, be examined there if there be no March examination at their own school.

6. An annual examination in drawing is also held in *November* at each of the Training Colleges, and pupil-teachers, who have no opportunity of being examined in *March* or *May*, and who obtain permission from the authorities of one of these Colleges, may be examined there.

## SECOND SCHEDULE.

## Section 4.

The said board will cause the pupil-teacher, while the school is not being held, to receive, without charge, from the certificated teacher of the said school for the time being, special instruction during five hours per week.

\* \* \* \* \*

## FOURTH SCHEDULE.

## Section 2.—English Literature and Language.

## Third Year.

N.B.—Poems of some length should preferably be selected.

## Section 5.—French.

Grammar to end of irregular verbs.

\* \* \* \* \*

## Section 6.—German.

Grammar to end of irregular verbs.

\* \* \* \* \*

New, or modified, Articles in the  
Code of 1876.

4. *Pupil-teachers should attend the examination at their own school, if one is held there; if not, they should be examined at the Art School, or Class, where they have been taught drawing. They cannot be examined both in March and May; nor on the occasion of H.M. Inspector's visit to their school.*

5. *Pupil-teachers may also, with the consent of the authorities of a Training College, be examined in black-board drawing (only) at the examination held, towards the close of the year, at each of these Colleges.*

## SECOND SCHEDULE.

## Section 4.

The said board will cause the pupil-teacher, while the school is not being held, to receive, without charge, from a certificated teacher of the said school, special instruction during five hours per week.

\* \* \* \* \*

## FOURTH SCHEDULE.

## Section 2.—English Literature and Language.

## Third Year.

N.B.—Poems of some length should preferably be selected. *No passages may be brought up which have been previously learnt for the standard examination.*

## Section 5.—French.

Grammar to end of *regular* verbs.

\* \* \* \* \*

## Section 6.—German.

Grammar to end of *regular* verbs.

MINUTE OF THE COMMITTEE OF COUNCIL ON EDUCATION, FIX-  
ING THE STANDARD OF PROFICIENCY TO BE REQUIRED  
UNDER THE 12TH SECTION OF THE FACTORY ACT, 1874.

*At the Council Chamber, Whitehall, the 23rd day of June 1875.*

BY THE LORDS OF THE COMMITTEE OF HER MAJESTY'S MOST  
HONOURABLE PRIVY COUNCIL ON EDUCATION.

Read :—

(1.) The 12th section of the Factory Act, 1874, which provides that,—

“ After the first day of January one thousand eight hundred and  
“ seventy-six, for the purpose of this Act and of the Factory Acts, 1833  
“ to 1856, in the case of a factory to which this Act applies, a person  
“ of the age of thirteen years and under the age of fourteen years shall  
“ be deemed to be a child, and not a young person, unless he has ob-  
“ tained from a person authorised by the authority herein-after men-  
“ tioned a certificate of having attained such standard of proficiency in  
“ reading, writing, and arithmetic as may be from time to time pre-  
“ scribed for the purposes of this Act by that authority : Provided that  
“ any such person who previously to the first day of January one thou-  
“ sand eight hundred and seventy-six is lawfully employed in any such  
“ factory as a young person, may continue to be so employed in like  
“ manner as if this section had not been enacted.

“ The authority for the purposes of this section shall be—

“ (a.) In England the Lords of the Committee of the Privy Council  
“ on Education ;

“ (b.) In Scotland the Lords of any Committee of the Privy Council  
“ appointed by Her Majesty on education in Scotland ; and

“ (c.) In Ireland the Lord Lieutenant of Ireland, with the advice of  
“ his Privy Council.

“ The standard of proficiency so prescribed shall be published in the  
“ London, Edinburgh, or Dublin Gazette, according as it is prescribed  
“ by the authority in England, Scotland, or Ireland, and shall not have  
“ effect until the expiration of at least six months after such publica-  
“ tion.”

(2.) Articles 113–117 of the New Code (1875).

113. The inspector after his yearly visit to a school will grant such certificates as may be required for scholars who have reached the standard prescribed by, or pursuant to the provisions of, the Agricultural Children Act, 1873, or any other Act for regulating the education of children employed in labour.

114. The inspector may depute his assistant, or the certificated teacher of the school to sign these certificates.

115. Certificates will be issued for those scholars only who pass in all the three subjects in the prescribed standard, or in a higher standard.

116. For the purpose of granting these certificates, the inspector, or his assistant, will examine—

- (1.) Scholars in the school, whether they have made 250 attendances or not ;
- (2.) Other children, not being scholars in the school, allowed by the managers to attend on the day of inspection.

117. If there is no school under inspection at which the children of any parish, or group of parishes, for whom certificates are required, can conveniently attend for examination, application for a special examination may be made by any person interested in procuring such certificates, subject to the following regulations:—

- (a.) The application shall be sent *to the inspector for the district* not less than 14 days before the date at which it is desired that the examination should be held.
- (b.) The applicant must specify the number of children (not less than 15) to be presented for examination, and must undertake—  
That all children within the parish, or group of parishes, for whom certificates are needed, will be summoned to and allowed to attend the examination; and—  
That a convenient room will be provided for the examination at such day and hour as shall be fixed by the inspector.
- (c.) The applicant must satisfy the inspector that he is a proper person to conduct the preliminary proceedings, and, if necessary, to receive for distribution the certificates which may be granted after the examination.

Resolved:—

That the standard of proficiency to be fixed for the purposes of the aforesaid Act shall, *for the present*, be regulated by the 4th Standard prescribed by Article 28 of the Code of 1875, viz.:—

Reading:—

To read with intelligence a few lines of poetry selected by the inspector.

Writing:—

In small hand, eight lines, slowly dictated once from a reading book; spelling and handwriting to be considered.

Arithmetic:—

Compound rules (money, and common weights and measures \*).

#### CIRCULAR TO H.M. INSPECTORS AS TO THE ISSUE OF CERTIFICATES UNDER THE FOREGOING MINUTE.

Education Department, Whitehall, London, S.W.,  
4th March 1876.

SIR,

I AM directed to request your attention to the annexed copy of a circular, which has been issued by the Inspector of Factories, with reference to the requirements of section 12 of the Factory Act, 1874, quoted in the enclosed copy of their Lordships' Minute of the 23rd of June last, which was duly published in the Gazette.

The special provisions made by Articles 113–117 of the Code, also quoted in that Minute, for obtaining certificates under the Factory Act, appear not to be generally known. My Lords have, therefore, after communicating with the Home Secretary, agreed to the arrangements which you will find detailed in Mr. Redgrave's circular.

\* Avoirdupois weight, long measure, liquid measure, time table, square and cubical measures, and any measure which is connected with the industrial occupations of the district.

If an occupier of any factory in your district, affected by the Act of 1874, applies to you, as recommended, for an examination of the young persons in his employment who require certificates, I am to request that you will make arrangements accordingly.

If you can provide for the attendance of the persons to be examined at a public elementary school which you may be visiting, it will, of course, be open to you to do so ; but if this is impossible, some one hour on a Saturday, or on any morning on which you, or your assistant, may be on your way to or from visiting a public elementary school, will, in most cases, be sufficient for the examination of a single factory. If two or more employers will make combined arrangements for a collective examination, this plan will be more convenient, and should be adopted when possible.

My Lords regret that this additional trouble should be imposed upon you, but it is of importance, from an educational point of view, that every effort should be made to enforce the requirements of the Act of 1874 in the manner now indicated.

I am, &c.

F. R. SANDFORD.

#### TO THE OCCUPIERS OF TEXTILE FACTORIES.

Factory Inspectors' Office, Whitehall,

26th February 1876.

GENTLEMEN,

I BEG to call your attention to section 12 of the Factory Act, 1874, which enacts that a person of 13 and under 14 years of age who was not working full time in your factory before the 1st January last shall be deemed to be a child, unless it has passed an examination to be fixed by the Education Department.

The Education Department fixed the 4th Standard, as follows :—

Reading :—

Reading intelligently a { few lines of poetry selected by the inspector  
(*England*).  
passage from some history book (*Scotland*).

Writing :—

In small hand, eight lines, dictated slowly from a reading book ; spelling and handwriting to be considered.

Arithmetic :—

Compound rules, money, and common weights and measures, viz., avoirdupois weight, long measure, liquid measure, square and cubical measures, and any measure which is connected with the industrial occupations of the district.

The Education Department, in their Minute of 23rd June 1875, promulgated the following arrangement for the examination for certificates :—

The inspector after his yearly visit to a school will grant such certificates as may be required for scholars who have reached the standard prescribed by, or pursuant to the provisions of, any Act for regulating the education of children employed in labour.

The inspector may depute his assistant, or the certificated teacher of the school, to sign these certificates.

Certificates will be issued for those scholars only who pass in all the three subjects in the prescribed standard, or in a higher standard.

For the purpose of granting these certificates, the inspector, or his assistant, will examine—

- (1.) Scholars in the school, whether they have made 250 attendances or not;
- (2.) Other children, not being scholars in the school, allowed by the managers to attend on the day of inspection.

If there is no school under inspection at which the children of any parish, or group of parishes, for whom certificates are required, can conveniently attend for examination, application for a special examination may be made by any person interested in procuring such certificates, subject to the following regulations :—

- (a.) The application shall be sent *to the inspector for the district* not less than 14 days before the date at which it is desired that the examination should be held.
- (b.) The applicant must specify the number of children (not less than 15) to be presented for examination, and must undertake—  
That all children within the parish, or group of parishes, for whom certificates are needed, will be summoned to and allowed to attend the examination; and—  
That a convenient room will be provided for the examination at such day and hour as shall be fixed by the inspector.
- (c.) The applicant must satisfy the inspector that he is a proper person to conduct the preliminary proceedings, and, if necessary, to receive for distribution the certificates which may be granted after the examination.

But in order to increase the facilities for the granting of certificates, the following further arrangements have been made :—

The occupier of a factory having in his employment persons ready for examination for the certificate to entitle them to work for full time should communicate with the inspector of schools for the district, and inform him of the number of persons to be examined, and the inspector will then arrange to call at the factory and make the examination; or if several occupiers will combine and arrange for the use of a school or other room, the inspector will be prepared to examine a larger number of persons than he could at the factory.

The inspectors of schools for your district are \_\_\_\_\_

---

with whom I request you will at once put yourself in communication, that any certificates of proficiency that may be necessary in your factory may be obtained, or the persons of 13 not having such certificates be kept upon half-time.

The certificates should be kept in the age certificate-book as long as the persons are employed in your factory.

A young person claiming to be 14 years of age, and therefore exempt from the necessity to produce an educational certificate, should, if there is any doubt as to the age, produce a certificate of birth, as the surgeon's certificate is insufficient of itself to prove the age to be above 14,

I am, &c.

ALEXANDER REDGRAVE.

MINUTE OF THE COMMITTEES OF COUNCIL ON EDUCATION, DATED  
26TH JUNE 1875, FIXING THE CONDITIONS UNDER WHICH  
PENSIONS MAY BE GRANTED TO CERTAIN TEACHERS.

*At the Council Chamber, Whitehall, the 26th day of June 1875.*

BY THE LORDS OF THE COMMITTEES OF HER MAJESTY'S MOST  
HONOURABLE PRIVY COUNCIL ON EDUCATION IN ENGLAND AND  
SCOTLAND.

Read :—

(1.) The Minutes of 25th August and 21st December 1846, and 6th  
August 1851 :—

*25th August 1846.*

“Resolved :—That it is expedient to make provision in certain cases, by a retiring pension, for schoolmasters and schoolmistresses who, after a certain length of service, may appear entitled to such provision.

“That the Lord President cause regulations to be framed respecting the grants of such retiring pensions.”

*21st December 1846.*

“A retiring pension may be granted by the Committee of Council to any schoolmaster or schoolmistress who shall be rendered incapable by age or infirmity of continuing to teach a school efficiently.

“Provided that no such pension shall be granted to any schoolmaster or schoolmistress who shall not have conducted a normal or elementary school for 15 years, during seven at least of which such school shall have been under inspection.

“In all cases of application for pensions a report shall be required from the inspector, and from the trustees and managers of the schools, as to the character and conduct of the applicants, and the manner in which the education of the pupils under their charge has been carried on.

“The amount of the pension shall be determined according to such report, but shall in no case exceed two-thirds of the average amount of the salary and emoluments annually received by the applicant during the period that the school has been under inspection.

“A Minute of the grant of every such pension, and of the grounds on which it has been awarded, shall be published in their Lordships' Minutes.”

*6th August 1851.*

“Read :—A former Minute, dated 21st December 1846 (as above).

“Resolved :—That the foregoing Minute be declared to have been intended to facilitate the appointment of competent successors in the place of meritorious but incapacitated teachers, whose removal might, by such assistance, be effected in a manner consistent with their claims on the public.

“That in order to define the extent of the charge to be created on the Parliamentary grant for education, the pensions to be awarded, pursuant to the Minute of the 21st of December 1846, be as follows:—

				£	
270	{	20 pensions of 30 <i>l.</i> each	-	-	600
		100 pensions of 25 <i>l.</i> each	-	-	2,500
		150 pensions of 20 <i>l.</i> each	-	-	3,000
		Donations or special gratuities	-	-	400
				<hr/>	
				£6,500	

“That in order to give precedence to the most deserving cases, all applications for retiring pensions be collected for comparison, and decided according to their respective merits, not oftener than twice in each year, until the foregoing list be completed, and thenceforth only as vacancies in it shall occur.

“That the pension be liable to be withdrawn on such proof as shall be satisfactory to their Lordships that the pensioner has been guilty of misconduct, or possesses sufficient means of livelihood from other sources.

(2.) The Minutes of the 29th of July 1861, and the 9th of May 1862, introducing and confirming the Revised Code, and cancelling the Code of 1860, in which (Articles 164–171) the Minutes of 1846 and 1851 were embodied.

(3.) The evidence taken by a Select Committee of the House of Commons, appointed in 1872, “to inquire whether, by a deduction from the Parliamentary grant in aid of public elementary schools, or by any other like means, a provision can be made for granting annuities to certificated teachers of such schools, upon their retirement by reason of age and infirmity,” with the following extract from their report:—

“Your Committee wish to guard against the further growth or continued existence of certain expectations which have arisen in the minds of some teachers, from a misapprehension of the Minutes of the Committee of Council on Education, dated 25th August and 21st December 1846, by means of which power was taken to award pensions to teachers, but only in ‘certain cases,’ on the fulfilment of specified conditions both by the teacher and by the school, and always at the discretion of the Committee of Council.

“Some of the witnesses have informed your Committee that many teachers have regarded these Minutes as a promise of pensions to all teachers who fulfilled the conditions therein laid down.

“Your Committee are, however, of opinion that these Minutes of 1846 were not intended to hold out any such promise, but that their true construction is that which is put on them by the Minutes of 6th August 1851, and the circular letter of October 1851, namely, that the Committee of Council on Education took power, but did not pledge themselves, to grant pensions.”

(4.) Various representations addressed to the Education Department, praying that the promises held out by the Minutes of 1846 and 1851 may be fulfilled, in the case of teachers who entered the profession before the Revised Code was introduced.

Their Lordships, while declining to admit that the Minutes of 1846 gave any teacher a vested right to claim a pension, even before these Minutes were explained by the Committee of Council in 1851, or that the establishment of a general system of teachers’ pensions, at the public cost, is now called for, decided that—having regard to “the expectations of those who became teachers while the Minute relative

“to pensions remained in force, and who entered the service in the “hope of receiving pensions”—it is advisable to add the following article to the Codes now in force in England and Scotland respectively :—

A limited number of pensions will be granted, on the following conditions, to teachers who were employed in that capacity when the Minutes relating to pensions were cancelled :—

1. The proposed pensioner must—

(a.) Be a certificated teacher in a public elementary school at the time when the pension is applied for.

(b.) Have become incapable, from age or infirmity, of continuing to teach a school efficiently.

(c.) Have, as principal teacher, conducted elementary schools continuously since the 9th of May 1862.

(d.) Be recommended by Her Majesty's Inspector, and the managers of the schools served in.

(e.) Be 60 years of age (if a man), or 55 (if a woman), unless the pension is applied for on the ground of failure of health.

2. Pensions will be granted to those teachers only who have been, during the seven years preceding the application on their behalf, in charge of schools under inspection, and in receipt of an income not exceeding 120*l.* (men), or 60*l.* (women). A free house will be treated as equal to 10*l.* a year (men), or 6*l.* (women), in calculating a teacher's income.

3. Applications for a pension will be received only from the managers of the school in which the teacher is serving at the date of retirement.

4. These applications will be collected for decision, on their comparative merits, twice a year, about Lady Day and Michaelmas.

5. Teachers who entered on the charge of a school before 1851 will be regarded, *ceteris paribus*, as having the first claim.

6. The maximum number and value of pensions receivable at one time, in England and Scotland together, and including the pensions now current, will be as follows :—

				£
270	{	20 pensions of 30 <i>l.</i> each	- - -	600
		100 pensions of 25 <i>l.</i> each	- - -	2,500
		150 pensions of 20 <i>l.</i> each	- - -	3,000
				<hr/>
				6,100
Donations or special gratuities (each year) -				400
				<hr/>
				£6,500
				<hr/>

7. The pension will be paid yearly, on certificates proving identity, good behaviour, and continued need.

MINUTE OF THE COMMITTEES OF COUNCIL ON EDUCATION, DATED 16TH JULY 1875, MODIFYING CERTAIN CONDITIONS OF THE MINUTE OF 26TH JUNE 1875, UNDER WHICH PENSIONS MAY BE GRANTED.

*At the Council Chamber, Whitehall, the 16th day of July 1875.*

BY THE LORDS OF THE COMMITTEES OF HER MAJESTY'S MOST HONOURABLE PRIVY COUNCIL ON EDUCATION IN ENGLAND AND SCOTLAND.

Read :—

The Minute of 26th June 1875.

Resolved :—

To modify the following paragraphs in the article proposed by that Minute to be added to the Codes for England and Scotland.

Article as in Minute of 26th June 1875.	Article as modified. <i>N.B.</i> —The modifications are printed in italics.
<p>1. The proposed pensioner must—</p> <p>(a.) Be a certificated teacher in a public elementary school at the time when the pension is applied for.</p> <p>(c.) Have, as principal teacher, conducted elementary schools continuously since the 9th of May 1862.</p> <p>2. Pensions will be granted to those teachers only who have been, during the seven years preceding the application on their behalf, in charge of schools under inspection, and in receipt of an income not exceeding 120<i>l.</i> (men), or 60<i>l.</i> (women). A free house will be treated as equal to 10<i>l.</i> a year (men), or 6<i>l.</i> (women), in calculating a teacher's income.</p>	<p>1. The proposed pensioner must—</p> <p>(a.) Be a certificated teacher in a public elementary school, <i>or training college</i>, at the time when the pension is applied for.</p> <p>(c.) <i>Have been employed continuously, since the 9th of May 1862, as principal or assistant teacher in elementary schools.</i></p> <p>2. Pensions will be granted to those teachers only who have been, during the seven years preceding the application on their behalf, in charge of schools under inspection, <i>and are in need, and deserving, of such assistance.</i></p>

## CIRCULAR TO MANAGERS OF SCHOOLS AS TO STONE-THROWING AT TELEGRAPH WIRES.

Education Department, Whitehall, London, S.W.,  
2nd August 1875.

GENTLEMEN,

THE Duke of Richmond is informed that so much damage is done to postal telegraph lines by stone-throwing that Her Majesty's Postmaster General is compelled to put the law in force against offenders.

Most of the damage is caused by mischievous persons, but it is found that much injury is done by school boys, who do not think they are doing any great harm, and are not aware that they render themselves liable to imprisonment, and perhaps to flogging.

You are hereby requested to be good enough to caution the children in your school against throwing stones at the telegraph lines, and to impress upon them the risks they run, and the great expense, trouble, and annoyance they cause by so doing.

I am, &c.

F. R. SANDFORD.

CIRCULAR TO TRAINING COLLEGES FOR FEMALES WITH REFERENCE TO THE EXAMINATION IN LANGUAGES AND SCIENCE AT CHRISTMAS, 1876.

Education Department, Whitehall, London, S.W.,  
28th March 1876.

SIR,

My Lords have received from the authorities of a few of the training colleges for schoolmistresses a request that they would reconsider the change made in the syllabus for 1876, by which the students in these colleges are confined to one of the two optional subjects of languages and science, and are not allowed in the examination for certificates to receive marks for both subjects.

The great majority of the colleges have, apparently, admitted the propriety of the change, which was made on the recommendation of Canon Tinling, H.M. Inspector, from whom their Lordships have received the following Report:—

“In 1875 a paper on languages was introduced with the syllabus as an *optional* subject. In my report of that year I expressed a doubt as to the judiciousness of introducing this additional subject into the female training colleges for the following reasons, viz.: (1.) That the hours of combined study and domestic employment of the women during the residence in college were fully occupied with subjects positively essential to the success of the students as elementary schoolmistresses. (2.) That the health of the female students under training was not equal to a larger amount of study and domestic work than they were required at present to undertake. (3.) That the language which might be selected was not likely to be sufficiently well taught to enable the students either to understand their own language better, or to derive real practical gain from the acquired language. This conviction was forced upon me from the following information which I gathered from the training school authorities and from the local medical men whom I had the pleasure of conversing with at my annual visits to the different colleges, viz.: (a.) That the amount of combined study and domestic work at present required of the students occupied at least eight hours a day, and in some colleges a good deal more than eight hours a day. (b.) That in certain colleges the health of the students suffered from the additional study given to subjects not *required* by the syllabus, which additional study caused the total work of the college to be more than could be fulfilled by the students without breaking down in health. (c.) That the *optional* science subjects at present taken up vigorously in some colleges are practically put aside as soon as the examinations are over in May, thus demanding on the female students a severe amount of strain for a limited amount of actual knowledge. I therefore suggested that the examination in “languages” should be alternative with the examination in science, *i.e.*, that female students should be allowed to take either but not both of these *optional* subjects; that both should be specified as *optional*; that the science examination should be held at Christmas; that the marks for “languages” and for “the two science subjects” allowed in the syllabus should be equal in amount, and should be sanctioned for students in each year of their residence.

“In making these suggestions I desire to interfere as little as possible with the teaching in the different training schools. It will be, as heretofore, for the training school authorities to decide whether or not they choose to teach the *optional* subjects to any or to all of their students, as it will be for them to select for examination in “languages” those students who have a gift for language, and for examination in science subjects those who show an aptitude for science. The only interference which will be found may be, I trust, the prevention of too great a pressure upon the health of the young women under training; and the security that if an optional subject be selected for examination it shall be taught, not for a few weeks with severe study and then laid aside, but with some hope of continuance.”

When the necessity for the change that had been made in the syllabus was demurred to, my Lords thought it their duty to take the best advice on the question, raised by Canon Tinling, as to the hours of study proper for young women of 18 to 22, the age of the great majority of the students in training. They find their view of the propriety of their Inspector's proposals amply confirmed by the opinion expressed to them by the highest medical authority. They are advised that the time of study for female students should not be allowed to exceed eight hours a day, and that, even for this number of hours, great care is necessary in the distribution of the several subjects of study, so as to avoid undue fatigue of the nervous system. I am, therefore, directed to state that the examination for certificates at Christmas next will be conducted in accordance with the terms of the syllabus which is now in your hands.

My Lords will consider whether it will be necessary, or possible, hereafter to give effect to that part of Canon Tinling's proposals which relates to the date of the science examination; but no change can be made in this respect for the current year.

The question as to the marks to be given for the alternative subjects will also be attended to, but their Lordships trust that no such consideration will be allowed to influence the selection of the subjects to be prescribed for study to the students in any college under inspection. This point should be settled for each student by the authorities of her college, solely in consideration of her capacity for particular subjects; and each student who, on admission, is found competent to take up one of the optional branches, should, if she is to derive any real advantage from its study, be confined to that branch during the two years of her residence in the college. If any of them have passed the May examination in science successfully before they enter the college, they will receive credit for their success when the class list of candidates for certificates is made up.

I have, &c.

F. R. SANDFORD.

---

## INSPECTORS' DISTRICTS.

## SCOTLAND.

N.B.—Where more than one Inspector is employed in the same District, the Name of the Chief Inspector is printed first. The Names of the Inspectors' Assistants are printed in italics.

## SYLLABUS OF SUBJECTS OF EXAMINATION AT CHRISTMAS 1876.

### MALE CANDIDATES.

The Examination for Certificates will commence on Tuesday, the 12th  
of December 1876, at 10 a.m.

This syllabus shows the extent of the examination, but acting teachers may obtain certificates who can answer plain and simple questions confined to the following subjects :—

1. English history (leading facts).
2. Geography (elements of, and British).
3. Arithmetic (including proportion, practice, vulgar and decimal fractions).
4. English composition, spelling, and parsing.
5. The management of a school, including, in all cases, questions under sections 2 b, and 3 of the second year's paper on this subject.

Special attention is directed to the requirements of the Code (Article 19 a) respecting discipline, which are as follows :

“To meet the requirements respecting discipline, the managers and teachers will be expected to satisfy the Inspector that all reasonable care is taken, in the ordinary management of the school, to bring up the children in habits of punctuality, of good manners and language, of cleanliness and neatness, and also to impress upon the children the importance of cheerful obedience to duty, of consideration and respect for others, and of honour and truthfulness in word and act.”

All candidates must pass reasonably well in reading and handwriting.

Acting teachers attending the examination may, at their option, take the papers of the first or second year. In the former they will find plain and simple questions specially noted for them.

The relative proficiency of the candidates according to examination, and whether they take the papers of the first or second year, is recorded in their certificates.

### READING, AND REPETITION FROM MEMORY.

#### *First Year.*

To read a passage in prose, and another in verse, with a distinct utterance, due attention to the punctuation, and just expression. Each *student* must have learned at least 300 consecutive lines of poetry, from the work selected under Grammar (section 2), some of which he will be called upon to repeat at the annual inspection of the training college.

#### *Second Year.*

Candidates will be expected to show improvement in the higher qualities of reading, such as expression, modulation of voice, and the correct delivery of long or involved sentences. Each *student* must have learned at least 300 consecutive lines of poetry, or 200 consecutive lines of prose, from the work selected under Grammar (section 1), and will be called upon to repeat some part at the annual inspection of the training college.

### PENMANSHIP.

#### *First Year.*

1. To write a specimen of the penmanship used in setting copies of text hand and small hand.
2. The general character of the writing in the examination papers.

*Second Year.*

As in first year, but defects more severely visited with loss of marks.

NOTE.—Writing, as taught in schools, is apt to be too small and indistinct. The handwriting which was generally practised in the early part and middle of the last century was far better than that now in common use. Pupils should be taught to write a firm, round, legible hand.

## SCHOOL MANAGEMENT.\*

*First Year.*

1. To answer questions on the best methods of teaching reading, spelling, writing, arithmetic, and other common subjects of elementary instruction, generally, and with special reference to the development of the intelligence of children.

2. To answer questions on the art of oral teaching generally.

3. To write notes of a lesson on sanitary questions, investment of savings, and "common things."

*Second Year.*

1. To teach a class in the presence of Her Majesty's Inspector.†

2. To answer questions in writing on the following subjects:—

*a.* The different methods of organizing an elementary school.

*b.* The form of school registers, the mode of keeping them, and making returns from them.

*c.* The mode of teaching geography, history, and grammar, generally, and with special reference to the development of the intelligence of children.

3. Questions connected with moral discipline, as affecting the character and conduct of children.

## GRAMMAR AND COMPOSITION.

*First Year.*

1. The elements of grammar.

2. To parse words selected from a passage in Milton's "Allegro and Pensive," or Spectator, "Sir Roger de Coverley Essays." (*December 1876*).‡

3. To paraphrase a passage from the book selected (1876), to convert it into the order of prose, and to analyse an easy passage.

4. To write plain prose upon a given subject.

*Second Year.*

1. To paraphrase (*December 1876*) a passage from Shakspeare's "Macbeth," or Johnson's "Lives of Dryden and Pope."‡

\* Passages taken from Reading Lesson Books commonly used in schools, may be given in the papers on all subjects which admit of it, and candidates will be expected to show how they would explain such passages to children. Each paper may also contain questions on the method of teaching the elementary parts of the subject to which it relates.

† Students of the second year who are to be examined on the papers of the first year (Article 105) must also teach a class in the presence of Her Majesty's Inspector.

‡ A passage from each author will be given; either (not both) may be taken by the candidate. The work selected should be carefully read through in short portions, in illustration of the English grammar used.

2. To analyse the same passage.\*
3. To answer questions on the language, style, and subject-matter of the work chosen for paraphrase and analysis.
4. To write plain prose upon a given subject.

## GEOGRAPHY.

*First Year.*

To describe (*in words*) and draw † the map of the four quarters of the globe, and the map of each country in Europe (that of Great Britain in fuller detail).

*Second Year.*

1. Physical,
  2. Political,
  3. Commercial,
- } of the British Empire.
4. Elementary propositions in Geography, which depend upon Astronomy for explanation.‡

## HISTORY.

The questions will be such as can be answered from a perusal of any of the standard Histories of England.

Candidates will be expected to know something of the biographies of the eminent men of the period.

*First Year.*

The History of England to the death of Queen Elizabeth.

The paper will contain questions in Scottish History; and candidates in Scotland may confine themselves to those questions.

*Second Year.*

The History of England from the death of Queen Elizabeth to the year 1815.

## ARITHMETIC, ALGEBRA, AND MENSURATION. §

*First Year.*

1. To work arithmetical sums both mentally and on paper.
2. To prove and explain the rules.

\* This subject may be studied in "The Analysis of Sentences explained and simplified" (Longmans), or in many of the recently published grammars.

† The neatness as well as the correctness of these outlines will be taken into consideration. The degrees of longitude and latitude must be given, in order to obtain *full* credit for the exercise.

‡ This subject may be studied in selected chapters from Sir J. Herschel's *Treatise on Astronomy*, in Lardner's *Cabinet Cyclopædia* (Longmans), or from Arago's *Popular Astronomy*, translated by Rev. E. Tomlinson (Routledge). There are many other manuals, and most of the Text Books of Geography contain a chapter upon the same subject.

§ In *algebra*, the students of the first year should understand the four simple rules, involution, evolution, common measures, common multiples, algebraic fractions and surds, ratios and proportions, progressions and the solution of simple equations or problems producing such. Those of the second year should, at least, add to this a knowledge of permutations and combinations, the binomial theorem, logarithms, interest, and annuities, scales of notation, summation of ordinary series, and the solution of quadratic and simultaneous equations or problems producing such.

In *mensuration*, the students of the first year should understand the measurement of every species of plane rectilineal figure, and the practical application of this to land surveying. Those of the second year should add to this a knowledge of the measurement of circles or parts of a circle, cylinders, spheres, cones, and a few irregular solids, together with the practical application of this knowledge to artificers' work, timber measuring, and gauging.

The figures should be well formed and the work methodically arranged as a good model for children to imitate.

Also (in a separate paper) to answer simple questions, both theoretical and practical, in algebra, and the mensuration of plane surfaces.

### *Second Year.*

To answer more difficult questions, and work problems in arithmetic, algebra, and mensuration.

## GEOMETRY.

### *First Year.*

The first two books of Euclid, with simple deductions from the propositions.

### *Second Year.*

The first four books of Euclid, with simple deductions from the propositions.

## ECONOMY.

### *Second Year.*

Elementary Questions in Political Economy. Works on this subject, published of late years for use in schools, contain matter to which these questions will have reference.

## VOCAL MUSIC.

### *First Year.*

1. Notation: The treble and bass staves, and the relation between them.

2. Time: Simple common, and simple triple.

3. The scales, major and minor; with the intervals (major and minor, perfect or other) found in both, and the chromatic intervals found in the latter.

4. Transposition from one key to another; and transcription from one variety of time to another (as from  $\frac{3}{2}$  to  $\frac{3}{4}$ ).

### *Second Year.*

1. Notation: The alto and tenor staves, and their relations to the treble and bass.

2. Time: compound common, and compound triple.

3. Classification of intervals, as perfect and imperfect, consonant and dissonant.

4. Resolution of individual dissonant intervals.

5. Rudiments of harmony: Positions of chords; progression; inversion; discords by suspension (on fundamental basses only); the discord of the dominant seventh (in its direct form only).

NOTE.—A paper on this subject is not given to any student, about to leave the Training College, who has not passed the Musical Inspector's examination in practical skill. Acting teachers who take this paper must produce a certificate from some competent person (such as the organist of their church) that they have "*such an amount of musical skill, vocal or instrumental, as is sufficient for the purpose of teaching children to sing from notes.*"

## DRAWING.

[N.B.—This exercise does not form part of the December examination. Annual examinations, in drawing only, are held at each of the training colleges under inspection some time in November, and at the various local drawing schools in connexion with the Department of Science and Art, at times to be learned from the masters of those schools. The value of the exercises is marked, and the marks carried to each candidate's total, for a certificate under this syllabus.]

The series of exercises prescribed in the Art Directory\* of the Department of Science and Art, for a drawing certificate of the second grade.

#### LANGUAGES.

A paper in {  
 1. Latin,  
 2. Greek,  
 3. French,  
 4. German,

will be set for each year, and candidates may take one, or two, (but not more) of these languages.

#### *First Year.*

This paper will contain grammatical questions, and easy passages† in prose for translation from and into English.

#### *Second Year.*

This paper will contain harder passages† (in poetry as well as prose), for translation from and into English prose, with questions upon the construction of particular sentences.

#### SCIENCE EXAMINATIONS.\*

Additional marks will be given to any candidate who has passed with success in certain of the subjects enumerated in Article VI. of the Science Directory of the Science and Art Department, at the examinations fixed by Article XVIII. of the same Directory; provided that—

1. He obtains the minimum number of marks for a certificate according to this syllabus, without counting his science marks.
2. He has obtained a first or second class at the Science Examinations, either in honours, or in the advanced stage (Science Directory, XXI.) of the subject, or subjects, for which he claims additional marks.

N.B.—Students in Training Colleges are admissible to the Science Examination in those subjects only for which a special course of instruction is provided in the time-table of their respective colleges.

Students of the first year can be examined in the *elementary stage* only, and no students of either year can be examined in more than *three* subjects.

The subjects for which additional marks may be given (being those for which pupil-teachers and other candidates for admission to training colleges may† receive special marks) are as follows:—

- |                                |                         |
|--------------------------------|-------------------------|
| 6. Theoretical mechanics.      | 11. Organic chemistry.  |
| 7. Applied mechanics.          | 14. Animal physiology.  |
| 8. Acoustics, light, and heat. | 15. Elementary botany.  |
| 9. Magnetism and electricity.  | 23. Physical geography. |
| 10. Inorganic chemistry.       |                         |

The numbers prefixed are those which the subjects bear in the Science Directory.

---

\* For information respecting the examinations in Science and Art, and for copies of the Science and Art Directories, application may be made to "The Secretary, Science and Art Department, South Kensington, London, W."

† In 1876, the passages will be taken from *Cæsar's Bell. Gall.*, Books I. and II. Virgil's *Æneid*, Books I. and II., Xenophon's *Anabasis*, Book I., Euripides' *Hecuba*, *Derrière les Haies*, by Mme. de Witt, Racine's *Athalie*, Schiller's *Geschichte des dreissigjährigen Kriegs*, and *Das Lied von der Glocke*.

† See first schedule in English and Scotch Codes of 1875.

## FEMALE CANDIDATES.

The Examination for Certificates will commence on Tuesday, the 12th of December 1876, at 10 a.m.

This syllabus shows the extent of the examination, but acting teachers may obtain certificates who can answer plain and simple questions confined to the following subjects:—

1. English history (leading facts).
2. Geography (elements of, and British).
3. Arithmetic (as far as practice, neat and without failure).
4. English composition, spelling, and parsing.
5. The management of a school, including, in all cases, questions under section 3 of the second year's paper on this subject.

F/ Special attention is directed to the requirements of the Code (Article 19 a) respecting discipline, which are as follows:—

"To meet the requirements respecting discipline, the managers and teachers will be expected to satisfy the Inspector that all reasonable care is taken, in the ordinary management of the school, to bring up the children in habits of punctuality, of good manners and language, of cleanliness and neatness, and also to impress upon the children the importance of cheerful obedience to duty, of consideration and respect for others, and of honour and truthfulness in word and act."

All candidates must pass reasonably well in reading and handwriting.

Acting teachers attending the examination may, at their option, take the papers of the first or second year. In the former they will find plain and simple questions specially noted for them.

Teachers of infants will find questions specially bearing on the teaching of infants.

The relative proficiency of the candidates according to examination, and whether they take the papers of the first or second year, is recorded in their certificates.

## READING, AND REPETITION FROM MEMORY.

*First Year.*

To read a passage in prose, and another in verse, with a distinct utterance, due attention to the punctuation, and just expression. Each *student* must have learned at least 200 consecutive lines of poetry, from the work selected under Grammar (section 2), some of which she will be called upon to repeat at the annual inspection of the training college.

*Second Year.*

Candidates will be expected to show improvement in the higher qualities of reading, such as expression, modulation of voice, and the correct delivery of long or involved sentences. Each *student* must have learned at least 200 consecutive lines of poetry from the work selected under Grammar (section 2), in addition to what she has learned in the first year, and will be called upon to repeat some part at the annual inspection of the training college.

## PENMANSHIP.

*First Year.*

1. To write a specimen of the penmanship used in setting copies of text hand and small hand.

2. The general character of the writing in the examination papers.

*Second Year.*

As in first year, but defects more severely visited with loss of marks.

NOTE.—Writing, as taught in schools, is apt to be too small and indistinct. The handwriting which was generally practised in the early part and middle of the last century was far better than that now in common use. Pupils should be taught to write a firm, round, legible hand.

## SCHOOL MANAGEMENT.\*

*First Year.*

1. The methods and principles of elementary teaching, generally, and with special reference to the development of the intelligence of children.

2. Notes of lessons.

3. To answer questions on the form of, mode of keeping, and making returns from, school registers. (*Students* of the first year, who are proceeding to a second year's residence, may omit *this part* of the paper.)

4. Special subjects for candidates who, coming from, or being about to take, infant schools, desire to obtain special certificates as teachers of infants :—

*a.* Method of teaching infants, and of conducting an infant school.

*b.* Notes of object lessons;—such as common domestic processes; functions of the human body; common plants, animals, and minerals—their appearance and use.

*Second Year.*

1. To teach a class in the presence of the inspector.†

2. To answer questions in writing on the following subjects :—

*a.* The different methods of organizing an elementary school.

*b.* The form of, the mode of keeping, and of making returns from school registers.

3. Questions connected with moral discipline, as affecting the character and conduct of children.

NOTE.—Only a per-centage of the marks for these exercises will be given in the case of those students (of the second year)† who do not present a certificate signed by the mistress of the practising school or other officer responsible for the practical instruction of the students in the art of teaching, and countersigned by the superintendent of the training college, stating that they are satisfied with the aptitude and proficiency of the candidates as practical teachers.

## GRAMMAR AND COMPOSITION.

*First Year.*

1. Parsing and analysis of simple sentences.

2. An explanation in clear and simple language of a passage from Goldsmith or Scott (*alternative*).

The examples for these exercises will be taken in 1876 from the *first* canto of *The Lady of the Lake*, and from Goldsmith's *Traveller* and

---

\* Passages taken from the reading lesson books commonly used in schools, may be given in the papers on all subjects which admit of it, and candidates will be expected to show how they would explain such passages to children. Each paper may also contain questions on the *method of teaching* the elementary parts of the subject to which it relates.

† Students of the second year who are to be examined on the papers of the first year (Article 105) must teach a class, and present a certificate of practical skill like other students of the second year. *Students* seeking to pass under Article 87 (*b*) must also teach a class and present a certificate of practical skill.

*Deserted Village (together).* One only of the authors named may be selected by candidates.

3. To write plain prose upon a given subject.

*Second Year.*

1. Parsing and analysis of sentences.

2. An explanation in clear and simple language of a passage from Wordsworth or Milton (*alternative*).

The examples for these exercises will be taken in 1876 from *Paradise Lost*, Book I., and from the *first* book of Wordsworth's *Excursion*. One only of the authors named may be selected by candidates.

3. To write plain prose upon a given subject.

GEOGRAPHY.\*

*First Year.*

1. Elementary knowledge of the shape, size, and motions of the earth, and of the distribution of land and water upon its surface.

2. The physical and political geography of Great Britain and Ireland.

3. Map drawing, confined to this subject.

*Second Year.*

1. The British Empire and its dependencies.

2. The physical and political geography of Europe.

3. Map drawing, confined to these subjects.

HISTORY.†

*First Year.*

Elementary facts and general outline to the accession of the Tudors.

*Second Year.*

Elementary facts and general outline from the accession of the Tudors to the present time.

The papers will contain questions on the history of Scotland.

ARITHMETIC.

*First Year.*

1. The first four rules.

2. Practice, and bills of parcels.

3. Simple proportion.

4. Vulgar fractions.

5. Decimal fractions.

6. An exercise in mental arithmetic.

The figures must be well formed, and the sums worked methodically and as good models for children to imitate.

*Second Year.*

1. As in first year, but defects in method and neatness more severely visited with loss of marks.

2. Simple interest.

\* No questions will be set except such as can be answered from text books in common use.

† All questions set will be such as can be answered from text books in common use, except that the final section will embrace subjects respecting the progress of the country, and the national changes in food, clothes, dwellings, locomotion, &c.

## SEWING AND CUTTING OUT.

*First Year.*

To cut out, and make, parts of a shirt.

*Second Year.*

The work of a needlewoman in various branches applicable to the family of a working man.

## DOMESTIC ECONOMY.

One paper will be set for both years.

*First Year.*

1. Clothing. | 2. Food. | 3. Cooking. | 4. Laundry.

*Second Year.*

1. Duties of servants.
2. Household expenses, and investment of money.
3. Practical rules for the preservation of health.

NOTE.—Only a per-centage of the marks for this paper will be given in the case of those students (of both years) who do not present a certificate signed by the superintendent, to the effect that she is satisfied with their practical proficiency in some specified portion of the work usually comprehended under the name of industrial training.

## VOCAL MUSIC.

*First Year.*

1. Notation: The treble and bass staves, and the relation between them.
2. Time: Simple common and simple triple.
3. The scales, major and minor; with the intervals (major and minor, perfect or other) found in both, and the chromatic intervals found in the latter.
4. Transposition from one key to another; and transcription from one variety of time to another (as from  $\frac{3}{4}$  to  $\frac{3}{8}$ ).

*Second Year.*

1. Notation: The alto and tenor staves, and their relations to the treble and bass.
2. Time: Compound common, and compound triple.
3. Classification of intervals, as perfect and imperfect, consonant and dissonant.
4. Resolution of individual dissonant intervals.
5. Rudiments of harmony: Positions of chords; progression; inversion; discords by suspension (on fundamental basses only); the discord of the dominant seventh (in its direct form only).

NOTE.—A paper on this subject is not given to any student, about to leave the Training College, who has not passed the Musical Inspector's examination in practical skill. Acting teachers who take this paper must produce a certificate from some competent person (such as the organist of their church) that they have "*such an amount of musical skill, vocal or instrumental, as is sufficient for the purpose of teaching children to sing from notes.*"

## DRAWING.

[N.B.—This exercise does not form part of the *December* examination. Annual examinations, in drawing only, are held at each of the *training colleges* under inspection some time in November, and at the various *local drawing schools* in connexion with the Department of Science and Art, at times to be learned from the masters of those schools. The value of the exercises is marked, and the marks carried to each candidate's total, for a certificate under this syllabus.]

The series of exercises prescribed in the Art Directory\* of the Department of Science and Art, for a drawing certificate of the second grade.

#### LANGUAGES.

A paper in { 1. Latin,  
2. French,  
3. German,

will be set for each year, and *candidates who have not attended the Science Examination*, in the May preceding their Examination under this Syllabus, may take *one* of these languages.

#### *First Year.*

This paper will contain grammatical questions, and easy passages† in prose for translation into English.

#### *Second Year.*

This paper will contain harder passages† (in poetry as well as prose), for translation into English, with questions upon the construction of particular sentences.

#### SCIENCE EXAMINATIONS.\*

Additional marks will be given to any candidate who has passed with success in certain of the subjects enumerated in Article VI. of the Science Directory of the Science and Art Department, at the examinations fixed by Article XVIII. of the same Directory, provided that—

- I. She obtains the minimum number of marks for a certificate according to this Syllabus without counting her science marks.
- II. She has obtained a first or second class at the science examination, either in honours, or in the advanced stage (Science Directory, XXI.) of the subject or subjects for which she claims additional marks.
- III. She does *not* take the language paper at the Christmas examination.

N.B.—Students in Training Colleges are admissible to the science examination in those subjects only for which a special course of instruction is provided in the time-table of their respective colleges. Students of the first year can be examined in the *elementary stage* only, and no student of either year can be examined in more than *two* subjects.

The subjects for which additional marks may be given (being those for which pupil-teachers and other candidates for admission to training colleges may‡ receive special marks) are as follows:—

- |                                |                         |
|--------------------------------|-------------------------|
| 6. Theoretical mechanics.      | 11. Organic chemistry.  |
| 7. Applied mechanics.          | 14. Animal physiology.  |
| 8. Acoustics, light, and heat. | 15. Elementary botany.  |
| 9. Magnetism and electricity.  | 23. Physical geography. |
| 10. Inorganic chemistry.       |                         |

The numbers prefixed are those which the subjects bear in the Science Directory.

\* For information respecting the examinations in Science and Art, and for copies of the Science and Art Directories, application may be made to "The Secretary, Science and Art Department, South Kensington, London, W."

† In 1876, the passages will be taken from Cæsar's *Bell. Gall.*, Books I. and II., Virgil's *Æneid*, Books I. and II., *Derrière les Haies*, by Mme. de Witt, Racine's *Athalie*, Schiller's *Geschichte des dreissigjährigen Kriegs*, and *Das Lied von der Glocke*.

‡ See first schedule in English and Scotch Codes of 1875.

PAPERS relating to ELEMENTARY EDUCATION, presented to  
PARLIAMENT by the COMMITTEE OF COUNCIL ON EDUCATION.

Report to Her Majesty the Queen in Council, 1874-75 :—

Report and Parts I. to IV. of Appendix. [C. 1265.—I.] Price 3s. 9d.

Part V. of Appendix. [C. 1265.—II.] Price 1s. 7d.

Report by the Committee on Education in Scotland to Her Majesty the  
Queen in Council, 1874-75. [C. 1266.—I.] Price 1s. 6d.

*Minutes, &c.*

New Code of Regulations (1876). [C. 1458.] Price 2d.

New Code of Regulations for *Scotland* (1876). [C. 1459.] Price 2½d.

Minute (26th June 1875) fixing the Conditions under which Pensions may be  
granted to certain Teachers [C. 1270]. Price ½d.

Minute (16th July 1875) modifying certain Conditions of the Minute of 26th  
June 1875, under which Pensions may be granted. [C. 1280.] Price ½d.

*Returns.*

Return relating to the District of the School Board for London. (Mr. Sandford.)  
H.C. 229. Price 4½d.

Return of the Standards under the Education Code, adopted by School Boards,  
in *England* and *Wales*, the passing of which entitles children to partial or  
total exemption from school attendance. (Mr. Salt.) H.C. 405. Price 1d.

Return of the attendance of children in Public Elementary Schools in the  
counties of Dorset, Notts, Suffolk, and Warwick. (Mr. Dixon.) H.C. 282.  
Price ½d.

Return school fees (*England* and *Wales*). (Mr. Heygate.) H.C. 133. Price  
4s. 4d.

Return relating to religious teaching of children, &c. in School Board schools  
in *England* and *Wales* (in continuation of Parliamentary Paper, No. 404 of  
Session 1874). (Mr. Sampson Lloyd.) H.C. 471. Price 6d.

Nominal return of all schools in *England* and *Wales* transferred to School  
Boards under section 23 of "The Elementary Education Act, 1870." (Mr.  
J. G. Talbot.) H.C. 253. Price 5d.

Return of the number of Public Elementary Day Schools (Church, British,  
Roman Catholic, and Board respectively) in *England* and *Wales*, inspected  
in the years ending 31st August 1874 and 1875 respectively. (Viscount  
Sandon.) H.C. 78. Price 3d.

Return relating to School Boards (*Scotland*). (Viscount Sandon.) H.C. 415.  
Price ½d.

Return of the Schools, receiving Government grants, inspected in the London  
School Board District in the year ending 31st August 1875. (Mr. John  
Talbot.) H.C. 129. Price ½d.

Return of the amount contributed since the year 1839, when the Education  
Department was formed, towards the Building and Maintenance of Ele-  
mentary Schools. (Mr. Heygate.) H.C. 208. Price ½d.

Return of the Number of Public Elementary Schools in which Religious  
Instruction is given. (Mr. Cowper-Temple.) H.C. 209. Price ½d.

Return of all School Boards ordered to be formed by the Education Depart-  
ment in those Districts where Elementary School accommodation has not  
been found to be insufficient; of the names of those School Boards so formed  
who have adopted compulsory byelaws for the attendance of the children in  
the voluntary schools of their respective districts; and of the number of  
schools, with the amount of accommodation in each, under the management  
of such School Boards. (Mr. Hammond.) H.C. 431. Price 1d.

Nominal return of all places where School Boards have been established.  
(Mr. John Talbot.) H.C. 416. Price 4d.

Return showing, by counties, the number of School Boards which have and which have not schools under their management ; also showing the number which have appointed visitors for such schools, and in the girls' schools lady managers, together with the cost of the staff of such schools, &c. H.C. 264. Price 1*d*.

Return of all School Districts being boroughs where a rate of threepence in the pound on the rateable value will not produce six shillings per head of one sixth of the population of such school district. (Mr. William Edward Forster.) H.C. 295. Price 1*d*.

Return of all School Districts, whether boroughs or civil parishes, where a rate of threepence in the pound on the rateable value will not produce six shillings per head of one sixth of the population of the parish or school districts. (Lord Robert Montagu.) H.C. 299. Price 1½*d*.

---

\* \* \* Those of the above-mentioned Papers marked C. (Command) may be purchased from Messrs. Eyre and Spottiswoode, Sale Office, House of Lords, and East Harding Street, Fleet Street, or from Mr. Hansard, 32, Abingdon Street, Westminster, and 13, Great Queen Street, Lincoln's Inn Fields; those marked H.C. (House of Commons) from Mr. Hansard only. The order should specify the Parliamentary number of the paper, as given above. Prepayment of the postage upon Parliamentary Proceedings is optional, when the circulation is within the United Kingdom; and if it be made in part, the simple difference only is charged.

---

## TABLES.

## (No. 1.)—EXPENDITURE FROM EDUCATION GRANTS.

(TABLE A.)—Classified according to Object of Grant.

	For Year ended 31 March 1875.	Compared with Year ended 31 March 1874.	
		Increase.	Decrease.
1. In Annual Grants:—	£ s. d.	£ s. d.	£ s. d.
(a.) According to the Code of 1860, viz.:			
Grants in Augmentation of the Salaries of Certificated Schoolmasters and Schoolmistresses -	26,328 2 6	- - -	17,403 11 8
Grants to pay the Stipends of Pupil-teachers, and Gratuities to the Schoolmasters and Schoolmistresses instructing them -	19,644 16 8	- - -	43,665 0 10
Stipends to Assistant Teachers -	315 0 7	- - -	496 13 1
Special Allowances for Drawing -	- - -	- - -	69 11 2
Grants to Industrial Classes in connexion with Elementary Day Schools -	- - -	- - -	- - -

Article 21.—If the time table of the school, in use throughout the year, has provided for one or more specific subjects of secular instruction according to the table in Schedule IV.—  
*a.* A grant of 4s. per subject may be made for every day scholar presented in Standards IV.—VI. (Article 28) who passes a satisfactory examination in not more than *two* of such subjects.

*b.* Any scholar who has previously passed in Standard VI. may be presented for examination in any *three* of such specific subjects.  
*c.* No payment will be made under this Article if less than 75 per cent. of the passes attainable in the Standard Examination by the scholars presented for examination (Article 28) has been obtained.

*d.* No grant may be claimed under this Article on account of any scholar who has been examined, in the same subject, within the preceding year, by the Department of Science and Art.

See the column for "Examination," in Table (No. 10.)

\* Article 19. The managers of a school which has met not less than 400 times, in the morning and afternoon, in the course of a year, as defined by Article 13, may claim at the end of such year—

A. The following sums per scholar, according to the average number in attendance throughout the year (Article 26).

(1.) 4s.

(2.) 1s. if singing forms a part of the ordinary course of instruction.

(3.) 1s. 6d., if the inspector reports that the organisation and discipline are *excellent*; or, 1s. if he reports that they are *good*.

The inspector will bear in mind, in reporting on the organisation and discipline, the results of any visits of surprise (Article 12), made in the course of the school year.

B. For every scholar, present on the day of examination, who has attended not less than 250 morning or afternoon meetings of the school :—

1. If above four, and under seven, years of age at the end of the year (Article 13),—

(a.) 8s., or

(b.) 10s. if the infants are taught as a separate department, by a certificated teacher of their own, in a room properly constructed and furnished for their instruction.

2. If more than seven years of age, subject to examination—

3s. for passing in reading;

3s. for passing in writing;

3s. for passing in arithmetic.

C. 1. The sum of 2s. per scholar, according to the average number of children, above 7 years of age, in attendance throughout the year (Article 26), if the scholars present on the day of examination, in the classes from which children are examined in Standards II. and III., show an intelligent and grammatical knowledge of the passages read.

2. A further sum of 2s. per head on the same average if the classes from which children are examined in Standards IV., V., pass creditably in history and geography.

3. The extent of the examination is indicated by the passages printed in italics in Article 28. In districts where Gaelic is spoken the intelligence of the children examined, under this paragraph, in Standards II. and III., may be tested by requiring them to explain in Gaelic the meaning of the passage read.

4. The examination is not confined to the scholars who have made 250 (or 150) attendances; and one half of the children, examined under this paragraph of Article 19, must pass creditably.

5. The mode of examination (whether oral or on paper) is left to the discretion of the inspector.

+ Article 22. The managers of a school which has met not less than 60 times in the evening, in the course of a year, as defined by Article 107, may claim (Articles 108 and 109),—

(a.) The sum of 4s. per scholar, according to the average number in attendance throughout the year (Article 26).

(b.) For every scholar, above 13 years of age, who has attended not less than 40 evening meetings of the school 7s. 6d., subject to examination (Article 28) viz., 2s. 6d. for passing in reading, 2s. 6d. for passing in writing, and 2s. 6d. for passing in arithmetic.

Under the Code (1874) the grant is reduced—

Article 17d. By the amount due for the portion of the year defined by Article 13, during which the principal teacher was not duly certificated (Article 43), except in the case of evening schools, which may be taught by assistant teachers fulfilling the conditions of Article 79.

Article 32 (a). By the excess above—

\*1. The income of the school from fees, rates, and subscriptions;

\*2. The income of 15s. per day scholar (*see* Article 21 c.), and of 10s. per evening scholar, according to the average number in attendance; and

\*3. One half the expenditure on the annual maintenance of the school.

Article 32 (b). By not less than one-fourth nor more than one-half in the whole upon the inspector's report, for faults of instruction, discipline or registration, on the part of the teacher, or (after six months' notice) for failure on the part of the managers to remedy any defect in the premises which seriously interferes with the efficiency of the school, or to provide proper furniture, books, maps, and other apparatus of elementary instruction. If the inspector at a visit without notice (Article 42), not less than six months after intimation has been given of the requirements of the Department reports that they have not been carried into effect, a deduction may be made from the next grant to the school.

Article 32 (c). At the rate of 80s. for the year, for every 40 scholars, after the first 20, of the average number in attendance, unless there has been during the year one pupil-teacher fulfilling the conditions of Article 79, for every such 40 scholars.

A certificated (Article 43) assistant teacher, or an assistant fulfilling the conditions of Article 79, is equivalent to two pupil-teachers. This reduction of the forfeiture is made only once for the same pupil-teacher, and not in successive years for the same school.

Article 32 (d). The payments under Article 19 B. (c.), may be withheld if the inspector reports that the scholars under 7 years of age are not satisfactorily taught.

Article 32 (e). No payment will be made under Article 21 if less than 75 per cent. of the passes attainable in the Standard Examination by the scholars presented for examination (Article 38) has been obtained.

\* In operation for part of the year only.—Omitted from the Code of 1875.

+ Under the Code of 1875, if a staff of pupil-teachers (Article 70) is not provided, at the rate of one for every 40 (or fraction of 40) scholars in average attendance, after the first 60, a deduction, at the rate of 1l. for the year, will be made on account of each of the first 20 scholars out of every 40 for whom a pupil-teacher is required but not provided.

60, a deduction, at the rate of 1l. for the year, will be made on account of each of the first 20 scholars out of every 40 for whom a pupil-teacher is required but not provided.

## REPORTS ON ELEMENTARY SCHOOLS.

---

GENERAL REPORT, *for the Year 1875, by Her Majesty's Inspector,*  
A. DEY, Esq., M.A., LL.M., CANTAB, Fellow of St. Peter's College,  
Cambridge, *on the SCHOOLS inspected by him in SOUTH FORFARSHIRE.*

---

MY LORDS,

Remarks on  
the changes  
brought about  
by the Edu-  
cation Act.

WHILE acknowledging the honour of presenting to you my first report I am constrained to confess my own diffidence. It is not quite three years since I commenced my present duties. The time has been stirring as the circumstances have been anomalous. An old and tried system in the national economy has been superseded by a measure intended to be at once more comprehensive and detailed. A vast accession of power and responsibility has devolved on your Lordships. Hitherto you had control over the public money and could dispense premiums to deserving merit. This and little more. Now you are the sole guardians of national elementary education. By liberal donatives you can encourage the aspiring, and where persuasion is ineffectual you can employ more cogent arguments. You require to know the name, age, attainments, and progress of every child in Scotland under 13. Boards, teachers, school supply, and the whole machinery of education are the objects of your supervision. You wish to commend what is good, to correct what is defective down to the minutest details. Your enlarged responsibilities have increased those of your officers. The circumstances make additional demands on their vigilance and judgment. It is not merely that they have to report whether each child in their district is instructed in the rudiments of education, they have to observe everything educational, and along with facts they are permitted to offer to your Lordships suggestions.

Nature and  
extent of dis-  
trict.

Up almost to the present time my district has been the county of Forfar. Though sufficiently compact there is no lack of variety. It embraces sequestered highland glens, running up into the Grampians, the rich agricultural valley of Strathmore, and seats of busy manufacturing industry along the sea-coast. Thus I have had to inspect schools of every class of children, and under the supervision of every variety of board. I arrived in the county in the heat of the elections to the school boards. I found the majority of people exulting in high anticipations of the benefits to accrue from the Education Act, while a few bewailed the ruin of the higher education. I had no previous statistics to guide me, nor were any statistics possible, nor, perhaps, desirable. I understood the Education Act to require that accommodation and materials for education should be provided within reasonable distance of every child in the county, and that every child should be educated. These requirements were sufficiently definite, and it is part of my commission to tell your Lordships how these things have been carried out.

School boards  
in Forfarshire.

The boards, as a whole, entered on their duties with a spirit of earnestness, energy, and determination to accomplish that for which they were appointed. In conversation recently with an intelligent gen-

tleman, who was a member of two English school boards, I was told that the members of both these boards did little more than obstruct education. Most of them were originally opposed to the Education Act as vexatious and expensive, and, appointed to carry out its provisions, they made it their object to keep down the rates without the least regard to the education of children. I certainly cannot lay the same to the charge of any board in Forfarshire. All have not been equally active, equally judicious, or equally harmonious, but I believe all have been conscientiously anxious to advance education as the first point, and after that that the burden should lie as lightly as possible on the county. The boards were also supported by the great body of the people. I was much delighted on one occasion with the cheerful enthusiasm of a farmer lady who was nearly 60, and had no children to educate in a district where the rate was 9d. This being the spirit in which the work was begun, the result could not be other than satisfactory. Structures of modest elegance and at moderate expense sprang up. Here and there a board has been dilatory, but rather from incapacity or indecision than from any sinister motive. An occasional board has been liberal with apology and explanation where a more creditable apology would have been the accomplishment of the work to which they were appointed; these are exceptions, and are neither many nor important.

The work, as a whole, has progressed steadily, and at the expiry of the time of office of the present boards I believe every district in Forfarshire will be supplied with convenient and ample school accommodation.

I have noticed with regret that while the boards have been liberal in providing schools the same spirit has not always been manifested with regard to teachers' houses. This, I am happy to say, applies only to a very few. Ultimately this is detrimental to the interests of the children. Nothing affects the character of a teacher, either morally or physically, more than his dwelling-place. The man who lives in a hovel becomes an invalid and coarse, while a cheerful and elegant habitation elevates the sentiments and tastes, increases the self-respect, and enlarges the sympathies. Ill-health, discontent, frequent changes of teachers are the consequences of this injudicious parsimony, and from all these the school suffers materially as well as educationally. Inefficiency in the school is visited by a reduction of the government grant, and the money thus entirely lost to the district has to be made up from the pockets of the ratepayers.

Teachers' houses.

The last three years have formed an important epoch in the history of the teaching profession; teachers have been in demand and salaries have increased. They have, however, been subjected to much personal discomfort from the great influx of pupils and the insufficiency of room. This, of course, is merely temporary, and on the other hand the gains have been substantial and permanent.\*

Change in the circumstances and prospects of teachers especially important in the case of females.

Everyone who has reflected on the recent changes must have noticed one unpleasant feature. While the profession has been made more lucrative, and in other respects more attractive to male teachers, the extent to which the prospects of female teachers have been injured I consider ought to be a matter for the greatest anxiety. Formerly there were many excellent female schools in connexion with the various denominations, and the prospects which these afforded induced many capable and accomplished ladies to become teachers. Boards have

\* Since this was written I am glad to see that the school board of Dundee have had this matter under consideration.

shown a tendency to establish mixed schools, and whether by design or by accident they have, so far as I am aware, uniformly appointed males to the head offices. This leaves nothing for females but the subordinate offices. They teach only the infant and elementary classes, and even in these departments their duties are ill-defined if at all. They are absolutely dependent on the head master, who may usurp the honour and profit of their successful labour, but may allow them a liberal share of the reproach of failure. If some remedy be not found for this we must speedily lose the best class of female teachers. While the newspapers are teeming with advantageous offers to males, I seldom see one that would not be rejected by all the best female teachers; I think this a matter that deserves the most serious consideration from boards. How far females might be successful teachers of theology or practitioners in medicine I do not pretend to say, but no man that knows anything of the subject will deny them the honour of being successful teachers. Teaching is a work congenial to their nature, and consequently numbers of excellent ladies have entered into the profession. Their influence, too, upon children is of the most elevating and beneficial kind. The finest schools, in my experience, are those in charge of females, and I know that most, or all, of my colleagues would give similar testimony.

**Pupil-teachers.** Pupil-teachers have been the least satisfactory part of the educational machinery. In several respects the system has not worked well as far as I have observed it. Perhaps, however, I should not lay this so much to the charge of the system as to defects palpable and easily removed. In the first place there has been a universal complaint that apprentices have been difficult to obtain. It is very desirable that the services of smart boys should be secured, but at present it is the rule that only the second or third rate boys can be got, and these are often backward in education at starting. Besides, those that accept of the office do it without enthusiasm, and, not unfrequently, till something better turns up. A boy at 13 who has passed the 5th or 6th Standard has a considerable market value, and, even if he had an inclination for teaching, his parents are little disposed to engage him for four or five years for such a small and precarious allowance as has been hitherto made to pupil-teachers. Again, I think pupil-teachers have been employed to excess. It has always seemed to me that to expect any teacher to take charge of 230 pupils and 4 pupil-teachers is unreasonable. Pupil-teachers at the best require a great deal of supervision, their assistance in teaching, especially during the first half of their apprenticeship, is not great, while, on an average, three of the four are in this elementary stage. The responsibility of their own education also rests on the teacher. I am happy to see, however, that in my district at least there is a rapid improvement going on in this matter as boards are judiciously allowing assistants more frequently.

Remarks on pupils. Detailed statistics not instructive in present circumstances.

Passing now from the teachers to the taught it is not necessary for me to trouble your Lordships with figures, showing how many I found present in school, how many were qualified for examination, how many passed, &c. Everything has been so unsettled during the two and a half years that I have been inspecting that little information can be extracted from such statistics. It is enough to say that I have seen nearly every child in Forfarshire that could be accommodated, for the people as a whole have responded most heartily to the Education Act, and the children have come pouring in, in such numbers as almost to overwhelm school boards who had made no provision for them. Many of these were very backward in education, and this circumstance, together with the want of proper school supply, has made the teachers' hands more than

full. Nevertheless the work has been going on with the utmost vigour and cheerfulness. The most hearty and laudable efforts have been made on all hands to work up to the requirements of the Code and all its various articles have received close attention.

The question of discipline is at all times a difficult one, but it must have pressed peculiarly hard on the teachers during the past two years with the rooms full of raw children. Discipline, as a rule, has been good but yet I think it is a subject that deserves more consideration than it has as yet received. I do not know whether or not it be possible to prescribe general rules for the guidance of teachers, but the present state of matters is by no means satisfactory. On the one hand teachers and boards are told that they cannot expel any child out of a public school however improper its behaviour; teachers on the other hand inflict corporal punishment at their peril. I have heard a sheriff remark that if any case were brought into court where the least mark could be seen on the skin of a child, he would feel it his duty to convict of assault. Without offering any suggestions I mention this subject to show the unpleasant position in which teachers are placed, and to record my opinion that in all questions of discipline the teacher deserves the support of the board and the sympathy of the public. The instances are indeed rare where a teacher is harsh with an obedient boy or girl, and they are still more rare in which he inflicts serious injury on either. These remarks apply only to the extreme cases. Discipline to be really good and to have any positive merit must be the result rather of the healthy moral influence of the teacher, but yet we cannot ignore the fact that there will be cases in every school where this does not apply.

The question of discipline an important one.

Let us pass now to a little more particular consideration of the working of the Code. The first noticeable feature in it is the gratifying flexibility with which your Lordships change and improve any and every point that seems to require it. This must give much satisfaction to managers and especially to teachers. Remarks on the Code.

A change in the conditions of earning the geography and history grant was needed, but it is perhaps rather violent, I fear that a large number of schools in my district at least will not be able to present 20 per cent. above the 3rd Standard in 1876.\* Geography and history grant.

I have sometimes had a little difficulty in recommending the grant for infants. I should have been glad if it were possible to recommend a reduction for deficiencies in the instruction of infants without withholding the grant altogether. I understand that Article 32 C. applies in such a case, but it would be better if some penalty could be inflicted under 19 B. 1. Grant for infants.

Specific subjects have not been a success in my district. Not many schools have taken them up. I think also in some cases they ought not to have been attempted. I doubt much how far it is wise to encourage specific subjects in Standard IV. at all. Boys seem to have enough to do to advance from Standards III. to IV. without any adventitious difficulties. To see a pupil at an advanced age wasting his time over the declensions of nouns and verbs in the Latin grammar while deficient in his knowledge of English reading, and intelligence, grammar, geography, and history is very displeasing. Teachers ought to exercise considerable discretion in the matter of specific subjects. Specific subjects.

---

\* Since this paragraph was written the 20 per cent. has been changed to 10, which will meet the difficulty.

Those who should take up specific subjects.

Uniformity in the rate of payment of specific subjects not desirable.

Thorough knowledge in few subjects recommended in preference to superficial knowledge in many.

Effects of the Act of 1872 on "higher education."

Grant or discipline.

They should never forget that the vast majority of schools are, and must remain elementary, that their object is to give a good, sound, practical education to the masses. This is their primary object but if it were possible to devise some method by which those who have been at school regularly and are likely to remain so for sometime, and especially by which the precocious boys could be encouraged to proceed with the higher subjects, I should consider it much preferable to the present system. This I think would be effected by a much larger grant for these subjects, and a much stricter examination in them.

There might also be variety in the payments. English literature and such like need not, and I think ought not to be paid at the same rate as mathematics and classics. English literature as at present prescribed, is an easy and useful exercise and is perhaps sufficiently rewarded, it is also kindred to the other subjects on which Standards V. and VI. are engaged, as composition, intelligence, and grammar. This subject also can be taught with profit to whole standards and thus 4s. a head makes a pretty fair return. Most of the other subjects should be taught only to the few, to those namely, who have some reasonable prospect of continuing to prosecute them for some time. The sight of a whole class of boys, perhaps from the 5th Standard, declining Latin nouns, feebly attempting the elements of algebra, or endeavouring vaguely to comprehend the dew point while their writing is bad, their intelligence and grammatical knowledge of English imperfect, their notions of geography limited to the position of a few towns, and that of history to a few dates, is anything but satisfactory. There is a vast difference between the boy who knows a thing thoroughly and one who knows it fairly. Let a boy leave school a good writer, for example, it will be a pleasure and a profit to him all his life. To him writing a letter or anything else that implies writing is a pleasing pastime. It is the same with geography, history, or any other subject that is really mastered; it becomes a part of oneself and is never forgotten, the mind recurs to it easily and frequently. On the other hand deduct a little from the attainments in these ordinary subjects, and bestow it on the Greek grammar or the like and your pupils leave school imperfect in every thing. Writing is repugnant to their mind, they write only when they must, and in consequence their writing deteriorates. They execute nothing with which they are not themselves dissatisfied, they are in short badly educated, and it is poor compensation to them that they can decline  $\delta$ ,  $\eta$ ,  $\tau$ , if indeed they remember anything about it. In conclusion, what I like to see is, boys thoroughly well drilled in the ordinary subjects, including spelling, composition, grammar, geography, and history, with any further attempts judiciously restricted to the few, to the precocious, to those who will continue.

The Act of 1872 will be an incalculable benefit to the country. It lays the foundation of higher intelligence in the lower orders, and must in time greatly diminish pauperism and crime, by elevating the sentiments and tastes of the people. But I think it would be useless to pretend that it encourages to any great extent that which has been generally meant by "higher education" in Scotland. The term is applied to that education on the merits of which a boy can proceed to the University. Some considerable change is required in the Act before elementary schools will attempt to lay even the foundation of such an education.

There seems to be some difference of opinion about the grant for discipline under Article 19. From the last Blue Book I see that one of my colleagues has taken what appears to me the true view of the question. Discipline is a means to an end and has not positive merit

by itself. No school can be considered in a satisfactory condition where the discipline is not good, and the absence of it is a defect that should be punished. On this head I cannot do better than express my general concurrence with my colleague Mr. Hall.

There is nothing in the management of a school that has caused more confusion, discomfort, and loss than registers. They are and must always remain the source of a good deal of trouble to the teachers. It would, however, be an undoubted advantage if a uniform system of registers were adopted. Teachers and pupil-teachers would become familiar with them and could keep them with more facility. Managers also would be able on their occasional visits into schools to inspect them and would thus avoid the necessity of signing the returns required solely at the prompting of the teacher, as many of them do at present. I should be very glad to see the Education Department prescribe registers of their own.

Registers.

The most important provision in the Education Act I consider to be the compulsory clause, but the working of it has not been uniformly successful in Forfarshire. Several decisions under it have been very discouraging to school boards. The people as a whole, happily do not require it, and for the few who are affected by it, I should be glad to see it more decided and stringent. This is the more desirable as there is not the least danger of boards abusing it to the annoyance of any one.

The compulsory clause

Half-timers have been the subject of discussion for some time, and I hope will soon be the subject of legislation. They are very difficult to manage in an ordinary school. In fact, they cannot be educated without exclusive attention to themselves, and this teachers cannot afford to give; it would be unreasonable to expect them to give especially as the attendance of these pupils at these schools, for any length of time, is very problematical. Of a large number of half-timers that I find in a school, very few have made the attendances required for earning the grant, and of those that had made the attendances, many left the week or the day before inspection. The teacher cannot rely on them, and therefore cannot be expected to give them his valuable time. Besides, I am told by teachers that the extent to which children are admitted under age to work both half-time and full time is notorious. There are some half-time schools not under Government inspection, and here education is not likely to be very efficiently given, for they want the stimulus which other schools have.

Half-timers.

There still remain a good many adventure elementary schools. These are as a rule very demoralizing places, for the accommodation is inconvenient and unhealthy, and the teachers ill-qualified to give instruction. Boards will no doubt soon proceed to inquire into the circumstances of these schools in accordance with the power vested in them by the Education Act; when they have done so they will not allow children to attend them unless they are thoroughly efficient. This remark applies also to half-time schools connected with works but not under inspection.

Adventure elementary schools.

I here take occasion to remark about "visits without notice"; I do so because I believe teachers especially to have an erroneous conception of them. They imagine that such visits are prompted by distrust of them in particular. As I understand the matter, your Lordships are influenced by no such sentiment. A large grant of public money is made to each school on certain conditions which are not intended to be either hard or vexatious. It is fair and reasonable that your officers in the district should ascertain at any time whether these conditions are complied with. The Inspector accordingly visits a school occasionally to

Visits without notice.

see whether the managers keep the premises comfortable and healthy ; whether the teacher is supplied with all the necessary appliances for his work, as books, maps, &c. ; whether the children are attending regularly ; whether registers are properly kept, &c. In short, the principal object is to see that the teacher and pupils are thoroughly comfortable ; it will be sufficiently tested at the annual inspection how the teacher personally discharges his duties.

I cannot conclude without acknowledging to your Lordships my great obligations to my assistant, Mr. Thompson. His services have been to me most invaluable. Before he joined me he was teacher of one of the largest schools in Aberdeen, and there was hardly a failure at either of the three inspections previous to his leaving it. The experience there gained made his opinion on matters of detail of great value. This, however, is but a small part of his merit. His gentlemanly bearing, his self-respect, his faithful discharge of all his duties, are deserving of the highest praise, while his laudable ambition for self-improvement and his ever-increasing attainments merit the esteem of teachers, and should be a pattern for at least the younger of them.

I have the honour to be, &c.

A. DEY.

*To the Right Honourable*

*The Lords of the Committee of Council on Education.*

---

GENERAL REPORT, for the Year 1875, by Her Majesty's Inspector,  
J. MACLEOD, Esq., on the SCHOOLS inspected by him in the Counties  
of CAITHNESS, SUTHERLAND, and ROSS, and the Islands of LEWIS,  
HARRIS, and STROMA.

MY LORDS,

October 1875.

I HAVE the honour to submit to your Lordships, my first general report upon the schools subject to government inspection, in the northern district of Scotland, for the year ended 31st August.

The district includes on the mainland the counties of Caithness, Sutherland, and Ross; and the islands of Lewis, Harris, and Stroma. On the mainland I had to travel in one direction to John O'Groat's, 92 miles distant from my permanent residence; in another to Durness, 70 miles distant; and in a third to the foot of Ben Attow, 114 miles distant. To traverse the area within these corners requires much travelling; and during the past year my official duties kept me 171 nights from home.

The increase in the work of inspection has been such that I could not visit all the schools within the year, and accordingly your Lordships appointed Donald Sime, Esq., Her Majesty's Inspector, to assist Mr. Jolly and myself. It is right to add that both of us owe a debt of gratitude to our new colleague for the willing manner in which he exerted himself to oblige us at all times; and the harmonious way in which the work was got through leaves nothing to be desired.

The operation of the Act of 1872 has effected considerable changes in the management of education, and it may fairly be expected to increase its efficiency in this district. I am not sanguine that individual results will be much better for a long time to come, than those produced under the government regulations in force since 1862, although satisfactory results are certain to be more numerous. Hitherto a fair elementary education was the lot of a very few; hereafter the lack of that education will be the misfortune of a still fewer number.

The number of schools subject to government inspection will be increased by 50 per cent., and all will be better equipped with apparatus and furniture than any, except a very few of the previous buildings. Nor does this represent the full value of the boon to be conferred. Not a few of the existing buildings will be discontinued as no longer required in the neighbourhood of other schools, and the additional number of schools will be utilised by being planted in districts where they are needed. In passing, it is only righteous to offer an expression of gratitude for what was formerly done for the cause of education by voluntary effort and statutory regulation.

In some parts of our highland counties, where the population is small, it was found that the provisions of the Act of 1872 could not be carried out in full without excessive hardship to the ratepayers. This matter was taken into consideration by your Lordships, and the liberal way in which it has been dealt with appears to put these parts on a satisfactory footing; and, so far as I am aware, gives entire satisfaction throughout my district. In addition to the special grants given to schools in such districts it is allowed that the schools may be taught by pupil-teachers "who have completed their engagement with credit" and who receive a "special recommendation by the inspector." A lad of this sort I consider the most suitable officer for such a school in every way. It has been my invariable experience to find that a school, whose average attendance does not exceed 20 scholars, under the direction of a certificated teacher, is badly taught. He fancies that with his handful of children there is no scope for his energies to work upon; and we all

Extent of district.

Assistance given by your Lordships for inspection.

Effects already and likely to be produced by the Act of 1872.

Increase of schools.

Special grants to schools in thinly peopled districts.

know how little any one is likely to accomplish when he does not try to do his best. A smart ex pupil-teacher, on the other hand, will find in such an institution verge enough for the exercise of his best efforts, and the results will show how much more effective these are than the languid or fitful exertions of an otherwise more experienced and able man.

Irregular attendance and efforts of school boards to diminish it.

Throughout my district the teachers consider irregularity of attendance as a more formidable obstacle in the way of progress, than all other impediments combined. The evil thus uniformly, and, as I think, justly complained of, though it is not likely to be wholly removed, will be greatly lessened under the new *regime*. In many cases I know that school boards, not merely through their compulsory officer, urge upon parents the necessity of keeping their children of school age at school, but the individual members exert themselves in the same behalf. Sometimes these commendable endeavours do not meet the success which they deserve, although in other cases their beneficial consequences are conspicuous. I am not aware of any instances of prosecution before the sheriff having taken place in this district. School boards find it difficult to put the compulsory powers of the Act in force while the accommodation is inadequate; and they probably have a laudable dislike to exercise coercion until milder appliances have been tried and failed.

Inducements provided by the Code to keep the attendance regular.

It appears to me that one of the most judicious provisions of the Code of 1873, is that which makes so many items of the payment for results depend upon the average attendance. It is the duty of the school board to combine the greatest efficiency of instruction with the least expenditure of the rates, which the means provided by the Act place at their disposal. These two ends come at times into conflict, but they are both promoted by a large and regular attendance. Regular attendance is an essential factor of successful teaching and a large average, both of which increase the "payment for results," and consequently reduce the burden of the ratepayer.

Benefits of the standard system,

and objections of the philosophers.

The standard system introduced into our common schools in 1862 has done incalculable good to the education of the working classes. It was at first declaimed against by the majority of teachers, and here and there will still be found a schoolmaster who sighs for the good old times, when his reputation for professional skill was sustained by the clever answers of one or two pupils possessing more than ordinary advantages, while the education of the mass was all but totally neglected. The philosophers to a man, and I may now add, to a woman, in the face of facts, persist in their opposition to the system, and lose no opportunity of protesting against its continuance. The main objections are, that it makes education mechanical, and has reduced its standard in Scottish schools. The first objection is twofold in its character, implying that the system reduces the work of the teacher to a mechanical process, and that the results to the children are mechanical. Sometimes the one, and sometimes the other, is exclusively argued in the philosophical disquisition. The answer is easy, and is, I think, conclusive against the objection. We do not prescribe any method to you, it may be said to the philosopher, for communicating instruction to your pupils. We allow you the free use of your own methods, short of putting restrictions upon the old system of flogging. If your fine methods can produce the required results, you are welcome to press them into your service; and you cannot, therefore, justly complain that you are forced to use mechanical processes. If, on the other hand, your fine processes cannot produce these results, they are not fine, they are merely worthless, in our estimation, and you must adopt the methods, mechanical or otherwise, which effect what is required. The second part of the first

objection is involved also in the second objection,—that, under the system of standards, the education furnished in the common schools of Scotland has deteriorated.

The prevailing opinion both in Scotland and beyond it, regarding the education that was provided in our parish schools, was very erroneous. It was supposed, that the great majority of our boys received there not only a sound English, and commercial, but a very fair classical, education. In truth, the majority of boys received neither the one, nor the other. A few boys went from several parish schools to college, the bulk of whom, however, were but ill-qualified for their advanced position. Nor were the teacher's attainments much in advance of his pupil's. He could construe baldly an ordinary passage in a classical author with the aid of a dictionary; but in no classical author could he discover any beauty of thought or expression, beyond the observance of grammatical rules. Although he had a vague idea that the whole thing was fine, he had no notion wherein the excellence consisted. The dreariest common places, and the most subtle thinking, were alike admirable to his untutored mind; and yet it is a deadly heresy to say that this man was not qualified to send out admirable Crichtons by the score. I am quite aware that at distant intervals in our parish schools would be found teachers not inferior in natural or acquired ability to the average professor in Oxford or Cambridge. Such, however, was not the rule, but the very rare exception, and the exceptions are now as numerous as ever they were. The majority of the old teachers were, probably, inferior to the majority of our schoolmasters at the present day; while the methods of instruction, and the results of the present day are incomparably superior to what they were even 15 or 20 years ago.

People looked at what was done; and, totally overlooking what was left undone, exclaimed, "How excellent! In all the earth is there any-thing to compare with it? Have not two boys belonging to the parish "gone to college?"—Yes, and what of the large numbers of boys and girls in the parish who could not even sign their own names? How came it that the individual who invariably began his letters: "i rit yu this " Fue lins Too Let yu no that i Am in goode helth Hopping this Too " find yu the Saim " was the confidential secretary of a district, in the absence of any one who could begin a letter in any way? While it would be very wrong to depreciate the national importance of the service rendered by our parish schools in sending boys to college, the existence of the state of things implied in the last query was felt to be unsatisfactory. The Government felt that the system must be remodelled, however admirable in some respects, which neglected the education of the many. What is consequently aimed at now, is to make every child fairly proficient in the arts of reading, writing, and working sums, which by themselves are complained of as being an educational starving of our youth. As an additional objection, it is urged that this knowledge, meagre in itself, leaves the teacher no time for imparting instruction in the higher subjects. No other conclusion can be drawn from these objections, except that a knowledge of the three R's is all that can be imparted to the great mass of children, or else that we ought to revert to the good old system, when the few were taught and the many neglected. The latter alternative is likely to be itself neglected. If in one sense a knowledge of the three R's, such as that now being imparted in our public schools, is not much, in another, as compared to what was formerly done, it is something to rejoice at. We have surely made an important advancement when we find the children of those who could not sign their own names capable of reading correctly, calculating their own accounts, and doing their own correspondence

The education formerly provided in our parish schools was very much overrated in and out of Scotland.

Why it was overrated.

A knowledge of reading, writing, and arithmetic provided for the many, said to be insufficient.

in words that are correctly spelt, and language that is comparatively correct in grammar.

And also more than sufficient.

There are not wanting opponents to the standard system, and especially as embodied in the New Code, of an opposite kind; those who maintain that we are over-educating the people. They have no objection to education itself; what they dread, is the consequence that those "over-educated" people will be discontented with the lot of working men and women, and refuse to do what is commonly understood by work. Notwithstanding the vapouring one hears about "culture," and were the man of culture to be always what he ought to be, instead of what he so frequently is—the quintessence of snobbery—and the more sober observations upon the dignity of man's intellectual nature, if it is to be a choice between education with uncultivated fields and closed factories; and ignorance with abundance to eat, with all my heart I go in for the latter. But the gloomy vaticinations of these objectors have small chance of fulfilment, since a standard of education that includes all confers no distinction. The masses will be left relatively where they are, although the units, by a quickened intelligence, will be better fitted for a right discharge of their duties.

Jeremiads of H. M. Inspectors of Schools.

It has struck me, and has probably attracted the attention of others, as a little curious, that the Blue Book reports of so many Inspectors contain ungrudging laudation of the skill and diligence of the teachers, followed by a doleful account of the results of teaching every subject in the common school curriculum. The lack of intelligence is the one theme that stirs up the sorrow of every inspector; but Mr. Matthew Arnold may be regarded as the prophet of the lamentations. In his report for 1874-75, he seems to ascribe this "lack of intelligent life," to the standard system, and prescribes the remedy that is to cure it. With all the deference that is due to so great an authority, I venture to affirm that he has completely misunderstood the cause, nor has he devised the remedy. The cause is a state of things not to be removed in one generation by any skill in teachers, nor foresight in legislation. There is a law of things which is too inert to be altered by crotchets. The diffusion of intelligence among the masses, like every other thing belonging to the great law of progress, though not to be despaired of, requires time for its accomplishment. The growth of ideas is slow in the race. We can educate a generation up to a certain limit only; the education of the following generation can be carried further. Most of my colleagues will bear me out with the assertion, that the child of educated parents, other things being the same, will answer questions on the meaning of a lesson very satisfactorily, while the child of uneducated parents will stand dumb through the ordeal. The former has been gradually trained in abstract thoughts by the conversation of the fireside; the latter hears them not—except when read in his school book, and there they pass too rapidly through the mind to be mastered by it. His education, imperfect though it be, prepares him to improve upon it; and his own child starts therefore with an advantage which he did not possess. The inference from this view of the matter is, that we ought to develop the intelligence as far as we can. We need not look for much success; but we may fairly expect that more will be accomplished by the generation following us. Is it a pity that more cannot be done by ourselves?—Yes, in the same sense that the laws of electricity and the phenomena of the tides are a pity, and not in any other: these things are inevitable, and it is unwise to lament, or not to do our best with them.

The diffusion of intelligence among the masses is a slow process.

The New Code bears the impress of good practical workmanship on almost every page of it. It is founded on the elementary truth that all

knowledge is useful, and the experimental truth that only a limited amount of it can be acquired by the individual. A school may pass with credit, and earn a large grant, with the three R's, and a little geography and history. If, however, the teacher is inclined to make further exertion, and has pupils of the requisite capacity, he will be remunerated with praise and money for successfully teaching one or more special subjects, having a pretty wide range from which to choose. This, because natural, is as it should be.

The New Code gives a wide selection, but does not demand too much.

Theorists—a pretty numerous class in the press, and on the platform—seldom think that there is a limit to the capabilities of children in public schools; and forthwith prescribe as an essential part of the public school curriculum any pet subject of their own, without for a moment considering the practicability of its being dovetailed into, or superimposed upon, the more essential parts of the course. If you want to get rid of all the ills that flesh is heir to, says one theorist, teach botany; says another, natural history; says another, physiology; says another, zoology; says another, mathematics; says another, natural philosophy; and a member of Parliament, or any candidate for that honour, insists upon the paramount value of political economy. “Is our industry,” says this reasoner, “not paralysed by the interruptions caused to business by strikes? If people knew how the unalterable laws of supply and demand regulate wages, workmen would not strike. Political economy teaches everything about those laws; and if you teach political economy in the public schools, it follows, therefore, that you put an end to strikes.” Could political economy achieve what is thus professed, by making the working people “content with their wages,” an admirable case would be made out for teaching it in the public schools, if not in addition to, what are deemed the essential subjects at present, then instead of, some of them. But neither political economy, nor anything else, which you will teach in schools, will terminate strikes, and introduce a reign of contentment among the working people. The cure lies in holding a little more christian fellowship with them. If those whom circumstances in wealth or otherwise place above them, were to show that they *feel* the dignity of labour by holding not a patronising but a brotherly intercourse with the honest labourer; and show him by their bearing towards him that they respect him, and take an interest in himself, his family, and his conversation, it would do more to diminish discontent among the working classes than all the volumes of all the authors who have written upon political economy. And surely it would be as dignified a thing for “a perfect gentleman” to spend part of his time in learning something of his fellow citizens at home, and encouraging them with his sympathy, as lounging on the sofas of his club, grumbling at the badness of his cigar or sherry, or discussing the “Times’s” comments on the despatches from Vienna or Peking.

Theorists would make compulsory what the Code makes optional.

Social effects promised by theorists will not be realised by teaching their subjects, but by lessening our present social selfishness.

### HOW THE WORK IS DONE.

I regard reading as the most important subject taught in our schools. On the way in which it is taught greatly depends the subsequent education of the pupil as carried on by himself. In several schools in my district it is very satisfactory. The lower standards read correctly and distinctly: the higher add correct emphasis. In not a few, however, the reading cannot be spoken of with even modified praise. In these schools the lower standards read in a slow, hesitating manner, leaping over some words, and stumbling at others; and the higher standards, although they pronounce the individual words correctly, get

Reading.

through a passage with disagreeable monotony. Indistinctness of utterance is, I regret to say, far from being unknown. The final syllables of words are elided, and occasionally a polysyllable is glided over in some barbarous fashion as if it were a single sound. This is the result not of bad attendance, bad apparatus, or bad buildings, but exclusively of bad teaching.

Suitable text  
books for  
reading.

The importance of having good text books for reading cannot be over-estimated. The advanced text books of the older series, some of which are still in use, seem to have been compiled for the use of people who got beyond the stage of learning to read, and were previously educated so far as to be able to enter readily into the spirit of short discussions on scientific, historic, moral, and metaphysical subjects. This state of mind does not as a rule exist inside our public schools, and is not produced until some years after the school is left. Instead of fostering a love of reading, these books, containing so few lessons of interest to the scholars, rather squeezed out of their minds such love of it as might naturally lie there. The great aim of the teacher should be to inspire his pupil with a desire to read by himself; and this can only be done by presenting to him in his class book much at least of what is interesting to him. The lessons should deal largely with the concrete and the exciting. Such pictures ought to be presented as the fancy can realise with some degree of vividness, and what along with this can produce excitement. The nation has, however, got into what Mr. Carlyle would call a "Schwarmerei" on the matter of science; and science must be in education what action was once said to be in oratory, everything. Accordingly, in harmony with the popular view of what ought to be, our "Courses," and "Advanced Readers," and "Progressive Readers," look like so many miniature encyclopedias of science. But their pernicious unfitness as reading books, is the daily observation of those who see them in daily use. Their appropriate motto as school books would be "Nemo me impune legit." Science like other good things requires to be kept in its proper place. In the new series the evil is only lessened, not removed. I have seen one series only that is free from the scientific padding; and it is otherwise admirably got up. In the more advanced text books are stories of adventure, of heroism displayed in the face of danger of various kinds, and of the well-fought battle field, just the thing to interest boys when they begin to think a little for themselves, and take an interest in other than mere playthings. Of course there are lessons on other kinds of subjects, and it contains some of the finest gems of our literature in prose and verse. Most of the new reading books contain woodcuts illustrative of the text. These woodcuts possess various degrees of merit, and some of them are real works of art, which I would hardly expect to find in books so cheap. I think them decided excellences.

The new  
reading books.

Writing not  
well taught.

Writing in general is better done on slates than on paper. A few teachers in my district teach the subject on system; the great majority may be said not to teach the subject at all. An art so purely mechanical, and one that demands so small an amount of intellectual effort as penmanship, leaves no excuse for any schoolmaster who fails to make good writers of all pupils, who remain an adequate length of time with him. The one and sufficient qualification of the scholar is the absence of weakness in the fingers. If the fingers have ordinary strength any young person may be taught to write like "copper plate." All that is required in the teacher is that he knows the elements of the letters, that is to say, that he knows the relative lengths of the various parts of the letters, the parts that should be thick, the parts that should consist of a hair line, where the various parts should be united, and the proper slope. This

might be learnt by him in an hour or two. He should not merely instruct his pupils in this analysis, but point out regularly to each of them where he failed to attend to this analysis. The teacher should attend to this while the writing is being done. Good pens, good paper, and good ink, include all that is additionally requisite.

Arithmetic is taught in this district with creditable success. More especially in the lower standards, the results are satisfactory, except in the few schools which might in general be described as moderate. The greatest per-centage of failures occurs in the 6th Standard; but in the 4th and 5th Standards the children, as a rule, do not show much power in solving a question demanding a little ingenuity on their part; and they pass, by solving correctly the two questions that are worked "by the rule." The teachers devote but little time, and very wisely I think, to an exposition of the principles of arithmetic even to their advanced classes. It is quite possible to repeat the theory before a class of boys and girls, and to get them to repeat the words again without their becoming in the least assimilated with ideas already in their minds. The greater part of the theory is too abstract for them. This is not true of the whole of it, and in no case, where a teacher has a reasonable assurance that his exposition of theory would convey really intelligent notions to the minds of the children, should he pass it over. For example it would be easy to account to any ordinary child why fractions must have the same denominator before they can be added or subtracted, but very difficult, except to a clever child, to account for the position of the decimal point in a sum in division of decimals. It would be easy enough to get a child to repeat the words that convey the true principle; but these are worse than useless, unless to the child they contain intelligent notions.

Arithmetic.

Principles seldom expounded.

In December 1873, your Lordships entrusted me with the revision of some hundreds of arithmetic papers worked by female candidates for admission to a training college. The greater number of the papers was well done, and a few of them remarkably so, as regarded neatness of solution, and intelligent understanding of the meanings of the questions. A rider to a question in multiplication of decimals took the form of asking the reason for the position of the decimal point. All who attempted this gave the rule; there was not a single bungling effort even to give the reason, from which I inferred that this bit of theory had never been explained to any of the candidates. I could not help reflecting with satisfaction on the degree of good sense which this absence of effort to explain what in so many cases would lead, not to clearness but to bewilderment, showed in those who were their instructors. When these elementary, but more abstract, operations are taken upon trust, there is an intelligent application of them, without which any knowledge of arithmetic can be of no intellectual, and is of very little practical value. I hope that by and by we shall in this district show a little more of this intelligent application, because there is room for not a little improvement. I was at first afraid that the Code demanded too much from the younger children, especially too much notation. My experience of it has proved, however, that what is required can be easily accomplished by teachers of average skill.

Arithmetic papers of female candidates for admission to a training college.

The New Code does not demand too much from the lower standards.

English grammar, such as it is, receives a fair amount of time, and possibly more than it deserves. I generally find that the 2nd and 3rd Standards do what is required of them with readiness and accuracy, and the 4th Standard very frequently much more. The 5th and 6th can parse sometimes a more difficult passage than that given to Standard IV., but generally fail in analysis. I think it a mistake that the Code tacks grammar to reading in the higher standards. I sometimes describe the

English grammar.

Grammar should not be

tacked to  
reading.

reading of these standards, as "good" or "very good," and have all or nearly all the pupils marked as failures in the examination schedule. This is surely anomalous, and not unlike what would happen were a person, who was classifying men according to their height, to put a man of six feet in the rank of men of five feet four, because MacAnak happened to be afflicted with toothache.

The end for  
which gram-  
mar is pro-  
fessedly taught  
almost entirely  
overlooked in  
school.

The great fault in the teaching of grammar is that it almost overlooks the true end of grammar, which is, according to the old definition, "The art of speaking and writing the English language with propriety." Indeed it seems to me that it is hopeless to expect a restoration of this true end to its proper place until "parsing" and the "analysis of sentences" are abolished. I do not undervalue "parsing" and "analysis" as an exercise of some mental value; what I insist upon is that grammar, if properly taught, would, as a mental discipline, be immensely more important than the barren exercises which now usurp its place, besides its direct bearing upon the utterances of the pupil ever afterwards. At present one not unfrequently hears an educated person say "Well I scarcely know a single rule in grammar and I write correctly for all that." The truth is, however, that in consequence of this "scarcely knowing a single rule" very few educated people indeed either speak or write the English language correctly. Members of Parliament, barristers, and clergymen speak it incorrectly; newspaper writers—penny and sixpenny—write it incorrectly; and there are not wanting in this profane age daring people, who will assert that the Blue Book reports of Her Majesty's Inspectors, are by no means a well of English undefiled. And then what pedantic productions, even of their own kind, most of our grammars are! Not to mention such philosophical changes as "the definite article" into the "distinguishing adjective;" instead, for example, of explaining what is the proper sequence of tenses for conveying given thoughts in English, we are told that we have no such thing as tenses in English, or perhaps they say we have two, as I forget the exact nonsense on this point. The reason for that assertion is that we do not say *readebam*, but *I was reading*. Although we do not express our tenses by one word we still have the notions to be expressed by some collocation of words as well as the Greeks and Romans who conveyed them by one word. What it behoved the grammarians to do therefore was to give this collocation for the various tenses, and then explain how they should be employed. In a lecture delivered in the month of January 1872 before the Nairnshire Association of teachers, Mr. Jolly sketched with great clearness, an admirable method of dealing with this subject. He lays it down that composition should go hand in hand with grammar from the very first. The child should be taught, as soon as it begins grammar, the nature of simple sentences, and also to form simple sentences of its own. This instruction is to be elaborated until the pupil becomes fairly acquainted with the general principles of composition. Were our text books on grammar framed to include this course, the authors would find it necessary to investigate the general types of expression that are employed for expressing ideas related in given ways. And were these taught at school we should see less slipshod writing, and consequently have less careless thinking, than we encounter now in every form of publication.

Mr. Jolly's  
method of com-  
bining what  
is called gram-  
mar with com-  
position.

The lack of  
this combina-  
tion felt in the  
dictation exer-  
cises of Stan-  
dards V. and  
VI.

The want of this systematic teaching of composition is woefully manifested in the dictation exercises of the 5th and 6th Standards. The 6th Standard succeeds better than the 5th. The former has to write an original composition on a simple subject selected by the Inspector. The thoughts in that case do not flow very rapidly; and one is expressed

before another occurs to the mind ; hence, the composition, as a rule, consists of sentences, though many of them are not well framed. In the 5th Standard the children have to write the substance of a narrative read twice to them by the Inspector. The thoughts are consequently all present to the mind before it tries to find expression for them. The result too often is, that the whole are strung, or rather loosely packed, together without any effort at systematic division or sentence making.

During my first experience of these exercises, I dealt leniently with them, but unless there is considerable improvement hereafter, a severer hand must be laid upon them. I should like all the teachers in my district to procure a copy of Mr. Jolly's lecture published by Blackwood.

The geography of Standards IV. and V., I generally found well prepared, and not unfrequently the history was creditably mastered as to minuteness and accuracy. As a rule, however, neither the geography nor the history of Standard VI. could be characterised above moderate, while the schools in which I had to speak of these subjects as very imperfect, are far from rare. The grant was therefore very often endangered, but very seldom, indeed, acquired by those presented in the 6th Standard.

The Code of 1875 has made a change in the period of history which is to be prepared by the 5th Standard. If the 5th Standard can now prepare what is prescribed, it will enable them, when in the 6th, to make a better appearance than their predecessors did during the past year ; the history of Standard VI. being on the whole diminished, though the geography remains the same, both have a better chance of being well prepared. I would, however, respectfully submit to your Lordships that the amount of geography required of the 6th Standard is still too great.

My practice has been to examine the three Standards in geography and history, orally and in classes. A question being put, I request all in the class, who can answer it, to hold out their hands. Of those who do so I first select the one less likely to answer correctly, and then, without indicating whether the answers be right or wrong, I pass over them all, and note the number of correct answers. At times, if the first answer is right, I merely count the number of hands, and regard the number of satisfactory answers as being identical with it. As a general rule, I put about 20 questions in this way, and dividing the sum of the correct answers by the number of questions, if the quotient amount to 50 per cent. of the children presented, I recommend payment of the grant. I had cases where the answers were so decidedly few, or so decidedly numerous, that the counting of them was superfluous for enabling me to decide, whether payment of the grant was to be refused or recommended. Occasionally, also, after I was satisfied that the grant should be paid, I ceased to count the answers, but continued the examination with the view of ascertaining the full extent of the instruction which the children received.

For these subjects I prefer a payment according to the average number in attendance, to one for the individual passes. If you make the payment for a pass a large sum, you weaken one of the motives for giving due attention to the more essential three R's ; and if you make it a small sum in schools where few are presented in the higher standards, you almost destroy one of the principal motives for teaching these subjects at all. By the present system of payments a teacher who bestows ordinary pains upon this part of his work, receives a fair remuneration for his labour, while it supplies an inducement to the managers to keep the average attendance large.

Geography and history generally well mastered by Standards IV. and V., very imperfectly by VI.

A change in the period of history to be professed by Standard V.

Too much geography required from Standard VI.

Mode of examining geography and history.

Advantages of the present system of payments.

Mr. Hall's  
objections.

I observe that Mr. Hall in his report for 1874-75, disapproves of this system, and quotes with apparent approbation the opinion that it is not a payment for results, inasmuch as the man who makes 90 per cent. of passes, is encouraged with no higher reward than he who attains to only 50 per cent. This is a kind of objection that would hold against any conceivable system of payments, unless one in which infinitesimal shades of excellence were estimated, and corresponding increments of payment made for them, using the integral calculus as an instrument for their summation. But is it true in this case that the teacher who makes 90 per cent. of passes gains nothing over the man who makes only 50 per cent.? My own practice is to bestow liberal praise upon the work of the former, while the latter receives a report for creditable work only. The teacher, it is to be hoped, sets some value upon the praise; but it is more to him than empty laudation. When he becomes a candidate for a school he finds that the favourable report of Her Majesty's Inspector stands him in better stead than aught else; and by thus receiving a better appointment his extra, 40 per cent. really secures him a money payment.

Mr. Jolly's  
system of  
graded pay-  
ments.

The same things may be said against Mr. Jolly's system of graded payments. Doubtless, this system has merits of its own, but it has also blemishes; and not the least, I fear, that it would do the contrary of what he supposes, by encouraging the teacher to give his attention to the clever children, who would earn large grants, and neglect those who would only earn a trifle. It is more an objection to the details than to the system itself, to say that nothing should be paid for results below those at present entitling to a pass. We must consider the nature of the end sought to be attained. Results that are next to useless with respect to that end, entitle the party producing them to no remuneration. We wish the pass in arithmetic in the higher standards, for example, to be a sort of guarantee that the pupil who obtains it, is capable of calculating ordinary accounts with accuracy; and it does not seem advisable to encourage a lower standard of proficiency in any way. Nor do the higher grants proposed by the system serve any useful purposes. The maximum grant now allowed is admitted on all hands to be liberal; and by the existing system, that maximum can be secured by ordinary skill and diligence. The following extract from a letter which I lately received from one of the ablest teachers in the country shows what *can* be got; but I know that equally satisfactory pecuniary results have been obtained by men of average ability:—

"On Saturday last we received copy of report on school which, I am happy to think, was as favourable as you in the discharge of your duty could make it. Faults and failures are sometimes unavoidable, and of many of these, no one is more sensible than I am. Your criticisms are fair and legitimate, and for the whole report I thank you most cordially. The practical £ s. d. result of the whole is this, that the school fees and the grant earned on examination amount to 7s. 8d. more than the whole expenditure on the teaching staff."

Discipline.

In most of the schools in this district the work is done quietly and with fair precision in the class movements. The discipline is on the whole decidedly better in schools taught by female, than in those taught by male, teachers. Probably the more gentle manners of the female teacher gradually impress themselves upon her pupils, and lead to a pleasantness in their conduct which is more rarely attained elsewhere. The chief defect in our discipline shows itself in the lack of a ready perception on the part of the children of what is said to them, which is fostered by the teacher's bad habit of repeating commands. Scenes like the following occur more frequently than is desirable, and will show what I mean:—

*Inspector.*—Please to stand up all who are in the 1st Standard.

*Teacher.*—Sit down you who are in the 2nd Standard. It is only those in the 1st Standard who are required to stand up. What standard are you in, John Smith?

*J. S.*—In the 5th Standard, sir.

*Teacher.*—Well, I'm sure you don't require to stand up, the Inspector wishes those only in the 1st Standard to stand.

*Inspector (to teacher).*—Do all in the 1st Standard read the same book?

*Teacher.*—Yes, sir.

*Inspector (to Standard I.).*—Now will you be good enough to turn to page 9 of your book. Write on your slates the first line in the lesson on The Horse. Do it as neatly as you can. Please to sit down now.

The Inspector goes round, when the exercise is finished, and finds that some have written two lines; some, three lines; some, one-half line; and a few only did what was required—write one line.

I always regard the absence of attempts on the part of the children to take assistance from their neighbours as a mark of good discipline. Indeed, this may be taken as unfailing evidence of it, because although quietness may prevail on the day of inspection, in consequence of a few days preliminary drill, the self-reliance referred to can only be produced by long and constant habit. Furthermore, by good discipline exercised throughout the year, it is possible to eradicate completely the system of "copying."

I notice that some of my colleagues would have three grades of payment for discipline and organisation, one of these being a payment of say 6*d.* for each pupil in average attendance for discipline and organisation that do not reach "good" but might be described as "pretty good." Discipline that is not "good," in my opinion, is worth nothing. I have, however, seen the results of discipline that I would describe as "very good" for which I would have no objection to see a payment made above that which is given for "good," and below that given for "excellent" discipline. Since discipline has been paid for, it has received additional attention from teachers in my district.

#### SPECIAL SUBJECTS.

The subjects most generally professed in my district, for which special grants are paid, are English Literature, Physical Geography, Latin, and Mathematics. Next to these comes French. In two schools, Greek was professed; in two, animal physiology; in two, German; and in one, Chemistry and Botany. I regret that in none of our schools has what is called Mechanics in the Schedule been taken. We know nothing of matter except through force, and the best preparation for a study of any branch of physical science would be an acquaintance with the laws of force. Nor will it do to acquiesce in the verdict of pedants that only a very little of the science of dynamics would be mastered in our schools; and therefore that the time spent in mastering that little would be misapplied. Such an elementary knowledge of the principles of statics as could be learnt at school, would be highly advantageous to anyone, who wished to know something definite of the phenomena of Heat, Light, Electricity, Sound, &c., besides being of immediate service in the exercise of various crafts. And now, since so much can be done in the solution of questions by means of diagrams, almost independently of theoretical mathematics, it is the more desirable that our mechanics should receive instruction in the subject at school. At a meeting of the

Special subjects most generally professed.

The study of dynamics should be encouraged.

Northern Association of Schoolmasters, held in Inverness, in the month of June last, I delivered a lecture on the "graphic method" in statics, in which I explained various details of the method, and showed its application to the solution of various problems. I pressed upon the teachers present, and I now embrace this renewed opportunity of pressing upon them, the wisdom of mastering, at least its elementary principles, and teaching them whenever possible to those boys—future blacksmiths, carpenters, masons, and engineers,—who would find their knowledge of direct use in the daily exercise of their several callings.

A subject which I should like to see inserted in the list of special subjects is the science of Navigation. I even think it a matter of national importance that teachers having charge of schools in localities that send youths to sea, should be competent to give efficient instruction in that subject. As a rule, the officers of our merchant ships are thoroughly skilled in seamanship, but a competent knowledge of navigation is a rare possession among them. Nor need anyone be surprised that such is the case, when we consider the circumstances under which they study the art. The ordinary teacher, whether in a common or grammar school, may admit ignorance of the subject without incurring the slightest danger of not being regarded in his own community as a walking encyclopædia. Hence the embryo mate or captain must look for that instruction, which cannot be obtained in the regular schools, from any self-constituted master who advertises his terms and address. Generally this is not a man of "prodigious" learning; and that which is a comparatively simple and exceedingly beautiful art, becomes in his hands a system of interminable mechanical rules. In reading these rules the logical faculty is scarcely ever brought into play, and the only way in which they are stored in the mind is by sheer force of memory. Were the number of these rules small, we should have no reason to wonder that the memory could discharge the function thus devolving upon it, but when it is legion, our first reflection is that the memories of mates and captains must possess more than ordinary capacity. It is, alas! however, true among the mental faculties, as elsewhere, that a proper division of labour is an essential condition of excellence in their workmanship. Hence we may hazard the conjecture that when, as in the study of navigation, the mechanical memory, which ought to do the least, is entrusted with the most, while the reasoning faculty, which ought to do the most, is entrusted with the least, the work is badly executed. True, it is the duty of the Board of Trade to see that no person is licensed to undertake the management of a vessel to a foreign country without a competent knowledge of navigation; but the Board of Trade declares that amount of knowledge to be sufficient which is provided for it. In short, it accepts, but does not set up, the standard of efficiency. We have here an apparent, not a real, negligence. To those wiseacres who regard examinations as the alpha and omega of learning, the conduct of the Board of Trade will seem highly reprehensible. To me it seems that there are concauses—to borrow a term from the metaphysicians—of proficiency in any branch of learning of even considerably more importance than examinations, be they ever so rigid. What is wanted in the present case, therefore, is not stiffer examinations, but better instruction. I regret that I cannot say that many of the teachers in our public schools are well qualified to impart that better instruction, although I cannot doubt that if pecuniary encouragement were given in such a district as the coast of Caithness, where it would be serviceable, the proper men could be found. I venture to add, that if a teacher in a public school, possessing adequate attainments, were to take the

Navigation  
should be  
included.

trouble, he would send out youths better qualified for their duties than those sent from an institution exclusively devoted to the training of sailors. In the present day such an institution would most likely be governed by a board of directors. One director would insist upon botany forming a part of the course of instruction; another upon natural history; another upon geology; another upon zoology; and the whole board would urge the imperative necessity of teaching two or three modern languages. Of course, during a period of two or three years a youth could acquire but a very imperfect knowledge of these subjects, and navigation would fare little better than the other parts of the course. The mind, instead of being strengthened by the full grasp of the subject which was proposed to be mastered, would be weakened, partly by being overstrained with work beyond its power to accomplish, and partly by the confusion engendered by the vagueness of many of its notions.

I regret not being able to report to your Lordships that sewing and knitting are satisfactorily taught in my district. As a rule, the parties who teach them are unskilled as needlewomen themselves; and when the schoolmaster's wife is the sewing mistress, I have reason to believe that she too often neglects her duties with the full connivance of her husband. I happen to possess a strong opinion upon the social and educational value to the girls attending our common schools of being efficiently instructed in the arts of sewing and knitting, and I would, therefore, press upon school boards that not the least important part of their duties is to see that needlework is taught, not perfunctorily, but in the best possible manner. I highly approve, with one slight variation, of a "Course of Instruction in Needlework for Elementary Schools," prepared by Mr. Thomas Rogers, Mirfield, Yorkshire. I would put herring-boning in the third, and button-holing in the fourth stage, which is the reverse of what is done in Mr. Rogers's scheme. With a properly graduated scheme of this kind before them, I trust our sewing mistresses will be assisted in giving a thoroughness to their instructions which at present is too often wanting. I intend to circulate copies of the above course among them.

It is with much pleasure that I feel able to report to your Lordships most favourably of the abilities, and, what I prize still more, of the fidelity of the schoolmasters in my district. The majority are qualified to discharge their duties very efficiently, and labour with singleness of purpose to produce the best results. The duty of inspecting the schools taught by these men and women is to myself exceedingly pleasant. As might be expected, however, a class that includes so many individuals contains a minority in describing whom praise must be replaced by censure. This minority consists of persons of various shades of imperfection. There is the sham schoolmaster whose examination schedule is distinguished by the large number of its failures, but who prides himself upon his pupils who study Latin and mathematics, and who translate *mon bon père, ma bonne mère*, which is called French. There is the man who has got every clause of the Code at his finger ends, and waxes eloquent over what he considers to be its faults. The rights of teachers are weighty matters in his estimation, and constitute an inexhaustible theme for his logic of defence; the duties are light, and are a matter of secondary consideration. If his results are never good, their badness is always accounted for by many plausible excuses. When a strong resolution has to be passed at a meeting of the profession, this is the sort of man who "moves" or "seconds," and the strongest resolution is a pattern of mildness in comparison with the vigour of his

speech. Dull must be the listener who wont feel that now has arisen a veritable Samson ready to slay the Philistines among school boards, inspectors, boards of education, and education departments with the appropriate instrument. There is sometimes the man who holds the various public offices in his parish, and who prides himself upon being not a schoolmaster but a man of business. This man is generally a fluent speaker and a ready paragraphist. At times of elections he is the self-constituted, or perhaps willingly admitted, leader of the supporters of a certain candidate. His business really necessitates a large correspondence, and, when as not unfrequently happens, he possesses an effeminate fondness for getting letters, epistles are constantly despatched upon the most trivial occasions. Many of these letters are written in school during school hours, to the serious neglect of its important duties. The example of such a man is far from good, because the impression most likely to be received by his pupils from him is, that the greatest of sublunary gifts is "the gift of the gab," and the supreme art in life "the art of dodging." There is also a minority of this minority, who cannot be relied upon in any of their doings.

In the appendix will be found a table showing the extent to which the several parishes are to avail themselves of the advantages offered by Art. 19 D. of the Code of 1875.

I have the honour to be, &c.

J. MACLEOD.

*To the Right Honourable*

*The Lords of the Committee of Council on Education.*

#### APPENDIX.

The following table shows the parishes in the counties of Caithness, Sutherland, and Ross, which avail themselves of the provisions of Art. 19 (D.). From the parishes of Eddrachillis and Durness I received no returns.

County.	Parish.	No. of Schools coming under sub-sect. a.	Children whose education remains to be provided for under sub-sects. b and c.
Caithness	Dunnet	2	0
"	Halkirk	2	0
"	Latheron	1	8
"	Reay	Unknown	Unknown.
"	Watten	0	8
Ross	Alness	2	3
"	Applecross	6	0
"	Edderton	0	12
"	Gairloch	Unknown	Unknown.

"	Clyne	2	0
"	Creich	1	22
"	Farr	1	Children of 8 families.
"	Tongue	0	Children of 7 families.

GENERAL REPORT, for the Year 1875, by Her Majesty's Inspector,  
DONALD ROSS, ESQ., M.A., on the SCHOOLS inspected in the Counties  
of RENFREW, BUTE, and ARGYLL.

MY LORDS,

Glasgow, 30th November, 1875.

IN addition to a large mass of miscellaneous work I have travelled 7,916 miles on duty and inspected 28,884 scholars during the past year.

Some of the success of the new system will depend upon the thoroughness as well as the fairness with which the Inspectors do their part of the work. As under the Old Code, the results desired within the area of the examination schedule are to a great extent definite, and can be tested in the *unit*. And here discretionary latitude is not allowed and not desirable. It is otherwise, however, beyond this area, inasmuch as the principle of *class examination*, although the most important in the Code, can easily be worked into its chief demerit. For though it is always true that a uniform standard is second only to a high one, it is also true that this principle, in which the spirit is more than the letter can always limit, may be shaped into a poor continuation of the routine which it supplements and was meant to check. The hardest part of my work consists in allocating the grants given for merit appearing in the *mass* and existing in the *unit*; for merit, therefore, of a subtle kind, not easily measured by any fixed rule, and least of all by a process of routine or evidence of a mechanical eye. Discipline and intelligence, *e.g.*, are both positive elements; but since they arise out of negative conditions, one is apt to judge them from their negative side, and to overlook the vital fact that they cannot show themselves in uniformity of result, since they are not created by uniform methods in uniform circumstances. Intelligence is knowledge, but it is rather an appreciable capacity than a specified measure of book knowledge. And hence I think that the breadth of school influence and the healthy action of school life should vary with the amount of liberty given to the fallible judgment of the examiner in testing this and all kindred subjects. The examiner is sure to err now and then; but here occasional error is better than perpetual routine. Liberty means restraint here. The every day life of an inspector and the principle of payment by results both gravitate towards the mechanical; and in a large system, like the net-work of the Education Department, there is danger that the most perfect centralization may, for that reason, degenerate into a series of lifeless lines at the remote circumference. Therefore I rejoice that your Lordships are removing artificial lines from the Code, and looking more and more at results apart from the methods producing them. And I have no sympathy with those who urge the splitting up of the existing Standards, the addition of new ones in spelling, composition, grammar, and collateral subjects, or the burdening of the Code with mechanical minutiae that tend to make fair inspection an impossibility.

The mode of examination in the more elastic part of the Code is left to the Inspector. Method is a thing of subjective art rather than of objective rule, but it should grow out of the given conditions and be protean in its application. If a matter of routine, class examination defeats its object; and if not searching, it becomes a sham. It gives scope for intuitive decisions, and intuition, as a transconscious faculty, might here pass for a negative quality. In judging the merit of a class I do not trust to the method of testing it by a few specimens taken at

The importance and difficulty of class examination.

Routine not desirable here.

Method of conducting class examination in my district; and the result.

random, nor to that of simultaneous answering, nor to paper work alone, nor even to a limited number of prepared questions; amongst other reasons, because the first embraces too much chance; the second takes the shadow for the substance—supported noise for isolated thinking; the third sometimes aims at the impossible, inasmuch as an average Scotch boy in the 2nd or 3rd Standard cannot transfer such intelligence as he possesses to paper; and in the fourth the lines of a fair set of questions might run parallel with those of fair intelligence. In all subjects where thought and intelligence are required I cross-examine the children, intersecting the field professed at all angles, and following the paths that the ingenuity of the scholars or the exigency of the examiner may open up. My aim is to get at the individuality of each child. And although the general strain upon my attention and the pressure of details are sometimes too severe, this exercise is interesting in good schools, is effective in showing up weak, flippant, or pretentious methods, as well as the results of careful or thoughtful instruction, and confirms the belief that the examination schedule is not always a correct index of the real worth of a school.

Value of reports.

In addition to their main object, reports should convey to managers and others a correct idea of the actual state of schools. They are valued according to their content in truth and suggestiveness. Formerly it was common to publish good reports and to smother the bad ones. But now when the Press looks in upon the School Board meeting there is a probability that nothing can escape publicity.

Nature of this report.

This is the first general report grasping all classes of schools in these counties.

Population of the district.

Number of children.

The population of the district is now probably 350,000, with about 59,000 children who should be at school. Making ample allowance for the number of non-inspected schools, for children sent elsewhere for their education, and for invalids, we have at least 40,000 children between 5 and 13 who should be at inspected schools; whereas only 30,571 were actually present at inspection. I cannot state how many of these were under 5 or how many were over 13; but of the number on the registers on the day of visit, 680 were of the former and 2,084 of the latter class. In round numbers then, only 28,000 children of school age were present—a singularly poor result. Of the 30,571 actually present only 15,920 were in the Standards. This indicates very irregular attendance, but this is not all. For of those examined in the Standards, 64·72 per cent. were in the two lowest, and only 6·7 per cent. in the two highest Standards—more than one third of the whole being in Standard I., or reading monosyllables or a shade beyond. When these facts are examined in the light of collateral ones, such as the natural rate of mortality amongst children, and the age of those on the registers, they assumed a fearful significance. I have given the per-centages of the presentation, not of the pass, which was worst in the upper Standards. In Standard V. the per-centages of pass were 76·64, 53·59, and 73·85 in reading, writing and arithmetic, respectively; in Standard VI. 87·07, 84·79, and 88·60.

Number inspected.

Number in standards.

Per-centage in Standards I. and II.

Per-centage in Standards V. and VI. Pass.

The extent and quality of elementary education in Renfrew, Bute, and Argyll.

These results may be put thus:—*At least one fourth of the children of the district were not at all accounted for; of those accounted for, only a little over one half were in the Standards, of those in the Standards considerably over one third were in the very lowest, and only about a fiftieth in the highest standard; and of those in the upper Standards between one fifth and one sixth failed to reach the mark at which they aimed.*

Age and attainments.

Again, the age progression should nearly correspond with the attainments progression; but in fact it does not.

Children not in the Standards may be grouped thus :—

1. Those, chiefly in large towns, not in school for the reason that there is no room for them.

2. Those in poor adventure or other uninspected schools, existing upon sufferance as being at least better than the street.

3. Those actually present but withheld from individual examination, either because they were not qualified by attendance or because they were supposed not to be so by attainments. These were generally examined somehow and found almost always to fall into or below the 2nd Standard.

These three classes are almost all uneducated.

Now if a boy leave school before he can pass the 4th Standard at least, his school life on its intellectual side has been almost in vain.

What little he has learnt slips away without leaving any germ of knowledge or any desire for learning behind. Before his school life can be of permanent value to a boy, it must go to the length of creating a facility, of forming a habit, of giving an interest, or of somehow mixing its influence with his real life. The Department recognizes this; for it regards a fair presentation in the upper standards as an essential element of a good school.

Translated into English and read in this light, the above statistics, combined with my own experience of two years, mean, amongst other things, *that of the whole number of children in my district who are at present passing out of school age into actual working life, not one half have got the minimum of education, and one fourth have got none at all.* This statement is staggering, but not too strong. The remarkable poverty, both in the extent and quality of the education given may be traced to two groups of causes :—

1. Those antecedent or extrinsic to the present system.

(1.) Of the antecedent merely, the following may be mentioned.

The attempts and failures of the legislature to introduce a National Bill, and the delay, uneasiness, and weakness caused by these, should be in the front. The effect of the narrow compass and exotic principle of the Code of the three R's upon Scotch teachers was another corrosive element. There are a few teachers in this district, who seem to think that the chief aim of elementary education is to secure a grant, and that the best way to do this is to begin the pupils, of whatever grade of capacity or attainments, low down, and keep them in low standards as long as possible. The interests of the pupils and the wishes of the parents were frequently sacrificed for the sake of a clean schedule; and now when your Lordships have provided a remedy for this in making a substantial fraction of the grant dependent on results in high standards, a few teachers are capable of protesting. On the other hand, the prospect of payment by results was too violent a shock for the inertia of Scotch feeling; and hence many parish and other schools kept aloof from the benefits of Government aid and supervision, and a considerable section of the teachers, partly in honest dread of the monopoly of mechanical results, became dissatisfied or uneasy, or took to the negation of airing class grievances. School managers did as little as possible, and that little patchwork. The rules of the Department in regard to space and light were relaxed or laid aside in favour of urgent temporary needs, and with all this and such as this public opinion, as we know from the stereotyped speeches of amateur educationists, did not gather light or strength, and the sense of parental responsibility was not quickened. But for much of this the remedy is now at work. The Scotch Code is acknowledged to be liberal, comprehensive, elastic, and improving with age; school supply, not dependent on the

Three classes of children not presented.

The character of these.

The minimum of elementary education.

Extent of the deficiency.

Causes of this deficiency.

1. Those antecedent or extrinsic to the present system.

rivalry of sects, but largely supplemented by denominational zeal, is rapidly increasing; the Department can soon enforce its regulations; and public opinion will support School Boards, in this district at least, in the exercise of their compulsory powers.

(2.) Epidemics very general in Argyll, and fatal to regular attendance and school progress.

(2.) Of the extrinsic but contemporary causes I will mention only one group. Epidemics traced in some cases to defects in the school premises are more frequently traceable to the drainage, defective water supply, or the unhealthy condition of the district, and are fatal to educational progress. Notwithstanding the foulness of their dwellings and the general ignorance of a large section of the population of the towns in the valley of the Clyde, their public schools, except at Port Glasgow, perhaps, are not crippled by fevers to nearly the same extent as are those of Argyll, with its hills and fine fresh sea breezes. In the Highlands, where so much depends upon the grant and, consequently, upon regular attendance, irregular attendance and meagre results were explained away to me by the prevalence of typhoid, scarlatina, and other forms of sickness; and for three months last summer my work generally was through a layer of disease. There is no necessary physical cause and no moral reason why epidemics should be normal anywhere. The schools themselves by the spread of intelligence will do much for sanitary improvement; but in the meantime they are too feeble for this, and the remedy must, therefore, be sought elsewhere.

The cause of these.

The rules of the Department will go for something towards providing a remedy; and whenever I had opportunity I tried to impress upon teachers and managers the necessity of looking after the ventilation and the drainage of schools as well as of using the suasion of their influence with the community, and especially the poor. Many of the people of Argyll live in wretched little hamlets along the coast, defective in drainage and ill supplied with water; the houses, if not dilapidated, are filthy within and have heaps of ancient offal giving out foul and dangerous odours at the door; and we must expect to find disease nestling in this ignorance, neglect, and defiance of all natural law. The remedy is obvious, but there are peculiar difficulties in the way of its action. Apart altogether from the saving of human life and the allaying of human misery which sanitary improvement would effect, the gain to educational progress should justify a small expenditure of money which should be effected before the ravages of fever are finally assigned to providential dispensation. School Boards, in some of the worst cases, can do little or nothing; the parochial boards are equally powerless; but I think the country can look with confidence to the growing influence and vigilance of the Board of Supervision for a remedy. To minimise these epidemics is one way of giving at least a chance to Highland schools in their present struggle for existence.

2. Causes at present in operation within the system. Action of school boards a matter of geography.

2. Causes at present in operation within the system resolve themselves into defective management or the inaction of School Boards, whose efficiency in this district is very much a matter of geography. Where there is real representation of the popular will, or where the leading power in the parish takes an interest in the welfare of the people, the action of the Boards is almost always good; in opposite circumstances it is either bad or nothing at all.

(1.) The Boards of Glasgow and Govan have really done marvellous work. Next to Glasgow the largest towns in the west of Scotland are Greenock and Paisley.

Educational destitution of Greenock,

The educational state of Greenock is still a *terra incognita*, both to its own citizens and the outside public. The Board found a population of about 70,000, with 9,900 children of school age, but only six really

good schools (and these overcrowded), exclusive of some private academies, on whose roll there seem to be 600 children between 5 and 13. The other schools, though serving temporary needs in a poor way, were defective in one or more respects. Either they were situated in unhealthy or noisy lanes, or their fabrics were hopelessly bad, or the supply of light was very poor, or considerable outlay was needed for furniture and repairs, or the schools were held in temporary halls shared by the Missionaries, Good Templars, or Freemasons, all good enough in their way, but decidedly objectionable adjuncts to public schools in a town seldom free from fever. The Board, in going to work with extreme caution and a liberal tendency to recognise existing supply, based its operations on certain statistics that went to show that 2,500 additional places would complete the school accommodation. Experience has modified this; for the Board has already nine temporary schools, with space for 2,369 pupils; it has enlarged one school so as to hold 500; and it has four splendid schools in course of erection. 1,866 neglected children have been sent to school through the operation of the compulsory clause. Although 8,000 were on the registers last year, only 5,542 were present on the day of inspection, and only 2,624 were in the Standards, of whom nearly *one half* were in the very lowest Standard. The whole town, in all its schools, was able to present just 96 pupils in Standard V., *i.e.*, working proportion, and 22 in Standard VI., or working decimal fractions; and the Highlanders' Academy contributed a fair share of these. This is elementary education with a vengeance; it is eminently unsatisfactory as regards the present, and even discouraging as regards the future. For it means both an alarming amount of irregularity and an extremely low conception of education. The teaching staff of the town, both in quantity and quality, is below the average. It is ever true that the weakness or incompetence of the teaching power of a school goes further than the greed or indifference of parents towards explaining why we get only meagre results in low standards. The Board, with whose difficulties I heartily sympathise, is working vigorously in making up for past neglect, but the task before it is formidable, and the educational destitution of the town is of the worst kind in consequence of the character of a large section of the inhabitants. Its situation as the narrow gate opening Scotland to Ireland, and leading from the West Highlands, has made Greenock into a kind of New York, with a large Celtic element of few local ties and less local interests; an element, moreover, which, in contributing much energy, deposits a vast incubus, not exactly of pauperism, but of the difficult strata immediately above it.

Work of the  
School Board  
of Greenock.

Difficulty be-  
fore it.

Character of a  
section of the  
population.

Paisley, with a population of 50,000, had gone down nearly to the level of Greenock in the matter of school supply; but the character of its inhabitants is vastly different. In one respect it is a somewhat stationary town with a marked individuality; its traditional native is as famed for his intellectual independence, free-thinking vigour, and the respect which he pays to the dictates of his own being as he is for the somewhat narrow compass of his vision for the universal. And this, doubtless, accounts to some extent, for the lively interest which the inhabitants of the town have taken in the working out of the Education Act. The destitution is very great; most of the schools are temporary, and all over-crowded. I inspected a Paisley school last week into which more than double the normal number were squeezed. I cannot speak too highly of the energy, public spirit, and wisdom manifested by the Paisley School Board. Many of its members devote much time to the management of the schools with gratifying results. One of their number is a lady—Mrs. Arthur, of Barshaw; and I believe that it is no

Destitution in  
Paisley.

Energy of its  
School Board.

exaggeration to affirm that she is the most valuable and efficient member of a very efficient Board.

Good work  
done by School  
Boards in the  
Lowlands.

Upon the whole the School Boards in the lowland parts of this district are pursuing a large, liberal, and wise policy. The prophecy has not come true that these bodies, elected on a democratic basis, would dissipate much of their energy in the flash of party oratory, and postpone public interests to the furtherance of sectarian claims. In three years they have done as much for education as was done in the previous thirty by all agencies. In providing permanent supply, in grappling with temporary needs, in enforcing attendance where there is room, and where there is none preparing the public mind for its enforcement, and in gradually spreading the network of their organisation over their areas, they are getting down to the lowest and out to the most migratory of the population. I see no reason for bewailing the departing glory of the good old Scotch system, because I have every confidence that the School Boards will conserve what was distinctively good in that system, plant it in a wider field, and give it more room to grow upwards, and fructify the best intellect of the country. The status and the emoluments of our teachers are rising, and if they do not rise higher the blame will rest, not with the Boards, but with teachers themselves. For Boards have commercial instincts, and act upon the commercial principle that salary should vary with merit, and that promotion in any direction should be justified by competence. Teachers would do well, both for their own sakes and that of their usefulness to consider this and profit by the inference. Never were the opportunities of the profession written in more legible characters than now; those who read them are not the feeble and noisy reformers who bewail the condition of their class, but those who have a high ideal of their own work and prepare themselves for it. In my district, at all events, it is not public indifference, nor stingy managers that keep the salaries and social status of teachers down, but it is a social law which should first be recognised and then mastered by obeying it. The teaching profession more than any other takes its rank from the character of its lowest and not of its highest strata, because the most scholarly of its members are precisely those who do not air their learning in the market place, and those who are least bound by the interests and habits of the scholar to the retirement of the closet mingle with their social equals and are taken as the measure of the whole body, which they are not. Some of the ablest and most faithful teachers in Renfrewshire, I find, are content to do their own work well. Let each member of the profession do likewise, let him raise his own competence for his own work, and the profession is raised in popular esteem. School managers are prepared to advance salaries to competent men, but salaries cannot naturally rise much higher till the attainments of teachers are at a higher level, and till our South country teachers imitate their brethren in Aberdeen by getting a university training added to the routine of the normal school.

What rests  
with teachers  
themselves.

A general  
desire for more  
highly-trained  
teachers.

Action of  
School Boards  
in Argyll not  
always  
satisfactory.

State of school-  
houses.

Unlike overgrown southern towns Argyll was not previously neglected. It was studied with Parish, Free Church, General Assembly, and other schools; but much of this supply has been withdrawn, and the county is now practically at the mercy of School Boards. I cannot say that the action of these bodies is generally good. I cannot here enter into details, but the reports written by my colleague and myself during last summer in several cases revealed an unsatisfactory state of matters, which indicates an under-current of more general neglect. We had frequently to complain of foul and offensive offices where they did exist, of defective ventilation, of the absence of proper furniture and apparatus and of incomplete registers. These may seem trifles; but our schools cannot prosper unless they are attended to, and energetic managers never despise them. There is no

great lack of supply in the county, and the expenditure of a few pounds of money, plenty of fresh air, and some care, would make almost the worst of the schools fit for temporary use. Respectable parents will not trust their children to damp and dangerous rooms, and careless ones follow their example, hence attendance is irregular; fees are small, and the government grant is uncertain. Thus your Lordships' minutes, which are favourable to poor localities are not taken advantage of, imperial aid is lost, and the support of the schools falls chiefly upon the local rates. In reality, however, it is the teachers who suffer most; as a class they are more dispirited and uneasy than those in the lowlands, and not without reason.

Irregular attendance.

Teachers dispirited.

I am not ignorant of the general state of the Highlands, nor of the ways in which poverty of results are explained away. In our tour of inspection we often got excuses, sometimes comically meagre in their superfluity. The herding came in for a good deal of blame, even when we saw one half the children of the village or the hamlet sporting themselves on the green or in the gutter.

Insufficient excuses for irregular attendance.

In 1871 the population of Argyll was 75,679, the number of children present at inspection last summer was 7,750; and Campbeltown, with its 7,000 inhabitants, contributed about 1,000 of these. Were it not for Cantyre, the school statistics of the county would present a miserable front.

Population of the county.

It is not reasonable to expect the education of the Highlands to equal that of the Lowlands, but it should be much better than it is in Argyll. Towards explaining the existing weakness, the jealousy of the two leading churches may go for something; yet sectarian feeling cropped to the surface in one place only. The peculiar position of the factors of very large, very small, and absentee proprietors, may be a second, but certainly is not a general element. Evidence of a positive and negative kind seems to trace the weakness back to conditions with which Parliament alone can deal. Where the leading proprietor takes an intelligent share in School Board work, or where healthy public opinion dare express itself, there I saw promise of substantial results, but in several parishes the power of the ratepayers seems to be nominal, and the deliberate collective will, such as it is, has to shrink back before the caprice of private interest or ambition. It may happen that only two men in the parish dare be moderately independent, viz., the minister and his leading heritor independence in a third being a troublesome accident based on the strength of personal character rather than on the security of position.

No public opinion in several parishes.

An amendment in the Act in reference to the Highlands seems desirable.

(2.) Defects in the teaching power of the district.  
(a.) There are in these three counties 270 inspected schools of various kinds; and the number is rapidly increasing.  
(a.) The majority are under School Boards.  
(β.) Seventeen are Catholic Schools. In the valley of the Clyde the Catholic population bulks largely in pauperism and crime; and in different circumstances the elementary education of this section of the community would fall upon the local rates, from which at present Catholic managers receive no aid. My surprise is, not that these schools are not what they should be, but that they are what they are. It is not fair to compare them with ordinary Scotch schools of good traditions. For the parents of many of these children are poor and migratory; home influence is generally bad or nothing; hereditary impulses, associations, and habits combine to make the children lawless, restless, and very difficult to catch or keep. Notwithstanding that, these schools deserve an honourable place. I have been uniformly strict with them, as with other schools, and outspoken in touching their defects. The priests are intelligent, energetic, and fair managers. In the matter of discipline I rate these schools

highly; in general intelligence they are low, although the Female Department of St. Lawrence school, Greenock, is a striking proof that even in this subject they can compete with our common elementary schools. A higher level of teaching power is what they need, and I believe Catholic managers would act wisely in employing more certificated labour, and in devising some means for raising the standard of their candidates and apprentices, who at present are at the rear of their class.

(γ.) There are seven Episcopal Schools. These are well managed, and three of them, St. John's, Greenock, the one at Oban, and that at Ballachulish, are at present better than the competing Board Schools.

(δ.) Five sessional schools. These are not very well managed. When the school is virtually a private speculation in the hands of one man, the temptation is strong to be stingy in repairs, to lay out next to nothing in apparatus, and to employ the cheapest staff.

(ε.) Of the remaining schools, the Neilson Institution, Paisley, with 800 pupils, is one of the best in Scotland. Its curriculum is wide and well organised. Combining a good secondary with excellent primary instruction, it realizes something like the perfection of school management; and its success has been great in several directions. Few of our theorists in education have displayed more sagacity and enlightened purpose than Mr. Gardner, who has devoted a considerable share of a valuable life-time to the extension and growth of the institution which his uncle founded.

(3.) I can only slightly refer to the lines of weakness in the teaching of reading, writing, and arithmetic.

(a.) The quality of the reading differs widely in different schools. It is worst in Argyll, where too frequently I found a melancholy kind of sing-song, or a species of shouting produced by violent muscular effort. Good reading is the result of careful training. It begins in imitation, and is carried on by the intelligent appreciation of good flexible prose or poetry. In the upper classes it is not always the power to read with some degree of fluency that is at fault, but the faculty of intelligence. Hence teachers cannot spend too much effort in methodic and individualising drill in analysis, grammar, and the meaning of what is read. I see no good reason why grammar and elementary analysis, both of which overlap comprehension, should be dissociated from good reading. We want intelligent reading; and here the aim should be to open up the mind of the scholars and the treasures of our literature together, to create a taste, and to transform the art of reading into an instrument of knowledge and the enjoyment which knowledge conveys.

(b.) Writing is well taught in many schools. Not seldom, however, and especially in Argyll, the scholars are sent to their desks and allowed to scribble away as they please, whilst the teacher is engaged in something else. In these cases the child begins at the top of the copybook with some purpose and hope; at the second line he imitates himself; he gets into shorter lines and more careless habits as he goes down the page; and ends by making the exercise positively pernicious to his eye and mind. Failures in this subject generally result from bad spelling rather than from careless penmanship. I have got a fair number of very sensible letters in Standard VI., but as a rule there is not sufficient practice in composition in the schools, and I regret to find that in several cases the aim of letter-writing seems to be not higher than to reproduce a stereotyped specimen (or modified form of it) that has done duty as a framework in the rural parts of Scotland for many years.

(c.) In the lower classes defective notation, in the upper want of practice in paper work, accounts for shortcomings in arithmetic. Some teachers not familiar with the Code were not prepared for paper work of any kind; the pupils were set to write their sums upon scraps or copy-leaves, discovered after a confused search; they got bewildered at the novelty of the operation, and failed from sheer inability to make any use of their arithmetical knowledge. Too often this subject is left to look after itself, or to the care of a small pupil-teacher, who is considered fit to supervise arithmetic when not qualified for anything else.

In the light of two years' experience I beg to state that I think the school staff of this district is not sufficient to work the Scotch Code really well. On the one hand there is the difficult material to be raised, and on the other the high level to which it is meant to raise it. We are in a transitional state of great difficulty. In Renfrew many of the children drafted into school are disorderly and very hard to control. A great deal of energy must be spent in disciplining these, and for this young apprentices are altogether incompetent. Again, from Standard II. upwards general intelligence bulks, and should bulk largely in results, and here also pupil-teachers are powerless. The range of the Scotch Code is much wider than that of the Old Code, and therefore its successful working out requires a correspondingly large amount of teaching power of a higher kind. I do not go the length of suggesting to your Lordships that the minimum staff should be increased, because the minimum line should be the lowest working line, and I know a few cases where, by dint of excessive effort, the minimum staff has actually produced satisfactory results. But I would urge upon managers, with all the emphasis at my command, that the staff of the Code indicates the minimum, and not the normal or highest amount of teaching power; that in my experience it has been rarely effective in securing the maximum grant or in realising the idea of the Code; and that excessive economy always defeats its object. In present difficult circumstances managers would do well, as many of them are doing, to strengthen their teaching power as much as possible by adding to its amount. Assuming that the schools under the old Mechanical Code were not over-staffed, I may safely assert that the Intelligence Code, which now is in force, requires an addition of something like one half to the school staff in order to work it successfully, at least in this district.

The quality of the teaching power is inferior, owing to the large number of apprentices in the district. Last year I examined 428 pupil-teachers, and I have spent considerable energy in trying to improve them. The papers written by the pupil-teachers, as a rule meagre, are very poor in the subjects where some thinking and intelligence are required and notably so in grammar and composition. The parsing is often incomplete, mechanical guess work, or the result of some feeble rules. Grasp of the meaning is not shown, and instead of elementary reasoning, rote-work too frequently does duty. Even when memory is the faculty exerted, and some mastery over grammatical rules and principles is required, the answering is incomplete, if not taken wholesale from one of those loosely-constructed Primers which are rapidly thrusting English grammar out of our schools. The composition of a 6th Standard boy is too often as good as that of a candidate when he enters the normal school.

Till I became an Inspector I had no knowledge of the practical working of the pupil-teacher system; but my experience in Paisley and Greenock has thrust the question of its efficiency upon my notice. The system originated in a theory which does not recognise the radical moment of education, that the intelligent personality of the teacher

(c.) Arithmetic defective.

In present circumstances the minimum staff insufficient to work the Scotch Code really well.

An addition to the teaching power suggested.

Quality of the staff inferior. Number of pupil-teachers examined.

Their want of intelligence.

Inferior class of boys employed in Renfrewshire.

Many of them do not follow out teaching.

must transform its influence into the receptive *potenz* of the pupil. The notion, at the root of the monitorial system, that a school can educate itself, has always seemed to me to be an untested popular delusion in education, the equivalent of perpetual motion in physics. In both cases work is expected where energy is not spent or transformed. A school left to teach itself is not taught at all. A school with a master and three or four young apprentices is nearly in this state; for the master has to superintend his staff, keep order everywhere, answer all appeals, and in the midst of this distraction teach the class more immediately in hand. In Renfrew the pick of the boys do not come forward, and the material from which managers select their candidates is much lower, I am told, than formerly, and not calculated to raise the profession. Many of the lads become pupil-teachers without any intention of continuing in the practical work of teaching; for their temporary services they receive additional instruction, and what to them is a considerable sum of money, and after experimenting upon the school as much to the harm of the scholars as their own good until they just begin to be of some use, they turn their attention and talents to something else. These want enthusiasm, and have little interest in their work. Last year I examined 60 boys in the beginning, and 55 at the end of their first year of apprenticeship, but only 5 in their fifth, and 22 in their fourth year. The system, then, in this district does not send its due numbers into the ranks of practically trained teachers, and, if its operation have the effect of crippling school work or dwarfing intelligence, *fiat experimentum in corpore vili*, and not in our elementary schools. It needs remodelling and contraction.

Females of a higher class now become elementary teachers.

Female labour not suitable for the higher standards.

Only one per cent. of presentation in Standard VI. in schools under mistresses.

Objection to universal employment of females.

Abundant supply. Suggestions towards the improvement of the pupil-teacher system.

(1.) Rise of Standard.

(2.) Decrease of number allowed to each master or mistress.

In this district girls are from a much higher social grade than boys, and a considerable number of ladies by birth and education are now becoming elementary teachers. The proposal is sometimes made to staff the schools from this abundant female market. But those who advocate the universal employment of females in elementary schools have not a very exalted idea of what constitutes elementary education. For Infant Schools, for small country ones, and for the lower standards, females do remarkably well. The influence of a sensible and well-educated woman over even the roughest children is great and good. But in the 62 schools under the charge of mistresses, examined by us last year, I find that 70 per cent. of the presentation was in the two lowest Standards, and only 1 per cent. in Standard VI., and that failures in the upper Standards are heavier than in schools under masters. There are obvious objections to the employment of females except within definite limits.

I have no fear whatever about the future supply of teachers. Practical training, however, is essential, and therefore I venture to offer a few hints towards the improvement of the pupil-teacher system.

1. Rise of Standard.—No candidate should be accepted who has not passed his fifteenth year and the 6th Standard. I believe, that the shortening of the period of apprenticeship would be a gain both to the schools and the candidates themselves.

2. Diminution of the number of apprentices allowed to each master or mistress.—The organisation, discipline, general morale and intelligence of a school cannot be successfully superintended or imparted by young apprentices, without whose aid, therefore, the school staff should be ample to work the Code in the direction of those. If judiciously distributed the grants given for these, for higher subjects, and for general culture will greatly develop the intelligence of the working classes. Above all other things our age and country have need of skilled labour from law-abiding and law-loving citizens; the complaint is pretty general that workmen of

all kinds possess too little of the skill of intelligence, even when they display much of the dexterity of machines, and it is admitted that the public schools alone can provide the remedy. I have gone very carefully into this question, and I find that of the 8,104 children examined for the grant (Art. 19 c. 1) not more than 4,652 passed with fair credit. Geography and history were not much better. The teacher is often compelled to leave these important subjects in the hands of pupil-teachers, whose own minds are unawakened or incapable of observation, reflection, or thought; who cannot therefore stimulate reflectiveness in others, or teach what they have not learnt. The attempt to develop intelligence thus implies an incongruity as great as the dulness of the grammarian who offered to instruct Charles Lamb in the correct method of writing English. Unfortunately, several teachers have not a high ideal of what constitutes intelligence, and perhaps in no part of school work does the difference between good and bad methods of instruction appear so prominently as here. The basis of intelligence should be the home life of the scholar; and in explaining the lesson read, the aim of the teacher should be to lay a bridge between the vocabulary of the textbook together with what is naturally associated with it, and the perceptions and mastered thought of the child. The growth of intelligence is a process of translation and retranslation, but the central fact of the child's real life should never be lost sight of. It is easy to commit lists of what are called *meanings* to memory. But if these *meanings* are simply synonyms, the process is of no use to the pupil, and deserves no encouragement from the Department.

Intelligence not high in the district.

The pupil-teacher system partially responsible for this.

3. Shortening of their hours of labour.—They teach too much and are over-wrought. In temporary or over-crowded schools especially their position is one of drudgery and not of dignity. They are watched by the master and outwitted and teased by the children; their status crushes vitality out of them; they wish to appear able to keep order without harshness and they must slyly resort to underhand dodges. This species of training makes them peevish, uppish, and disposed to exercise small tyranny over weaker natures. Their long hard hours produce a double injury in weakening health and deteriorating character. It is a fact, not now observed for the first time, that young teachers, out of whose nature the curriculum of the Normal school has not uprooted elements attained during the period of apprenticeship go forth into professional life with an excessive consciousness of their own personality.

(3.) Shorter hours of labour.

4. A part of the time thus saved might be devoted to more thorough instruction in the technical and practical part of their work.

(4.) More technical instruction.

5. The present mode of instructing the pupil-teachers whilst the best that can be devised for country schools is not a success in Greenock, Paisley, Glasgow, and large towns. Each candidate (par. 4, Memorandum of Agreement) bargains for at least five hours of special instruction per week; and where the candidates are in different years, learning different subjects, no one gets this minimum. It is unreasonable to expect that a man who has been working all day in an over-crowded school, as many of the teachers in this district do, can teach for three or four hours each evening. But unless he does this, the compact is violated. What actually happens is this:—The master takes his pupil-teachers together and gives about a quarter of an hour to each. The letter and spirit of the Memorandum of Agreement are violated in nearly all the large schools of Renfrew; the candidates do not and cannot receive the minimum amount of instruction; and I therefore would suggest that restrictions should be removed and School Boards allowed

(5.) Change in the mode of instructing them.

The memorandum of agreement (par. 4) violated in all the large

schools of the district.

In the new conditions the pupil-teachers might be more cheaply and better trained.

(6.) School Boards might do more towards raising the standard.

The proposed chairs of education.

Teachers must always get a great part of their training as formerly at the Normal schools.

Much advanced work in the elementary schools.

Number examined and passed in higher subjects during the year.

to make their own arrangements for the instruction of their apprentices. So long as the Department reserves to itself the fixing of the standard and the testing of the apprentices, and so long as a penalty is attached to failure, managers, in my opinion, may safely be allowed to suit their means of instruction to the special circumstances of their case.

It would be a great gain if the energy which at present is fruitlessly spread over the instruction of candidates could be concentrated, systematized, and applied at special points. In the large public schools which are now nearly built in several towns in the district, the certificated teachers might spread the work of instruction amongst them, or a more comprehensive scheme could easily be drawn up, so as to secure due attention to be given to each pupil-teacher, to stimulate the candidates themselves to healthy emulation, and to conserve energy at present not very fruitfully spent.

6. The district itself, or the principal school boards, might originate a system of prizes, well planned and judiciously administered; and these prizes might help the successful competitors through a university course. Renfrew is both wealthy and liberal, and here is a desirable channel.

The professional training of teachers affects this district very seriously, and following the example of my colleagues, I beg to offer one or two suggestions on this point.

1. The proposed education chairs do not affect the question. I cannot see by what machinery the practical department of the work of the teacher of method can be attached to any university chair. A professor may be appointed to a chair similar in constitution to that of *Allgemeine Erziehungslehre* in Leipzig, or that of education in any continental university, but his first and chief function will consist in defining his province, collecting the literature of the subject, and actualising a science of education.

2. The great part of the work of training teachers must fall upon the Normal Schools. But these institutions are at present crushed by the low attainments of their entrants. They have to go over the curriculum which the elementary schools should finish; they are therefore compelled to move in very mechanical lines and to turn out students without individuality or culture. For the great bulk of the population a plain elementary education is all that can be supplied, and the Training Colleges are well fitted to provide the machinery to give this, provided they receive their students better prepared.

3. But there is a great deal of advanced teaching in the schools of this district, and for this the Normal Schools cannot provide. It is very creditable to our Scotch teachers, as a body, that they are emphatic in demanding for their class the advantages which the progressive and liberal culture of the universities can alone supply. In Aberdeen a considerable number of the elementary teachers are graduates, and some of the best of my schools are under the charge of university men. Whatever arrangements may be made, except in large towns, it would be difficult to establish purely secondary schools without enormous expense to the country. There is a demand for advanced subjects amongst the lower and middle classes, and for this demand, I believe, the public schools must provide in the future as in the past. Last year the presentations in special higher subjects in Renfrew, Bute, and Argyll were 1,942, and the passes amounted to 1,640. Latin was taken by 41 schools, English literature by 41, mathematics and physical geography each by 25, French was selected by 12, and Greek by 3 schools; but this advanced work was, for the most part, in the old parish schools, or in

those schools whose masters had passed through a full or partial university course. There is much talent of a high order amongst even the poorest children; the upward path of this talent, if not easy, should at least be possible, and therefore the ousting of advanced education from even the schools attended by the very poor would prove a disappointment to the working classes and a loss to the country. School Boards and local liberality in connexion with their organisation might found bursaries, as the reward of proved merit, to enable poor children to remain longer at school, and ultimately to fight their way through a central school to the university. But if this drafting upwards is to be effected, a larger number of teachers should receive a more liberal training, and all classes of schools should fit into a graduated system.

I look forward with interest to the action of the universities in this reference. I see no reason why several more of the teachers should not pass through a short curriculum like that indicated by the B.Sc. degree of Glasgow.

When a school secures more Government money for bare attendance than for passes, it is not efficient, and though the grant payable is out of all proportion to its merit, the inspector finds a difficulty in recommending a reduction. A very poor school under a careless or incompetent master can somehow succeed in collecting together a very fair sum out of the passes in reading, writing, and arithmetic, and the grants for music, discipline, and the large range of special subjects, when it has a nucleus of 4s. per child secured to it for bare attendance; it can, therefore, in the face of a qualified or damaging report, present a fair front to the managers and the local public, and proceed on its easy course for another year. No doubt the remedy lies at present in reducing the grant; but I believe that when the principle of the Code is payment for educational results, a more effective remedy would be the abolition of the attendance grant altogether, and the spread of the money thus freed over other subjects, such as physical and moral training, general intelligence and higher subjects. My impression is that no untoward circumstance or fortuitous calamity would injure any really deserving school, whilst a great stimulus would be given to schools that require spurring up, and subjects of great educational value, now unfortunately too much neglected, would receive encouragement.

Desirability of continuing secondary education in the elementary schools.

More of the teachers should get a university education.

The grant for attendance encourages inefficiency.

Its abolition and the spread of the money over higher and other subjects recommended.

The advantage of this.

## PHYSICAL EDUCATION.

Military drill, now taught in five of my schools, and soon to be introduced into several more, is a capital auxiliary to moral discipline, and on that ground alone should find a corner on the time-table of all large schools, and especially of those where the children are disorderly and barbarous by habit and instinct. The conditions of our civilization, in demanding skill and mental aptitude rather than bodily strength or dexterity, are unfavourable to the development of the physical organism; and with all their concreteness of mind and practicality, the Scottish people have very little of the Hellenic in their moods, habits, or social economy. It is, I suppose, admitted that the physique of the working classes in this part is degenerating, and that it is desirable to educate a nation vigorous in body as well as in mind.

I would go the length of recommending a small grant for this desirable branch; and to give it and other subjects at present neglected room, managers might restore the Saturday school. In Germany, where school hours are longer than in this country, Saturday is not a day of idleness. In large schools attended by the worst class of children,

Physical education.

Drill.

How desirable.

Small grant recommended for this subject.

Saturday school recommended.

the break of two successive days is an interruption fatal to organisation, discipline, and progress. The process of education should be as continuous as possible, and not by fits and starts. Children who are left to themselves when not at school and are not under home supervision of a good kind, come back to school on Monday, wild, unruly, or restless, and needing to begin where they left off, not on Friday, but before it. Without much additional trouble to the permanent staff these schools might be organised with a curriculum embracing Saturday and subjects now ignored. It should be noted that the arguments in favour of the abolition of the Saturday school in this country nearly all belonged to a group of fallacies, which ignored the interests of all except the over-worked teachers themselves. The teacher is for the school, not the school for the teacher; and in conditions which make the subdivision of labour as possible in the school as elsewhere, these arguments have not now even the apparent force which formerly made them plausible.

### MORAL TRAINING.

**Moral training.** Several of the schools, especially of those not previously inspected, are deficient in organisation. A smoky, dingy, or ugly room, with a poisonous or depressing atmosphere, clumsy or rickety desks badly arranged, forms fit for Fingalian use, or without support for the back, or too narrow in the seat, are all fertile sources of confusion and disorder, and are all in various combinations found here. In all new schools, however, we find parallel desks and galleries; and rightly, for the master's eye, the most potent instrument of discipline, should command the class, if not the class-room. In a few schools the pupils are classified upon no rational plan or system; all was purposeless rigmarole, and although the classes should as nearly as possible correspond with the standards, a small standard was often found divided into several classes, reading a variety of books of various grades of stiffness. A good organiser, like a good general, makes the most of his materials, and translates energy into work in such a manner as to secure the greatest benefit to the greatest number of pupils, whilst dissipating as little as possible in noise, fuss, or show. The aim of organisation should be first to conserve energy or check waste, and secondly to create a habit which in its turn will form an educational leverage.

What good organisation secures.

Too often a narrow view of discipline taken.

A few teachers confound discipline with the narrow thing called class movements. It is really the highest form of training—the education of the will, and it is, therefore, partly the foundation, partly the means, but chiefly the best result of school effort. Class evolutions are a means to, but are not, discipline. In a few schools I found a moral code amongst the scholars; school *esprit* and the feeling that each is a unit in the system; school government maintained without much police force, and confidence between teacher and taught; power of attention and self-control, obedience, order, and self-respect almost equal to those of the best German schools.

The class of children with which we have to deal.

What the school can do

To base an induction upon my own district may be a narrow process. There is a large class of children here who are uncleanly in person and speech, ragged, and disorderly; who are drawn from houses where they experience little love or kindness, and where they witness much coarseness, obscenity, and misery. If the compass of our public schools were widened by the introduction of moral and physical training as a definite part of school work, something more might be done to restore these rough and undisciplined children to habits of order and moderate cleanliness; to bring back a large section of the working classes from the waste and ruin of the public-house to the comfort of family life, and to

check the swelling of the criminal lists. Two or three generations have degraded the volatile Irish Celt into the nondescript of the Salt market. The high pressure of civilization is in one respect a process of degradation, which should be counteracted. Schools, churches, and all benevolent agencies can find ample scope in this wide field, and should supplement the good efforts of one another. All look to education for a supreme remedy, ratepayers demand a decrease of crime as their due; but we should remember, with Locke, that the aim of Government is the good of society, and believe, with Plato, that the work of education is to turn the eye of the soul to the proper quarter. It is true that the ethical range of the school, however wide, must always be a poor substitute for that of the family, and that family life is the basis of national strength. But in the valley of the Clyde, and in all our large towns, we are getting into conditions of less and less family life amongst the lower classes; and here the school can certainly do something towards elevating the population out of a state of animal impulse or self-will caprice to that of the harmonized autonomy of free citizens possessing political power.

In urging the claims of moral training, I am simply laying emphasis upon what is already recognised by your Lordships, and put into practice in several schools. State or imperial action is now becoming a larger factor with us; and in controlling the education of the country it finds a field to which no one can dispute its title in elevating the condition of the multitude, not merely through the spread of intelligence but also by direct culture of its moral sentiments, tastes, and habits. Results can be tested here, certainly not with the same precision as in arithmetic or writing; but still they can be tested. And, I believe, that a graduated grant of, say, 3s., 2s., and 1s. would greatly aid and encourage managers who are moving in the direction of making the school a means of social reform. In any case the discipline grant might be increased with great advantage to the country.

A grant for moral training recommended.

#### INFANT SCHOOLS.

I regret that there are only six really good infant departments in my district. The infants are too often neglected, frowned into a corner, thrust into pitiable rows in the back of the gallery, made to sit painfully on unstable forms, or allowed to do what they like so long as they do not stand in the way or make a noise. This should not be the case.

Infant school teaching deserves to be a special study, and needs special preparation. It is best where the restless energy of the little ones is grasped, controlled, and fructified in rhythmic and other movements; where interest is never allowed to flag; where pretty songs are sung frequently with the accompaniment of juvenile pantomime; where there is constant appeal to the perceptive faculties of the children, to the black board, ball-frame, and such objects of form and colour as can be had; and where the teacher draws somewhat upon the methods of Fröbel and Pestalozzi. Regular Kindergartens do not suit cold Scotland, but Fröbel's idea is eminently philosophic, and can be modified to suit all subjects and all climates. Among those who had a profound conception of what constitutes education I would place F. Fröbel near to Kant. Kindergartens.

By comparing an ordinary child of the upper classes with the street gamin, and both with the typical infant scholar of Renfrew, one sees how much remains to be done for infant education in the West of Scotland.

#### HIGHER SUBJECTS.

The question of secondary education is at present receiving vigorous, and I trust, hopeful attention. To banish higher training from the better

Higher grant recommended

for languages  
and mathe-  
matics.

class of the public schools would be a calamity. But, notwithstanding the demand for secondary education by those who take advantage of the primary schools, Latin, Greek, mathematics, in so far as this district is concerned, are gradually giving place to the easier subjects of physiology and physical geography, which are too often professed as an easy path to the public purse, and not with reference to their usefulness as educative instruments. The fact is that it is considered much easier to pass the scholars in a science subject than in a language, and that in consequence languages and mathematics are neglected in the almost universal rush for Government grants. Those in Scotland who desire Latin, Greek, and mathematics are generally only those who have the ambition to prepare for the Universities and the liberal professions, or who desire to enter a wider path than that which leads to manual labour. Hence the number learning languages must always be small; but that is not a good reason why they should be cast adrift. I think a partial remedy would be found in a higher grant for passes in these subjects. Looking at the importance to a Scotch boy of Latin, Greek, and Mathematics, and at the pressure of school work, I think that a grant of 15s. per pass in each of these would not be too great an encouragement and could not affect the Treasury to any appreciable extent. The only result would be that country teachers would devote more time to the few clever boys who are able to profit by these subjects.

Visits without  
notice.

I pay a good number of visits without notice, and with advantage. In some places the idea is current that these visits are meant to relieve school boards of a good deal of the practical management of their schools, and that the terror produced by the vigilance of an ubiquitous inspector is enough to keep teachers to their duties. Now school boards and the public should clearly understand that the representatives of the Department do not profess to do the work of managers, who are responsible for the accuracy of the returns they make, and the integrity of their schools, and that any loss to the locality through a reduction of the grant must be held as due to defective management. These visits are very valuable to the Inspector; but if that official is to be regarded as a sort of detective, and nothing more, the high influence which the Department at present exerts must be lessened, whilst your Lordships' staff must be much reduced in quality and increased in number.

Gaelic.

Gaelic is spoken in the outlying parts of the district. It is sometimes asserted by the more eager enthusiasts in support of teaching this language in our public schools that the action of Government is fatal to its existence. But the fact is that Gaelic was a dying language long before the days of codes or grants. English is spoken in almost all corners of the district; it is through English that the upward path lies; and, much as I regret the rapid disappearance of Gaelic, in the interests of the rising generation many of whom hope to earn a livelihood in southern towns, I would regard as backward policy any attempt to resuscitate Gaelic at the expense of the rival tongue. If there were any possibility of preserving the language from the pressure of English or of keeping the Highlands apart from the Lowlands, the planting of Gaelic schools would be both possible and desirable, but there is none.

Rapidly dis-  
appearing.

In a question, which is based upon fine patriotic sentiment quite as much as upon public utility, side issues are apt to overlap the central one. Hence even the more moderate advocates of Gaelic, instead of calmly facing the situation, seem to favour a continuous bilingual education. But, however great the advantage of mastering two languages may be, this mastery cannot be general for any lengthened period, especially amidst the competing claims of other subjects and the pressure of more vital and proximate interests than those attached to a language

which is more and more becoming a luxury for the learned, instead of being a necessity for the working classes. Experience has convinced me that children are most intelligent where the ordinary school-work is conducted through the medium of one language. Whenever it is desirable and possible, however, Gaelic should be used in getting at the mind of the child, and I see no reason why this language should not be placed in the list of special subjects. Might be a special subject.

To my colleague, Mr. Boyd, and my able and faithful assistant, Mr. Binnie, I owe much. I have received much kindness in the performance of hard work from the district, to which I came a stranger. Though younger than those who assist me, and the teachers whose schools we examined, I have not yet received any unfairness or discourtesy from any teacher or manager.

I have the honour to be, &c.

DONALD ROSS.

*To the Right Honourable*

*The Lords of the Committee of Council on Education.*

REPORT, for the Year 1875, by Her Majesty's Inspector, CHARLES E. WILSON, Esq., M.A., LL.D., on the TRAINING COLLEGES of SCOTLAND.

## GENERAL REPORT.

MY LORDS,

Edinburgh, January 1876.

I HAVE the honour to lay before your Lordships my general report on the training colleges in Scotland for the year 1875. The inspection of these institutions occupied the usual time from May to December.

Number and organization of the colleges.

Since the date of my last report the number of colleges has been increased by the opening in Aberdeen of a second one for female students under the auspices of the Free Church of Scotland. As the plan for the new buildings includes accommodation for a male and a female department, the former to contain 40, and the latter 80 students, the authorities would seem to contemplate this addition as a possible contingency, as it is no doubt a desirable one. This raises the number of training colleges to seven, or, speaking more strictly, to eleven, as the four Presbyterian colleges in Edinburgh and Glasgow are double colleges, that is to say, they have a male as well as a female side.

Number of students attending.

The attendance at all the colleges during the year 1875 was 944, distributed as follows :—

Name of College.	Males.		Females.	
	1st Year.	2nd Year.	1st Year.	2nd Year.
Edinburgh, Church of Scotland -	55	41	51	39
"    Free Church -	44	48	55	47
"    Episcopal Church -	—	—	29	21
Glasgow, Church of Scotland -	50	53	59	50
"    Free Church -	30	30	80	60
Aberdeen, Church of Scotland -	—	—	35	30
"    Free Church -	—	—	37	—
Total -	179	172	346	247

There were thus 23 male students, and 111 female students more than in 1874.

Number of students who left at the end of their first year's training.

Some of the first-year students left at the end of their first year's training, viz. :—

In the Edinburgh Church of Scotland Training College, five males, and eight females; the former were Gaelic-speaking students, admitted by the General Assembly's Education Committee for one year's attendance, and who, therefore, left in due course. Of the eight females, one left in consequence of impaired health, while the rest left in consideration of home circumstances, and with the permission of the Education Committee.

In the Glasgow Free Church Training College, eight female students left at the end of their first year's training, with the full consent of the authorities. In three cases, they were much older than the common run of students, had previous practice in teaching, and were considered quite capable of conducting a small school. In two cases, the home

circumstances of the students were such as to justify their leaving, while in the remaining three cases, the reason assigned for this step was the necessity for earning their own living, as their means were insufficient to enable them to spend another year in Glasgow. Seven of the eight have already received appointments. Such is the present demand for trained teachers.

In the Aberdeen Church of Scotland Female Training College, three students left at the end of their first year's training, with the permission of the committee of management. In the one case, the age of the student, in the other cases, doubtful health, or family circumstances, were given as the reason for this step.

In the Aberdeen Free Church Female Training College, one student left at the end of the first year's training, with the consent of the managers. She was older than her class fellows, and her family circumstances made it desirable that she should do something for herself, and thus relieve her parents from the burden of supporting her.

It thus appears, that out of 944 students in attendance during the past year in all the colleges, only 25, or, in the form of a per-centage, 2.64 per cent., left at the end of their first year's training. But, though this may be fairly considered a gratifying result, I still hold that no student should be allowed to leave at the end of the first year, except on the score of health. A systematic and continuous course of training, extending over two years, is necessary in the case of every student, but more especially in the case of such as have not had the advantage of the previous training and instruction of the pupil-teachership.

The accommodation provided for the various colleges is quite sufficient, except in the case of the Church of Scotland and the Episcopal colleges, Edinburgh, and the Free Church Female College, Aberdeen, to all of which I have called attention in my special reports on these institutions. As regards suitable accommodation for the Christmas and the admission examinations, all the Edinburgh colleges are still very deficient; but, I am glad to say, there is now some prospect of this being remedied in the case of the Church of Scotland, and the Episcopal colleges.

In reference to the hours of meeting at the Christmas examinations, I may be allowed to quote from my Report for the last year :—

“Instead of the hours of meeting 10-1 and 3-6, which are, no doubt, suitable for English training schools, where all the students are resident, I venture to suggest that, in the case of Scotch training schools, the hours of meeting should be 10-1 and 4-7. Such an arrangement would leave a clear interval of three hours between the two meetings, and thus enable the candidates to go home and get a comfortable dinner, which, at no time during the course of their training, is of such vital importance.”

The experience of another examination has only strengthened this opinion, and I venture to bring the matter, a second time, under the notice of your Lordships. I am the more emboldened to do so by the fact, that I found the utmost difficulty in making arrangements for hearing the reading of the large number of candidates for admission, and providing time for allowing them to be tested in their practical skill in music, without depriving them almost entirely of their short interval, or of trenching too much on the time allowed for their paper work.

During the last session, there were in actual attendance 944 students, of whom 679 were church bursars, and 265 private, or self-supporting students; all, however, with the exception of five Gaelic-speaking male students in the Church of Scotland Training College, Edinburgh, had passed the examination for admission, and (Art. 96, Scotch Code) ranked as *Queen's Scholars*, although a considerable proportion on the

Amount of accommodation.

Accommodation for the Christmas examination still deficient in the Edinburgh colleges.

A prospect of remedy as regards the Church of Scotland and Episcopal colleges.

Alteration suggested in the hours of meeting.

Reasons for this.

Number of students in actual attendance during last session, &c.

female side received no aid from the authorities of the colleges. Of the Queen's scholars 675 had been pupil-teachers, thus leaving 269, or 28·49 per cent. of the whole number, who had not enjoyed the previous advantages of a systematic and graduated course of training in a good elementary school. The number of second-year students was 419, and of first-year students 525. The 419 second-year students left the colleges at Christmas last, and are now, with few exceptions, engaged in the actual work of teaching throughout the country. Indeed, such is the increasing demand for trained teachers, that, while I was occupied with the inspection of the colleges in October and November, not a few of the best students had been already picked up by the school boards of Edinburgh and Glasgow, for service as assistants in the large public schools in the course of erection in these cities.

With the exception of the 25 mentioned above, who left at the end of their first year's training, and, it may be, a few others, either from the state of their health, or other sufficient reasons, the first-year students may be expected to enter on their second year's course of training, while their places will be filled by the requisite number of Queen's scholars, selected from the list of those, who passed the examination for admission.

Supply of trained teachers barely sufficient for the demand.

Growing disinclination on the part of school boards to employ pupil-teachers.

Some modification of the system necessary.

Reasons for this.

It thus appears that, even with the addition of a second training college in Aberdeen, &c., we are barely keeping pace with the daily increasing demand for trained teachers and assistants in our large public schools. This increase may only be for a time, but it has nevertheless to be met and provided for.

Many school boards show such a decided preference for trained assistants, and such a growing disinclination to employ any, and more especially, male pupil-teachers, that some modification or adjustment of the system would seem to be called for. In the mining and manufacturing districts, and in such towns as Glasgow, Greenock, Leith, and Dundee, the demand for juvenile labour is so urgent, and the remuneration so tempting, that the most promising boys are withdrawn from school at the earliest possible age, and are thus lost to the pupil-teacher-ship. Any number of girls may be obtained as yet, but there is a risk of this supply also being ultimately curtailed. In district and suburban post offices, and many other positions, girls may now be seen supplying the place of adult male labour, for which the remuneration is immediate, and the daily duty more routine in character, and much less exhausting, than the daily work of the schoolroom. This must ultimately tell on the quantity as well as the quality of the supply of female candidates. Be this as it may. The staple of the male pupil-teacher-ship is now so much deteriorated in districts from which were formerly drawn many of the ablest students in our training colleges, that the question is sometimes raised as to the *cui bono* of its continuance.

The staple of the male pupil-teacher-ship much deteriorated in certain districts.

Propriety of its continuance sometimes questioned.

No sympathy with this.

The system should be improved.

Modifications on Art. 70 (b) and (g), &c. of the Code suggested for this purpose.

With such a feeling I have no sympathy. The pupil-teacher has done good work in Scotland. He has assisted materially in elevating the platform of the primary school, and, though matters are now considerably changed, I do not despair of again seeing him occupy his former place in public estimation. The question is, therefore, not the abolition, but the improvement of the system. That this is practicable I have no doubt, and I venture to suggest, for the consideration of your Lordships, the following modifications on Art. 70 (b) and (g), and on the first schedule of the Code of Regulations, &c., which seem to me fitted to secure the end proposed :—

1. That no candidate should be admitted under the age of 15, and who had not passed Standard VI. creditably.

At an earlier age, and with less attainment, it is now generally allowed that they are, comparatively speaking, of but little use in a school. My own experience is that the best of our pupil-teachers have undoubtedly been those, who began their apprenticeship at the latest stages permissible, *i.e.* at the end of the second, or third year of the present term of apprenticeship.

In a communication on the subject, my colleague, Mr. Scougal, states :—

“In one of my best schools in the north, which has for years been famous for the quality of the pupil-teachers it sends to the admission examinations, candidates were scarcely ever admitted at an earlier stage than the end of the third year. The master, having a large school, giving him a wide field to select from, chose a few of his best pupils as privately paid monitor-candidates for each probable vacancy, trained them and tested them for two, or three years, and then finally fixed upon, and presented the best of these as candidates for the Government examination for apprenticeship at the end of the third year. These candidates were thus stimulated, during their probationary and competitive monitorship, to do their utmost both in learning and in teaching; their characters, temperaments, attainments, and capabilities were thoroughly tested; and, by the time they were apprenticed, the bent of their own minds was definitely fixed upon teaching as their future life's work, and they were fitted to become at once permanent, reliable, and really effective members of the officially recognised school staff.”

2. That the period of apprenticeship should be for *three* years, which should be shortened *only* in the case of superior merit.

The term of *five* years has latterly been a barrier in the way of getting suitable male candidates.

3. That no master, or mistress should be allowed more than two pupil-teachers.

With the work now expected from the teacher of a public school, the proper instruction and due superintendence of *two* pupil-teachers are, in my opinion, a sufficient addition to the labours of the day. In his general report for last year, my colleague, Mr. Barrie, states :—

“It is greatly to be regretted that in most of our schools the head master is so constantly engaged that he has little time to spare for the practical instruction of his pupil-teachers in the art of teaching. They are too often left to adopt a method of their own, or to pick up his as best they can.”

4. That more attention should be given to the technical instruction of pupil-teachers.

They should not be confined, as is too often the case, to the mere drilling of the backward members of the different Standards, but should be gradually and systematically trained in the various parts of practical school keeping, so that, when they pass into the training college, they may, from the very outset, be able to profit by the lectures of the master of method. In short, as a provisional certificate is frequently claimed at the close of the fifth year, pupil-teachers should not be allowed to finish their apprenticeship without a competent knowledge of the methods of teaching all the ordinary branches of an elementary school.

5. That the times and methods of instructing pupil-teachers should be more clearly defined; and that a special gratuity should be given to the teacher for this work.

At present, I fear, the instruction is often more nominal than real, and being given at the close of the school day, when master and pupil are alike exhausted, the result cannot be very satisfactory in any case, while in too many cases it is all but *nil*. Were teachers, however, directly paid for the instruction and training of their apprentices, as they undoubtedly should be, they would have more interest in their success, while a deduction could be made from the allowance in the case of an

indifferent examination, or it could be withheld altogether in that of a thoroughly bad one. In making this statement, I have no wish to cast any reflection on the character of teachers, for whom, as a class, I entertain the highest regard. But the whole relation between them and the public has now become so much a matter of supply and demand, that the sooner it is placed on a thoroughly satisfactory footing, so much the better for all parties.

The "centre system of training pupil-teachers."

The "centre system of training pupil-teachers" is at present agitating the educational mind in Scotland, but it would be foreign to the objects of this Report to discuss it here. Suffice it to say that, though I prefer the present system modified and altered, as I have suggested above, I should like to see the "centre system" get a fair trial in some town, or large centre of population, where there is a reasonable field for the experiment, and where the local parties could make the necessary arrangements. If it succeed, so far well—if it fail, there could be no grounds for cavil, except on the part of the pupil-teachers, who would thus be the greatest, if not the only, sufferers.

Reading.

In the reading I observed a marked difference between the first and second year students in all the colleges.

The reading of the second-year students was generally good, sometimes very good, and even excellent, but that of the first year rarely reached the same high standard. This was no discovery, as I had noticed the same fact in my previous visits to the Free Church Training College, Glasgow, and the reason is obvious. The students come from all parts of the country, their accent is various, their pronunciation peculiar, their enunciation often defective, and their reading, viewed as a whole, seldom good, and sometimes very moderate indeed.

The first year, therefore, is required to overcome, in some measure, these defects, and to introduce a uniform standard of pronunciation and a better style of reading. How well this has been done in the different colleges may be seen on referring to the table of per-centages.

Repetition.

I was much pleased with the precision and accuracy, with which the students of both years generally repeated the passages prescribed in the syllabus. This is a valuable exercise, and seems to obtain a due share of the time and attention of the student. *Memoria excolendo augetur* is not more trite than it is true; and, while no one denies the importance of a good and retentive memory, it is surprising to note how little, comparatively speaking, is done to cultivate this faculty in the young. Indeed, it has often been remarked that one of the greatest defects in the modern system of education has been the neglect in cultivating memory at an age, when it is most retentive and accurate. The repetition exercise has done a little in this direction, but to be really useful, and productive of solid and lasting advantage to the individual, it must be begun at school, and continued systematically during the whole course of instruction. In this way, much that is rare and beautiful in the works of our best writers in prose and verse might be gradually and accurately committed to memory, and would form such a wealth of thoughts and ideas, clothed in the choicest language, as could not but smooth the path of the young composer, whose difficulty lies not more in poverty of thought, than in poverty of language to give suitable expression to thought. Students, as a rule, do not compose with ease, or accuracy. Their style is unformed, bald, and inaccurate, sometimes pretentious, and but rarely clear and simple. The root of the evil lies in the primary school, where little, or no attention was paid to the subject. Children were generally well instructed in simple reading, writing, and arithmetic, but systematic instruction in the structure and use of

The importance of a good and retentive memory.

The cultivation of memory often neglected.

A remedy suggested.

their own language was formerly all but unknown. This, however, I am happy to say, is no longer the case. Manuals on English composition, drawn up by some of our most accomplished teachers, are now met with in almost every school, and a graduated course of instruction in English composition finds a place in most time-tables.

The teaching of the second-year students, and of such students as proposed to leave at the end of their first year's training, was quite equal to the average of former years. Of course, while some rose considerably above this average, others fell as considerably below it; still the general results of this important exercise in all the colleges were good, and left a decidedly favourable impression on my mind. The notes of lessons presented to me were generally well drawn up, and neatly written out, while the subjects were more carefully chosen, and less ambitious than last year. As it may be interesting, I give the following tabular statement of the subjects selected by the students in the different colleges:—

Name of Training College.	Number of Students.	Subjects.									Number of Lessons presented.
		Geography, Political and Physical, &c.	Reading and Grammar.	Arithmetic.	Animals, &c.	Plants, &c.	Minerals, &c.	Manufactures, &c.	Miscellaneous Subjects.

Tabular statement of notes of lessons.

N.B.—Each student presents notes on three different lessons.

It thus appears that of the 1,317 notes of lessons presented to me, 715, or more than one half of the whole number, were on the elementary subjects of geography, grammar, reading, and arithmetic, while the remaining 602 were mainly on such subjects as find a place in our ordinary school books. I must, however, take exception to lessons on such subjects as "Taxation," Capital, "Value," "Insalivation and Deglutition." They do not seem to me fitted for the purpose. They are either too abstract, or too difficult for a lesson even to the highest class, without previous preparation on the part of the pupils. Such lessons are generally selected by the best students, but they rarely get such high marks, as they would undoubtedly have done, had the subjects been of a simpler character, and better suited to the intelligence and capacity of the class.

Exception taken to a certain class of subjects.

There are large practising schools in connection with all the colleges. In the four Presbyterian colleges in Edinburgh and Glasgow, and in the Church of Scotland College, Aberdeen, they form an integral part

Practising schools.

of the respective institutions, and are under the direct management and control of the Principals ; while in the case of the Episcopal College, Edinburgh, and the Free Church College, Aberdeen, they are independent schools, the use of which has been kindly placed at the disposal of the authorities of these colleges. Whether we regard the size, the equipment, or the organization of these schools, they are admirably adapted to meet almost every requirement of the training college. Indeed, so far as I know, no college in Great Britain is better supplied with the means of studying and practising the art of teaching than our Scotch colleges. But I am bound to confess that there is a want, and one to which I have called attention in former reports, and notably in that on the Free Church Training College, Glasgow, (Report, &c. for 1869-70, pp. 527 and 528), in which I state :—

A want.

“ Although the students have thus the opportunity of acquiring the art of teaching in schools thoroughly organized and admirably taught, there is something wanting. In the practising schools the departments are graduated in such a way that no single one is a model of what an ordinary school should be. . . . It has occurred to me that a remedy for this defect might be found in occasional visits to some of the well-taught elementary schools of Glasgow, and the neighbourhood. These visits might be made periodically, and could not fail to be productive of much good to the students.”

A remedy suggested.

This suggestion has been adopted in Glasgow and Aberdeen, and with best results.

My experience since 1870 has only confirmed this opinion, and I am glad to say that my suggestion has been adopted by the Principals of the Church of Scotland Colleges in Glasgow and Aberdeen, and, I have reason to know, with the best results.

For the condition of these schools at the last visit of Her Majesty's Inspectors of Schools, I beg to refer to the special reports on the respective colleges.

University training of teachers.

The establishment in the University of Edinburgh of a Chair of Education has once more stirred the question of a thorough University training for our teachers. This I have always advocated for the masters of the secondary schools, but the training college must still continue to be the alma mater of the teachers of the primary schools. In my Reports for 1866 and 1874 I discussed the question in its various bearings, and I see no reason for greatly modifying the views which I then held, or materially altering my opinion on the general question.

Permission to attend the University.

In terms of Art. 102 (*b*) of the Code, students are permitted to attend the University for two sessions during the course of their training in the normal school. This arrangement has only been in operation for two years, and one can hardly form an opinion as to its ultimate effect on the general culture of the student. During last session 32 students attended the Universities of Edinburgh and Glasgow (vide special reports on the Church of Scotland, and Free Church Colleges), taking, as a rule, two classes each. This was only a small proportion of the whole number in attendance, but is an earnest, I trust, of better things, and argues a growing desire for a higher culture on the part of the students. They were examined by the professors in November last, and the results, though rather below what might fairly be expected of an average student, showed a considerable advance on those of last year. Much of this deficiency was no doubt owing to the period at which the examination was held. The classes in the University are usually examined either periodically during the course of the session, or immediately at its close, while the normal school students were not examined till after the commencement of the following session. This, in itself, makes a very material difference, and should be borne in mind, when

Examination of students who attend the University.

Period of examination unsuitable.

contrasting their appearance with that of their fellow students. Several of the professors pointedly referred to this fact, and expressed their belief that, in other circumstances, the results would have been much higher. The authorities of the training colleges also take exception to the date of the examination, and I must say that in this I sympathize with them. On reading over the papers worked by the students at the recent University examinations, I saw evident marks of *rust*, while several of the papers were of such a character as to show clearly that the writers would have done much more justice to themselves and their professors, had they been examined at the end of the session, and not, after six months of close application to other and far different studies. In these circumstances, I venture to suggest that this examination should be held at the close of the University session, and not, as at present, at the beginning of the following session, when the student is engaged with his preparations for the Christmas examination, and may also have entered on the work of a new class in the University. A change suggested.

The following tables exhibit the results of the recent examination for certificates in all the training colleges, and also, for the purpose of comparison, the corresponding results for 1874, as given in my report of that year :— Results of the examination of students.

I have the honour to be, &c.

CHARLES E. WILSON.

To the Right Honourable

The Lords of the Committee of Council on Education.

March 1876.

P.S.—I had finished my general report on the training colleges before I received the many valuable reports by the Inspectors, who revised the papers worked (a) by candidates (male and female) for admission, (b) by students (male and female) at the end of their first year, (c) by students (male and female) at the end of their second year. I have therefore appended such extracts as I thought might be of interest, or value to the authorities of the colleges, or to those who are more immediately engaged in preparing candidates for the admission examination. These extracts, though necessarily short, are still sufficient to bring out the salient points in the systems of training pursued in the different colleges.

## CANDIDATES FOR ADMISSION.

Arithmetic.  
Males.

On this subject one Inspector reports as follows :—

"1. As regards *accuracy of results*, the papers were, on the whole, very fair. All papers of an ordinary plain-sailing rule-of-thumb kind were generally correctly solved; but questions, even of no *out of the way* sort, which made a demand upon the intelligence, or thinking powers of the candidates, were generally shirked, if possible.

"2. In regard to *methods of working the sums*, and of *showing the processes used* in the solutions, a good many of the papers were admirable, but the majority fell into one of two errors, either (1) they used round-about, or over-elaborated (or one might call them diluted) methods; or (2) in striving after conciseness, or shortness of method, they omitted to exhibit clearly all the stages of their processes.

"3. The questions testing the candidates' grasp of methods of teaching arithmetic were by far the worst answered of the whole paper. The answers to these questions were, with exceedingly few exceptions, very poor indeed."

Another Inspector states :—

"The higher rules have been cultivated to the neglect of the lower, and I venture to think that pupil-teachers in their fourth and fifth years confine themselves too exclusively to the work of these years without keeping up a familiarity with the earlier rules; hence imperfect power of manipulation, and want of method and neatness are too generally apparent."

Females.

Another Inspector states :—

"The treatment of the questions generally shows that by far the greater number of pupil-teachers are taught to work by rules, without any attempt at understanding the reasons for these rules, and that they are thus incapable of putting before children the reasons for the simple processes of arithmetic. Evidence to this effect is given in the treatment of most sections, but is specially strong in the answers to the ninth section."

Euclid, algebra,  
and mensu-  
ration.

One Inspector states :—

"I am convinced that in some cases a few isolated propositions are learned by heart on the chance of one of them being set, and that the Euclid had not been learned with understanding at all. The definitions are generally done very badly, or omitted."

Another Inspector writes :—

"Many of the candidates deliberately wrote out the wrong propositions, and did not seem to see their error even after arriving at quite a different result from that demanded by the printed enunciation by their side. . . . A great many seemed to write their propositions from memory. Not 50 per cent. of those who attempted the first question, which consisted simply of a few definitions, and the enunciation of the three postulates, did them correctly. The algebra was, perhaps, on the whole, a trifle better done than the Euclid, but many of the attempts were most disappointing. The mensuration was almost pretty fair, on the whole."

School ma-  
nagement.  
Males.

One Inspector writes :—

"The answers were full of generalities, but no details were given to assure one that the subject was mastered. Again, the notes of lessons were very poor, both as regards matter and form. These defects in a subject of great importance arise, I believe, chiefly from the neglect of this subject by the teachers. The pupil-teachers, I am sure, get no lessons in school management; they have no questions given them to answer; they read no books on the subject. All that they know of it they get in a fragmentary, piecemeal fashion. What should be done is to make school management a subject of examination during apprenticeship. I would make it obligatory in the third and fourth years, certainly in the latter."

Another Inspector states :—

"Greater skill and neatness in drawing out 'notes of lessons' are desirable in the great majority of instances. There should be a logical arrangement of the subject-matter, and the information given should be such as would be really worth imparting. The matters which were, on the whole, best understood, as well as most satisfactorily treated of, were registration, school organization, and the rules to be observed in teaching to spell. Some good time-tables were also drawn out, and, in a limited number of instances, the outline of an elementary lesson on geography was given with tolerable clearness and intelligence."

## Another Inspector writes :—

Females.

"The faults of character, which a sewing lesson affords the opportunity of observing, are well described, but the teaching of needlework seems much wanting in method and proper organisation. The specimen registers are mostly well made out. Some few papers, full and good in other respects, were disfigured by mistakes in spelling."

## One Inspector states :—

Grammar.

"This year, as hitherto, questions depending solely on accurate memory of text-books have been, for the most part, fairly and fully answered; but classifications of adverbs and adjectives, and definitions of pronouns and prepositions, although useful, are not the most important part of grammar; and even here (questions IV. and V.) considerable inaccuracy is apparent. . . . The notes on a lesson (Q. VI.) struck me as being, on the whole, very imperfect, jejune, for the most part, in matter, and clumsy in method, where method was attempted. It was generally difficult to conclude, from the way in which the answers to this question were given, that any adequate knowledge was possessed of the subject-matter of the lesson supposed to be in hand, or, that, if possessed, it could have been imparted with tolerable lucidity and arrangement."

## Another Inspector writes :—

"Very few candidates seemed properly to understand the nature and use of participles, and of participles forming part of the passive of verbs. There were also extremely few correct answers on strong and weak verbs. Paraphrasing often wanted closeness; and the candidates, instead of writing plain prose, as they were asked, often used all sorts of fine phrases wide of the mark. Parsing was often defective, and there was a general suspicion of mere reproduction of the words of a book, rather than clear apprehension of the subject."

## One Inspector states :—

Geography and history.  
Females.

"A majority, so large as to be practically the whole of the candidates, obtained considerably better marks for the geography than for the history portion of the paper. That this should have been so to some extent is only to be expected from the nature of the two subjects and the age of the candidates; but that it should be so to the extent to which it evidently existed argues, I think, that in the training of the candidates a fair balance has not been maintained between the cultivation of their powers of memory and their powers of thought. In the geography portion of the paper, the candidates, for the most part, answer well all such questions to which replies come ready cut and dried from their text-books, or from a map. . . .

The least successful of the answers to this part of the paper is the map-drawing, although amongst the maps, out of which the candidates were allowed to make a choice, was one so easy and so familiar as that of Wales. Another weak point in the answers generally is the loose way in which numbers, such as lengths of rivers, heights of mountains, &c., are done. One candidate, for example, gives the length of the Ganges as '400,000 miles,' another as 'about five times the area of Europe.' . . . The most characteristic and most generally prevalent faults in the history answers appear to be these:—1st. Inaccuracy as to dates, e.g., McClintock is said by one candidate to have discovered the N.W. passage 'in A.D. 58,' Franklin to have perished in Arctic exploration 'in the 14th century,' Columbus to have discovered America 'in 1840,'—'in the reign of Henry III.,'—'in the reign of Stephen.' 2nd. Failure to recognize, and bring out in their proper relief, the really important events of English history, and to relegate to their proper obscurity the more insignificant events."

## Another Inspector states :—

Males.

"On the whole, I think the result is fairly satisfactory, the knowledge of facts displayed by the candidates being often considerable.

"Questions, however, which involved any thought in answering, or which partook of the nature of an essay were, as a rule, exceedingly badly answered."

## Another Inspector states :—

"The answers appeared to be too mechanical, and testified to the training of the memory rather than of the mind. Questions, which could be answered directly from text-books, were done with great fulness, while those which required a little originality of application of a general knowledge of the subject were seldom attempted, and, with the exception of a few instances which might, I fear, be easily reckoned on one's fingers, feebly done, and comparatively worthless. As an instance of the text-book style of answer, I might quote that given to the question (sect. I.—3) of

the 'Islands in the British Seas,' which, in most cases, gained nearly, or quite the full number of marks; as an instance of the latter (sect. IV.—3), comparison of the reign of George III. with that of Queen Victoria."

Another Inspector writes:—

"Learning text-books by heart is the rule of the pupil-teachers; it is, I fear, also the rule of many of the training colleges; and it is only natural that these trained teachers should perpetrate the evil with their own schools and with their own pupil-teachers. The first result of the general introduction of special subjects into the elementary schools will be, I hope, to prove to the teachers how fatal this system is, and then, and not till then, can we hope for better results."

One Inspector states:—

"For the most part I do not think that the papers are well done. Tegetmeier's book has been inaccurately learned, the spelling was often bad, and there was a general want of common-sense common knowledge. A great many of the candidates, for instance, said that linen was a kind of cotton, and one asserted that it was made from paper."

"I do not think that a pupil-teacher, after five years of training, ought to make mistakes like these. There were, of course, a good many who did much better."

One Inspector says:—

"The results are, on the whole, disappointing, and can only, I think, be accounted for on the supposition that a majority of the candidates have been but a short time under instruction. Two of them, indeed, by way of apologizing for their meagre performances, state that they knew next to nothing of the subject, having been studying it for barely two months. Not the least noticeable feature of the results is the decided superiority of the Scotch as compared with the English candidates. The difference is so marked, that I have thought it worth while to classify them separately as follows:—

		England.	Scotland.
Per-centage of 726 female candidates attempting the paper who obtained	No value - - -	46.1	10.5
	At least 20 p.c. of full value	24.7	68.2
	" 50 " "	8.8	25.6
	" 80 " "	1.9	4.9

"I have not been furnished with sufficient data to determine the per-centage of candidates who declined the paper, but I find that 42 per cent. of the papers attempted were from Scotch colleges."

Males.

Another Inspector states:—

"Only a very few students did good papers in German. In one case the errors of the translation from English to German showed that the candidate was better acquainted with the idiom of the German than of the English language. I see that the lad, who did the best papers in French and German, heads the list of the successful Scotch candidates."

"There were no good papers in Greek."

#### MALE STUDENTS.

One Inspector states:—

"That the papers, on the whole, were neatly and correctly worked, and a good deal of intelligence was shown in solving the arithmetical problems put before the students . . . but the chief defects in the papers were shown in the answers which attempted to explain the methods and give the rationale of the rules observed in arithmetic. Comparatively few explained intelligently the process of working a sum in subtraction, or division, or addition of fractions, few, that is, compared with the number of those who worked the sums correctly and well. In fact there seemed to be among many of the students a want of power to express themselves clearly and correctly."

One Inspector states:—

"The paper on algebra and mensuration was not done so well as might have been expected. In a few of the best colleges there was a general absence of very low

Domestic economy.

Languages. Females.

Arithmetic. First year.

Algebra and mensuration.

marks; in the rest there was great inequality, some papers being pretty good, and a considerable number very inferior.

"In conclusion, I would beg to recommend greater attention to the fundamental principles underlying the rules of algebra, and to accuracy and elegance of style in algebraical processes."

Another Inspector states :—

"In mensuration the students did remarkably well. In algebra the results were less satisfactory than in mensuration, and indicated that more time and attention should be given to it to satisfy the new requirements."

One Inspector states :—

Euclid.  
First year.

"On the whole, I think the papers show that the text of the subject is well got up. In most cases the full tale of propositions asked is produced with very fair exactness. Several of the colleges appear to aim at little more, though not a single college failed to send up at least one paper showing power to solve deductions.

"The only point calling for censure is the laxity of reasoning, I might almost call it dishonesty of reasoning, often exhibited. Again and again, after wandering hopelessly in a confused tangle of statements leading to no intelligible issue, a triumphant "therefore," is made to usher in the desired result, when it was impossible to conceive of any connection."

One Inspector states :—

Second year.

"The propositions were, on the whole, fairly well written out, in some colleges well, in some indifferently. The deductions and riders, however, were by no means well done, though in many colleges (especially Chelsea, Battersea, and Borough Road) a fair proportion of the students showed a creditable grasp of geometrical principles. On the other hand, scarcely any of the students at several colleges could solve the deductions, and showed great ignorance and confusion in their attempt to do so, which would scarcely be expected from fairly good fifth year pupil-teachers.

"I much regret this, as I am certain no one can efficiently teach geometry who is unable to work easy deductions. Where the riders were done, even by the best students, in nearly every case propositions more advanced in the subject than the propositions, to which the riders were respectively attached, were made use of, which is of course inadmissible, though I gave some marks for any kind of proof. All the riders (of which some were exceedingly easy) could be solved by the application of the parent, and of preceding propositions.

"Owing to the plan of dividing the paper into sections, the deductions requiring most thought were not attempted, only one student solved question No. 2 in section 5 (which I set for the boys at Cheltenham College 16 years ago); two or three did question 3 in that section; not one student solved the first question, and two only the third of section 6. Several were successful in question 1 of section 5, and question 2 of section 6."

One Inspector states :—

Grammar.  
First year.

"In composition originality was conspicuously absent. The subject selected was commonly that which referred to the life and writings of the poet studied, and in many cases, notably in the case of students in one of the Scotch colleges, an essay was written, which I am inclined to think must have been previously learned off by heart. . . . Punctuation was defective all over, and would seem to have received little attention. The grammar paper was only fairly done. The analysis was not more satisfactory. The detailed analysis of separate clauses was good, but the general analysis was defective, and in only a few cases was the nature of the whole sentence stated."

Another Inspector states :—

"The paraphrase is always a crucial exercise, and, as usual, few produced good work. The substitution of one word for another (*alteration for change, petition for pray*), while the structure of the sentences, and the shades of thought, were allowed to remain the same, was all that was generally attempted."

One Inspector states :—

Second year.

"In most cases, the narrative of the action of the prescribed play (Henry VIII.), was well and interestingly told. 'A short essay on the importance of the study of language' was, in the majority of cases, sensibly written, although the main point of the subject was frequently missed. In most instances the style was forced and stilted, showing that the habit of composition had not been sufficiently cultivated.

"The paraphrasing was weak throughout.

"The analysis was done, as heretofore, mechanically, and for the most part correctly; but the tabular arrangement was, in a great majority of cases, careless and slovenly.

"The explanation and illustrations of particular passages (Sect. III.) were, in the case of most colleges, satisfactorily performed. The peculiarities of construction and phraseology appeared to be well known and intelligently explained, and illustrated by a number of passages prescribed; but with a certain uniformity which suggested their having been, 'got up,' from the same text-book. There were few marks of originality in the teaching of the subject.

"The last section, which contained an exceptionally difficult question, viz., the compiling of 'part of a dictionary, &c.,' was not satisfactorily performed. It was attempted, however, by nearly all the candidates, and although unsuccessful this year, may suggest a useful and apparently attractive study for future examinations."

Geography.  
First year.

One Inspector states:—

"The instruction for the most part would seem to have been imparted in a satisfactory manner.

"The questions are very comprehensive, and perhaps the 'space' allowed is scarcely sufficient for a full answer; but many of the students would have done themselves greater justice, had they been taught to exclude irrelevant matter, to give direct answers, and to condense their information.

"Map-drawing requires increased attention in some of the training schools. The maps, as a rule, were not drawn freely, neatly, fully, and accurately."

Another Inspector states:—

"The text-book knowledge displayed is in many cases full and accurate, and may on a general estimate be pronounced satisfactory. . . . The questions requiring more general knowledge than an ordinary text-book supplies are, as a rule, not so well answered. Along with this deficiency of grasp, there should be noticed in not a few papers a want of order in description—a tendency to write disjointed notes rather than a connected paragraph. Again, unimportant details and distinctions often receive attention, while features of a more prominent nature are passed over."

Second year.

One Inspector states:—

"The maps done were, with very few exceptions, of inferior quality, both as to accuracy and execution. I doubt if the point has been much attended to in the colleges, but it is most important to a teacher.

"Both in physical and commercial questions, there was a strong tendency to give mere strings of names. The word '*describe*,' has been too often read as if it meant '*enumerate in order*.'

"I take it to mean something more, viz., to give, by orderly and scientific arrangement, a *general* view of the mountains, lakes, productions, &c. referred to.

"The mathematical section surprised me by the large proportion, five-sevenths, who preferred the mathematical question on temperature. I expected to find, as in some colleges I did find, that strength on the mathematical side was the set-off against weakness in pure geography. To a certain extent it is so. A large proportion of the 200 students, more or less, who took these questions answered them fully and clearly."

History.  
First year.

One Inspector writes:—

"There were 18 questions, and they were divided into six sections, in each section one question referred to Scotch history. Scotch students appear to have no marked preference for the history of their own country; the Scotch questions not being very generally answered, and one question was not attempted at all.

"The knowledge displayed appeared to me on the whole very creditable, but it struck me that the work done by the students of certain colleges was, as a whole, better than that done by the students of other colleges; whether this difference in quality of work arises from some colleges accepting only the most promising students, or from a better system of education in the colleges themselves, I cannot tell, but probably both causes are at work."

One Inspector states:—

"The papers evidently represent the result of much intelligent teaching and much steady application."

Another Inspector writes:—

"Many of the candidates answered the first questions at inordinate length, and left little or no room for the subsequent sections. As the questions increase in value

School management.  
First year.

in the order of the sections, a great many marks were thus lost. This is so common a fault that it might be desirable to insert in the heading of the papers a notice that candidates are recommended to confine their answers to the space opposite each section.

. . . . . The distinction between teaching and training was generally well made, but often in the same words by students of the same training college . . . .

. . . . . In teaching spelling to young children transcription seems to be scarcely sufficiently noticed; the words to be written in dictation by upper classes are sometimes recommended to be repeated twice, and the correction of mistakes is left too much to the children themselves. It is, perhaps, not easy to draw up notes of a lesson without access to books of information on the subject. But the notes were usually more defective in form than in matter, and were, in many cases, rather accounts of ventilation, &c. than of the method of teaching. Questioning seemed scarcely sufficiently attended to, nor did time seem to be allowed, at the end of the lesson, to ascertain how far the scholars had followed the instruction. No clue also was given to the method to be pursued to test the knowledge of a whole class."

One Inspector states :—

Second year.

"A great many of the time-tables must have been rejected as not fulfilling the requirements of the Elementary Education Act, giving less than two hours secular instruction between the closing of the registers and the close of school. Needle-work was frequently unprovided for, or was so introduced that the girls would have received no instruction whatever in one or more of the essential subjects . . . . .

. . . . . The distinction between organization and classification has not been sufficiently understood, and most of the answers bearing upon this were vague and of little value.

"Many students, who took the question on collective teaching, failed to understand the meaning of the term, and consequently wrote vaguely and without point."

One Inspector writes :—

Languages.  
First year.

"There can be little question that, in by far the majority of cases, the students by whom these papers were worked must have come up to the training colleges possessed of little, if any, acquaintance with the languages prescribed.

"Their course of training in this subject ought, therefore, to include a careful grounding in grammatical forms and syntax, and attention to these points should be continued throughout their whole period of study.

"Elementary prose composition in the language, or languages selected ought also to go hand in hand with translation into English.

"Only in a very few instances were the easy sentences set in the papers for translation from English accurately rendered.

"A knowledge of Latin or Greek, or some modern language, is valuable to an elementary teacher, both as an addition to his educational stock in trade, so to speak, and also, as implying some degree of culture, but its value in both respects is altogether in proportion to its accuracy. Want of this accuracy is the defect, which in the revision of these papers I have had most occasion to complain of."

One Inspector writes :—

Second year.

"The first remark which I think it necessary to make, therefore, upon the papers from 17 colleges, which have been submitted to me for revision, is, that the result of the examination indicates very clearly that in the subject of languages, as in all others, superficial work is of little or no use; and that whilst this subject has been taught very successfully in some of the colleges, it is nevertheless far better that it should be omitted altogether than done carelessly. It is also far preferable that one language should be learned thoroughly, than that two should be taken up and prepared inaccurately.

"In regard to the papers which belong to the colleges which stand high on the list, I would only remark that it is desirable that translation of short English sentences into the French and Latin idioms should be practised more. In Latin, Arnold's Latin Prose, Part I., would be found of great use, and such exercises as it contains ought to be mastered by the students.

"Only two German papers were done, and about half a dozen Greek ones. Most of these showed very considerable scholarship."

#### FEMALE STUDENTS.

One Inspector writes :—

School management.  
First year.

"Among so many papers (592) various degrees of merit might naturally have been expected, but while a high degree of excellence was only attained by a few, there were no positive failures, and only two or three which might be regarded as imperfect . . . . . The general characteristic of these papers was

neatness in the arrangement of each answer, an intelligent acquaintance with the subject of which it treated, and a style of language at once clear, grammatical, and appropriate. The defects in the remainder, which precluded them from receiving an equally favourable judgment, were such as occasionally too brief and hurried answering, inattention to the instructions printed at the head of the paper, or else a misapprehension of the true purport of the question."

Another Inspector states :—

"For the most part the form was good, the answers being neatly and clearly set down. A good average style of handwriting seemed to be attained, but I was sorry to see, in the case of one or two of the Scotch colleges, a very inferior style not much better than a scrawl. The answers were also grammatically expressed, and a respectable knowledge of the subject seemed to be attained in most cases. The greatest deficiency was in the notes of lessons. These, in the case of the English colleges, were meagre. The lessons of some of the Scotch students were admirable specimens of what such lessons might be, and should be, generally. Their notes were truly notes of matter, which reading and observation had given them in abundance."

Second year.

One Inspector states :—

"I have the honour to report on the papers on school management :—

1st. That the papers were upon the whole satisfactory.

2nd. That the best answers were,—

*a.* Upon organization of schools.

*b.* Upon teaching reading.

*c.* Upon maintenance of discipline.

3rd. That the answers upon Kindergarten showed considerable intelligence and thought.

4th. That the answers upon the moral training of children were upon the whole satisfactory.

5th. That the answers on the time-tables were, on the whole, unsatisfactory, and in all the Scotch training colleges bad.

6th. That the answers upon registers were not, on the whole, as good as they ought to be from young women entering on the charge of schools. The chief defects were,—*a.* In the explanation to a pupil-teacher of the best way of testing the accuracy of marking the absence, or presence of scholars. *b.* In the weekly averages in the specimen register. *c.* In the average number of attendances made by each child.

7th. That in the whole of this subject of school management, the answers from the Scotch training colleges were inferior to those from the English."

Grammar.  
First year.

One Inspector writes :—

"The parsing and the analysis of sentences, with the questions thereon, were fairly done. In the essay there were but few mistakes in spelling, but, upon the whole, the composition could only be termed moderately fair. The least satisfactory portion of the paper worked by the students was the paraphrasing, a large number of them failed to express, with any degree of accuracy, the meaning of the passage selected."

Second year.

One Inspector writes :—

"*Composition.*—The subjects of the essay were, with comparatively few exceptions, handled loosely, and with little regard to method and arrangement.

"*The Paraphrase.*—This was still less satisfactory. In some answers the meaning of the passage was misunderstood; in other cases it was reproduced in a clumsy manner, too often in the words of the authors themselves.

"*Parsing and Analysis* were upon the whole creditably done, and call for no special remark."

Geography.  
First year.

One Inspector states :—

"There is a great difference in the standard attained in different colleges. The best papers worked in some being below the worst worked in others. . . . .  
. . . . . Wherever the papers are well worked, there is too great a tendency to be diffuse; much time is often wasted in attempting to answer a general question with too great minuteness. Notes for a lesson on a particular subject may abound in details, but a general description of a large tract of country should be given in outline only.

"The astronomical questions in section I. are often very poorly answered; students should be taught to use plain language to express their thoughts, and never to attempt to use a technical word without being clear as to its meaning. Spurious derivations have no value, they add nothing to the information of the children taught,

and serve to expose the ignorance of those who use them. There is too great a tendency to answer by rote. I could often trace the text-books through the continued recurrence of set phrases."

One Inspector states :—

Second year.

"I find that, as a rule, there is very little variety between the best and the worst paper sent in from the same training college; but that the papers of some of the training colleges are, as a whole, immensely superior to those of others, one of the Scotch colleges standing out as especially good. . . . I find map-drawing generally bad, outlines incorrect, and great haziness as to the position of places, while the lines of latitude and longitude are often curiously correct. . . . The third question produced the weakest answers; the climate, productions, and distinctive characters of the people of Sweden, Turkey, or Sicily. The fourth question, 'write notes of a lesson on the Mediterranean or the Rhine,' brought out, in general, a thorough knowledge of whichever subject the student selected; but the arrangement for a lesson was in general defective, often no arrangement was attempted at all, and, more often still, the materials of the lesson were beyond the comprehension of the first class in an ordinary elementary school."

One Inspector writes :—

History.

"As a general rule, the answers were given fully and with accuracy, and showed that much care and diligence had been expended on the subject. . . .

First year.

. . . At the same time, there was one fault noticeable throughout, to which, I think attention ought to be directed, viz., that for nearly every question each training college had its own special answer, which would be given in almost identical language, and with painful reiteration by all the members of that particular college. This, I fear, indicates a system of cramming, whereby the student merely learns up a stock answer to certain questions, which, it may be calculated, are nearly certain to be asked, and fails to get anything like an intelligent comprehension of the subject.

"It is, perhaps, doubtful whether so long a period of history could be otherwise learned in the time, but I cannot help thinking that it is a cause for regret, that so much real industry should be expended to obtain a result, which cannot altogether be looked on as satisfactory."

One Inspector writes :—

Second year.

"The work of these students is, on the whole, very satisfactory, though there were many instances in which the examinee had failed to grasp the scope of the question proposed. Most of them, however, had made good use of the college lectures, and of the text-books, which had been put into their hands—and their knowledge of the subject had been well digested and was given in a compact form."

One Inspector states :—

Domestic economy.

"The great mass of the work was very fairly done. . . . The papers were easy, perhaps, in so easy a subject as domestic economy, almost too easy, and in some cases the questions allowed too loose and indefinite a scope for their answers; which two causes doubtless account, in a good many cases, for the answers being worth little more than half marks.

"Domestic economy is a subject that tempts (from long practical familiarity with some of its branches on the part of students) a free and undigested style of writing,—and where the questions are either very easy or very indefinite, a strong tendency exists, on the part of candidates, to run off an answer without having previously mastered the exact points asked for in the question.

"This, and not ignorance of the book work of the subject, was, to my mind, almost universally the cause of students obtaining so often either low, fair, or only very fair marks for their exercises."

One Inspector states :—

Languages.  
First year.

"In a great many instances the candidates showed the very smallest acquaintance with the meaning of the words in the passages to be translated into English, while the attempts to translate English into French were ludicrous in the extreme. The parsing was, as a rule, done very badly, and not one candidate answered all the questions correctly, yet the paper was by no means difficult. . . . Some few of the candidates attempted Latin, but with no very satisfactory result. As this is a voluntary subject, I think it would be as well for the authorities of the training colleges, if possible, to allow only those of the students who have something like a decent knowledge of the subject to take the paper."

One Inspector writes :—

Second year.

"Most of the candidates who sent answers on 'languages' took the French. A very large proportion of these were only commencing the study of that language,

and were quite unable either to translate, or to answer grammatical questions correctly. A small proportion, however, showed a good knowledge of French, having evidently studied it previously to their entering the training school. About a dozen took the German paper, of whom several did it very fairly, and one or two remarkably well.

"Of those who took *Latin*, there was one, who did it excellently, and a few others fairly. The rest were only beginning to study the accidence."

## SPECIAL REPORTS.

### EDINBURGH CHURCH OF SCOTLAND TRAINING COLLEGE.

I visited this institution in May and November. There is no change in the premises since last year, but the managers are in treaty with the Edinburgh Improvement Trust for the purchase of a piece of cleared ground behind the college, on which they propose to erect a hall and new offices, &c. for the use of the male students. The removal of the old tenements between the college and the Grassmarket adds to the salubrity of the site, while the erection of a suitable hall, &c. would add much to the comfort and convenience of all connected with the institution.

I found in regular attendance the following students :—

MALES.					
First year	-	-	-	-	55
Second year	-	-	-	-	41
					96
FEMALES.					
First year	-	-	-	-	51
Second year	-	-	-	-	39
					90

giving a total of 186 students, as against 173 for 1874.

These may be further divided into two classes, viz. :—

#### 1. Students holding church bursaries.

MALES.					
41, each	-	-	-	-	22 <i>l</i> .
55, „	-	-	-	-	20 <i>l</i> .
FEMALES.					
20, each (first year)	-	-	-	-	8 <i>l</i> . to 15 <i>l</i> .
19, „ (second year)	-	-	-	-	„
2. Ordinary, or self-supporting students.					
Female	-	-	-	-	51

of the 96 male students in the college, 80 had been, and 16 had not been, pupil-teachers ; while of the 90 female students, 61 had been, and 29 had not been, pupil-teachers.

In reference to the important subject of the health of the students, I have been favoured with the following statement by Dr. Dunsmore, the medical officer :—

“53, Queen Street, Edinburgh, 29th November 1875.

“I BEG to report that the health of the students belonging to the training school, Johnstone Terrace, during the session 1875, has been upon the whole remarkably good, and the attendance upon the classes has consequently been regular. Most of the cases treated have been of a trifling nature, and require no special notice. The only infectious diseases that occurred were in two male students, Alexander Howie and Thomas Smith, who had an attack of scarlet fever, but as they were not allowed to return to school until a fortnight after desquamation of the skin had ceased, the disease did not spread among the other pupils.

“Two deaths unfortunately took place during the holidays, viz., that of William Nicholson, who was labouring under lumbar abscess, and who was reported in his schedule as not strong, and of Christina Hodge, who died from acute phthisis. Her health began to give way in June, but notwithstanding, she continued to attend her classes until the commencement of the holidays.

"Since the reopening of the school in September, Jane Park has been suffering much from cough, and is far from strong. I have recommended her not to return next session, but to remain at home for a year, in the hope that her health may be re-established.

(Signed) JAMES DUNSMURE,  
"M.D., F.R.C.S. Edin."

The instruction and the training of the students are conducted by the following staff :—

In the course of the year I had repeated opportunities of seeing the methods of instruction pursued by the lecturers and the other teachers of the college, and I have the pleasure of expressing my satisfaction with the general way in which the work of instruction is carried on in all its departments. The discipline and order of the classes are very satisfactory, and the course of instruction is very judicious, and well suited to secure the end purposed.

The following statement by the Principal explains his method of preparing the students professionally :—

"The arrangements in the college for the practice of teaching by the students do not differ from those of last year.

"Two hours a week are assigned to students of the first year for teaching in the practising school; the male students confining themselves to the upper school, the female students to the infant and junior schools. This arrangement continues in operation throughout the first half of the session.

"During their second year's attendance, the teaching of the students is for the first half exclusively in the way of criticism lessons. Two hours a week admit of each student giving a lesson of this sort twice. During the latter part of the session, students resume their teaching in the school.

"For the purpose of studying organization, each second year's male student passes an entire week in the practising school; each female student one week in the infant school, and one week in the junior school.

"All their work in, and in connection with, the practising school is duly superintended."

The industrial instruction of the female students continues to receive due attention. It is now conducted by Miss Ross, and consists of knitting, sewing, cutting out, and fixing for all the students, and of cooking, laundry, and general household work for such students as reside in the boarding house under the superintendence of Mrs. Harrower.

Two students of the second year hold bursaries from the Education Committee for attendance at the University. They attend the senior Latin and second Mathematical classes.

The practising schools continue to be conducted with much ability and success. At the time of my visit in June last, I found, in average attendance, 530 children, while 606 were present on the days of inspection, and 447 names were entered in the examination schedules, as having completed the required attendances.

The per-centage of failure (reading, 0·00; writing from dictation, 4·15; arithmetic 0·77) is very low, and will bear favourable comparison with any school of the same size, and attended by the same class of children. In the higher branches, and in the specific subjects (English Literature, Physical Geography, Mathematics, and Light and Heat), *the pass*, if not so high as in the standard examination, was still very creditable. Criticism lessons are given regularly under the superintendence of the Principal.

The members of the committee of management who met me, were Rev. Dr. Masson, David Smith, Esq., Charles Pearson, Esq., Dr. Winchester, and Simon S. Laurie, Esq., Secretary and Treasurer.

#### RESULTS.

The following summaries furnish the necessary information.

The number of those who obtained certificates of competency to teach drawing at the last examination by the Department of Science and Art was 10 males and 1 female; while 13 males, and 5 females gained prizes.

In Science the attention of the students was confined to Physical Geography, Electricity and Magnetism, and, at the examination in May 1875, the numbers presented, and the passes were as follows :—

#### PHYSICAL GEOGRAPHY.

Senior male students:—42 were examined in the advanced stage, and 34 passed in the second class.

Senior female students:—39 were examined in the advanced stage, and 18 passed in the second class.

#### ELECTRICITY AND MAGNETISM.

Junior male students:—54 were examined in the elementary stage, and 50 passed in the first, and 4 in the second class.

Senior male students:—42 were examined in the advanced stage, and 21 passed in the first, and 19 in the second class.

The number of male students, who finished their course of training at Christmas 1874 was 44. These have been disposed of as follows :—

Appointed to schools in Scotland	-	-	40
„ „ England	-	-	4
			<u>44</u>

The number of female students who finished their course of training at Christmas 1874 was 42. These have been disposed of as follows :—

Appointed to schools in Scotland	-	-	38
„ „ England	-	-	4
			<u>42</u>

The results of the recent examination for certificates may be seen from the following summary :—

Candidates.	Examined at Christmas 1875.	First Division.	Second Division.	Third Division.	Fourth Division.	Failed.	Per-centage successful.
Male, first year -	54	22	25	4	1	2	96·29
„ second year -	41	16	15	9	0	1	97·56
Female, first year -	50	5	31	14	0	0	100·00
„ second year -	39	12	18	9	0	0	100·00
Totals --	184	55	59	36	1	3	98·36

Thus out of 184 candidates, only four are found below the third division, and of these only three have failed to obtain a place in the class list. It may be further observed that of these 184 candidates, 154, or 83·69 per cent., are in the first and second division, as against 73·09 per cent. last year.

This result is as satisfactory as could be fairly expected in the institution, to which the Education Committee of the Church of Scotland sends all the Gaelic-speaking students.

#### EDINBURGH FREE CHURCH TRAINING COLLEGE.

I visited this institution in May, October, and November. The premises were described in my Report for last year, and I found them in equally good condition at my recent visit. The adjoining grounds are of considerable extent, and afford ample scope for military drill, which should find a place in every system of male training. I regret, however, to add that it has not yet been introduced here.

I found in regular attendance the following students :

##### MALES.

1st year -	-	-	-	-	44
2nd year -	-	-	-	-	48
					<u>92</u>

##### FEMALES.

1st year -	-	-	-	-	55
2nd year -	-	-	-	-	47
					<u>102</u>

giving a total of 194 students, as against 196 for 1874.

These may be further divided into two classes, viz. :—

1. Students holding church bursaries :

##### MALES.

					£
60 each -	-	-	-	-	25
32 „ -	-	-	-	-	23

## FEMALES.

53 each	-	-	-	-	-	15
14 „	-	-	-	-	-	12

## 2. Ordinary, or self-supporting students :

Female	-	-	-	-	-	35
--------	---	---	---	---	---	----

Of the 92 male students in the college, 73 had been, and 19 had not been, pupil-teachers; while of the 102 female students, 57 had been, and 45 had not been, pupil-teachers.

In reference to the important subject of the health of the students, I have been favoured with the following statement by Dr. Ziegler, the medical officer of the college:—

“47, George Square, Edinburgh, 28th October 1875.

“THE health of the students during the past year, I am glad to inform you, has been very satisfactory. Any ailments which have occurred have been of slight importance, and few in number, and, so far as I can remember, no case, having a fatal termination, has taken place during the session.

“(Signed) WM. ZIEGLER, M.D.”

The instruction and the training of these students are conducted by the following staff:—

On referring to my notes for last year, I find that I heard all the lecturers dis- course and examine on almost every part of the course, and noted the same accurate and careful instruction, to which attention has been so often directed in previous reports.

The order and discipline of the classes are excellent, and the course of instruction is very suitable and well arranged.

The professional training of the students continues to receive a due amount of time and attention. On this subject the Principal has favoured me with the following statement :—

“In the present session, no change has been made in the method of preparing students in the practical work of their profession. Besides the school management lessons, in connection with which sketches of lessons, time tables, short essays on educational subjects, &c., are ex- acted, the students practise with all the classes in the practising school. Some of the subjects are chosen by themselves, in other cases they are prescribed by myself. The female students spend a considerable time in the infant, the fifth, and the industrial classes, where they are superintended by the teachers of these classes respectively; at all other times, the teaching practice of all the students is superintended by myself.”

The industrial instruction of the female students is conducted by Miss Couper, assisted by Miss Beattie, and consists of knitting, sewing, cutting out, and fixing for all the students, and laundry, and general household work for such students as reside in the boarding house under the superintendence of Miss Smith.

By order of the Free Church Education Committee, an examination was held simultaneously in Edinburgh and Glasgow in October last, to test the qualifications of any students of the first or second year who applied for permission to attend the University in terms of Art. 102 (b) of the Code. The examiners appointed by the Education Committee were, the Rev. Dr. Thomas Smith, the Rev. Professor Candlish, and the late James Cumming, Esq., LL.D. These gentlemen prepared papers in Latin and Mathematics, which were worked by the candidates in Edinburgh under the superintendence of the late Dr. Cumming, and in Glasgow under the superintendence of Dr. Candlish.

In their report the examiners selected 10 students of each year as qualified to enter the University; 17 taking two classes each, and 3 taking one class each.

These 20 students are now attending the University of Edinburgh; one having taken Logic and Moral Philosophy; six the senior Mathematics, and Natural Philosophy; eight the junior Mathematics, and Rhetoric; one the junior Mathematics, and Latin; one the junior Mathematics, and Greek; and three the junior Mathematics alone.

The practising schools continue to be conducted with great ability and success. At the time of my visit in June last, I found in average attendance 795 children, while 862 were present on the days of inspection, and 633 names were entered in the examination schedules as having completed the required attendances. The per-centage of failure (reading, 0.00; writing, from dictation, 4.85; and arithmetic, 7.01) is low, and bears emphatic testimony to the thoroughly efficient character of the instruction, while in the higher branches and in the specific subjects (English Literature, Physical Geography, Mathematics, Latin, French, and German) the *pass*, though considerably lower than in the standard examination, was still very creditable.

Criticism lessons are given regularly under the superintendence of the Principal.

The members of the committee of management who met me were, Rev. Thomas Brown, William Dixon, Esq., James Wilson, Esq., John M. McCandlish, Esq., and Josiah Livingston, Esq.

#### RESULTS.

The following summaries furnish the necessary information:—

The number of those who obtained certificates of competency to teach drawing at the last examination by the Department of Science and Art was 13 males, and 8 females; while 14 males, and 9 females obtained prizes.

Classes in Science were conducted, as in former years, by Mr. Lees for the male students, and by Mr. Melville for the female students.

At the recent examination the passes were as follows:—

Subjects.	1st Class.	2nd Class.	Failures.
Acoustics, Light, and Heat :			
Advanced Stage - - -	1	23	2
Elementary Stage - - -	28	36	1
Magnetism and Electricity :			
Advanced Stage - - -	6	13	4
Physical Geography :			
Advanced Stage - - -	0	28	18
Elementary Stage - - -	14	28	1
Animal Physiology :			
Advanced Stage - - -	0	6	0
Elementary Stage - - -	2	2	0
Totals - - -	51	136	26

The number of male students, who finished their course of training at Christmas 1874, was 35. All are now engaged in teaching:—

In Scotland	-	-	-	-	-	30
In England and Wales	-	-	-	-	-	5
						<u>35</u>

The number of female students, who completed their course of training at Christmas 1874, was 64. All are engaged in teaching except four, one having married, and the three others being in delicate health:—

In Scotland	-	-	-	-	-	37
In England	-	-	-	-	-	23
						<u>60</u>

The results of the recent examination for certificates may be seen from the following summary:—

Candidates.	Examined at Christmas 1875.	First Division.	Second Division.	Third Division.	Fourth Division.	Failed.	Per-centage successful.
Male, first year -	43	28	12	3	0	0	100·00
„ second year -	48	24	21	3	0	0	100·00
Female, first year -	54	13	31	10	0	0	100·00
„ second year -	47	24	21	2	0	0	100·00
Totals -	192	89	85	18	0	0	100·00

Thus out of 192 candidates, none fall below the third class. It may be further observed that of these 192 candidates, 174, or 90·62 per cent., are in the first and second division, as against 87·11 per cent. last year.

This may be fairly considered a very satisfactory result.

#### EDINBURGH EPISCOPAL FEMALE TRAINING COLLEGE.

I visited this institution in July and October. The premises remained the same as in 1874, and were in equally good order. The members of the committee of management who met me (the Very Rev. the Dean of Edinburgh, the Rev. Dr. Teape, the Rev. A. Haldane Chinnery, the Rev. J. A. Sellar, Colonel Lindsay, and James Haldane, Esq.) expressed their regret that they had not been able to commence building operations, but they hope to be able to do so at no distant date.

The general sanitary arrangements of the establishment are very satisfactory, and the health of the students during the past session has been quite equal to the average of former years, as will appear from the following report by Dr. Hunter, the medical officer of the college:—

“18, Abercromby Place, Edinburgh,  
“20th October 1875.

“I CERTIFY that the health of the students attending the Episcopal College, Lochrin House, has been satisfactory during the past year; that there has been no case of infectious disease; that one student whose symptoms threatened an attack of fever was, as a precaution, at once removed to the Royal Infirmary, but at the end of the week was enabled to return to the college.

“(Signed) JAMES A. HUNTER, M.D.”

I found in residence the following students :—

FEMALES.

First year	-	-	-	-	29
Second year	-	-	-	-	21
					<hr/> 50 <hr/>

giving a total of 50 students, as against the same number for 1874.

In this college all the students are received on the same terms. Bursaries are not given as in the other Scotch colleges. Each student pays an entrance fee of 3*l.*, with 2*l.* a year for books, and receives her board, washing, and education, &c. free.

The instruction and training of the students are conducted by the following staff :—

No.	Names.	Degrees.	Duties.	Annual Salaries.
1	Rev. C. Smith	- B.A. Univ. London, Est. Church Training Col.	Principal, constantly	- £ 250 s. 0 d. 0

	Jun.	"			"		Private Study.
Saturday		Recreation.			Recreation.		Roll, Recreation.
Sunday -		Private Study, 2.30-4.15.			Private Study, 6.30-8.15.		Evening Service.

(1) Principal; (2) Miss Smith; (3) Miss Kinsley; (4) Miss Bowden; (5) Mons. and Madame Kichon.

The work of the college continues to be conducted in a very satisfactory manner. The discipline and order are excellent, and all the arrangements of the establishment are very judicious and well fitted to secure the comfort of the students, and to prepare them for their future work.

The mode of preparing the students for the practical work of the schoolroom remains the same as last year—*vide* my Special Report for 1874 (Blue-Book, p. 128).

The industrial instruction is conducted by Miss Smith. It consists of the usual kinds of needlework, with cutting out, fixing, &c.

In domestic economy the instruction is partly theoretical, with "Tegetmeier's Manual of Domestic Economy" and Laurie's "Household Economy" as text-books, and partly practical, consisting of general household and laundry work, with cooking under suitable superintendence.

St. John's Episcopal female school, Earl Grey Street, continues, with the consent of the managers, to be used as a practising school. It is situated in the vicinity of the college, and is, in every way, well suited for the purpose.

In reference to the attendance of the students, I have been favoured with the following statement by Miss Atkinson, the mistress of the school:

"The students of the Episcopal Training College, Edinburgh, teach in this school. It is arranged that three come at a time, and remain a fortnight; the class each has to conduct, and the lessons to be prepared, are previously appointed. During their stay in school, they are under the supervision of the mistress, who corrects any fault, she considers necessary in their mode of teaching. A report of the ability and conduct of each is sent to the Principal."

At my visit in November last, I found in average attendance 211 children, while 237 were present on the day of inspection, and 163 names were entered in the examination schedules as having made the required attendances. The per-centage of failure (reading, 0.00; writing from dictation, 4.76; arithmetic, 6.66) is very low, and says much for the efficient character of the instruction. In the higher branches, *the pass*, if not quite so good as in the standard examination, was still creditable.

Criticism lessons are regularly given under the superintendence of the Principal, or, in his absence, of one of the other officers of the college.

## RESULTS.

The following summaries furnish the necessary information:—

The number of those who obtained certificates of competency to teach drawing at the last examination by the Department of Science and Art was 2, while 2 obtained prizes.

I was informed by the Principal that none of the students attended the examinations in Science.

The number of students, who finished their course of training in 1874, was 29. These have been disposed of as follows:—

Appointed to schools in Scotland	-	23
"                    "          England	-	6
		<hr/> 29

The results of the examination for certificates at Christmas 1875 may be seen from the following summary:—

Candidates.		Examined at Christmas 1875.	First Division.	Second Division.	Third Division.	Fourth Division.	Failed.	Per-centage successful.
Female, first year	-	29	2	18	9	0	0	100·00
„ second year	-	21	6	14	1	0	0	100·00
Totals	-	50	8	32	10	0	0	100·00

Thus out of 50 candidates, none fall below the third class. It may be further observed that of these 50 candidates, 40, or 80 per cent., are in the first and second division, as against 84 per cent. last year.

This result, although not equal to that of last year, is still satisfactory.

## GLASGOW CHURCH OF SCOTLAND TRAINING COLLEGE.

I visited this institution in May and June by myself, and in November with Dr. Middleton. The premises were described in my Report for 1874, and I found them in the same satisfactory condition at my recent visit.

The court for the exercise and recreation of the students is very well kept, and affords sufficient space for the military drill of the students under the janitor, a volunteer of many years' experience. The students do not form part of any volunteer corps, but certificates, after a strict examination, are given to such as prove themselves to be efficient. At the close of last session, of 53 second-year men, 18 were declared extra-efficient, and 28 efficient.

I found in regular attendance the following students:—

MALES.						
1st year	-	-	-	-	-	50
2nd year	-	-	-	-	-	53
						103

FEMALES.						
1st year	-	-	-	-	-	59
2nd year	-	-	-	-	-	50
						109

giving a total of 212 students, as against 193 for 1874.

These may be further divided into two classes, viz.:—

1. Students holding church bursaries :

MALES.						£
53, each	-	-	-	-	-	22
50, "	-	-	-	-	-	20

FEMALES.						
5, each	"	"	"	"	"	15
33, "	"	"	"	"	"	10
5, "	"	"	"	"	"	8

2. Ordinary, or self-supporting students :

Female	...	...	...	...	...	66
--------	-----	-----	-----	-----	-----	----

Of the 103 male students in the college, 99 had been, and only 4 had not been, pupil-teachers; while of the 109 female students, 84 had been, and 25 had not been, pupil-teachers.

In reference to the important subject of the health of the students, I have been favoured with the following statement by Dr. Dickson, the medical officer of the college.

"Church of Scotland Training College, Dundas Vale, 29th October 1875.

"THE health of the students, attending the college this year, has been as good as in any previous year. There have been no deaths; but one male, and two females were invalided. Amongst the others, no special case of illness occurred, only slight ailments.

"The situation of the schools and college is open, airy, and healthy; the rooms are spacious, well lighted, and ventilated; the playgrounds and students' quadrangle are large, and well kept; and all sanitary measures are carefully and promptly attended to. None of the students reside in the buildings.

"The situation of the Boarding house is very healthy, with a south-western exposure, and excellent drainage. It has been fitted up with all modern appliances as to health, and every attention is paid to the diet and comfort of the inmates. The public rooms are large, the bedroom accommodation is ample and good; all the apartments are well lighted and ventilated."

"(Signed) J. R. DICKSON, M.D.,  
"Medical Officer of the Institution."

The instruction and the training of the students are conducted by the following staff:—

Names of Teach- ers.	Mr. Stevenson.		Mr. Robertson.	Mr. Dixon		Miss Foulis. Miss McDonald.	Mr. Robert- son.	Miss Mac- donald.	Mr. Moodie.	Mr. For- syth.

I find, from my notes, that I heard lectures on almost every part of the curriculum, and have now the pleasure to express my satisfaction as much with the skill and energy of the lecturers, as with the general demeanour and attention of the students. The discipline and order of the classes are most satisfactory, and the course of instruction is very suitable.

The following statement by the Principal explains fully his method of preparing the students professionally:—

"The different influences that are brought to bear on the professional training of the students are as follow: (a) lectures are given on organization, discipline, the art of teaching, and other details of school management; (b) special attention is devoted to principles of teaching, in connection with the systems of various eminent Educationists, such as Locke, Pestalozzi, Bell, Lancaster, Wilderspin, Stow, and Spencer; (c) the art of teaching is practically illustrated in "criticism" lessons, in which every student takes a part; these lessons are always given in presence of the Principal, and form an admirable means of training students, and calling their attention to recognised principles; (d) the students go daily into the practising schools, and take classes in the branches usually taught in elementary schools, such as reading, spelling, dictation, writing, drawing, arithmetic, and music; while a few have also been engaged in giving lessons to children in French and mathematics; the female students assist constantly in the teaching of sewing, knitting, and cutting-out; while in the schools the students are superintended by the Principal, and the work they do is tested from time to time by the different masters of departments; under the superintendence of the drill master, the male students have been trained to put classes of boys through a course of military drill; (e) the students paid visits during the present session to the following elementary schools, in each of which they spent half a day, observing the methods of teaching practised: the male students to St. Enoch's, St. Rollox, St. Paul's (Balfour), St. John's (Macfarlane Street), St. Matthew's, Maxwell (Stanley Street), and London Road schools; the female students to St. Enoch's, St. James', St. Rollox, St. Paul's, Anderston Burgh, and Annfield schools."

The industrial instruction of the female students is conducted by Miss Foulis, and her assistant, Miss McDonald. It consists of knitting, sewing, cutting out, and fixing for all the students, and of fancy work for such of the second-year students as are considered *efficient* in the ordinary work of the department. In addition to these subjects, those students who reside in the boarding house receive stated instruction in practical cookery, laundry, and general household work under the superintendence of the matron.

Additions of interest and value have been made to the library and to the stock of apparatus and diagrams. Every facility is afforded to the students to make use of these in drawing up notes for their model and criticism lessons.

The practising schools are the largest in Scotland, and are conducted with much spirit, skill, and success. I have been favoured by my colleague, Dr. Middleton, with the following details of his last visit. On that occasion, he found in average attendance 1,131 children, while 1,291 were present on the days of inspection, and 669 names were entered in the examination schedules as having completed the required attendances. The per-centage of failure (reading, 0.03; writing from dictation, 2.03; and arithmetic, 2.66) is very low, and says much for the thoroughness and efficiency of the instruction. While in the higher branches, and in the specific subjects (English Literature, Physical Geography, Physiology, and Latin) the *pass* was very creditable.

Criticism lessons are given regularly under the superintendence of the Principal.

As on former occasions, I met the committee of management, the members present were, Rev. Dr. Jamieson, Rev. Mr. Dodds, Andrew Laughlen, Esq., and G. W. Snodgrass, Esq., Treasurer.

RESULTS.

The following summaries furnish the necessary information :—

The number of those, who obtained certificates of competency to teach drawing at the last examination by the Department of Science and Art, was 21 males, and 5 females; while 29 males, and 10 females obtained prizes.

The special subjects studied in this college, with a view to the examination in Science, were Magnetism and Electricity, Animal Physiology, Botany, Geology, and Physical Geography. The science studies were thus heavier than on former years, and the net payments, earned on the results of the examination, amounted to 592*l.* 0*s.* 6*d.*, as compared with 257*l.* 16*s.* 8*d.* of the previous year; while the number of Queen's prizes obtained by students, who passed in the 1st class, was 186.

The number of male students, who finished their course of training at Christmas 1874, was 45. These have been disposed of as follows:—

Appointed to schools in Scotland	-	-	-	44
„ „ „ England	-	-	-	1
				<u>45</u>

The number of female students, who finished their course of training at Christmas 1874, was 43. These have been disposed of as follows :—

Appointed to schools in Scotland	-	-	-	41
„ „ „ England	-	-	-	2
				<u>43</u>

The results of the examination for certificates at Christmas 1875 may be seen from the following summary :—

Candidates.	Examined at Christmas 1875.	First Division.	Second Division.	Third Division.	Fourth Division.	Failed.	Per-centage successful.
Male, first year - -	50	23	22	5	0	0	100·00
„ second year - -	51	27	19	5	0	0	100·00
Female, first year - -	57	11	35	11	0	0	100·00
„ second year - -	50	19	28	3	0	0	100·00
Totals - - -	208	80	104	24	0	0	100·00

Thus out of 208 candidates, none fall below the third division. It may be further observed that of these 208 candidates, 184, or 88·46 per cent., are in the first and second division, as against 91·09 per cent. last year.

This result, although not equal to that of last year, may be fairly considered very satisfactory.

GLASGOW FREE CHURCH TRAINING COLLEGE.

I visited this institution in May by myself, and in November with Dr. Middleton. The premises were described in my Report for 1874, and I found them in equally good condition in 1875. The accommodation in regard to class-rooms is excellent. I am glad to know that steps are now being taken to provide suitable cloak and waiting rooms for the female students, and a spacious luncheon-room for the scholars of the practising schools and the students. This addition will render the accommodation very complete, and supply a want which has long been felt.

The grounds are not very extensive, but they are still quite sufficient for the healthy recreation of the students, and for all the requirements of military drill, which the authorities propose to introduce at the beginning of next session.

The general sanitary arrangements of the college are excellent, and the health of the students during the past session has been quite equal to the average of former

years, as will appear from the following statement by Dr. Adams, the medical officer of the college:—

"62, Cambridge Street, Glasgow, 5th November 1875.  
 "I BEG to report that, during the past year, the health of the students attending the Free Church Normal School has been exceptionally good. I have had no serious illness to deal with, and such petty ailments as have required my professional consideration, have been less numerous, and of less importance, than during any similar interval for many years past.  
 "(Signed) JAMES ADAMS, M.D.,  
 "Medical Officer of the College."

The number of the students during the past session was as follows :—

MALES.					
First year -	-	-	-	-	30
Second year -	-	-	-	-	30
					<hr/> 60
FEMALES.					
First year -	-	-	-	-	80
Second year -	-	-	-	-	60
					<hr/> 140

giving a total of 200 students, as against 168 for 1874.

These may be further divided into two classes, viz. :—

1. Students holding church bursaries :

MALES.					
27, each	-	-	-	-	£ 25
33, each	-	-	-	-	23
FEMALES.					
46, each	-	-	-	-	15
36, each	-	-	-	-	12

2. Ordinary, or self-supporting students :

Female	-	-	-	-	58
--------	---	---	---	---	----

Of the 60 male students in the college, 49 had been, and 11 had not been, pupil-teachers; while of the 140 female students, 73 had been, and 67 had not been, pupil-teachers.

The training and instruction of the students are conducted by the following staff:—

No.	Names.	Degrees.	Duties.	Annual Salaries.
1	Thomas Morrison	M.A. Aberdeen.	Principal	£ 600 s. 0 d. 0
2	Rev. John Kerr	M.A., LL.D. Glasgow.	Lecturer on mathematics	300 0 0
3	A. H. Dick	M.A. Lon., D.Sc. Edin.	Lecturer on history and geography.	300 0 0
4	Edmund Boyd	F.E.I.S.	Lecturer on method	300 0 0
5	William M. Miller	-	Teacher of music	100 0 0
6	James White	-	Teacher of drawing	60 0 0
7	Mons. Goreckie	-	Teacher of French	100 0 0
8	Miss Wallace	-	Lady superintendent	75 0 0

## MALE DEPARTMENT.

Thomas Morrison, Esq., M.A., Principal, lectures 12 hours a week ; on religious subjects four hours, on grammar four hours, and on classics four hours.

Rev. John Kerr, M.A., LL.D., lectures 14 hours per week ; on mathematical subjects eight hours, on arithmetic six hours.

A. H. Dick, Esq., M.A., D.Sc., lectures 10 hours weekly ; on geography three hours, on history three hours, and on economy four hours.

Mr. Boyd lectures 11 hours a week ; on school management, &c. nine hours, on reading and repetition one hour, and on penmanship one hour.

Mr. Miller lectures four hours a week on music.

Mr. White gives four hours a week to instruction in drawing.

M. Goreckie gives lessons in French four hours a week.

## FEMALE DEPARTMENT.

The female students receive their general instruction from the same staff of lecturers as the males ; indeed the whole arrangements are so similar that any remarks which I make on the one class are equally applicable to the other.

The Principal lectures eight hours a week ; on religious subjects three hours, and on grammar five hours.

Dr. Kerr lectures six hours per week on arithmetic.

Dr. Dick lectures 10 hours weekly ; on geography five hours, and on history five hours.

Mr. Boyd lectures 12 hours a week ; on school management, &c. 10 hours, on reading and repetition one hour, and on penmanship one hour.

Mr. Miller lectures four hours weekly on music.

Mr. White gives instruction in drawing four hours a week.

M. Goreckie gives lessons in French four hours a week.

Miss Wallace devotes six hours a week to sewing, &c., and four hours to domestic economy.

The time tables are much the same as last year, and need not be repeated. I have, however, prepared the following analysis, showing the distribution of the hours of study for one week.

Subjects.	Male Students.		Female Students.	
	1st Year.	2nd Year.	1st Year.	2nd Year.
Holy Scriptures and catechism.	2	2	2	2
School management -	2	2	2	2
Teaching - -	3	3	3	3
Arithmetic - -	3	3	3	3
Mathematics - -	4	4	—	—

Vocal music - -	2	2	2	2
Sewing and cutting out -	-	-	3	3
Domestic economy -	-	-	2	2
	31	31	31	31

During my recent visit, a considerable part of my time was spent in hearing the reading and reciting of all the students, and in observing and noting the teaching of those of the second year. I had also repeated opportunities of seeing the methods pursued by the different lecturers, and have much pleasure in expressing my satisfaction with the way in which the work of instruction is conducted in the various classes. The discipline and order are excellent, and the whole arrangements of the college are very judicious.

The following statement by Mr. Boyd, the master of method, explains fully his method of preparing the students professionally:—

"The methods and plans adopted for the training of the students in the theory and practice of education and school management generally, during the present session, have not differed in a material degree from those in use at the date of my last report.

"This year, the classes of female students, both the first and second, are, correspondingly, very considerably larger than those of the preceding years. This increase, while it does not make itself very sensibly felt in the theoretic part of the course, except in the examination of written exercises, yet it is manifestly evident in the practical part of the work, viz., in the 'art of teaching.'

"To give the same amount of practice in the model schools, to each individual when the classes are so largely augmented, as in former years, when the students were considerably fewer in number, has undoubtedly occupied a larger amount of time and attention. It was deemed only right, however, that the amount of time and supervision formerly allotted to each individual student in the practising departments, ought not to be diminished; and, to prevent this, the course of practical teaching was continued with unbroken regularity in all the classes of students from the very beginning of the session in January, till the date of examination in the 'art of teaching,' by Her Majesty's Inspector of Training Colleges, about the middle of November.

"Collectively, the female students of the first year have, in the course of the present session, given not less than *one hundred and sixty* carefully prepared lessons, over a wide field of general knowledge subjects,—embracing lessons on Scripture history; natural history, chiefly zoology; objects; 'common things'; trades; manners and customs; manufactures; the elements of arithmetic, &c., &c. These lessons were given simultaneously and orally to children under six years of age, and to those in Standard I. of the New Code, and were listened to with great pleasure on the part of the pupils, and with close attention and evident interest by the whole of this class of students. They were also criticised fully and freely, not, of course, in presence of the scholars, both by the students and by the master of method, under whose immediate direction all these exercises are conducted.

"In like manner, the females of the second year have given *one hundred and twenty lessons* for criticism, after having fully written out carefully prepared notes, which were submitted to the master of method at the beginning of their respective lessons.

"These lessons were given to children varying in capacity and attainments from the measure of Standard II. to that of Standard V., on subjects chiefly of instrumentary instruction, such as reading, spelling, dictation, grammar and analysis, arithmetic, history, physical geography, trade, commerce, and manufactures. Besides, the students in this division spent a complete week in the several practising schools, teaching classes under the direct superintendence of the heads of the departments, but specially for drill in organization, discipline, and general management. From a systematic inspection of the 'registers of students' work' in the departments, I am able to report that, as a rule, the students, by their behaviour, attention, and zeal, no less than by their energy, skill, and power in government, obtained the highest marks of merit from the respective masters.

"The practice of the male students of both years has been conducted in a manner almost similar to that of the females. The male students of the first year have in their collective capacity conducted *sixty lessons* addressed to the younger pupils on a variety of subjects selected for the purpose of awakening interest in natural objects, of stimulating their natural inquisitiveness, and of teaching them to observe accurately, to compare carefully, and to discriminate wisely. While the male students of the second year have given *ninety gallery criticism lessons*, embracing every variety of subjects engaging attention in the higher grade of elementary schools, such as reading with exposition, grammar and analysis, derivation, advanced arithmetic, geography, history, scientific subjects, animal physiology, light and heat, as well as manufactures, exports, imports, &c., &c. Besides, they received the usual course of drill in passing in rotation through the several practising schools for class teaching, and for observing all the detail of general school-keeping.

"To my own mind, and judging solely from my own observation, the least satisfactory result of all the normal school work is to be found in the case of those students who, from whatever cause, require to leave at the end of their first year of training. However well they may comprehend the general principles and processes of education, or whatever may be the extent or accuracy of their scholastic attainments, I find them, not always certainly, but as a rule almost immeasurably inferior to students at the end of their second year, in practical ability, in freedom, force, and vigour, as well as in general skill, masterly command, and thorough efficiency.

"Students in all the classes are taught the theory of education, the general principles, the various methods, modes, and systems, by lectures, by the study of various text-books, and examination, both oral and written, thereon, and by essays and themes prescribed on subjects of practical importance in all that relates to primary education.

"A short course of lectures, one each week, since the midsummer vacation, was delivered by the master of method to the combined class of out-going students, on the 'History of Education and Continental Systems,' with brief sketches of the lives and labours of eminent educationists at home and abroad."

The industrial instruction of the female students is conducted by Miss Wallace, and receives, as its importance demands, very special attention. It is gratifying to note that 98 per cent. of the second-year students obtained 60 per cent. and over of the total marks, while only 2 per cent. fell below that standard.

As stated in my special report on the Free Church Training College, Edinburgh, an examination was held in October, for testing the qualifications of such students

of the first year as might apply for permission to attend the University in terms of Art. 102 (b) of the Code. In their report the examiners named seven students as qualified to enter the University, five taking one class each, and two taking two classes each.

These students are now attending the classes in the University of Glasgow for Latin, English Literature, Mathematics, and Logic.

The large practising schools connected with the college continue to be conducted with the same ability and success, to which I have so often called attention in former reports. I have been favoured by my colleague, Dr. Middleton, with the following details of his last visit. On that occasion, he found in average attendance 660 children, while 726 were present on the days of inspection, and 421 names were entered in the examination schedules as having completed the required attendances. The per-centage of failure (reading, 0·03; writing from dictation, 7·20; arithmetic, 5·88) is very low, and says much for the efficient character of the instruction. In the higher branches, and in the specific subjects (English Literature and Physical Geography) *the pass*, though not so high as in the standard examination, was still in the circumstances very creditable.

Criticism lessons are given regularly under the superintendence of the master of method.

As on former occasions, I met the committee of management; the members present were, the Rev. Principal Douglas, D.D., the Rev. Alexander Wilson, Dr. W. G. Blackie, Alexander S. Baird, Esq., John McClure, Esq., and William Mitchell, Esq.

## RESULTS.

The following summaries furnish the necessary information:—

I was informed by the Principal that the number of those, who obtained certificates of competency to teach drawing at the last examination by the Department of Science and Art, was 14 males, and 5 females; while 15 males, and 20 females obtained prizes.

Classes in connection with the Science and Art Department were conducted during the session with much success. The students (male and female) of the first year, and the female students of the second year, took Electricity and Magnetism under Dr. Kerr.

The results were:—

	1st Class.	2nd Class.	Failures.
Advanced stage - - -	11	9	0
Elementary stage - - -	122	29	0
Totals -	133	38	0

The male students of the second year took the advanced stage of Animal Physiology under Dr. Dick.

The results were:—

	1st Class.	2nd Class.	Failures.
Advanced stage - - -	2	22	3

The number of male students, who finished their course of training at Christmas 1874, was 26. These have been disposed of as follows:—

Appointed to schools in Scotland - -	-	-	21
" " England - -	-	-	5
			<hr/> 26

The number of female students, who finished their course of training at Christmas 1874, was 62. These have been disposed of as follows:—

Appointed to schools in Scotland - -	-	-	54
" " England - -	-	-	7
At home - - -	-	-	1
			<hr/> 62

The results of the examination for certificates at Christmas 1875 may be seen from the following summary:—

Candidates.	Examined at Christmas 1875.	First Division.	Second Division.	Third Division.	Fourth Division.	Failed.	Per-centage successful.
Male, first year - -	29	7	14	8	0	0	100·00
„ second year - -	29	12	13	3	0	1	96·55
Female, first year - -	80	18	56	12	0	0	100·00
„ second year - -	58	15	26	17	0	0	100·00
Totals - -	196	52	103	40	0	1	99·48

Thus out of 196 candidates, only one failed to obtain a place in the class list. It may be further observed that of these 196 candidates, 155, or 79·08 per cent., are in the first and second division, as against 73·93 per cent. last year.

This result is as satisfactory as could be fairly expected in an institution where the number of Highland students on the male side bears such a proportion to the number in attendance.

#### ABERDEEN CHURCH OF SCOTLAND FEMALE TRAINING COLLEGE.

I visited this institution in October with Mr. Kerr. The premises remained the same as they were in 1874, and were in equally good order. The additions and alterations have not yet been completed, but I was assured that no time would be lost in doing so.

The general sanitary arrangements are very good, and the health of the students during the past session has been very satisfactory, as will appear from the following statement by Dr. Kerr, the medical officer of the college:—

“I HEREBY certify that the health of the students attending the Church of Scotland Training College here has been, on the whole, very satisfactory. I have been called in to attend to only two cases, neither of which was serious.

“Aberdeen, 13th October 1875.

“(Signed) DAVID KERR, M.D.”

The number of students during the past session was as follows:—

#### FEMALES.

First year - -	-	-	-	-	-	35
Second year - -	-	-	-	-	-	30
						<u>65</u>

giving a total of 65 students, as against 30 for 1874.

These may be further divided into two classes, viz. :—

#### 1. Students holding church bursaries :

##### 1ST YEAR.

5, each - -	-	-	-	-	-	£ 15
10, „ - -	-	-	-	-	-	10
5, „ - -	-	-	-	-	-	8

##### 2ND YEAR.

9, each - -	-	-	-	-	-	10
11, „ - -	-	-	-	-	-	5

#### 2. Ordinary, or self-supporting students :

First year - -	-	-	-	-	-	15
Second year - -	-	-	-	-	-	10

The instruction and the training of the students are conducted by the following staff :—

No.	Names.	Degrees.	Duties.	Annual Salaries.
1	Joseph Ogilvie -	M.A. Aberdeen.	Principal, constantly ; school management, 3 hours ; criticism, 2 hours ; religious knowledge, 3 hours ; arithmetic, 4 hours.	£ 400 s. 0 d. 0
2	Robert McWilliam	M.A. Aberdeen.	Lecturer, constantly ; English, 5 hours ; history, 3 hours ; arithmetic, 4 hours ; and geography, 4 hours.	200 0 0
3	Joseph Kennedy and assistant.	—	Teachers of drawing, 2 hours.	30 0 0
4	James Wilson -	—	Teacher of singing, 5 hours.	45 0 0
5	Wm. Adlington -	—	Teacher of piano, 4 hours.	33 12 0
6	Mrs. Kerr -	C. of M. -	Lady Superintendent, and teacher of industrial work (interim), 6 hours.	36 10 0
7	Mdlle. Boudin -	--	Teacher of French, 4 hours.	33 12 0
8	Miss Newsam -	—	Teacher of piano, 17 hours.	48 0 0

TIME TABLE.

Hours.	Class of Students	Monday.	Tuesday.	Wednesday.	Thursday.	Friday.

	Seniors.	Geography.	School Management.	Geography.	Criticism Lesson.	Needlework.
3-4	Juniors.	Music.	Needlework or Teaching.	Music.	Needlework.	Music or Needlework.
	Seniors.	Needlework.	Music or Teaching.	Needlework.	Music.	Practical Geometry.

The work of the institution continues to be conducted in a very satisfactory manner. The discipline and order are excellent, and the whole arrangements are very judicious, and reflect much credit on the authorities of the college.

The following statement, with which I have been favoured by the Principal, explains fully his mode of preparing the students for the practical work of the school :—

"The students of the junior class spend two hours a week in the practising school from the beginning of the session in February till the midsummer vacation (end of June), visiting the three departments in turn, in three separate groups. While giving lessons, they are duly superintended by the principal teacher of each department, who stands by and notes any mistakes in method, language, or manner, pointing out these either at the time, or at the close of the lesson, as may be found most judicious and appropriate. No lesson is given without previous preparation on the part of the student, who has to hand in to the superintending teacher notes on the subject prescribed. The students of this class receive, in addition to the above, a complete course of instruction in infant school management (one hour a week till near the close of the session) from the mistress of the infant department.

"The students of the senior class, during the first half of the session, each spend a whole week in one of the departments of the practising school, with a view to inform themselves practically on the subjects of discipline and organization. During the latter half of the session, they take the place of the junior students in the practising school. Criticism lessons are regularly given in the lecture room during the session, either in presence of myself and the two or three selected to teach for the day, or before the whole class. In accordance with the suggestion of Dr. Wilson, Her Majesty's Inspector of Training Colleges, opportunities have been given to the senior students of visiting some of the principal schools in town, the teachers of which have cordially received them, and afforded them every facility for becoming acquainted with their methods of teaching and school-keeping."

The industrial instruction continues to receive that amount of time and attention, which its importance demands. It is conducted by Mrs. Kerr and two qualified assistants, and consists of knitting, sewing, cutting out, fixing, &c. The boarding house will be opened at the beginning of next session. Arrangements will then be made to give the students practical instruction in laundry work and cooking under the superintendence of the matron.

The practising schools continue to be conducted in a very satisfactory manner. I have been favoured by my colleague, Mr. Kerr, with the following details of his last visit. On that occasion, he found in average attendance 607 children, while 617 were present on the day of inspection, and 349 names were entered in the examination schedules as having completed the required attendances. The per-centage of failure (reading, 0·36; writing from dictation, 6·90; and arithmetic, 6·90) is very low, and says much for the style and character of the instruction. While in the higher branches, and in the specific subjects (English Literature and Physical Geography), *the pass*, if not quite so good as in the standard examinations, was still very creditable.

Criticism lessons are given regularly under the superintendence of the Principal.

As on former occasions I met the committee of management; the members present were, the Rev. Professor Black, the Rev. Professor Milligan, D.D., the Rev. Professor Pirie, D.D., the Rev. Henry Cowan, B.D., A. Simpson, Esq., and W. Yeates, Esq.

#### RESULTS.

The following summaries furnish the necessary information :—

At the recent examination by the Department of Science and Art, three students obtained certificates of competency to teach drawing, and five gained prizes.

The results of the examination for certificates at Christmas 1875 may be seen from the following summary :—

Candidates.	Examined at Christmas 1875.	First Division.	Second Division.	Third Division.	Fourth Division.	Failed.	Per-centage successful.
Female, first year -	35	9	22	4	0	0	100·00
„ second year -	29	11	18	0	0	0	100·00
Totals -	64	20	40	4	0	0	100·00

Thus out of 64 candidates, none fall below the third division. It may be further observed that of these 64 candidates, 60, or 93·75 per cent., are in the first and second divisions.

This is a most gratifying result.

## ABERDEEN FREE CHURCH FEMALE TRAINING COLLEGE.

I visited this institution in October with Mr. Kerr. The accommodation remained the same as it was at my special visit in February. It is only temporary, and consists of the Session-house of the South Free Church, and a class-room in the practising school. In order, however, to meet the requirements of next session, the managers, I am informed, have obtained the use of the Session-house of the East Free Church, distant only a few yards from the present class-room. This addition will meet all the requirements of the college.

The plans for the new buildings include accommodation for a male and a female department; the former to contain 40, and the latter 80 students. The site selected is immediately adjoining the practising schools, and is in every way suitable. It is healthy, well drained, and in no way incommoded by the vicinity of manufactories, or public works.

The general sanitary arrangements are as satisfactory as could be expected in temporary premises, while the health of the students, during the past session, has been good, as will appear from the following statement, with which I have been favoured by Dr. Urquhart, the medical officer of the college :—

“10, Union Terrace, Aberdeen, 13th October 1875.

“I BEG to state that during the past session the health of the students has been good.

“There have been a few cases of cold and indigestion, but very few students have been absent from college even for a day.

“The only case calling for particular remark is that of Miss Douglas, who suffered from an attack of dropsy, from disease of the kidneys, before the midsummer holidays. As there was no probability of speedy recovery, she was sent home, and has not since returned.

“(Signed) J. URQUHART, M.D. Edin.,  
“Medical Officer of the College.”

As the college was opened for the first time in February 1875, I found in regular attendance, at the time of my visit, only 37 students of the first year, divided into two classes, viz. :—

## 1. Students holding church bursaries:

						£
One -	-	-	-	-	-	15
Six, each	-	-	-	-	-	12

## 2. Ordinary, or self-supporting students:

Female	-	-	-	-	-	30
--------	---	---	---	---	---	----

The instruction and training of the students are conducted by the following staff:—

No.	Names.	Degrees.	Duties.	Annual Salaries.
1	Alex. Ramage	- - - -	Principal; scripture, 3 hours; grammar, 4 hours; school management, 3 hours; reading, 1 hour; writing, 1 hour.	£ s. d. 150 0 0
2	Robert Scott	M.A. Aberd.	Lecturer, occasionally; arithmetic, 4 hours.	
3	William Litster	- - - -	Lecturer, occasionally; music, 2 hours.	30 0 0
4	Joseph Kennedy	- - - -	Teacher of drawing, 2 hours.	20 0 0
5	Agnes Walker	- - - -	Teacher of domestic economy, 1 hour; sewing, 3 hours.	20 0 0
6	Ellen Knowles	- - - -	Teacher of geography, 2 hours; history, 2 hours.	20 0 0
7	M. Boudin	- - - -	Teacher of French, 2 hours.	20 0 0

In the course of my two visits, I had repeated opportunities of seeing the methods of instruction adopted by the Principal and the other teachers, and have every reason to be satisfied with the way in which the work is carried on in the different classes. The discipline and order are remarkably good, and the general arrangements of the institution are as complete and satisfactory, as could be fairly expected in temporary premises.

The following statement, with which I have been favoured by the Principal, explains fully his mode of preparing the students for the practical work of the school:—

"The means employed during the last session for training the students, and giving them practice in the art of teaching, are twofold: (1.) the criticism lesson; and (2.) sectional teaching. (1.) *Criticism Lesson.*—For this exercise four students in rotation teach in presence of their fellow students on subjects which have been carefully prepared, and "notes" on these are laid before me at the commencement of the lesson. Those, who do not teach on that day, are expected to take notes of the work done, and upon their return to their own room, three or four are asked to give their opinion of the lessons taught. These criticisms embrace remarks upon manner, matter, discipline, language, &c., after which I not only sum up what has been said, but point out what may be considered good and worthy of imitation, and also wherein the lesson has been weak, or defective, showing how and why it was so. (2.) *Sectional Teaching.*—For this the various classes of the practising school are broken up into sections of ten or twelve; to each of which a student is appointed. The subjects to be taught are the usual ordinary branches. While teaching, they are superintended by the teachers of the various departments, as well as by myself. Particular attention is given to those, who have had little or no previous practice in teaching; hints are given; and the class is often taken for a few minutes, to show not only how to teach, but also how to *manage* a class. The students are expected to practise at this time the practical hints and suggestions given in the Lectures on School Management, and it is satisfactory to observe the attempts, often very successful, to carry out in practice, the principles laid down in the lecture of the preceding week.

"With a class of second-year students, some modification must be made in the above, to suit their requirements, but during the past session it has been found to work well. Each has had an opportunity of displaying tact and skill in managing a class, in circumstances similar to those in which she will hereafter likely be placed. To be able to keep a class, thus placed, active, orderly, and without undue noise, is a characteristic of a successful teacher."

The industrial instruction is conducted by Miss Walker, and consists of sewing, cutting out, fixing, &c. As there is no boarding house connected with the college, the instruction in domestic economy is necessarily confined to lectures on the theory, with Tegetmeier's "Manual of Domestic Economy," &c., as text-books.

The large practising schools are conducted with much ability and success. They are under the official superintendence of my colleague, Mr. Kerr, who has kindly favoured me with the following details of his last visit. On that occasion, he found in average attendance 623 children, while 645 were present on the days of inspection, and 386 names were entered in the examination schedules as having completed the required attendances. The per-centage of failure (reading, 1·55; writing from dictation, 0·25; and arithmetic, 1·29) is very low indeed, and bears marked testimony to the thoroughly efficient character of the teaching. While in the higher branches, and in the specific subjects (English Literature and Physical Geography), the *pass* was also very creditable.

The members of the committee of management who met me were, the Rev. Mr. Moir, the Rev. Mr. Iverach, and Messrs. Henderson, McHardy, and Harvey.

#### RESULTS.

The following summaries furnish the necessary information:—

At the recent examination by the Department of Science and Art, one student obtained a certificate of competency to teach drawing, and two gained prizes.

The results of the examination for certificates at Christmas 1875 may be seen from the following summary:—

Candidates.	Examined at Christmas 1875.	First Division.	Second Division.	Third Division.	Fourth Division.	Failed.	Per-centage successful.
Female, first year - -	36	1	16	18	1	0	100·00

Thus out of 36 candidates, none fail to obtain a place in the class list, though one is only in the fourth division. It may be further observed that of these 36 candidates, 17, or 47·22 per cent., are in the first and second division.

This result is not high, but, in the circumstances, it may be considered satisfactory. It is only fair to add that the other colleges had selected their first year students from the class list of candidates for admission before this college was ready to do so.

REPORT, for the Year 1875, by JOHN HULLAH, ESQ., *Inspector of Music, on the EXAMINATION in MUSIC of the STUDENTS of TRAINING COLLEGES in GREAT BRITAIN.*

MY LORDS,

I EXPRESSED a hope, in the report which I had the honour to address to your Lordships last year, that my next report would present a still more favourable record of musical progress in the training colleges now under inspection. This hope has been not only fulfilled, but fulfilled to a greater extent even than I had anticipated. The tables of per-centages show that a larger proportion of students than heretofore have obtained "60 per cent. and over" of the utmost number of marks attainable, whether for theoretical knowledge or practical skill. These tables, however, do not quite do justice to all the colleges, since in several the majority of the students have attained as many as 90, and even 100 per cent. of these marks, a fact unrecognized in them. This improvement is attributable to a variety of causes, among which your Lordships' recognition of the importance of the subject must be placed foremost, involving, as of necessity it does, corresponding recognition on the parts of managers, instructors, and pupils. More and better space has been allotted to it in time-tables, inefficient teachers have been, in some colleges, replaced by efficient ones, and learners have ascertained that musical skill is within the reach of the majority of, if not all, those who seek it earnestly. Even in the matter to which I have had occasion, in former reports, to refer so often, the musical deficiencies of students on entering the training colleges, some improvement on former years has to be recorded. Of the 1,672 students I examined individually in 1873, 923 had, before their entry to their several colleges, received no instruction, even in the elements of music, and many had never sung even by "ear." Of the 1,807 (second year students) presented to me for examination last year, 731 were in like predicament. Relatively this is a small number, absolutely it is a very large one; and the only hope of its diminution is to be found in the more general teaching of music "from notes" in elementary schools, gradually to be made possible by an increased supply of schoolmasters skilled in music, but only to be insured by the organisation of competent inspection of their work. I must repeat, and it is to be feared shall have still occasion to do so, that, especially having regard to the number of subjects, some of them new ones, to which the attention of the training college student has to be directed, there is little chance of his attaining musical skill enough to be useful to him in his after calling, unless he enters on his training with some of that "sympathy of eye and ear" to which I have so often referred. This he should have acquired, not merely before he becomes a student, but before he becomes even a pupil-teacher. Pupil-teachers, as a rule, enter on their term of apprenticeship at the age of 13, an age which, besides being five years too late to begin the study of music at to much good purpose, is just the age at which the voice, both of boy and girl, is often on the point of undergoing a change, during which it should be exercised but little or not at all. The years of a pupil-teacher's apprenticeship, from 13 to 18, are exactly those during which his or her voice should be least exercised.

Such increase in musical preparation for admission to the training colleges, as I have been able to record, has doubtless been stimulated by a growing sense of the importance of the subject. It is likely to be made more general and thorough by the entrance examinations in musical skill to which candidates were subjected at Christmas last.

Progress.

Per-centages

expression of  
relative skill.

Musical pre-  
paration on  
entry to  
colleges.

Improvement.

How to be  
maintained  
and increased.

Preparation  
should be made  
in school.

Pupil-teachers.

Entrance ex-  
amination.

Examinations of this kind have for some years past been made in some of the colleges, but they have for the most part been rather negative than positive, and limited in their operation to ascertaining that the candidate was *not* voiceless and earless. They were consequently passed by nearly all candidates. But at Christmas last a paper of directions for examination was for the first time put into the hands of the musical instructors in the several colleges, whereby they might be guided in ascertaining how far each candidate rose to a very moderate but uniform standard in the matter of musical skill. This paper, a copy of which is subjoined to this report, was so contrived as to test candidates taught on whatever method or using whatever notations. To what extent the authorities of the colleges have availed themselves of the results of this examination I have as yet not ascertained.

I have seen no cause for making any essential changes in my mode of examination. Last year, as before, I heard the second year students of each college sing collectively and individually; the individual singing being of music both prepared and unprepared, or "at sight." I also submitted them to ear tests like those described in the entrance examination paper subjoined.

I found last year the collective or simultaneous singing in some of the colleges to be very good, in the majority good, and in some few *too* good. I mean by this that it showed results of a kind of polish which the subsequent individual examination of the students proved they were quite unfit to receive. Having regard to the very limited time which can be given to musical practice in a training college, it is certain that as yet this polish can only be given at the expense of the fabric to which it is applied. To occupy the time of beginners, often as yet practically uncertain of the most simple melodic or rhythmic relations of notes, with the consideration of any but the broadest distinctions of *effect*, if even with them, is to sacrifice the indispensable to the desirable. As the poet has it in relation to the starving—

"Such dainties to them their health it might hurt,

It's like sending them ruffles when wanting a shirt."

In the combined singing of the first year students, whom, though I do not examine individually, I hear always together, a curious result sometimes presents itself. I find it occasionally superior to that of the students of the second year. For instance, at Saltley, Derby, and Cheltenham I have this year noted the latter as merely good, or even fair, and the former as very good. Now and then this result may be attributable to the accident of a higher average of voice as well as of general power in the one body than in the other; but it is only another proof of the musical inequality of the students on entry to the colleges,—generally a constant source of inconvenience to the musical instructors, a disadvantage to the better prepared of those they have to teach, and not an inevitable accident, but a quite evitable cause.

In the individual singing of music already practised a gradual improvement is to be noted. On this the training of the students in other subjects tells favourably indirectly, and in one especially, reading aloud, directly. Their enunciation in singing is, as a rule, better than that of many amateurs who have studied music apparently under more favourable circumstances. I wish, however, that this improvement could be extended to the choice of subjects on which students exhibit their individual powers. At some colleges, *e.g.*, Bangor, Borough Road, Darlington, Lincoln, Peterboro', Ripon, Wandsworth, York, the solos were generally well chosen; but in some others I was favoured with a variety, or worse, a repetition, of the poorest vocal compositions I had ever before listened to under the same circumstances. The time of a student

Mode of  
examination.

Collective  
singing some-  
times *too good*.

Individual  
singing.

in training is his best, often his only property, and he should be prevented wasting it on the consideration of trash, literary or musical. I am sure it can only be needful to call the attention of the musical instructors to this matter to have it set right.

Singing at sight.

In the power and facility of reading fresh music, or as it is commonly called "singing at sight," the past year's examination has revealed great and, I believe, unprecedented improvement. Of this the extent, in comparison with that of former years, will be easily gathered from the subjoined table of averages of practical skill; since I have, from my first examination, assigned no less than half the marks attainable to this subject only. Its importance is paramount. It represents both theoretical knowledge and readiness in applying it, habit of attention, quickness of eye and ear, in a word, to what extent the reader or singer is a self-dependent *musician*, competent, unaided, to set others on the right way and to tell them where and how they have departed from it.

Its importance.

Ear tests.

The number of students who have undergone the "ear tests" satisfactorily in the course of the last examination is again somewhat greater than at any previous one. This is one of the subjects wherein the first step seems everything. I find, as a rule, that students can either tell sounds played or sung to them readily and certainly, or not at all. This might suggest the conclusion that the power of doing so was a natural gift. That it is largely dependent on race and family is certain, simply, as I believe, because among certain races and in certain families music has long been cultivated. Among varieties even of the most musical races with whom this has not been the case musical aptitude will be found to die out. Thus the Celts of Wales are, perhaps, the most musically apt of any people in Great Britain; on the other hand, those of the Highlands of Scotland are the least so. I have never met with a Welsh student with what is called a defective ear. I have taken the utmost pains to get a Highland student to imitate even approximately the simplest succession of musical sounds, quite unsuccessfully; and this not in one instance only, but in half-a-dozen consecutive instances. The cause is not far to seek. Music is an imitative art. For time immemorial the Welsh ear has been formed, consciously or unconsciously, by the harp, an instrument not merely refined in its quality, but an instrument of harmony, and, therefore, of necessity tuned on the system which, with Europeans, use has made into a second nature. The Highland ear has been formed on the coarsest variety of one of the most imperfect even of monodic instruments, the bagpipe. I do not give these as the only causes of the musical inequality of these two varieties of the same race, but as one of them, and that of itself a sufficient one.

Musical ear, how far dependent on race and family.

Instrumental music.

Having regard to its non-recognition as a subject, instrumental music makes considerable progress in the training colleges. There is not one in which it is not cultivated by a fair proportion of students, and in several every student receives, or has the opportunity of receiving, some instruction in it. I had not time to test formally the results of this instruction, save in one instance; but I find in my journal notes to the effect that students were often accompanied in their vocal solos by their fellow-students, and that they even sometimes accompanied themselves. This was the case at York, Stockwell, the Borough Road, Oxford, and elsewhere.

The pianoforte.

I have already on two occasions called attention to the teaching of the pianoforte in the Church of Scotland Training College at Edinburgh. The exceptional method employed there and the equally exceptional results obtained from it must be my excuse for doing so again. Between 40 and 50 of the female students of this institution are distributed into six classes, in each of which not fewer than seven, or more than eight,

receive instruction from Mr. Mackenzie, an eminent Edinburgh professor, assisted by a resident governess, Miss Hart. For this and the use of music they pay a small fee. Some previous preparation is a condition of entrance even into the lowest of these classes, which of course are in various stages of progress. Mr. Mackenzie's method is simple, whatever musical science and skill, energy and quickness of observation may be needed to make it effective. When he has occasion to introduce a new composition to his pupils he collects them round one pianoforte, plays it, marks and gives reasons for the choice of the "fingering," and then hands them the copy thus marked, that they may transfer his fingering to their own copies. At the end of a few days, during which they are expected to have given it some study and practice, the class reassembles and simultaneously practises it under Mr. Mackenzie's direction. It is obvious that such instruction, in such a subject as pianoforte playing, can only be efficient in very competent hands. It is not enough that the teacher know whether what he listens to is right or wrong; he must know what it is that is wrong, and who is the wrongdoer. Moreover, his eyes must be as actively employed as his ears, that he may note and correct at least the most glaring instances of clumsy manipulation. That individual correctness may be attained by instruction thus distributed, I was enabled to ascertain by calling upon individual students, at Mr. Mackenzie's invitation, to play any of the major or minor scales, which they did generally readily and correctly. The piece I heard performed, and creditably, by the highest class was Bennett's Introduction and Pastorale, op. 28. Those acquainted with this refined competition will know what accuracy on the part of eight performers must be needed for a fairly agreeable rendering of it. I have returned at some length to this subject, from an earnest desire to see the example of Edinburgh imitated in regard to it. The preliminary outlay (for the purchase of pianofortes) will of necessity be a difficulty in many places, and the obtaining the services of a professor of the first class another.

Though instrumental practice other than on the pianoforte is, I am told, carried on to a considerable extent by individual students, in only one college have I found that any attempt has been made to turn it to account in simultaneous performance. At Culham a small band of brass instruments has been formed under the direction of a student—the son of a bandmaster—with such success as to show that, even in the limited time that can be devoted to it, instrumental music under competent direction might easily be made a part of the business of a training college. Practice of this kind, besides being an excellent exercise in power of attention for those who take part in it, is an indirect means of musical culture for those who do not. The management (of rehearsals, &c.), which at Culham is entirely in the hands of the students themselves, is of itself a lesson in organisation not without its value.

The majority of the training schools still labour under the disadvantage of having their practice limited to music for voices exclusively male or exclusively female, a limitation which deprives them of that best of all modes of cultivating the musical ear and taste—taking part in choral music with a completely appointed choir. The quantity of good music for the exclusively male or exclusively female choir is, as compared with that for the perfect choir, very limited. Its execution, too, is attended with especial difficulties, arising as well from the commonly extravagant compass of the extreme parts as their close texture. More profit is, I believe, likely to result from the practice of a single oratorio of Handel than from that of any number of part songs or similar pieces composed for either of the two classes of voice. I have repeatedly

Instrumental  
band.

The "perfect"  
choir.

recommended the authorities of the training colleges to make arrangements—often attended with little practical difficulty—for occasional meetings for practice of neighbouring institutions of different sexes. To mention a few instances of those near together : the college in the Borough Road is within two miles of that at Stockwell ; Westminster is at about the same distance from Southlands ; St. Mark's is still nearer to Whitelands—I mention in connexion only institutions under the same government—and, not to multiply instances, the two training colleges at Durham are next door to one another. Some even further removed, like Chester and Warrington, might meet, perhaps at longer intervals, but still occasionally. I regret to say that my recommendations have been so far without effect, save in a single instance. On the occasion of my last examination at Stockwell, some of the male students from the Borough Road attended, that those of the female students at Stockwell might, for the first and only time since they had been in training, realise fully the effect of the music they had been studying in detail, and ascertain practically the difference between half a choir and a whole one. Is it to be argued from their action or inaction in this matter that the authorities of the training colleges are of opinion that the only adult persons who cannot safely be trusted, to pass an occasional hour, every moment of which would be occupied, and this under surveillance, in company with those of another sex are the future instructors and instructresses of the people of Great Britain? It is impossible to believe that the subject has ever been seriously considered by them.

I have the honour to be, &c.

JOHN HULLAH.

*To the Right Honourable*

*The Lords of the Committee of Council on Education.*

## APPENDIX No. 1.

### EXAMINATION OF CANDIDATES FOR ADMISSION INTO TRAINING COLLEGES.—CHRISTMAS, 1875.

DIRECTIONS for the EXAMINATION, by the MUSICAL INSTRUCTOR of each COLLEGE, of CANDIDATES in PRACTICAL SKILL. (*See First Schedule to New Code.*)

Not more than three candidates at a time should be admitted to the room in which this part of the examination is conducted. Each candidate is to be examined separately.

The examiner will require a pianoforte or harmonium ; he will take care that each candidate under examination is out of sight of the keys.

The examiner will sound the note

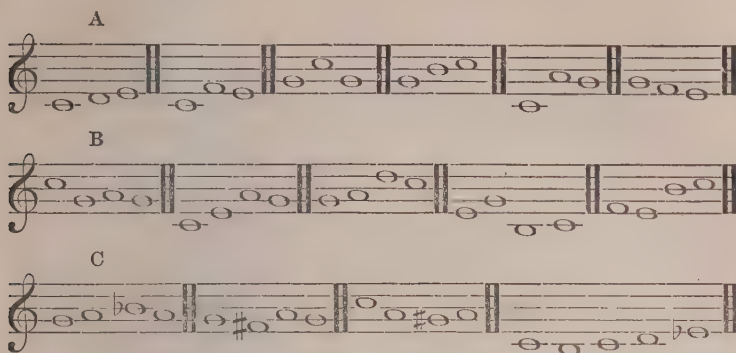

then play, or sing to the

vowel *AA*, slowly and softly, any one of the passages marked *A*, any one marked *B*, and any one marked *C* ; calling upon the candidate, after each has been played or sung, not more than three times, to name the notes (*Do, Re, C, D*, or other) of which it is composed. Or,

The examiner will himself name the notes of which any one of the passages is composed (taking care to use such names as the candidate is acquainted with), calling upon the candidate to sing it.

The passages marked *B* are more difficult than those marked *A* ; those marked *C* more difficult than those marked *B*.

The examiner should avoid testing two successive candidates with the same passages.

The examiner, beating time, will sol-fa, or recite without musical intonation, any one of the measures marked A, and then any one marked B; calling upon the candidate, after each has been so sol-faed or recited, not more than three times, to give the duration names (crotchet, quaver, or other) of the notes composing it. Or,

The examiner will himself give the duration names of which any measure is composed, and call upon the candidate to sol-fa or recite it.

In classifying the candidates, credit should be given to readiness as well as to accuracy, in answering to the tests.

## APPENDIX No. 2.

## PART IV. OF APPENDIX.

LIST (under Counties and School Board Districts) of SCHOOLS, aided from the Parliamentary Grant :

1. FOR BUILDING OR FIXTURES. In the cases marked with an asterisk \* the grant was made by the Treasury before the appointment of a Committee of Council on Education.
2. FOR ANNUAL MAINTENANCE. The grants entered are (with the exceptions marked *a*) those made upon inspection due (Article 13) in the year ending 31st August 1875.  
Changes in the date of inspection are denoted by two numbers in the first column.  
Where two numbers are given in the column for average attendance, the latter denotes Evening Scholars, unless otherwise specified.
3. COMBINATIONS OF SCHOOL BOARDS under Section 42 of the Education (Scotland) Act, 1872, are printed in *italics*.

NOTE.—P. denotes that the School is a *Public School*; C.S. or G.A. that it is in connexion with the *General Assembly of the Established Church of Scotland*; F.C., with the *Free Church of Scotland*; B., *Episcopal Church of Scotland*; R., *Roman Catholic Poor School Committee*; S., that it is a *Sessional School*; and U., that it is *Undenominational*.

Name of School Board, Name and Denomination of School, and Month when Inspection is due.	Amount of Grants for Building, Enlarge- ment, Improve- ments, or Fixtures, to 31 Dec. 1875.	Annual Grants. # REPORT.

TO THE RIGHT HONOURABLE

## THE LORDS OF COMMITTEE OF THE PRIVY COUNCIL ON EDUCATION IN SCOTLAND.

WE are now in a position to state somewhat fully the circumstances in which, as regards education, the country was placed at the time when the Education Act was passed; and what has since been proposed and effected to provide the additional school accommodation that was required.

Review of the  
results of the  
Education Act  
hitherto ar-  
rived at.

When the census was taken in 1871, there were in the landward parishes and districts of Scotland 368,238, and in the burghs 261,016, making together 629,254, children, between the ages of five and thirteen. In 1873, when the school boards reported to us, we estimated from the information supplied by them that there were 511,601 scholars on the rolls of all the schools in the country.

We have now been able to dispose of the schemes proposed by the school boards of 825 parishes and burghs—769 of the former and 56 of the latter—with a total number of children of school age (5 to 13 years) of 587,378, of which 329,486 belong to the parishes, and 257,892 to the burghs.

In the reports of these school boards two thousand nine hundred and six schools were returned as good, with 384,861 school places; eight hundred and forty-four as indifferent, with 65,871 places; five hundred and seventy-three as bad, with 31,450 places; making a total of four thousand three hundred and twenty-three schools—three thousand one hundred and twenty-nine in parishes and one thousand one hundred and ninety-four in burghs—with 482,182 school places. Of these one thousand five hundred and nineteen schools—one thousand two hundred and ninety-four in parishes and two hundred and twenty-five in burghs—with 108,312 places, have been discontinued or superseded; leaving available school places in schools not requiring enlargement or improvement, to the number of 276,549.

Ninety-four of these discontinued or superseded schools are in Orkney and Shetland, eighty-four in Caithness and Sutherland,

one hundred and four in Ross-shire, one hundred and twenty-five in Inverness, ninety-five in Argyll, one hundred and thirty-four in Aberdeen, and one hundred and nineteen in Lanark. In the purely agricultural counties in the Lowlands, the number is much smaller in proportion to the population. On the other hand, nine hundred and ninety-eight new schools—eight hundred and seventy-eight in parishes and one hundred and twenty in burghs—have been projected by school boards and sanctioned by us, and four hundred and eighty-two schools are to be enlarged, containing in all 226,543 school places—157,080 in parishes and 69,463 in burghs.

There remain still one hundred and fifty-five school boards of parishes and four of burghs—having 41,876 children of school age under their charge—whose reports have not yet been disposed of. This has arisen from the various causes mentioned in detail in our last report. The changes of opinion, and consequently of proposals, on the part of school boards—the unsuitableness of some of the schemes submitted to us—differences of opinion respecting the most convenient sites for the new schools—the refusal in some instances of proprietors to grant the sites selected by the school boards, and want of power to compel combinations of parishes for the support of joint schools and the formation of school districts,—these obstacles, the most formidable of which can be removed only by the Legislature, have caused a great deal of trouble and have entailed a large amount of unnecessary expense.

In a number of cases, school boards, after obtaining our sanction to their proposals, have neglected or delayed to carry their schemes into effect, and we have been obliged to put pressure upon them to induce them to do their duty.

In the Highlands and Islands, difficulties of a peculiar and formidable nature have largely hindered operations. The great expense (especially when compared with the rental of the parishes) arising from the large number of new schools to be erected, and the present high price of labour and materials, has been a very serious hindrance in carrying out the proposals for providing adequate and suitable school accommodation; and though the concessions made by your Lordships in the Code of 1874 and 1875 will materially lighten the heavy cost which must be incurred, the burden will still press with great severity on the ratepayers in these extensive, thinly-peopled, and poor districts of the country.

It is stated, for example, by the school board of a parish in Shetland, who in April 1874 resolved, with our sanction, to erect eight new schools, that they have taken no steps to carry out their ‘opinion and determination,’ on account of the ‘difficulty of procuring plans and specifications suitable, and, at the same time, at a reasonable cost.’ ‘This,’ they add, ‘is owing to the remoteness of the situation, and the want of roads for conveying materials.’

Another Shetland school board report that they require eight schools, to provide adequate school accommodation for the children of school age under their charge; that the rental of the parish is

998 new  
Schools  
sanctioned.

482 Schools to  
be enlarged.

Reports of  
School Boards  
not yet dis-  
posed of.

Proposals  
sanctioned, but  
not carried out.

Difficulties in  
the Highlands  
and Islands.

In Shetland.

only £3370; and that a rate of threepence per pound will yield only about £43. 'None of the works,' they say, 'have yet been begun, the school board being unable to see their way to incur the cost of the necessary buildings, and the maintenance of the number of teachers required, except at the risk of imposing such a burden on the numerous and poor ratepayers as could not be borne.'

Similar apologies for inaction have been received from several other boards in the northern islands.

Very little has been done in Sutherlandshire to carry into effect the plans proposed by the school boards for providing additional school accommodation. The excuse pleaded in almost every case, has been the expectation that Parliament would place this county, as regards building grants, in the same position as the counties of Argyll, Inverness, Ross and Cromarty, and Orkney and Shetland.

In Sutherlandshire.

Difficulties in obtaining suitable sites for schools have in several cases proved a great hindrance to the operations of school boards. In one district where it was proposed to build twelve new schools and to enlarge eight, nothing has been done, in consequence of the refusal to grant sites;—a difficulty which has obstructed school boards, both in the Highlands and Lowlands, in their efforts to provide for the educational wants of their parishes.

Difficulties in obtaining sites.

It is reported by a school board in a northern county that they have not been able to carry out their plans, because the proprietor, who has given a verbal promise of ground on which to build, cannot be induced to sign the conveyance. In a district in one of the western isles, where additional school accommodation is urgently needed for several hundreds of children, the school board report that they have failed to obtain any arrangement with the proprietor, who usually resides in another part of the country, and returns an evasive answer to all their requests for a grant of sites. These facts show the need for some such provision as is contained in the English Education Act for obtaining sites for schools, when refused by the proprietors.

We are informed by a school board in one of the western isles, who require to provide accommodation for about a thousand scholars, that they have advertised for contractors, but that no suitable tender has been received. Several other boards report that not a single tender of any kind has been sent in in answer to their advertisements. This unusual occurrence is owing to the fact, that both materials and workmen require to be brought from a considerable distance, and as the demand for labour is great, and wages are high, masons and carpenters cannot be induced to accept employment in the remote districts of the country, where suitable lodgings are not to be obtained.

In finding Contractors.

In Skye, where thirty-two schools and one enlargement are required to accommodate 2460 children, and in the island of Lewis, where twenty-seven new schools are to be built, and four existing schools to be enlarged, to contain 3905 scholars, little or nothing has as yet been done, owing to one or other of the causes mentioned.

Dissensions,  
etc., within  
School Boards.

In some cases the work has been at a standstill for reasons of a different kind. In one instance, 'the smallness of the population at present in the district' is pleaded as an excuse for allowing the children to remain without instruction; in others, the difficulty of collecting a sufficient number of children to form a school at any one point. Several school boards have changed their opinions as to the best mode of providing the requisite accommodation, but though they have resolved to set aside the plan which they had at first proposed, they have not as yet transmitted to us any other scheme in its room. Differences of opinion, and disputes among the members, have in a few cases arrested the operations of the school boards, and injuriously affected the educational interests of their constituents.

Refusals of  
School Boards  
to carry out  
the Act.

In a few instances school boards have thought fit to refuse to carry out our decision respecting the manner in which sufficient and suitable provision should be made for the instruction of the children under their charge, and have insisted that they had the right to provide the requisite school accommodation according to their own views, and not ours, as to what was necessary. The conduct of these boards has given us a considerable amount of trouble, and has been injurious to the interests of education as well as expensive to the ratepayers. The school board of Stow submitted to us a scheme for providing sufficient school accommodation by repairing their old school, which they had reported as bad, and purchasing an old chapel, which had been converted into a school. After an inspection of the site and premises by the secretary and by one of our number, and a careful consideration of the whole circumstances, we declined to sanction the proposal. The school board acquiesced in our decision, selected a site for a new school, which was duly sanctioned by us, obtained plans and estimates, and were about to commence the work, when the majority of the board suspended operations and refused to proceed with the undertaking. Our repeated remonstrances having failed to induce the school board to do their duty, we were reluctantly constrained to take proceedings against them under the 36th section of the Education Act. The case was brought before the First Division of the Court of Session on a petition and complaint at the instance of the Lord Advocate, and a decision was given unanimously by their Lordships sustaining the petition and complaint, with expenses. The effect of this decision is to compel the school board to proceed without delay to erect a new school and teacher's house in terms of our sanction, and in accordance with the requirements of the Education Act and the Code.

Operations of  
School Boards.  
In Edinburgh.

In Edinburgh, at the close of 1873, there was, in the opinion of the school board, a deficiency in the amount of school accommodation to the extent of 4161 places. To meet this deficiency, the board proposed to provide eight schools, to contain 4900 scholars, and to proceed at once with the erection of five. One of these has already been opened, and the other four, it is

expected, will be ready in the course of the summer and autumn. These five schools will afford accommodation for 2900 scholars, and their total cost (including sites) will amount to £53,807, 12s., about £18, 11s. per scholar.

The original proposals of the school board would have been sufficient to supply the deficiency of school accommodation in 1873; but since that time nine schools, affording accommodation for 2472 children (in addition to nineteen previously discontinued), have been closed by their managers. Owing to this occurrence, as well as to the increase of population, the school board have found it necessary to enlarge considerably their original plans. Temporary arrangements had, of course, to be made, in order to provide the additional accommodation thus required at once. At present the board have nineteen day schools under their charge, only one of which, however, is permanent. Five are rented by the board, and the use of thirteen is meanwhile given gratuitously by the proprietors of the buildings. All these schools appear to be crowded. To relieve the pressure of attendance at them, the board have opened five halls as temporary schools; but still the monthly returns show that the attendance is far in excess of the accommodation.

The school board of Glasgow ascertained, in 1873, by a careful In Glasgow. census, that there were 225 schools of all classes in the city, containing 57,219 places, and that there was a deficiency of good school accommodation for 30,000 children. To supply this deficiency, they proposed, in their original 'opinion and determination,' to build twenty-three schools, and to enlarge six others so as provide accommodation for 18,465 pupils. Since that time, however, sixty-four schools have been discontinued by their owners or managers. These schools, containing 10,889 places, had 11,775 pupils on their rolls and 9305 in attendance. The school board therefore find themselves under the necessity of providing a much larger amount of school accommodation than was originally proposed, according to the estimate made by them of the then known deficiency, and consequently of expending a sum correspondingly larger than was at first indicated. With regard to the twenty-three schools which the board proposed to erect, nine have been completed and opened, and four permanent schools, of which the board have obtained possession, have been enlarged, providing together accommodation for 8920 scholars; seven new schools, containing 5803 school places, are in course of erection; and considerable progress has been made in preparing plans and acquiring sites for the remainder.

At 30th November 1874, there were two hundred and seventeen schools in Glasgow, containing 59,556 places. Between that date and November 1875, twenty-four schools, having 3554 places, were abandoned by their managers. The school board state, that besides the schools which they have erected, eighteen private or denominational schools have been opened during the year ending November 1875. There are now altogether two hundred and twenty-six schools in the city, containing in all

(along with the temporary premises leased by the school board) accommodation for 69,177 scholars.

Seven of the permanent new schools, which have been built and opened, have cost (including sites) £81,213—ranging from £15, 0s. 7d. to £10, 10s. 7d., and averaging £12, 9s. 8½d. for each scholar they can accommodate. Three permanent schools, purchased and enlarged by the board, cost £15,200, at the rate of £8, 8s. 4½d. for each pupil.

The seven new schools at present in course of erection are estimated to cost £84,400, 18s. 9d.—an average of £14, 10s. 10d. per scholar.

Two transferred schools have been enlarged to accommodate 675 additional pupils, at an expense of £7410—about £10, 19s. 6d. per scholar.

Of the schools not under the charge of the school board, there are sixty-four, having an average attendance of 23,700 pupils, supplied by voluntary effort, and inspected by the Department. There are ten industrial schools, attended by 1004 scholars. The schools where the fee is more than 9d. a week—fifty-five in number—give instruction to 5771 pupils. There are thirty adventure schools, with an average attendance of 2721 scholars, not inspected, but returned as efficient. The fees charged are similar to those of the inspected schools.

In 1873 there were in Glasgow twenty-four schools which were classified as bad, and thirty-six as 'indifferent.' The school board now state that the number of schools which they regard as 'unsatisfactory,' either on account of defective accommodation or inferior teaching, or both combined, has been reduced to sixteen, containing accommodation for only 934 scholars, but having an average attendance of 1458. This overcrowding in schools which are so defective in their accommodation cannot but exercise an injurious influence on the health of the scholars and teachers.

The Glasgow board had under their charge at 31st December 1875 thirty-eight schools, having on the roll 19,275 scholars, and an average attendance during the year of 14,185. For the instruction of these scholars the board have a staff of 152 principal teachers and assistants, 244 pupil teachers and monitors, 3 sewing mistresses, and 5 visiting teachers. The total salaries and emoluments paid by the board during the year 1875 amounted to £16,901, 19s. 4½d. The board state that the number of these schools has since been increased to forty-two, containing 21,824 school places, having 20,832 pupils on the roll, and an attendance of 16,699 or 80 per cent. of the number on the roll.

In Govan.

The school board of Govan reported in 1873 that at the census taken in 1871 there were in the parish 9723 children of school age. 7198 pupils were on the rolls of all the schools of every class, forty-six in number. Five of these schools, containing 394 school places, have been discontinued. Five new schools have been built and opened, and one has been enlarged, affording in all accommodation for 4513 children. The total cost of the five new schools, and the enlargement, is £41,070—an average of £9, 2s. 0d. per scholar. At 31st December last the school board report that the

number on the rolls of all their schools is 6319, with an average attendance of 4106. In Govan, as in Glasgow, the cost of sites is very high, and adds materially to the expense of providing adequate school accommodation.

When the Greenock school board entered on office, and took a census of the number of children of school age in the burgh, they came to the conclusion that they would require to provide additional accommodation for 2500 scholars. But they have since discovered that this estimate was too low, and that the real deficiency in 1873 amounted to 2875 school places. In order to provide the additional accommodation required, the board resolved to erect three new schools in localities where they were most needed, and to purchase and enlarge an existing school. They have since resolved, in order to provide for the increase of population in the burgh, to erect two additional schools. They mention in a recently published report that one of these schools has been completed since 31st December 1875, and is now occupied; that another is nearly finished; and that considerable progress has been made with the erection of other two. When the buildings now in progress are completed, additional accommodation will be provided for 3584 scholars, at an expense, including sites, of about £50,000. The cost per scholar ranges from £8, 16s. 8d. to £13, 0s. 6d., and averages about £11, 8s. 4d., exclusive of sites.

*In Greenock.*

The price of ground in Greenock is high, and the cost of the sites purchased by the school board has been respectively £1568, £2181, £4650, and £4805. If these sums be added to the expense of the building, etc., in each case the cost per scholar will be increased by a sum varying from £1, 19s. 4½d. to £7, 4s. 5d.

The school board say, 'Greenock is a place where building is always relatively dear. Recently, building has risen very much in cost, from the advance in masons' and other tradesmen's wages, caused by the general school building throughout the country. Instructed by its architects, the board originally estimated the cost of the schools at a much smaller sum than, it is plain, will now be required.'

The school board of Paisley reported that at the date of the census of 1871 there were 8978 children of school age in the burgh, that 6170 scholars were on the rolls of the schools of all classes—which, however, contained accommodation for only 4566. Of these schools eight were returned in 1873 as good, twelve as indifferent, and seven as bad—nine were to be discontinued or superseded. The school board received our sanction to erect five new schools and to enlarge an existing school, to contain in all 3890 scholars. One of these new schools was opened on the 20th of March last. In 1874 six elementary schools were transferred to the school board by their former managers; one of these schools, however, is unfit for permanent use and must be rebuilt. In order to meet the immediate pressure for accommodation, the board obtained the use of the buildings in which seven of the discontinued schools had been conducted; and as the educational wants of the community were still unsupplied,

*In Paisley.*

four other buildings were secured on lease, and have been opened as temporary schools. The five transferred schools which have been recognised by the Department as fit to be permanent are all overcrowded to such an extent, that there are 661 pupils in attendance in excess of the proper number. Besides this, eight of the schools which are not under the charge of the school board are attended by 466 scholars beyond the number for whom accommodation is provided in these buildings. The injurious effects of this overcrowding will not be remedied until adequate provision has been made for all the children of school age in the town.

*In Dundee.*

In Dundee there were, in 1871, 21,120 children between the ages of five and thirteen, and in 1873 there were 17,464 pupils on the rolls of the schools—ninety-eight in number—in the town. Nine of these schools were returned as indifferent, and eleven were to be discontinued or superseded. The school board proposed, and have received our sanction, to erect seven new schools and to enlarge an existing school, to provide accommodation for 4000 scholars. Four of these schools have been completed, and the enlargement has also been made, which together will accommodate 2000 scholars.

*In Aberdeen.*

The school board of Aberdeen reported that there were 13,681 children of school age in the burgh at the date of the last census; that there were in 1873 11,881 scholars on the rolls of the ninety schools in the city of all classes—good, bad, and indifferent. Nine of these schools have been discontinued or superseded. The board received our sanction to erect five new schools and to enlarge two existing schools, to contain in all 3120 scholars. None of the new schools have as yet been completed, but the two enlargements have been made.

*In Leith.*

There were in Leith, in 1871, 8170 children between five and thirteen years of age, 5838 scholars were returned in 1873 as on the rolls of the thirty-six schools in the burgh—thirty-two of which were described as good. Six of these schools were to be discontinued or superseded, and the school board proposed to provide additional accommodation for 2800 children by erecting six new schools and enlarging an existing school. Four of the new schools have been finished and opened, and the enlargement has also been completed. The promptitude with which the Leith school board were enabled to commence the erection of their new schools contributed considerably to diminish the expense, as the contracts were taken before the rise in wages and in the price of materials, caused by the simultaneous erection of so many new schools and teachers' houses throughout the country.

*In Clackmannann.*

A similar result is mentioned in the very satisfactory report published by the school board of Clackmannann of their proceedings during their term of office. The cost of their principal school was £2050, an average of only £5, 14s. 3d. for each child for whom accommodation has been provided. 'The comparative cheapness of the building,' they say, 'is not a little due to the promptitude with which the work was undertaken, the contracts being entered into with the different trades-people before the great rise in

masons' wages, which took place in consequence of the impulse given to the trade by the building of schools and teachers' houses all over the country, consequent on the passing of the Act of 1872.'

Throughout the Lowland districts in general considerable progress has been made in carrying out the schemes of the school boards. In East, West, and Mid Lothian the erection of forty-eight new schools and the enlargement of thirty-four existing schools, to provide accommodation for 18,068 scholars, was proposed and sanctioned. At the close of 1875 fifteen had been built and nineteen had been enlarged. In the border counties of Berwick, Roxburgh, Peebles, and Selkirk thirty-one new schools were to be erected and thirty-five enlarged. Fifteen of the former and twenty-two of the latter have been completed. In Dumfriesshire, Kirkcudbright, and Wigtown forty-one new schools were to be built and thirty-seven enlarged, to accommodate 9054 children. Twenty-two of the former and twenty-eight of the latter were finished before 31st December 1875, and contain accommodation for 4788 scholars. In the mining and manufacturing shires of Ayr, Renfrew, Lanark, and Dumbarton it was proposed to erect one hundred and eighty-seven new schools and to enlarge seventy-four, to provide in all accommodation for 76,949 scholars. Seventy-one have been built and fifty enlarged, containing altogether 34,054 places.

*In the Low-  
land Districts.*

The school boards of Stirling, Clackmannan, Kinross, and Fife proposed to build sixty-five new schools, and to enlarge sixty-two, to provide 22,818 school places. Twenty-seven of the former and thirty-nine of the latter, containing accommodation for 9192 scholars, have been completed.

In the counties of Perth, Forfar, and Kincardine the school boards have received our sanction to erect seventy-eight new schools, and to enlarge an equal number of existing schools, to accommodate 22,017 scholars. Of these, fifty enlargements have been made and forty new schools built.

In the north-eastern counties of Aberdeen, Banff, Elgin, and Nairn one hundred and forty-three new schools and seventy-seven enlargements were required to provide accommodation for 27,671 scholars. At the end of last year fifty new schools had been erected and forty-nine enlarged, containing altogether 9865 school places.

The contrast between the progress made by these counties in providing suitable and adequate school accommodation, and the state of matters in the Highlands and Islands, is striking and instructive.

*In the High-  
lands and  
Islands.*

Argyleshire required additional accommodation for 7676 scholars, which the school boards in the county have resolved to provide by erecting eighty new schools and enlarging fourteen. But only thirteen of the former and six of the latter, containing 1553 school places, are completed.

In Inverness-shire one hundred and five new schools and eleven enlargements were needed to accommodate 9686 children, but as yet only eight have been built and one enlarged, with room for 880 scholars.

Ross and Cromarty required to build ninety schools and to

enlarge nineteen, to provide for 10,584 scholars. Eighteen of the former and eight of the latter are finished, and will accommodate 2070 pupils.

In Sutherland-shire.

In Sutherlandshire there was need of twelve new schools and nine enlargements to make provision for 1487 scholars, but as yet only one school has been built and two enlarged, with room for 231 scholars.

In Orkney and Shetland.

The state of matters is almost as bad in Orkney, and much worse in Shetland. The school boards in the former resolved to erect thirty-four schools, and to enlarge nine, to accommodate 3736 children; but they have only built three and enlarged one, having together 405 school places. The latter requires to build fifty new schools, and to enlarge two, to contain 3208 scholars; but they have not as yet done anything to carry out their proposals.

Summary of results:—291 new Schools built; 285 Schools enlarged.

Altogether, at 31st December 1875, two hundred and ninety new schools had been erected—two hundred and forty-nine of these being in parishes and forty-one in burghs. In addition, two hundred and eighty-five schools have been enlarged, providing in all accommodation for 85,505 scholars. In the parishes and burghs whose proposals have been sanctioned, there are still seven hundred and eight schools to be built (of which, however, the greater part are in progress) six hundred and twenty-nine in parishes and seventy-nine in burghs, and one hundred and ninety-seven to be enlarged, in order to provide accommodation for 141,038 children.

Transferences of Schools.

During the past year we have sanctioned the transference of twenty-seven denominational and subscription schools to the school boards of the parishes in which they are respectively situated.

Union of Parishes under Section 17th of the Act.

The school boards of Kirkton and Cavers proposed, on 15th September 1875, to unite under section 17th of the Education Act. As this amalgamation of these parishes appeared to us to be desirable, we sanctioned their proposal on the 15th of October, and declared them united accordingly,—the union to come into operation at the ensuing general school board election.

Combinations under Section 42.

In the course of last year there have been twenty-four combinations of school boards, in terms of the 42d section of the Education Act, for erecting, maintaining, and keeping efficient schools for the instruction of children belonging to the respective parishes concerned.

Summary Statistics. Schools, Teachers, and Scholars.

On 31st December 1875, there were 2329 public schools under school boards in Scotland, with 307,955 scholars on the roll, and an average attendance of 233,130, taught by 3418 principal teachers and assistants, with 3024 pupil teachers and monitors, 1164 sewing mistresses, and 110 visiting teachers.

Evening Schools.

There were 165 evening schools, having 12,343 scholars on the roll, and an average attendance of 9803. In these schools there were 203 principal teachers and 103 assistants, 65 pupil teachers and monitors, 4 sewing mistresses, and 2 visiting teachers. The

fees amounted to £2666, 9s. 5½d.,—the grants, under the Code, to £1904, 1s. 10d., and the salaries to £3631, 9s. 7½d. School Funds and Salaries.

The rateable value of lands and heritages, according to the Valuation Roll for 1875-76, is £17,340,467, 19s. 11d. The assessment required for the year by the school boards amounts to £285,764, 12s. 3½d. The school fees amounted to £135,868, 4s. 2¾d. The annual grants, under the Code, to £134,053, 7s. 9½d.; and the additional grants, under the 67th section of the Education Act, to £1526, 5s. 4d. The total salaries and emoluments paid during the year 1875 amounted to £377,603, 2s. 4½d.

The school boards report that during last year, in carrying out the compulsory clauses of the Education Act, 7499 parents have been summoned to appear before their respective boards, and that notices have been sent to 421 employers; that 279 parents and one employer have been prosecuted; that 197 of the former were convicted—135 of whom were fined and 20 imprisoned; that the fines and expenses amounted to £130, 4s. 8d., and that the cost of prosecutions, less the amount of fines and expenses recovered, was £466, 18s. 10d. The parents of 2974 children applied to parochial boards, under the 69th section of the Education Act, for assistance to educate their children, but it appears that the applications on behalf of 1150 of these were refused.\* Working of the Compulsory Clauses. The number of children who during the year have been brought into school by the operation of the compulsory clauses is estimated at 28,054. Of these children, 15,516 belong to towns and 12,538 to rural parishes.

In a considerable number of burghs and parishes the compulsory provisions of the Education Act have been carried out with great energy and success. In various instances, indeed, the result of the activity of school boards, in enforcing regularity of attendance, has been to overcrowd schools of all classes to an extent which has not only been inconvenient to the teachers, but prejudicial to the health of the scholars. In some of the larger towns, school boards still continue to plead that they are not in a position to enforce the compulsory clauses on account of the deficiency of school accommodation, which, however, they are doing all in their power to supply. We regret to learn that, in a good many rural parishes, no attempt has been made to carry these provisions of the Act into effect. In some cases we have discovered that the school boards had neglected even to appoint compulsory officers. The attendance at school has, in consequence, been stationary in various districts, and the children of careless and dissipated parents have not been brought under instruction. Causes of backwardness in working them.

Some of these school boards plead as a reason why they have taken no steps to provide the new schools or enlargements, for which they had obtained our sanction, that they have already sufficient accommodation for all the children at present attending school; thus

---

\* Objection has been taken to this section on account of the stigma of pauperism which is thereby fixed on those who live by their own industry, and are willing, although not able, to provide the means of education for their children.

making the consequences of their neglect of one duty an excuse for their neglect of another. It is evident that a strict supervision will be necessary to secure the carrying out of the compulsory provisions of the Act, especially in rural districts, where strong inducements are held out to parents to withdraw their children from school at certain seasons of the year, in order that they may be employed in agricultural labour.

The expense which must be incurred in prosecuting defaulting parents is, no doubt, one reason why a number of school boards are negligent or dilatory in the discharge of this duty. The cost of the compulsory department of the Glasgow School Board in 1875 amounted to £2356, an increase of £506 on the previous year. The Greenock board expended £233 in 1874, and £277 in 1875, in carrying out the compulsory clauses. There can be no doubt that the beneficial operation of these clauses would be greatly promoted if defaulters were summarily dealt with in the Police Courts in burghs, and in counties in the Justice of Peace Courts, which could be done at a trifling cost.

Beneficial results of the Compulsory Clauses.

In our last Report we directed attention to the practical effect of the compulsory provisions of the Education Act, and mentioned several examples of the influence which the powers entrusted to the school boards had exercised in bringing neglected children under instruction, and in securing regularity of attendance. It gives us great satisfaction to find that the results during the past year have been equally beneficial.

In Glasgow.

According to a statement recently published by the school board of Glasgow, there were, in 1873, on the rolls of all the schools of all classes in that city, 52,644 pupils; in 1875, that number had increased to 65,447, or 12·32 per cent. of the population. The average attendance in 1873 was 42,655; in 1875 it amounted to 52,657, or nearly 10 per cent. of the population; while there are 673 children under thirteen not included in the above figures who are attending evening classes. The total increase of the number of pupils on the rolls since June 1873 is 12,803. Deducting 10½ per cent. for the addition which would probably have been made in consequence of the increase of the population, the increase of the number of scholars on the rolls apparently due to the operation of the Education Act is 11,006, and the increase of the average attendance due to the same cause is 8546. Gratifying as this result is, there are still nearly 12,000 children of school age in Glasgow whose names are not on the roll of any school, and the average attendance falls short of the total number by upwards of 24,000, showing that much remains to be done before all the children of school age in the city are brought under instruction.\*

In Edinburgh.

The Edinburgh School Board report that their present compulsory staff consists of one head officer and nine assistants. They

\* In our account of the operations of the school boards of Edinburgh, Glasgow, Paisley, and Greenock, we have embodied some information furnished by these boards since the date of these returns to us—31st December 1875.

have summoned in all 361 defaulting parents to appear before them, of whom 174 were ordered to be prosecuted. A week's delay was granted by the board, of which 144 took advantage. Of the 30 who were ultimately prosecuted, 14 were convicted and punished with fine or imprisonment. To the remainder, the Sheriff granted a week, and, in some instances, a month's further delay, in order to send their children to school. In the case of those defaulters who pleaded want of control over their children, when the plea was sustained, the children were sent to an industrial school.

In Greenock, where the compulsory provisions of the Act have been carried out with energy and efficiency, there were, in June 1873, when the Educational Census was taken, 2776 children of school age not receiving instruction. Of that number, by 31st May 1875, 1866 had been dealt with successfully, and sent to school, mainly through the influence of the compulsory officers, or of a committee of the school board; and in only 25 cases was it found necessary to prosecute the parents before the Sheriff. After deducting the children who were above thirteen years of age before compulsory measures could be taken, together with those who had died or left the town, or were unable to attend school owing to permanent infirmities, there remained, at that date, only 564 to be dealt with—most of them under eight years of age. The school board now state that of these 564 who up to May last had not been sent to school, 523 are at present under instruction, and the remaining 41 are returned as either dead or removed. The number at present on the rolls is 9246, or 14·45 per cent. of the population. The average attendance is 7436, or 11·6 per cent. of the population.

*In Greenock.*

The school board of Paisley report that, through their own efforts and those of their compulsory officer, great progress has been made both in bringing to school children whose education had been previously neglected and in securing a more regular attendance on the part of scholars previously under instruction. Since June 1873 the number of children on the rolls of all the schools in Paisley has been increased by 875, but the actual attendance is greater by no less than 1062. The average rate of absence in all the schools in the town has been reduced from 20·2 to 15·2. This result of the labours of the board in carrying out the compulsory provisions of the Act is the more gratifying, as they justly remark, because it has been attained without the necessity of having recourse in any instance to legal proceedings. In regard to regularity of attendance, the school board assert that the schools under their superintendence have a great superiority over those under the control of denominational managers. In the public elementary schools of Paisley the average rate of absence has been reduced to 10 per cent.; in some of them it is as low as 4·7 per cent. In the same class of schools not under the charge of the school board, the average rate of absence is 32 per cent.; in some of them it is as high as 48·8 per cent.

*In Paisley.*

These results of the exertions made by the school boards of

Greenock and Paisley are very gratifying, as they show what may be attained when adequate school accommodation has been provided in all the towns and parishes throughout the country, and what will no doubt be attained whenever the compulsory powers of the Act are efficiently carried out. If the number of scholars under instruction in all the large towns and populous parishes of Scotland were in the same proportion to the population, the attendance would be increased by many thousands.

Nearly all the school boards of the large towns speak strongly as to the difficulties they encounter in their efforts to secure regularity of attendance on the part of children belonging to the lowest class of the community.

Difficulties in  
obtaining  
regular attend-  
ance at School.  
In Glasgow.

The Glasgow school board state that 'much of the time of the officers of the compulsory department has to be given to looking after absentees, and enforcing regular attendance. The average attendance at all the schools is so very much further below the number on the rolls than it should be, that constant attention to the perfecting of a system for securing regular attendance, and keeping that system continuously in force, is evidently a matter of prime necessity.'

In Edinburgh.

The Edinburgh school board say that they 'have found themselves baffled in their exertions to secure the attendance at school of the children of the most destitute class. They have felt unable to prosecute many parents brought under their notice whose children could not attend school because of want of food or clothing. They have, besides, found in attendance at school, more or less regularly, children of dissolute and intemperate parents, who were so poorly fed and clad as to be incapable of benefiting by the instruction given. The Association for Improving the Condition of the Poor, and other voluntary organizations also came to the assistance of the board, by relieving many cases. The Association provide food and clothing to such cases as the joint-committee pass. The attendance of children thus provided for, numbering, up to this date, 226, has been pretty regular.'

Similar difficulties have been encountered by the school boards of all the large towns in their efforts to secure the attendance at school of destitute and neglected children, as the Education Act makes no provision for supplying food and clothing for children of this class.

Applications  
for the removal  
of Teachers  
under Section  
60 [2].

From the  
School Board  
of Kelso.

Of St. Fergus.

During the past year we have had submitted to us for our approval several proposals on the part of school boards to remove a teacher from office under section 60 [2] on the ground of alleged incompetency, unfitness and inefficiency. In the case of the teacher of the public school of Kelso, we were of opinion that the evidence adduced by the school board did not warrant their decision, and therefore declined to sanction their judgment in the case.

The school board of St. Fergus proposed to remove from office the teacher of their public school, on the ground of his refusal to fill up the forms required by the Code, in order that the school

might be inspected with the view of obtaining a grant. With the approbation of your Lordships, we submitted a memorial to the Crown Counsel, setting forth the facts of the case, and asking whether, on the ground of this contumacy, the school board were entitled to decide that the teacher should be dismissed as incompetent, unfit, and inefficient. To this inquiry an answer was returned, that in the opinion of Counsel this offence did not come within the terms of the statute.

The proposal of the school board of Logierait to remove from office the teacher of their public school was attended with difficulties of a somewhat peculiar kind, which were happily removed by the resignation of the teacher. Of Logierait.

The only other case submitted to us during the past year is that of Mochrum, which led to a protracted lawsuit. It appeared to us that the evidence adduced was sufficient to warrant the decision of the Mochrum school board that Duncan Malcolm Macfarlane, the teacher of their public school, ought to be removed from office, and we therefore resolved to sanction their judgment. The schoolmaster, however, brought an action of reduction against the school board, to which we were made parties. He alleged that the special report of Her Majesty's Inspector in the case was not a proper report in terms of the Education (Scotland) Act, in respect that the report was one on the school and not on the teacher, and that it had been 'maliciously, oppressively, and unjustly obtained.' He asserted that the report was applied for when the school was disorganized by unusual proceedings of the school board regarding the school fees, by an outbreak of whooping cough, which caused the absence of many of the scholars from tuition during the period preceding the inspection, and by a sudden and unprecedented change in the vacation of the school, so that when the inspection took place the scholars were necessarily in a very imperfect state of tuition. The judgment founded upon the report obtained in such circumstances was, he averred, 'malicious and unjust.' He also pleaded that our deliverance ought to be reduced, as it followed upon the 'inept and wrongous proceedings' of the school board, and proceeded upon reasons furnished by that board which were incorrect in point of fact, and which, he alleged, he had no opportunity of answering. Of Mochrum.

The Lord Ordinary, while fully admitting that a judgment of removal by a school board, confirmed by the Board of Education, cannot be reviewed by the Court of Session on its merits, yet held that the averments of the pursuer were sufficient to warrant an inquiry, whether the school board in their proceedings had violated the provisions of the statute or exceeded the powers thereby conferred on them, or had oppressed or were actuated by malice towards the schoolmaster; and that if the allegations of the pursuer regarding the judgment of the school board were correct, our deliverance confirming that judgment must stand or fall with that judgment itself. The Lord Ordinary therefore 'repelled the defences stated, so far as preliminary, reserving their effect as defences hereafter on the merits,' and ordered the school board to Decision of the Court in the case of Mochrum.

‘satisfy production.’ This decision was confirmed on appeal by the First Division of the Court of Session, though on somewhat different grounds, and disallowing the pursuer’s averments of malice and ill-will on the part of the school board. The case was therefore remitted to the Lord Ordinary, who decided that the parties should be allowed a proof of their respective averments. On this the school board resolved, by advice of their counsel, to abandon the case, and to allow a decision to be given in favour of the pursuer. This result may serve to show that our Board, in exercising the authority intrusted to them in regard to the removal of teachers, should be assured that in the preliminary proceedings Her Majesty’s Inspector and the school board have strictly complied with the requirements of the Statute.

Loans under  
45th Section.

As in former years, the operations of school boards, both in towns and in the rural parishes, have been greatly facilitated by their being empowered, under the 45th section of the Education Act, to ‘borrow on the security of the school fund and the school rate’ the money required to provide or enlarge school buildings and teachers’ houses. During the year 1875 we have sanctioned applications from 353 school boards to borrow money for these purposes to the amount of £827,360, 0s. 10d. (of which £541,987, 17s. 2d. was borrowed by rural, and £285,372, 3s. 8d. by burghal school boards), making together, with the loans effected in 1873 and 1874, a total sum, up to 31st December 1875, of £1,547,184, 14s. 1d.

Difficulties  
caused by the  
terms of the  
Section.

We have again to bring under the notice of your Lordships the hardship inflicted on the ratepayers by the wording of the section of the Act referred to, and to repeat our suggestion that school boards in Scotland should be empowered, as they are in England, to borrow for ‘any works of *improving or fitting-up* a school house which, in the opinion of the Education Department, ought, by reason of the permanent character of such works, to be spread over a term of years.’

Report of Ac-  
countant.

We regret to learn from the report of our accountant, that in the course of his examination of the accounts of school boards he has found various charges which he considers extravagant and improper. In one case which he mentions the sum of £30, 9s. was paid for the rent of a hall for meetings of the ratepayers at the time of the election; in another, £7, 18s. had been paid for the expense of taking a poll of the ratepayers and parents in the parish respecting a question on which the school board were divided in opinion. Considerable sums had been expended at the first election in providing refreshments to presiding officers and clerks, and other persons employed at the election, and in counting the votes. In not a few instances heavy expenses have been incurred by lawsuits, most of which were about matters of no great importance in themselves, and might have been avoided by the exercise of discretion and good temper on the part of the litigants.

There is no authority, however, under the Act to disallow either improper or extravagant expenditure on the part of school boards.

In dealing with proposals for the conversion of public schools into higher class schools (under section 62 of the Act), we have felt that several points must be carefully considered. In the first place, by the conversion of a public school into a higher class school, that school would be deprived of all aid either from Governmental grants or from the local rates. Therefore, unless reasonable ground can be shown for expecting that the school in its new condition would be, by means of endowments or fees, or both combined, adequately and permanently self-supporting, we should hesitate to sanction the proposal for its conversion.

Higher Class  
Public Schools,  
under Section  
62.

Subject to these conditions, we think it an advantage that the number of the higher class public schools should be increased. The want of school classification in Scotland, though it has undoubtedly had the effect of broadening and elevating the teaching of the common schools, has, at the same time, checked the development of secondary schools, properly so called, in the country. While we would deprecate any proceeding which would lead to diminishing or extinguishing the higher subjects in the ordinary public schools of Scotland, we think that (this result being carefully averted) school classification, as contemplated by the Act, should be encouraged and fostered. Public attention is being much directed at present to the state of secondary education in Scotland; and the 'higher class schools,' as constituted by law, are sure to receive a great deal of scrutiny, which will probably lead to their being much improved. Every school of the kind will form a natural object for local liberality, and by various means its deficiency in funds may in time be remedied. In the meanwhile, it should be acknowledged that it is the function of such schools to afford higher instruction than that generally obtainable in the ordinary public schools, and that it would be an advantage to the managers and teachers of a higher class school that they should be freed from all necessity of paying attention to the restrictions of the Educational Code, which has been framed for the development, not of higher class, but of elementary schools.

During the year under report, we have sanctioned the conversion of Arbroath High School into a higher class school. Our table in Appendix No. VIII. shows fourteen higher class schools at present existing, of which one (the Haddington Burgh School), owing to difficulties arising out of litigation, was not open during 1875.

The general features of these schools remain much the same as we reported them to be last year. Out of 3401 scholars on the roll, 1517 appear to have been learning Latin, 320 Greek, 1066 French, 284 German, 692 Mathematics, and 387 Natural or Physical Science; while 3095 scholars have been learning the ordinary English branches, such as would be taught in every public school.

Characteristics  
of Higher Class  
Public Schools  
as at present  
existing.

It is obvious, as we stated last year, that the great majority of these schools are not as yet distinctively secondary schools; they are not places of preparation for the Universities, but are rather engaged in imparting to the greater part of their pupils what is considered to be a plain, useful education to prepare them for commercial or other practical life. The exceptions, to some extent, to this rule are (1) the Edinburgh High School, in which, out of 382 scholars on the roll, 320 have been learning Latin, 85 Greek, 147 Mathematics, 308 French, 298 Natural or Physical Science, and 30 Fencing, Gymnastics, and Military Drill; (2) the Glasgow High School, where, out of 468 on the roll, 331 are reported as learning Latin, 58 Greek, 90 Mathematics, 157 French, 38 Physical Science, and 121 Fencing and Gymnastics; (3) Aberdeen Grammar School, where out of 184 scholars, 169 are returned under the head of Latin, and 60 under that of Greek. The large proportion of those learning Latin at these three schools is in great contrast to the ratio exhibited by the other schools of the table. It must be remembered, however, that most of them admit girls as well as boys. The total income of the fourteen higher class public schools of Scotland for the year 1875, has been £25,465, 14s. 11½d., of which only £2881, 1s. 4d. was derived from general endowments or common good. The financial position of these schools is such that they are almost entirely dependent, not only on fees, but mainly on fees paid for the common English and elementary subjects. This one fact shows the general character of these schools, and how much, in various ways, they stand in need of improvement. The first step in this direction should be the providing adequate funds for their support. At present it would not be 'practicable' for most of them, in terms of the Act, to discontinue the teaching of elementary subjects; and yet this should undoubtedly be aimed at.

Almost all the questions connected with these schools, and with secondary education in Scotland generally, involve matters of great difficulty. But public opinion is becoming thoroughly awakened in regard to them.

As connected with the foregoing subject, we now beg to remark on the tables which we have given in Appendix X. of the numbers of scholars, male and female, returned as studying the 'specific subjects' in the public (not higher class) schools of Scotland. We feel especially interested in these returns, inasmuch as we were required by section 5 of the Act to submit for the consideration of your Lordships' Department the conditions according to which, in our opinion, parliamentary grants might be most advantageously distributed in Scotland; while, at the same time, by section 67 of the same Act, it was enjoined that, as far as possible, as high a standard as existed at the time of the passing of the Act should be maintained in all the schools inspected.

The results which we now submit may be summarized as follows:—Out of the total number of 2329 public elementary schools in Scotland (exclusive of the 13 higher class schools), there are

Numbers of  
Scholars  
studying the  
'specific sub-  
jects' in Public  
Schools.

1336 schools in which one or more specific subjects are taught. In those 1336 schools, 26,151 scholars are returned as studying specific subjects, being a ratio of 17·4 per cent. to the average attendance of the schools in question, and of about 11·2 per cent. to the average attendance of all the public schools in Scotland. Of the 26,151 scholars above mentioned, 23,540 appear to have studied two specific subjects each.

The following table shows the number of scholars studying each specific subject separately, and the ratio of that number to the average attendance at all public schools in Scotland:—

	Numbers studying.	Percentage on average attendance, at all Public Schools.
English Literature, . . . . .	12,924	5·346
Physical Geography, . . . . .	10,651	4·571
Latin, . . . . .	9,011	3·867
French, . . . . .	5,856	2·513
Mathematics, . . . . .	4,301	1·846
Animal Physiology and Physics, . . . . .	3,743	1·605
Magnetism and Electricity, . . . . .	749	·321
Domestic Economy, . . . . .	632	·271
Greek, . . . . .	533	·229
Botany, . . . . .	426	·183
German, . . . . .	394	·169
Chemistry, . . . . .	324	·139
Mechanics, . . . . .	107	·046
Light and Heat, . . . . .	104	·045

The inferences which these figures would suggest as to the present condition and tendencies of public instruction in Scotland cannot be called satisfactory. Out of 2329 schools as many as 989 remain unaffected by the inducements held out in Article 21 of the Educational Code, and teach none of the 'specific' or higher subjects. There must, therefore, be a vast number of districts in which the children of the poorer classes have no opportunity of getting the rudiments of higher cultivation; and this, we think, should not be the case. The fact of the non-operation of Article 21 in so large a number of schools, may be due to a variety of causes. In some instances, no doubt, the school boards have been to blame—setting their faces against the specific subjects, owing to a want of appreciation of them. In other cases the teacher, owing to early deficiencies in his own education, may not have been qualified to undertake the teaching of any of these subjects. But in the great majority of the 989 schools in question, these would probably be found neither the former cause nor the latter, but simply the operation of a very shrewd calculation on the part of the teacher (the school board concurring with him), that it would 'pay better' to stick to ordinary work under the standards, instead of trying for grants under Article 21. That this calculation is made, and that it is acted on by many teachers who reluctantly forego the teaching of higher subjects because it would involve a pecuniary sacrifice to continue to teach them under the regulations of the Code, we have strong evidence afforded to us. And we must respectfully press the consideration

Influence of the Educational Code as shown by these figures.

of this point on your Lordships, as we cannot disguise the fact that the working of the Code shows already a tendency to extinguish the teaching of higher subjects in the public schools of Scotland—a result which, on our appointment, we were especially charged to endeavour to avert.

Turning now from the 989 schools in which no specific subjects are taught, to the 1336 schools in which teaching is given with a view to grants under Article 21, we are at once struck by the selection evidently made out of the thirteen subjects (exclusive of domestic economy) enumerated in the fourth Schedule of the Code. The total number of courses of specific subjects studied during the year show a ratio of about 21 per cent. to the average attendance of pupils at all public elementary schools—two courses having generally been taken by each pupil so studying. But out of this 21 per cent. we find that as many as  $11\frac{1}{2}$  per cent. are carried off by the lighter and more easily taught subjects of English Literature, Physical Geography, and Animal Physiology and Physics. It is a melancholy fact that only 1·846 per cent. of the scholars in public schools now learn Mathematics, and only 3·867 learn Latin. That these latter figures are not even still lower than they are, we are inclined to attribute partly to the survival of an older class of teachers, who have been always accustomed to teach Latin and Mathematics, and who do so still from custom, from liking, and from pride. The full influence of the Code will only be seen when this race of teachers has passed away, and a new generation without the old traditions has succeeded them. There can be no doubt that there is already a keen rivalry between the thirteen subjects of Schedule IV., viewed simply as to the comparative ease or difficulty of obtaining grants by teaching them. Nor is this all, for we are informed that an additional competition with such subjects as Latin, Greek, French, and Mathematics, is introduced by the lucrative and easily obtainable grants offered to teachers by the Science and Art Department.

An Educational Code, which guides a teacher's course entirely by money considerations, requires to be carefully watched; and we would respectfully invite your Lordships' consideration to the question whether subjects like Physical Geography and Animal Physiology, in which a pass may be obtained by a few weeks' teaching, should be allowed to obtain equal money rewards with Latin, Mathematics, French, and Greek, in which a pass is only obtainable after a whole year's thorough and laborious teaching. English Literature is doubtless a natural and proper 'specific subject' for elementary schools, yet still it should hardly be placed in money value on a par with more difficult subjects. We would beg to advert to the terms which we employed in submitting our draft articles of an Educational Code for Scotland (18th April 1873), which were as follows:—

'While the Board do not expressly recommend the omission of any of the subjects enumerated in the fourth Schedule of the English New Code, they

Selections of  
specific sub-  
jects in Public  
Schools.

See Appen-  
dix XI.

Want of differ-  
entiation in  
the Grants at-  
tached to  
specific sub-  
jects.

are of opinion that Mathematics (including Algebra and Geometry), English Literature and Language, Latin, French, and German, imply more definite mental training. They have therefore contented themselves with submitting standards for successive annual examinations in each of these subjects, and they have added a four years' course of instruction in Greek, as still taught in some of the public schools of Scotland.

'It has been represented to them that sound elementary teaching in Natural Philosophy, particularly, can hardly be expected in public schools, and that harm is apt to be done by unsound elementary instruction in such a subject.'

While adhering to these views, and while wishing to discourage all pretence of scientific teaching, such as may be made a mere affair of learning technical terms and sentences by rote, we do not wish to urge the abolition of any of these specific subjects for which grants are now allowed by your Lordships' Department, but only that the money worth of these subjects be differentiated, so that larger grants may be awarded to those subjects that are thoroughly educational, and slow and difficult in the teaching, than to those which may be taught in a few weeks as a matter of memory. Unless this is done, we fear that under the Educational Code the ancient high character of the public schools in Scotland cannot possibly be maintained.

In referring, as we have done, to the Western Highlands and Islands, we may mention that representations have been made to us of the advantage which instruction in the Gaelic language would confer on many of the children resident in these districts.

The teaching of Gaelic in the Highlands and Islands.

It has been stated that a very short time suffices to teach children to read Gaelic in cases where that language is their mother tongue, and that such instruction during one or two hours weekly would soon enable a child to acquire the art of reading it, and increase the facility with which he would acquire an intelligent knowledge of English.

In districts where Gaelic is the language chiefly in use among the people, we venture to suggest that in any public school where the teacher is qualified, the school board, in framing the time-table, might properly provide that a lesson in Gaelic, during one or more of the attendances weekly, should be given to those scholars who desire such instruction. In this way the scholars might be benefited without any risk of impairing either the resources or the efficiency of the school.

The details stated in the preceding pages serve to show the progress which has hitherto been made—

- 1st. In providing adequate accommodation for the education of the young;
- 2d. In establishing efficient schools;
- 3d. In securing the attendance at school of the children of that class of the population who require to be influenced by the compulsory powers conferred on school boards; and
- 4th. With reference to higher class schools.

It is cause for regret that so little has yet been accomplished in the way of erecting the requisite buildings, as until these be

Hindrances to progress.

completed in the several parishes and burghs to an extent commensurate with the wants of the population, it will neither be possible to enforce the attendance of all the children of the community, nor to estimate accurately either the expense or the advantages of the Education Act. There is reason to fear that in the Western and Northern Islands, and also in many isolated places on the mainland, where there are few if any resident tradesmen qualified to undertake the building of schools and teachers' dwellings, it may yet be some years before a sufficient number of efficient schools can be established. In these circumstances, we would respectfully suggest that, irrespective of the nature or condition of the buildings, Her Majesty's Inspectors of Schools, when visiting such localities, might be instructed for a definite period, varying according to the locality, and not exceeding five years, to examine and report on the state of education in any schools which may be temporarily maintained by school boards in such premises as they can procure for the purpose of supplying the immediate educational wants of their several districts.

Temporary  
remedies  
suggested.

With regard,  
1st, to Build-  
ings;

We make this suggestion neither to encourage nor to sanction undue delay; but being aware of the difficulty which school boards in many cases experience in securing the services of tradesmen qualified to erect the requisite buildings, we deem it expedient that, in localities where this difficulty is the real bar to progress, school boards should be permitted to avail themselves of such premises as they can in the meantime obtain, in order to secure the education of the whole of the children for whose instruction such boards are responsible.

2d, to Teachers.

In localities such as we have just referred to, school boards have also much difficulty in securing the services of certificated teachers. The Education Act provides that 'no person shall be appointed to the office of principal teacher in a public school who is not the holder of a certificate of competency;' but the number of certificated teachers in Scotland is not yet equal to the number of public schools which are required in order to provide adequately for the instruction of the country, and therefore we would further suggest, that in cases where school boards have not been able to secure the services of a certificated teacher, it might be well to recognise the temporary appointment of a non-certificated teacher, so far as to instruct Her Majesty's Inspector, when visiting the district, to examine and report on the state of education in such school—it being understood that every such teacher is to be subordinate to the certificated teacher of some school in the neighbourhood.

Progress of  
Schools as to  
quality of  
instruction.

It would not be difficult to ascertain the nature and extent of the material progress which has been attained in carrying out the provisions of the Act, as the number of new schools and the extent of accommodation are accurately known, but it is by no means easy by fair comparison to estimate correctly the nature and extent of the progress which has been yet attained in securing the efficient education of the young.

It was one of the chief features of the old parochial school system of Scotland, that pupils were instructed in the higher branches of education, and were generally so well grounded in those branches that they were qualified to pass from the parochial schools to the University, and to take their places there among the pupils of the Grammar schools. But for some years past the scholars sent up from country schools have by no means exhibited the same degree of proficiency as in former times. This state of matters may to a certain extent be accounted for by the great demand for the services of young lads of intelligence for railway and telegraph stations, offices of various description, shops, etc., who are thus withdrawn from school before they can have completed, or in many instances commenced, their course of instruction in the higher subjects. But it is alleged by many of the teachers and others interested in the higher education of the country, that this deterioration, which has been more marked year by year, is also due, in part at least, to the necessity under which the teachers of our public schools are placed, to devote their attention almost exclusively to the training of their pupils in the elementary branches.

Higher instruction in old Parochial Schools.

Causes of declension.

The absence of entrance examinations in the Universities, too, and the consequent admission to the College classes of youths who are quite unprepared to take part in University studies, cannot but exercise an injurious influence on the cultivation of the higher branches, both in the elementary and secondary schools. If examinations of this kind were instituted, and scholars were in consequence obliged to remain at school until they were well grounded in the classics and mathematics, the result would be most beneficial in elevating the standard of education in all the public schools of Scotland.

It may be said, in fact, that among those most competent to judge, little, if any, diversity of opinion exists as to the effect of the present system in lowering the standard of education. There would be just cause for regret if the efforts of the State to encourage and to secure the elementary education of the children of all classes should be found to have had the effect of depriving scholars of talent from among the lower classes of society in Scotland of the opportunity which they have heretofore enjoyed of obtaining instruction in the higher branches of learning. The question how a characteristic and admirable feature in the old parochial education of Scotland—that the highest instruction was generally within the reach of the poorest child who was capable of deriving benefit from it—may be preserved and maintained in our more extended system of elementary teaching, is one well worthy of careful consideration.

Views of authorities on the subject. See Appendix XI.

In again calling attention to this subject, we are not unmindful that the leading object of the Statute, which we have been entrusted so far to administer, is to secure the elementary instruction of all children in reading, writing, and arithmetic. But the Education Act also requires that 'due care shall be taken that the standard of education which now exists in the public schools shall not be lowered;' and the declension in the teaching of the higher

Maintenance of the old standard of education required by the Act.

branches of education in these schools has become so marked as to force the subject on our notice, and to constrain us to express our earnest hope that some effectual remedy may be speedily devised.

Remedies.

With increased means of communication, secondary schools in districts conveniently situated will be of great service in promoting the cause of higher instruction. But even supposing that such schools were greatly multiplied, they would not meet all the necessities of the case, and there is always the danger that the scale of fees may be fixed so high as practically to exclude all but the children of persons in comparatively easy circumstances. It is evident that unless assistance is afforded to the children of parents in straitened circumstances, to enable them to carry on their education, they will be virtually excluded from the advantages of higher class education. An enlarged system of bursaries carrying pupils of promise onward from the primary to the secondary schools, or encouraging them to remain till they have completed their course under the instruction of qualified teachers in the public schools, would obviate this difficulty. Examinations in higher subjects might be instituted, in which the select scholars of groups of schools might compete for bursaries; and the masters might be stimulated to emulation, and rewarded for their extra work, by receiving a certain sum for each pupil who attained a given standard of excellence.

Funds for  
higher in-  
struction.

The important question presents itself, how can the expense of such schemes be defrayed? It will hardly be disputed that funds might be derived from some of the existing endowments, and applied to purposes of this kind, with no injustice, and great public advantage. Such an application would, in many cases, we believe, fall within the intentions of the original donors—intentions which ought always to be respected when altered circumstances demand no departure from them. But it is well known that there are a good many endowments which have not yet in any way been brought into operation, and there are others which are being administered in a manner quite at variance with the intentions of the founders. There are numerous small endowments for educational purposes scattered throughout the country which are now in not a few instances either unapplied or else are merely used to lessen the assessment levied on the ratepayers, without conferring any boon on the poorer classes in the districts to which they are attached. By the 69th section of the Education Act (1872), provision is made for payment out of the rates of the school fees of the children of parents in necessitous circumstances. It is therefore evident that an endowment devoted to the purpose of providing free education is no longer needed, and serves only to relieve the pockets of ratepayers,—a result which in all probability the founder of such an endowment never contemplated, and with which he might not have been satisfied. It is reasonable to suppose that the free education of the children of poor parents, not the relief of well-to-do ratepayers, was the intention of the founders of all such bequests. If those endowments were devoted to placing

Improved  
application of  
endowments.

higher instruction within the reach of the poor, they would therefore still be enjoyed by the same class upon whom the donors intended to bestow them, and would at the same time contribute not a little to improve the educational system of the country.

We have the honour to be

## APPENDIX No. XI.

Professor Laurie, in a recent communication to us, has stated his views as follows on the state of advanced education in the public schools of Scotland:—

‘By advanced instruction I mean instruction in those subjects which prepare a boy for entering a Scottish University, viz., Latin, Mathematics, the elements of Greek and the higher arithmetic. The leading subject is always necessarily Latin.

‘1. The Education Committee of the Church of Scotland have offered for the past two or three years an increase of bursary to all candidates for Queen’s scholarships who can work satisfactorily an easy Latin paper. The book to be examined on is prescribed beforehand—*Cæsar’s Gallic War*, lib. i. The paper consists of a testing passage from this book, grammatical questions and the turning of a simple sentence or two into Latin (the Latin words being given).

‘In December last 120 candidates for Queen’s Scholarship presented themselves in Edinburgh and Glasgow. Many declined to attempt the paper, and of those who did, only nineteen made such an appearance as justified us in reporting that they could be said to know any Latin at all. Of these nineteen not more than ten gave indications of having been thoroughly taught. Now, as these lads were all above eighteen, and had been, with seven or eight exceptions, pupil teachers in good public schools for a period of five years, I think that the result which I have just recorded is lamentable. The deficiency shown by these young men tells in two ways—first, by revealing the *present* state of the schools from which they come; and secondly, by suggesting the probable condition of the schools of which they will be the masters a couple of years hence.

‘I may mention that the Education Committee for managing the Church of Scotland Training Colleges, have represented to the Education Department the desirableness of giving higher marks for Latin at the Christmas examinations. High marks should be given for Latin at the *entrance* examination of Training Colleges also.

‘Another fact I wish to record in connection with my experience as Visitor for the Dick Bequest Trustees in the three north-eastern counties. The Code began to tell there at once, and I found it necessary to bring the state of matters before the Trustees before

it was too late, to provide a remedy. The decline of Latin and mathematics was less to be deplored, in my opinion, than the decline in English and arithmetic. The Code point being reached for 80 per cent. of a class, the rest of the time was devoted, not to carrying the class further, or in exercising its intelligence, or in suggesting fresh studies, but in grinding up the backward or irregular boys to the level of the Code Standard—much to the ultimate disadvantage, in my opinion, of these very boys themselves, and to the retardation of the whole school. Nor is this the only way in which I found the Code working in very many of these high-class schools, all taught by University graduates; for a standard of attainment being *fixed* by the State, the masters were content to reach this, and then to relax their efforts even when they could have done more. Their ambition was satisfied the moment they felt sure that they would earn the maximum grant for their boards. The result was, that the average age of the highest class had gone down. Boys above thirteen were not to be found except in that proportion of the schools which, despite of all difficulties and inducements, had maintained their character; and I was told, that after fulfilling the requirement of the 6th Standard, it was difficult to retain pupils after the statutory age. Now I am satisfied that this melancholy result is due to the teacher and not to the parent, and that the teacher has been reduced to this narrow conception of his duty to his parish by the inevitable action of the Code.

Professor Ramsay, in a statement on the subject of entrance examinations, which was printed by order of the Senate of the University of Glasgow, makes the following remarkable statements:—

‘The examination paper was intended simply to test knowledge of the language, without special preparation. It included simple questions on grammar, an easy piece of *Cæsar* to translate (it had been announced that a passage from a particular book would be selected), and a few simple sentences to translate from English into Latin, intended to test the knowledge of the ordinary rules of syntax, without special difficulties of any kind. The papers done by the students were carefully marked and placed in four classes. Class I. did the whole of the paper, or almost the whole, correctly. Class II. did the grammar and translation well, and did correctly a *part* of the sentences to translate into Latin. Class III. were unable to do any of these sentences, but obtained a *pass* in the grammar and translation. Class IV. were entire failures—could not do even the grammar questions without gross blunders.

‘Out of 268 students in the class, papers were sent in by 261. The result was as follows:—

In Class I.	were	24 students.
„ Class II.	„	34 „
„ Class III.	„	56 „
„ Class IV. (failures)	147	„

‘The next point to ascertain is what were the schools from which these students came.

UNDER CLASS I. WERE INCLUDED—

From Secondary Schools, . . . . .	19
„ Elementary do., . . . . .	3
„ Private or Foreign Schools, . . . . .	2
Total, . . . . .	24

IN CLASS II.

From Secondary Schools, . . . . .	14
„ Elementary do., . . . . .	15 or 16
„ Private do., . . . . .	5 or 4
Total, . . . . .	34

IN CLASS III.

From Secondary Schools, . . . . .	27 or 26
„ Elementary do., . . . . .	28 or 29
„ Private do., . . . . .	1
Total, . . . . .	56

IN CLASS IV.

From Secondary Schools, . . . . .	38
Partly Secondary, part Elementary, . . . . .	25
From Elementary Schools, . . . . .	73
„ Private do., . . . . .	11
Total, . . . . .	147

‘The result of the above comparison is to show that it is only as to Class I., and to some extent as to Class IV., that students coming from secondary schools have a decided advantage over students educated wholly or principally in elementary schools.’

‘The amounts given by the Code for the “special subjects” in which Greek, Latin, and Mathematics are included, are utterly inadequate; and the relative difficulty of the subjects for which equal grants are given is simply preposterous. As large a grant is earned by a master for passing a scholar in a certain amount of cram questions in so-called “Mechanics,” “Chemistry,” “Physiology,” “Botany,” etc., which can be without difficulty taught to an intelligent class in a few weeks, as for an amount of Latin, Greek, or Mathematics, which require two or three years of continuous teaching. Master after master has informed me that he can gain 4s. a head for a class of twenty scholars, with some four weeks’ teaching in these subjects, while he may have difficulty in gaining 4s. a head from eight scholars in Latin after two years’ constant work. To take an example: in Mechanics, “General notions of the Mechanical Forces;” in Physiology, “The organs and functions of alimentation, the properties of muscle and nerve,” are held

as equivalent to—"The Greek Grammar; Xenophon's *Anabasis*, Book I.; Somewhat longer sentences to be translated from English into Greek." To pass such an examination (if not a pure sham) three years' study of Greek at the least would be required. The Science and Art Department is lavishing its funds on a similar principle. A well-known and most able schoolmaster in the west of Scotland informs me that through the Science and Art Department last year the money results of classes in Chemistry and Electricity (there being about twenty scholars in each class) came to about £120, or at the rate of £6 per pupil. Latin and Greek would have brought in all, for the same pupils, £8, or at the rate of 8s. per pupil! After such statements, it need scarcely be asked what is the effect of the Code upon the study of those subjects which prepare for the University. Teachers unanimously report that its effect is to push those subjects aside; to make them of little or no importance as contributing to the income of the school or of the master; to diminish seriously the amount of time given to them where they continue to be taught; and to reduce the standard of attainment formerly reached. Even if advanced authors are read, the Inspector may not improbably decline to take any notice of the fact.

'It appears that in the elementary schools the study of Greek can hardly be said to exist as a regular school subject. A schoolmaster here and there teaches Greek to the one, two, or three scholars whom he can tempt to stay on at school in their third or fourth year of Latin; but the great majority of those learning Latin leave before that time, and the majority of those who learn Greek at all learn it probably for not more than a few months, a year at most. The study of Greek survives at all almost entirely in consequence of the laudable ambition of such teachers as are able to teach it, who are still anxious to keep up the old tradition of higher learning, and who, without any adequate remuneration, find time in their spare hours to bring on their most promising scholars,—proud of being thus able to keep up their connection with the higher education of the country. But it is a flickering flame at best, and without proper encouragement it must die out altogether.

'There are no direct means of comparing the extent to which the study of Latin and Mathematics has increased or decreased in those 68 schools\* since the passing of the Education Act. But as to the influence upon the study of those subjects of the introduction of the Code, the testimony of the schoolmasters is *absolutely unanimous*. . . . . To quote a few out of many opinions, all to the same purpose—The effect of the Act has been "very unfavourable to the higher branches in this district and school;" has been "very bad;" "much less time given to the higher subjects than formerly;"

\* From which Professor Ramsay's students were derived, and the masters of which had furnished answers to questions put to them relative to the teaching of higher subjects.

"very bad;" "number of pupils diminished;" "less attention given to the higher subjects;" "almost banished them;" "diminished the time spent on them;" "less attention to them than formerly;" "higher subjects almost extinct;" "time much diminished;" "has affected them injuriously;" "no time now for them;" "higher classes dwindling away;" "most unfavourable;" "higher subjects totally extinguished;" "almost crushed;" "less time to devote them," over and over again; "have had to coax boys to learn Latin;" "higher subjects knocked on the head;" "seriously affects classics;" "higher subjects very languishing;" "has almost extinguished Latin and Greek"—in 1872-73, the Inspector reported this as one of the four schools in the west of Scotland, in which Homer, Virgil, and Horace were read in a manner to do credit to any secondary school,—“and next year I shall not have one pupil—it would not pay;” “Physical Geography and English Literature up to the requirements of the Code can be easily passed with a quarter of an hour’s work twice a week. Latin, Greek, and Mathematics require not only higher skill, but ten times the amount of labour,” etc. etc. etc.

‘We may conclude by quoting entire an answer sent by the chairman of a school board in a populous parish near Glasgow, which states admirably the difficulties caused by the working of the Code, and suggests the true mode of meeting them:—

“‘Sufficient time has not elapsed to test the result of the Education Act. The Government grants for ordinary subjects are so much greater than for higher, that there is great danger that boards and teachers will devote less time to the higher subjects unless some counteracting change is made.

“‘At present the demand for secondary education is not great. Fees could not be raised sufficiently to meet the want should it arise; but an increase in the rates of an amount sufficient to provide an additional assistant, so as to free the head-master of, say, one school in the parish from continued attention to elementary work, would probably be all that would be necessary. A higher Government grant for higher subjects would make any considerable increase in the rates unnecessary. Small local bursaries for talented boys, to enable them to continue longer at school, would prove a great stimulus.

“‘The above remarks embody the opinions of the teachers on the points raised, and are concurred in by the School Board.”’

## APPENDIX No. XII.

TABLE SHOWING FOR COUNTIES, PARISHES, BURGHS, AND SCHOOL DISTRICTS IN SCOTLAND, THE POPULATION, THE NUMBER OF CHILDREN BETWEEN FIVE AND THIRTEEN YEARS (CENSUS 1871), THE ANNUAL RATEABLE VALUE OF LANDS AND HERITAGES, THE SUM REQUIRED FROM THE RATING AUTHORITY FOR THE YEAR 1875-76, THE SALARIES AND NUMBERS OF SCHOOL BOARD OFFICIALS, THE NUMBER OF PUBLIC ELEMENTARY DAY SCHOOLS UNDER SCHOOL BOARDS, THE NUMBER OF SCHOLARS ON THE ROLL AND IN AVERAGE ATTENDANCE, AND THE AMOUNT OF FEES COLLECTED IN SUCH SCHOOLS; THE AMOUNT RECEIVED BY SCHOOL BOARDS AS ANNUAL GRANTS UNDER THE CODE, AND AS ADDITIONAL GRANTS UNDER § 67, WITH THE NUMBER OF TEACHERS, AND THEIR TOTAL SALARIES AND EMOLUMENTS, FOR THE YEAR ENDING 31st DECEMBER 1875.

---

\* Asterisk in the column for Treasurer's Salary indicates that the Clerk is also Treasurer.

\*\* Double Asterisk indicates that the Clerk is also Treasurer and Compulsory Officer.

\* The causes chiefly assigned for low average attendance are (1) sickness, especially from November to March; (2) want of clothes, particularly shoes; (3) inability of parents to pay fees on Monday, and consequent absence of children all week; and (4) change of residence at the half-yearly terms.

<sup>b</sup> Teaches music.

## APPENDIX No. XXII.

ORDER UNITING THE PARISH OF KIRKTOWN TO THE PARISH OF CAVERS, IN TERMS  
OF SECT. 17 OF THE EDUCATION (SCOTLAND) ACT, 1872.

*At Edinburgh, the 15th day of October 1875.*

BY THE BOARD OF EDUCATION FOR SCOTLAND.

WHEREAS, by the Education (Scotland) Act, 1872, it is enacted (section 17) that it shall be lawful for the Board of Education to order that any Parish which in their opinion is too small, or contains too few inhabitants to be entitled to act as a separate parish for the purposes of the said Act, shall for these purposes be added to an adjacent Parish :

And whereas by the said Act (section 19) it is enacted that any order made by the Board of Education in pursuance of the powers conferred by sections 17, 18, and 19 of the said Act, shall, when no urgent reason to the contrary exists, be so framed as to come into operation at the next ensuing General Election of a School Board for the locality in which it is to have effect :

And whereas the School Boards of the Parishes of Kirktown and Cavers, in the County of Roxburgh, have represented to the said Board of Education that the said Parish of Kirktown is nearly surrounded by the said Parish of Cavers, is of small extent, and contains few inhabitants, and have requested that the said Parish of Kirktown may be added to the said Parish of Cavers :

And whereas the said Board of Education are of opinion that the said Parish of Kirktown is too small, and contains too few inhabitants to be entitled to act as a separate Parish for the purposes of the said Act, and that it is desirable and expedient that the said Parish of Kirktown should be added to the adjacent Parish of Cavers :

Now, therefore, the Board of Education for Scotland, by virtue and in pursuance of the power vested in them under the said Act, do order, and it is hereby ordered, that the said Parish of Kirktown shall, for the purposes of the said Act, be added to, and be deemed to be part of, the said Parish of Cavers, and that this order shall come into operation at the next ensuing General Election of a School Board for the said Parishes, as provided by section 19 of the said Act above referred to.

(Signed) JAMES TAYLOR, *Secretary.*

# REPORT.

---

BOARD OF EDUCATION FOR SCOTLAND,  
ACCOUNTANT'S OFFICE,  
33 YORK PLACE, EDINBURGH,  
22d December 1875.

*To the Secretary of the  
Board of Education for Scotland.*

SIR,

IN terms of Section 51 of the Education (Scotland) Act, 1872, I have the honour to submit, herewith, an Abstract showing the total amount of the Receipts and Expenditure of each school board for the year ending Whitsunday (15th May) 1874.

Previous to Whitsunday 1874 the Election of Members of school boards throughout the country had been completed, the total number of Boards being 985.

With the exception of the school board of Holm in Orkney, the Treasurers of all the school boards have transmitted to me an Account of their Income and Expenditure, accompanied by the necessary vouchers, as directed by Sections 48 and 49 of the Act.

The Balance Sheets had, in every case, been submitted to the school board, and signed by the Chairman.

The school boards of Cross and Burness, Carnoch, Kininmonth, Stirling (Landward), Dumbarton (Landward), Cumlodden, Ayr (Landward), and Leith (Landward) had no cash transactions during the year; and the following school boards had no schools under their management, viz. :—Carnoch, Stornoway, Sleat, Forres

(Landward), Glenrinnnes, Kininmonth, Brechin (Landward), Amulree, Tenandry, Burntisland (Landward), Cupar (Burgh), Kinghorn, Dollar, Stirling (Landward), Dumbarton (Landward), Cumlodden, Greenock — East Parish (Landward), Greenock — West Parish (Landward), Renfrew (Landward), Ayr (Landward), Calderhead, Clarkston, Rutherglen (Landward), Springburn, Bathgate (Town), Leith (Landward), Brydekirk, Corsock Bridge, Sheuchan.

#### INCOME.

The total amount received during the year was £333,886, 18s. 0 $\frac{3}{4}$ d.

*Payments by Heritors.*—The liabilities of Heritors under Section 78 of the Act were fully discharged by Whitsunday 1874, except in the cases of Dunbarney, Dunlop, and New Cumnock, where the payments had not been made at the time of closing the Accounts.

*School Fees.*—The income derived from this source forms a large part of the School Fund, the amount received during the year having been £75,523, 0s. 11 $\frac{1}{4}$ d. The school boards of Firth and Stennis, Barvas, Harris, Lochs, Uig, Urray, and South Uist exacted no fees up to Whitsunday in the Schools under their management; and in the following parishes, Farr, Killearnan, Boleskine, Aberlour, Bendochy, Bothwell, Whitburn, and Mochrum, no fees were received by the Treasurers till after Whitsunday. In the parishes of Coll, Kirkintilloch (Landward), and Dirleton, no account of the fees was rendered to the Treasurers; nor in Durness and Moy and Dalarossie. In the two latter, the fees were not accounted for to the Treasurer, owing, it is stated, to misunderstandings with Teachers who were in office prior to the passing of the Education Act.

*Parliamentary Grants.*—The total amount received

during the year was £34,517, 12s. 0d. As was the case with the Accounts of the previous year, payments made under the Privy Council regulations existing prior to 1873, were, in numerous instances, omitted to be entered in the Balance Sheets, owing to the fact of the money paid under these regulations being paid direct to the Teachers. A great amount of correspondence was thus rendered necessary; but the omissions were supplied, except in the cases of the school boards of Eddrachillis and Dumbarton (Burgh).

*School Rate.*—The sum received under this head during the year, viz. £204,836, 19s. 4d., forms the largest item of the Income of the school boards, but does not represent the full amount realizable from the Assessment imposed, as, up to Whitsunday, many school boards had received only an instalment of the sum called for. Of the above amount, the sum of £46,085 was collected in Lanarkshire; in Midlothian, £14,514, and in Aberdeenshire, £14,501.

*Endowments.*—In the Third Report of the Endowed Schools Commissioners, it is stated, page 13, that the School Endowments in Scotland are as follows:—

“1. Endowments *mainly* in connection with Parochial  
“ (now Public) Schools, and other schools in which Ele-  
“ mentary Instruction is chiefly given, - £42,979

“2. Endowments *mainly* in connection  
“ with Burgh and Grammar (now Public)  
“ Schools, and other schools in which Higher  
“ Instruction is chiefly given, - - £16,550

---

£59,529”

---

The greater part, however, of this sum is applicable to schools not under school boards, and according to the accounts furnished to me, the sum received from this source, during the year, was only £2434, of which amount £412 was for Higher Class schools.

*Income from other Sources.*—Under this head of my Abstract is included the sum of £1189, 5s. 6d., being the amount paid to school boards from the Common Good of Burghs or other funds under the charge of Town Councils. In addition to this amount, the sums paid to Higher Class public schools by Town Councils amounted to £1622, 8s. 4d. I append a Table giving the details. A larger amount may ultimately be annually available, as in several cases payments had been withheld, pending the decision of questions as to the legal obligation of Burghs to continue their contributions.

#### EXPENDITURE.

The total amount expended by School Boards during the year was £327,980, 16s. 7d.

The total amount of Liabilities at Whitsunday 1874 was £77,238, 4s. 10½d.

*Election Expenses.*—In my First Report, I stated that so few school boards had paid their election expenses by Whitsunday 1873 that it was impossible to make a general comparative statement for the whole of Scotland. A number had not paid these expenses even by Whitsunday 1874; but from all of them I have obtained a return of the amounts to be paid, with the exception of Kirkhill and Cross and Burness. I have thus ascertained that the total expenses incident to the elections of 983 school boards, amounted to £32,508, 7s. 2d., giving an average cost of 2½d. per head of the entire population of Scotland. Of this sum, £27,092, 19s. 9d. was paid during the year, and £1867, 9s. 6½d. prior to Whitsunday 1873, leaving

£3547, 17s. 10½d. to appear in subsequent accounts. I append a Table showing the total expense incurred in each county, and the relative cost per head of the population.

*Salaries of Teachers.*—These amount to £207,668, 1s. 0½d.

*Purchase of Land.*—Of the sum of £8614, 15s. 10d. under this head, £7715 was expended by the school board of Glasgow.

*Erection, &c., of School Buildings.*—The amount under this head is £15,580, 7s. 1d.

I append a Table, giving a summary of my Abstract, which shows the total amount of Income and Expenditure in each County.

I have further the honour to submit, appended hereto, an Abstract of the Accounts for the Higher Class Public Schools, 13 in number, for the year ending 15th May 1874,

The total amount received by these Schools during the year was £19,478, 2s. 7½d., and the total expenditure amounted to £20,699, 17s. 2½d.

As you are aware, I found in the course of my examination of the Accounts of school boards various charges which I considered extravagant and improper. For example, in the case of Aberdeen (Burgh), I noticed in the account of the election expenses a sum of £30, 9s. paid for rent of a hall for meetings of the ratepayers, which were held with a view to the public arriving at unanimity in respect to the board to be elected, and in the same account, the travelling expenses of the Town Clerk and Assessor paid on journeys to ascertain what were the duties of the latter in connection with the school board election. In the account of Gamrie I observed that a sum of £7, 18s. had been paid for the expense of taking a poll of the ratepayers and parents

in the parish on a question under the consideration of the school board. In the account of the expenses incurred at the election of the Glasgow school board, there is an entry of £193, 7s. 6d. paid to 'Purveyor'; and in the Govan school board account, the sum of £22, 7s. is entered for 'Refreshments to presiding officers and clerks.' In the account also of Edinburgh, the sum of £21, 7s. 6d. is charged for refreshments to parties employed at the election, and in counting votes. In Campbelton (Burgh) account, the sum of £5, 9s. was charged, and in that of Logie, £2, 14s. 10d., for dinner and drink at the election. In numerous instances the sums paid to the Returning Officer and other officials connected with the elections appear to be excessive.

As, however, according to the opinion of counsel, there is no authority under the Education Act to disallow such charges, it would be expedient, in the event of any amendments being made on the Act by the Legislature, to institute an efficient audit of School Board Accounts.

I have the honour to be,

SIR,

Your obedient Servant,

ALEX<sup>R</sup>. BAIN,  
*Accountant.*
